—BIS (+)														
—IMF (+)														
—other national monetary authorities (+)														
(b) with banks and other financial institutions headquartered in the reporting country (+)														
(c) with banks and other financial institutions headquartered outside the reporting country (+)														
4. Undrawn, unconditional credit lines provided to:														
(a) other national monetary authorities, BIS, IMF, and other international organizations														
—other national monetary authorities (-)														
—BIS (-)														
—IMF (-)														
—other national monetary authorities (-)														
(b) banks and other financial institutions headquartered in reporting country (-)														
(c) banks and other financial institutions headquartered outside the reporting country (-)														
5. Aggregate short and long positions of options in foreign currencies vis-à-vis the domestic currency[10]														
(a) Short positions														
(i) Bought puts														
(ii) Written calls														
(b) Long positions														
(i) Bought calls														
(ii) Written puts														
PRO MEMORIA: In-the-money options[11]														
(1) At current exchange rate														
(a) Short position														
(b) Long position														
(2) + 5 % (depreciation of 5%)														
(a) Short position														
(b) Long position														
(3) - 5 % (appreciation of 5%)														
(a) Short position														
(b) Long position														
(4) +10 % (depreciation of 10%)														
(a) Short position														
(b) Long position														
(5) - 10 % (appreciation of 10%)														
(a) Short position														
(b) Long position														
(6) Other (specify)														
(a) Short position														
(b) Long position														

IV. Memo items

(1) To be reported with standard periodicity and timeliness:[12]														
(a) short-term domestic currency debt indexed to the exchange rate														
(b) financial instruments denominated in foreign currency and settled by other means (e.g., in domestic currency)[13]														
—derivatives (forwards, futures, or options contracts)														
—short positions														
—long positions														
—other instruments														
(c) pledged assets[14]														
—included in reserve assets														
—included in other foreign currency assets														
(d) securities lent and on repo[15]														
—lent or repoed and included in Section I														
—lent or repoed but not included in Section I														
—borrowed or acquired and included in Section I														
—borrowed or acquired but not included in Section I														
(e) financial derivative assets (net, marked to market)[16]														
—forwards														
—futures														
—swaps														
—options														
—other														
(f) derivatives (forward, futures, or options contracts) that have a residual maturity greater than one year.														
—aggregate short and long positions in forwards and futures in foreign currencies vis-à-vis the domestic currency (including the forward leg of currency swaps)														
(a) short positions (–)														
(b) long positions (+)														
—aggregate short and long positions of options in foreign currencies vis-à-vis the domestic currency														
(a) short positions														
(i) bought puts														
(ii) written calls														
(b) long positions														
(i) bought calls														
(ii) written puts														
(2) To be disclosed at least once a year:														
(a) currency composition of reserves (by groups of currencies)														
—currencies in SDR basket														
—currencies not in SDR basket														
—by individual currencies (optional)														

Footnotes:

1. In principle, only instruments denominated and settled in foreign currency (or those whose valuation is directly dependent on the exchange rate and that are settled in foreign currency) are to be included in categories I, II, and III of the template. Financial instruments denominated in foreign currency and settled in other ways (e.g., in domestic currency or commodities) are included as memo items under Section IV.

2. Netting of positions is allowed only if they have the same maturity, are against the same counterparty, and a master netting agreement is in place. Positions on organized exchanges could also be netted.

3. Monetary authorities defined according to the IMF *Balance of Payments Manual*, Fifth Edition.

4. In cases of large positions vis-à-vis institutions headquartered in the reporting country, in instruments other than deposits or securities, they should be reported as separate items.

5. The valuation basis for gold assets should be disclosed; ideally this would be done by showing the volume and price.

6. Including interest payments due within the corresponding time horizons. Foreign currency deposits held by nonresidents with central banks should also be included here. Securities referred to are those issued by the monetary authorities and the central government (excluding social security).

7. In the event that there are forward or futures positions with a residual maturity greater than one year, which could be subject to margin calls, these should be reported separately under Section IV.

8. Only bonds with a residual maturity greater than one year should be reported under this item, as those with shorter maturities will already be included in Section II, above.

9. Reporters should distinguish potential inflows and potential outflows resulting from contingent lines of credit and report them separately, in the specified format.

10. In the event that there are options positions with a residual maturity greater than one year, which could be subject to margin calls, these should be reported separately under Section IV.

11. These "stress-tests" are an encouraged, rather than a prescribed, category of information in the IMF's Special Data Dissemination Standard (SDDS). Could be disclosed in the form of a graph. As a rule, notional value should be reported. However, in the case of cash-settled options, the estimated future inflow/outflow should be disclosed. Positions are "in the money" or would be, under the assumed values.

12. Distinguish between assets and liabilities where applicable.

13. Identify types of instrument; the valuation principles should be the same as in Sections I-III. The notional value of derivatives should be shown in the same format as for the nominal/notional values of forwards/futures in Section II and options in Section III.

14. Only assets included in Section I that are pledged should be reported here.

15. Assets that are lent or repoed should be reported here, whether or not they have been included in Section I of the template, along with any associated liabilities (in Section II). However, these should be reported in two separate categories, depending on whether or not they have been included in Section I. Similarly, securities that are borrowed or acquired under repo agreements should be reported as a separate item and treated symmetrically. Market values should be reported and the accounting treatment disclosed.

16. Identify types of instrument. The main characteristics of internal models used to calculate the market value should be disclosed.

Country Notes:

September 2009

Referring to all sections:

Accounting is done on the basis of settlement date and not on the basis of transaction date.

Referring to Section I:

1) Gold is valued at the end of every month at 90 per cent of the daily average price quoted at London for the month.

Referring to Section II:

1) Item II.1 refers to Government loans only.

Referring to Section III:

Item III.1(a) refers to Non-Government loans only.

August 2009

Referring to all sections:

Accounting is done on the basis of settlement date and not on the basis of transaction date.

Referring to Section I:

1) Gold is valued at the end of every month at 90 per cent of the daily average price quoted at London for the month.

Referring to Section II:

1) Item II.1 refers to Government loans only.

Referring to Section III:

Item III.1(a) refers to Non-Government loans only.

May 2009

Referring to all sections:
Accounting is done on the basis of settlement date and not on the basis of transaction date.
Referring to Section I:
1) Gold is valued at the end of every month at 90 per cent of the daily average price quoted at London for the month.
Referring to Section II:
1) Item II.1 refers to Government loans only.
Referring to Section III:
Item III.1(a) refers to Non-Government loans only.

April 2009

Referring to all sections:
Accounting is done on the basis of settlement date and not on the basis of transaction date.
Referring to Section I:
1) Gold is valued at the end of every month at 90 per cent of the daily average price quoted at London for the month.
Referring to Section II:
1) Item II.1 refers to Government loans only.
Referring to Section III:
Item III.1(a) refers to Non-Government loans only.

March 2009

Referring to all sections:
Accounting is done on the basis of settlement date and not on the basis of transaction date.
Referring to Section I:
1) Gold is valued at the end of every month at 90 per cent of the daily average price quoted at London for the month.
Referring to Section II:
1) Item II.1 refers to Government loans only.
Referring to Section III:
Item III.1(a) refers to Non-Government loans only.

February 2009

Referring to all sections:
Accounting is done on the basis of settlement date and not on the basis of transaction date.
Referring to Section I:
1) Gold is valued at the end of every month at 90 per cent of the daily average price quoted at London for the month.
Referring to Section II:
