

Statistical Appendix

The IMF's Middle East and Central Asia (ME&CA) countries and territories comprise Afghanistan, Algeria, Armenia, Azerbaijan, Bahrain, Djibouti, Egypt, Georgia, the Islamic Republic of Iran, Iraq, Jordan, Kazakhstan, Kuwait, the Kyrgyz Republic, Lebanon, Libya, Mauritania, Morocco, Oman, Pakistan, Qatar, Saudi Arabia, Somalia, Sudan, the Syrian Arab Republic, Tajikistan, Tunisia, Turkmenistan, the United Arab Emirates, Uzbekistan, the West Bank and Gaza, and Yemen.

The following statistical appendix tables contain data for 32 ME&CA countries and territories. Data revisions reflect changes in methodology and/or revisions provided by country authorities.

A number of assumptions have been adopted for the projections presented in the *May 2023 Regional Economic Outlook: Middle East and Central Asia*. It has been assumed that established policies of national authorities will be maintained, that the price of oil¹ will average US\$73.13 a barrel in 2023 and US\$68.90 a barrel in 2024, and that the six-month London interbank offered rate (LIBOR) on US dollar deposits will average 5.4 percent in 2023 and 4.9 percent in 2024. These are, of course, working hypotheses rather than forecasts, and the uncertainties surrounding them add to the margin of error that would in any event be involved in the projections. The 2023 and 2024 data in the tables are projections. These projections are based on statistical information available through late March 2023, unless otherwise noted.

For Afghanistan, data and projections for 2021–24 are omitted because of an unusually high degree of uncertainty and given that the IMF has paused its engagement with the country due to a lack of clarity within the international community regarding the recognition of a government in Afghanistan. For Lebanon, all projections for 2021–24 are omitted due to an unusually high degree of uncertainty. All data for the Syrian Arab Republic are omitted and excluded from aggregates from 2011 onward due to the uncertain political situation.

All data refer to the calendar years, except for the following countries, which refer to the fiscal years: Afghanistan (March 21 to March 20 until 2011, and December 21 to December 20 thereafter), the Islamic Republic of Iran (March 21 to March 20), and Egypt and Pakistan (July to June).

Data in Tables 7 and 8 correspond to the calendar year for all aggregates and countries, except for the Islamic Republic of Iran, for which the Iranian calendar year (beginning on March 21) is used.

The definitions for general government overall fiscal balance and non-oil fiscal balance in Tables 11 and 13 have been updated in line with GFSM 2001 and are calculated as general government net lending/borrowing excluding net acquisition of financial assets: policy lending. For Algeria, starting with the *October 2022 Regional Economic Outlook*, total government expenditure and net lending/borrowing include policy lending by the government, which mostly reflects support to the pension system and other public sector entities.

In Tables 3, 6, 13, and 14, “oil” includes gas, which is also an important resource in several countries.

Arithmetically weighted averages are used for all data aggregates except consumer price index, for which geometric averages are used. Long-term averages are calculated if data are available for the last ten consecutive years within the period of 2000–19.

REO aggregates are constructed using a variety of weights as appropriate to the series:

- Composites for data relating to the domestic economy (Tables 1, 3, 7–8), whether growth rates or ratios, are weighted by GDP valued at purchasing power parities (PPPs) as a share of total ME&CA or group GDP. Country group composites for the growth rates of broad money (Table 9) are weighted by GDP converted to US dollars at market exchange rates (both GDP and exchange rates are averaged over the preceding three years) as a share of ME&CA or group GDP.
- Aggregates for fiscal data in percent of GDP (tables 10–15) are weighted by GDP in US dollars as a share of ME&CA or group GDP in US dollars.
- Composites relating to the external economy in nominal terms (Tables 16–18 and 20) are sums of individual country data. Composites relating to external economy in percent of GDP (Tables 19 and 21) are weighted by GDP in US dollars as a share of ME&CA or group GDP in US dollars.
- Composites in Tables 2, 4, and 5 are sums of the individual country data.

The following conventions are used in this publication:

- In tables, ellipsis points (...) indicate “not available,” and 0 or 0.0 indicates “zero” or “negligible.”
- Minor discrepancies between sums of constituent figures and totals are due to rounding.

¹ Simple average of prices of U.K. Brent, Dubai Fateh, and West Texas Intermediate crude oil.

Country Groupings

The May 2023 *Regional Economic Outlook (REO): Middle East and Central Asia* covers countries and territories in the Middle East and Central Asia Department (MCD) of the International Monetary Fund (IMF) referred to as ME&CA countries and territories. It provides a broad overview of recent economic developments and prospects and policy issues for the medium term. To facilitate the analysis, the 32 ME&CA countries and territories covered in this report are divided into three (nonoverlapping) groups, based on export earnings and level of development: (1) Oil Exporters (OE), (2) Emerging Market and Middle-Income Countries (EM&MI); and (3) Low-Income Developing Countries (LIC). Additional analytical and regional groups provide more granular breakdown for analysis and continuity. The country and analytical group acronyms and abbreviations used in some tables and figures are included in parentheses.

ME&CA OE include Algeria (ALG), Azerbaijan (AZE), Bahrain (BHR), the Islamic Republic of Iran (IRN), Iraq (IRQ), Kazakhstan (KAZ), Kuwait (KWT), Libya (LBY), Oman (OMN), Qatar (QAT), Saudi Arabia (SAU), Turkmenistan (TKM), and the United Arab Emirates (UAE).

ME&CA EM&MI include Armenia (ARM), Egypt (EGY), Georgia (GEO), Jordan (JOR), Lebanon (LBN), Morocco (MAR), Pakistan (PAK), Syrian Arab Republic (SYR), Tunisia (TUN), and the West Bank and Gaza (WBG).

ME&CA LIC include Afghanistan (AFG), Djibouti (DJI), the Kyrgyz Republic (KGZ), Mauritania (MRT), Somalia (SOM), Sudan (SDN), Tajikistan (TJK), Uzbekistan (UZB), and Yemen (YEM).

Caucasus and Central Asia (CCA) countries include Armenia, Azerbaijan, Georgia, Kazakhstan, the Kyrgyz Republic, Tajikistan, Turkmenistan, and Uzbekistan.

CCA OE include Azerbaijan, Kazakhstan, and Turkmenistan.

CCA OI include Armenia, Georgia, the Kyrgyz Republic, Tajikistan, and Uzbekistan.

CCA EM&MI include Armenia and Georgia.

CCA LIC include the Kyrgyz Republic, Tajikistan, and Uzbekistan.

Middle East and North Africa (MENA) includes Algeria, Bahrain, Djibouti, Egypt, the Islamic Republic of Iran, Iraq, Jordan, Kuwait, Lebanon, Libya, Mauritania, Morocco, Oman, Qatar, Saudi Arabia, Somalia, Sudan, the Syrian Arab Republic, Tunisia, the United Arab Emirates, the West Bank and Gaza, and Yemen.

MENA OE include Algeria, Bahrain, the Islamic Republic of Iran, Iraq, Kuwait, Libya, Oman, Qatar, Saudi Arabia, and the United Arab Emirates.

MENA OI include Djibouti, Egypt, Jordan, Lebanon, Mauritania, Morocco, Somalia, Sudan, the Syrian Arab Republic, Tunisia, the West Bank and Gaza, and Yemen.

MENA EM&MI include Egypt, Jordan, Lebanon, Morocco, the Syrian Arab Republic, Tunisia, and the West Bank and Gaza.

MENA LIC include Djibouti, Mauritania, Somalia, Sudan, and Yemen.

MENAP includes MENA, Afghanistan, and Pakistan.

MENAP OI include MENA OI, Afghanistan, and Pakistan.

Arab World includes Algeria, Bahrain, Djibouti, Egypt, Iraq, Jordan, Kuwait, Lebanon, Libya, Mauritania, Morocco, Oman, Qatar, Saudi Arabia, Somalia, Sudan, the Syrian Arab Republic, Tunisia, the United Arab Emirates, the West Bank and Gaza, and Yemen.

Arab World OE include Algeria, Bahrain, Iraq, Kuwait, Libya, Oman, Qatar, Saudi Arabia, and the United Arab Emirates.

The **Gulf Cooperation Council (GCC)** comprises Bahrain, Kuwait, Oman, Qatar, Saudi Arabia, and the United Arab Emirates.

The **Non-GCC oil-exporting countries** are Algeria, the Islamic Republic of Iran, Iraq, and Libya.

North Africa countries include Algeria, Djibouti, Egypt, Libya, Mauritania, Morocco, Sudan, and Tunisia.

Fragile and conflict-affected states (FCS) include Afghanistan, Iraq, Lebanon, Libya, Somalia, Sudan, the Syrian Arab Republic, the West Bank and Gaza, and Yemen.

Conflict-affected countries include Afghanistan, Iraq, Somalia, the Syrian Arab Republic, and Yemen.

Table 1. Real GDP Growth
(Year-over-year percent change)

| | Average | 2020 | 2021 | 2022 | Projections | |

Sources: National authorities; and IMF staff estimates and projections.

¹ Historical figures for Iran's nominal GDP are computed using the official exchange rate up to 2017. From 2018 onwards, the NIMA exchange rate, rather than the official exchange rate, is now used to convert nominal rial GDP figures into USD. Staff assess that the NIMA exchange rate better reflects the transaction-value-weighted exchange rate in the economy over that period of time.

² Qatar's data reflect the recently published national accounts based on 2018 constant prices. Data prior to 2011 are extrapolated by staff to harmonize the base year and will be revised once official data are released.

Sources: National authorities; and IMF staff estimates and projections.

¹ Central government.

² General government includes state budget, Nakhchivan AR, State Oil Fund of Azerbaijan (SOFAZ), and State Social Protection Fund.

³ Central government including Targeted Subsidy Organization.

⁴ Receipts from domestic bond issuances as well as privatization operations are excluded in line with GFSM 2014.

⁵ Consolidated accounts of the federal government and the emirates, including extra-budgetary funds.

⁶ Fiscal balance reported according to GFSM1986.

⁷ Includes transfers to the electric and water companies.

⁸ Includes grants.

⁹ Includes loans on-lent to state-owned enterprises in the energy sector as part of the government's public investment program.

¹⁰ Includes oil revenue transferred to the oil fund.

Sources: National authorities; and IMF staff estimates and projections.

¹ Egypt's current account in percent of GDP differs from the data reported in the Staff Report for 2017 Article IV consultation with Egypt. The latter calculates annual GDP, based on quarterly GDP converted at the corresponding quarterly average exchange rate to better capture the impact of the large devaluation in November, 2016.

² The current account projections assumes that imports will be sufficient to cover the country's minimum import needs, based on survival minimum expenditure basket, global food prices, and the total population. This implies a positive financing gap, representing the import needs that are not met by identified financing. If no additional sources of financing are identified throughout the year, the financing gap and corresponding current account deficit will largely be reduced through import compression.

Sources: National authorities; and IMF staff estimates and projections.

¹ In line with the Balance of Payments Manual (paragraph 6.75), the series of Gross International Reserves has been amended to reflect the amount of external assets that is readily available and controlled by the monetary authorities after the re-introduction of financial sanctions. Staff estimates that only 10 percent of the previously reported gross international reserves other than Iran's SDR holdings and reserve position at the Fund were readily available for BOP purposes in 2019. Starting from 2020, gross international reserves are assumed to accumulate or decumulate with the estimated BOP surpluses or deficits, and from 2021 with the new SDR allocation approved in August 2021. For instance, in 2021, total gross reserves are estimated at about \$122 bn, while total usable reserves are estimated at \$17.7 bn.

² Saudi Arabia Monetary Agency gross foreign assets.

³ Central bank only. Excludes overseas assets of sovereign wealth funds.

⁴ Excludes gold and encumbered assets.

⁵ Gross international reserves exclude reserve assets in non-convertible currencies.

⁶ Gross international reserves include a large portion of unreconciled claims.

Sources: National authorities; and IMF staff estimates and projections.

¹In line with the Balance of Payments Manual (paragraph 6.75), the series of Gross International Reserves has been amended to reflect the amount of external assets that is readily available and controlled by the monetary authorities after the re-introduction of financial sanctions. Staff estimates that only 10 percent of the previously reported gross international reserves other than Iran's SDR holdings and reserve position at the Fund were readily available for BOP purposes in 2019. Starting from 2020, gross international reserves are assumed to accumulate or decumulate with the estimated BOP surpluses or deficits, and from 2021 with the new SDR allocation approved in August 2021. For instance, in 2021, total gross reserves are estimated at about \$122 bn, while total usable reserves are estimated at \$17.7 bn.

²Saudi Arabia Monetary Agency gross foreign assets.

³Central bank only. Excludes overseas assets of sovereign wealth funds.

⁴Gold and encumbered assets are excluded.

⁵The ratio of reserves to total imports understates the reserve coverage since a large part of imports reflect re-export activities.

⁶Reserve assets in non-convertible currencies are excluded.
