Zambia	30-Jan-08	Low	Yes	...	35
Zimbabwe 3/	11-May-09	In debt distress	Yes	...	*

*/ While there is no binding minimum concessionality requirement in the absence of a Fund-supported program under the PRGF, PSI, or ESF concessional flows remain the most appropriate source of external finance for LICs, highlighting the need for continued efforts by the international community to improve the availability and predictability of concessional financing (PIN No. 06/136).

na/ Minimum grant element has not been published.

1/ All LIC DSAs are expected to include an explicit rating of the risk of debt distress. However, some DSAs contain a discussion of the risk of debt distress, but no explicit rating. This has been the case for countries for which IDA does not require a rating for operational purposes (IDA-blend countries).

2/ May reflect usual lags in the publication.

3/ PRGF-eligible non-IDA only countries.

4/ A market-access countries (MACs) DSA has been completed and published within the past 24 months.

5/ The program does not envisage any external borrowing.
