الشرق الأوسط وآسيا الوسطى آفاق الاقتصاد الإقليمي عدد أكتوبرا ٢٠١

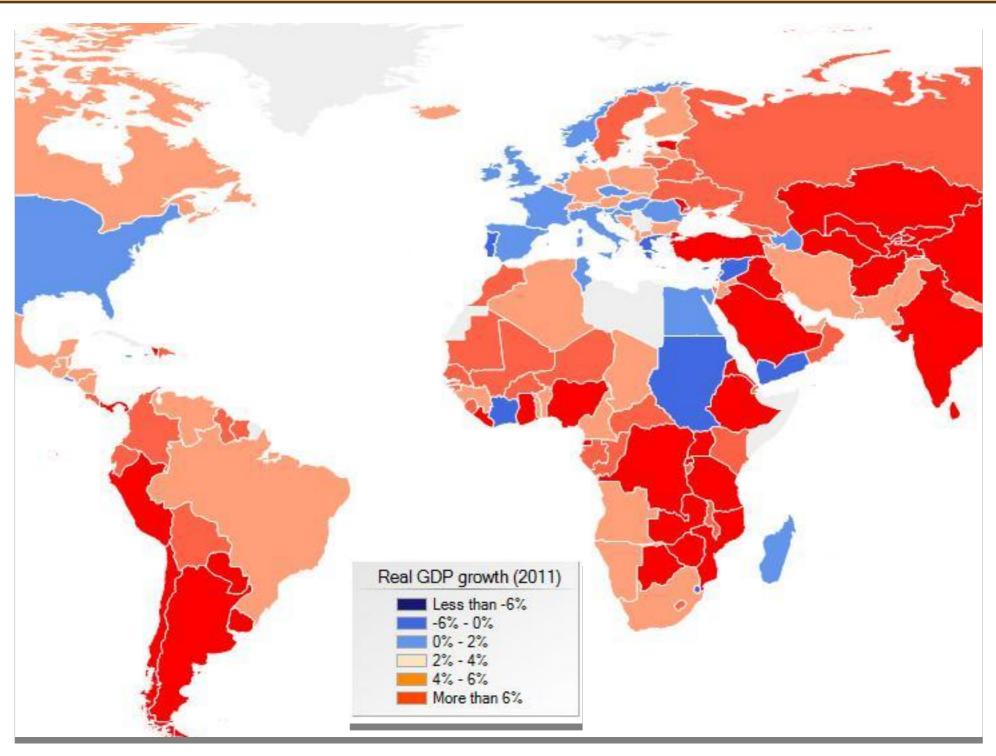

Overview

Global Outlook

MENAP Oil Exporters

MENAP Oil Importers

Uneven recovery

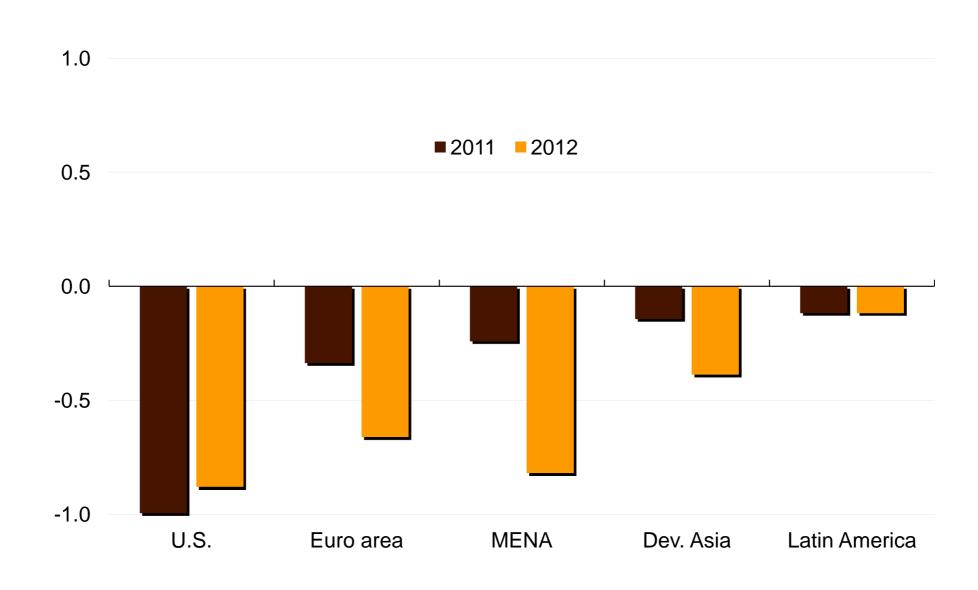

Global outlook has weakened

Revisions to GDP growth

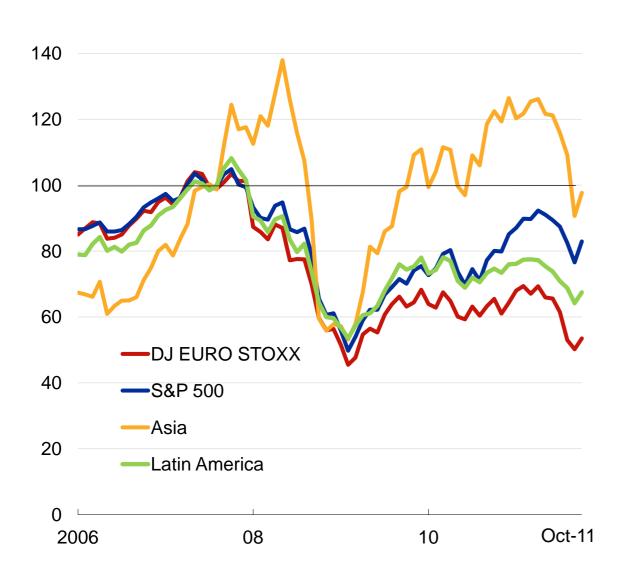

(Percentage point change; June 2011 WEO to September 2011 WEO)

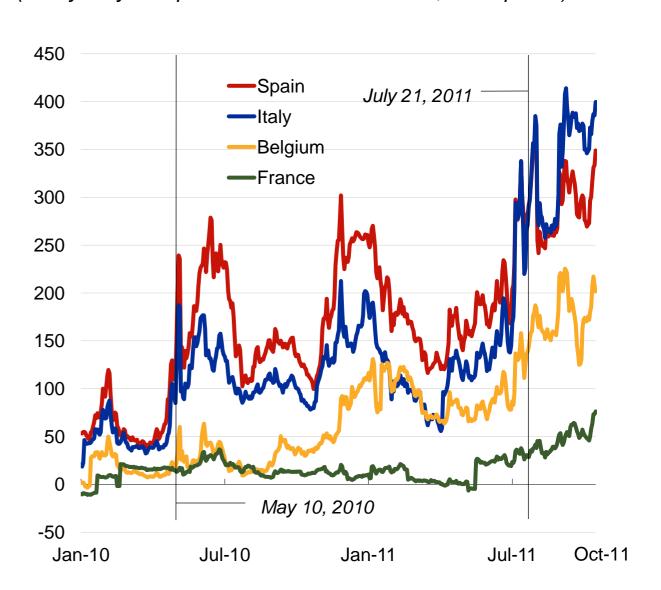

Equity markets have fallen, financial stability risks have increased

Equity markets (Index; 2007=100; national currency)

Government bond spreads

(Two-year yield spreads over German bunds; basis points)

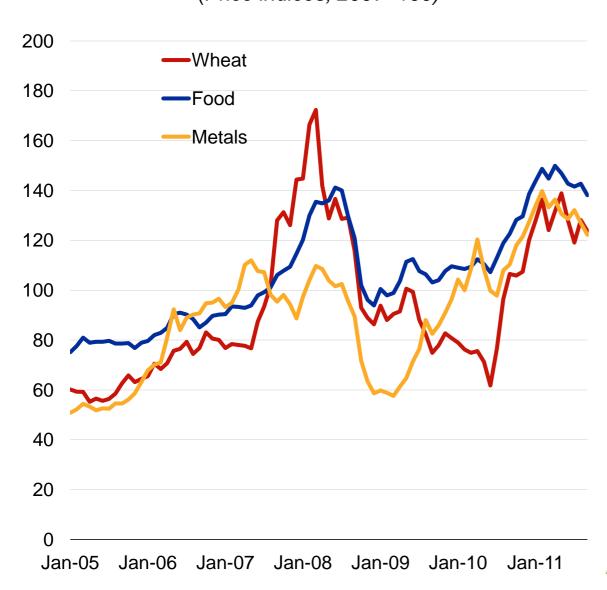

Source: IMF, World Economic Outlook.

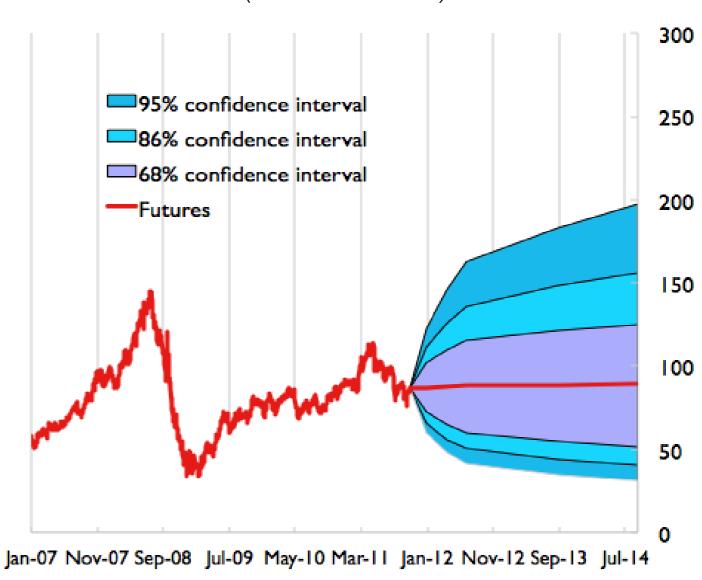

Commodity prices remain high

Global commodity price developments (*Price indices*; 2007=100)

Source: IMF, World Economic Outlook.

Oil price prospects (U.S. dollars a barrel)

Sources: Bloomberg; and IMF staff calculations.

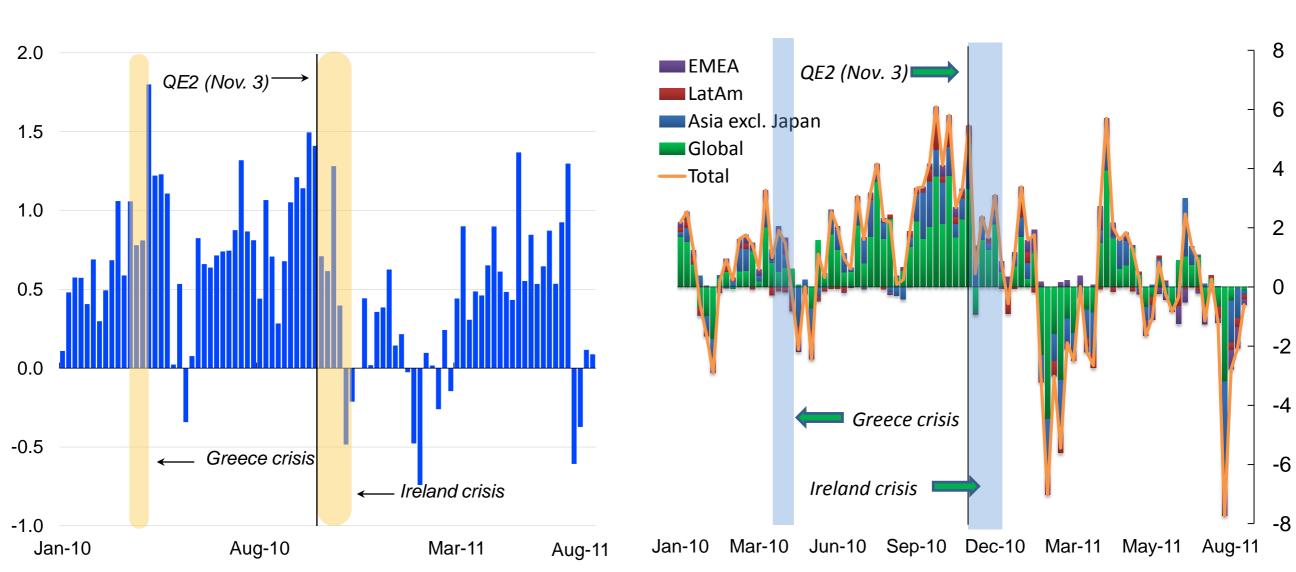

Note: Derived from prices of futures options on October 17, 2011.

Capital flows to EM have turned negative

Bond fund flows to emerging markets (Billions of U.S. dollars, weekly flows)

Equity fund flows to emerging markets (Billions of U.S. dollars, weekly flows)

Source: EPFR, Global.

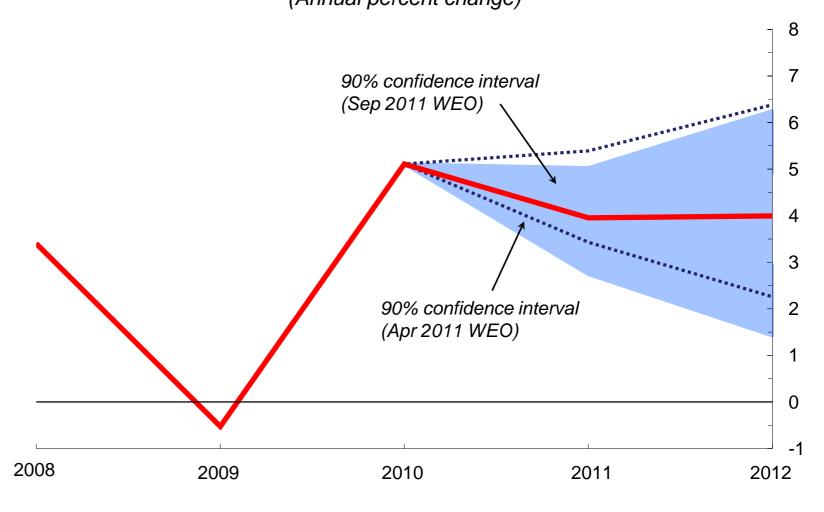

Downside risks have increased

Downside risks:

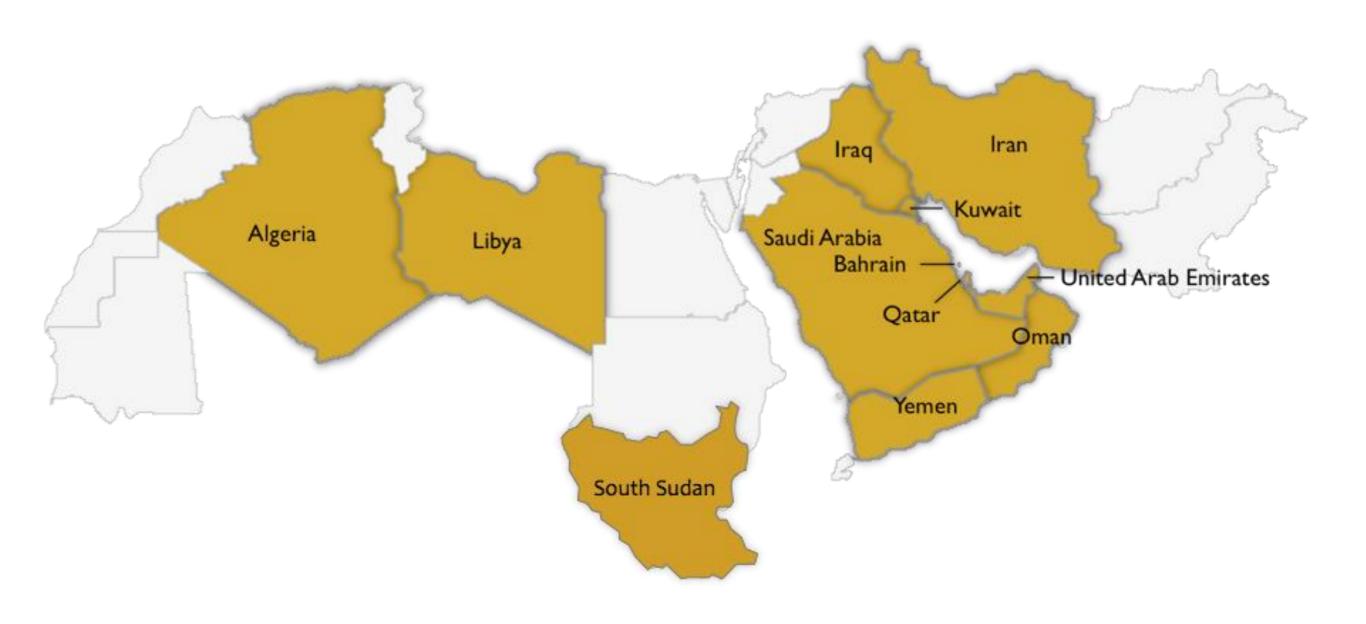

- Euro area crisis
- Advanced economy sovereign risks
- Escalating global financial volatility
- Oil supply concerns (risk of higher oil prices)

Prospects for world GDP growth (Annual percent change)

Source: IMF, World Economic Outlook.

MENAP oil exporters

MENAP oil exporters: positive outlook, but growing risks

Near-term Positive Outlook

- High oil price
- Increased production
- Relatively insulated from unrest

However Country-specific shocks

Downside risks to global economy

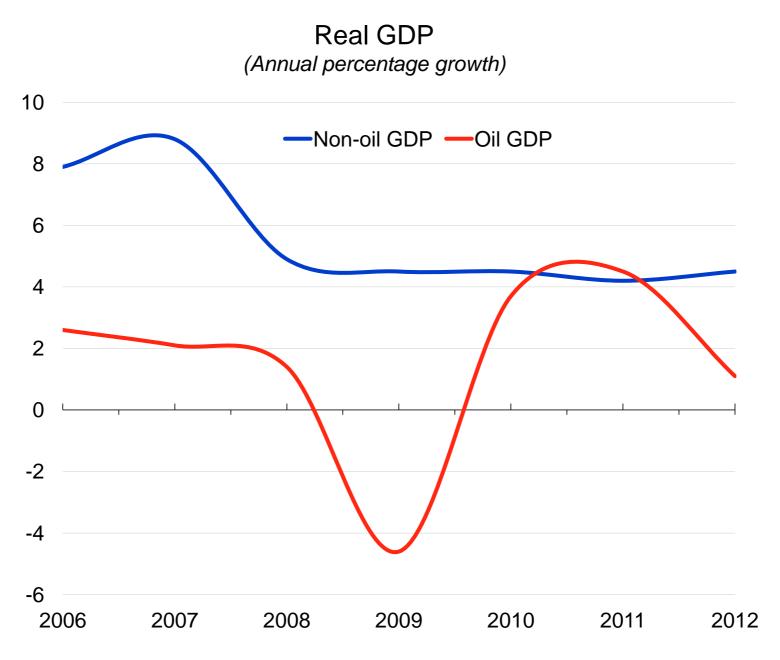

Rising break-even oil prices

Increased Fiscal Space

- Spending packages
- Boost to non-oil growth

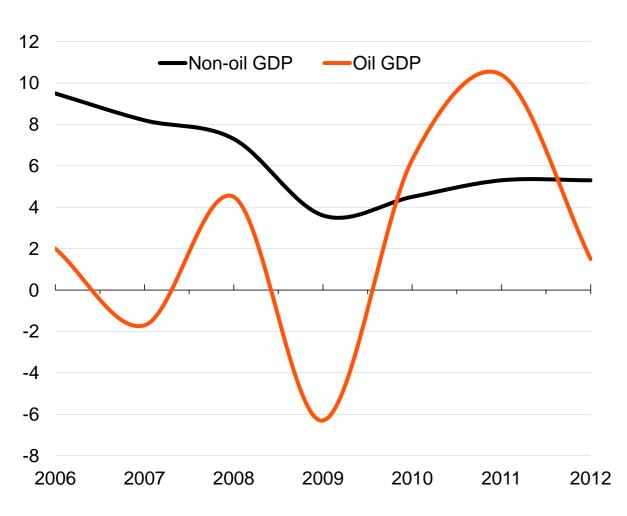

Oil sector spurs temporary uptick in 2011...

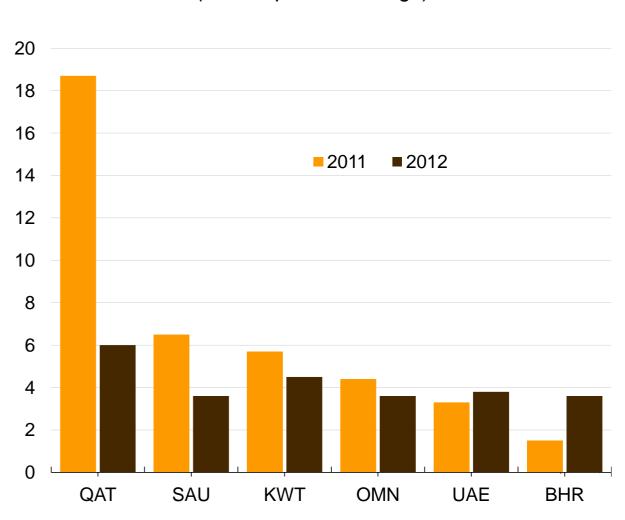

... particularly for the GCC

Real GDP in GCC countries (Annual percent change)

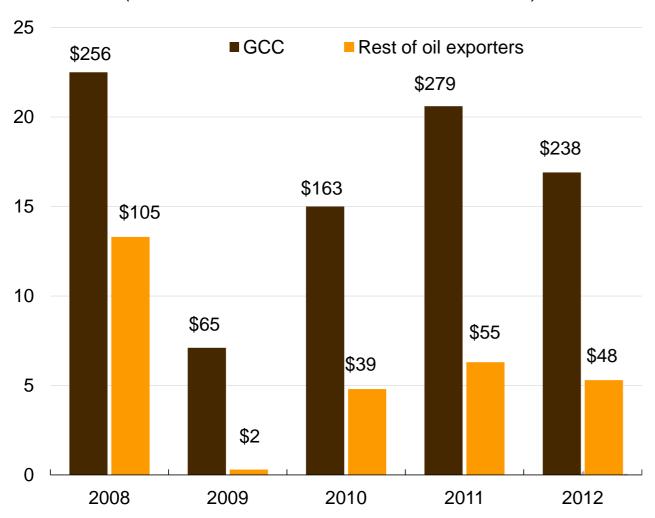

Real GDP (Annual percent change)

Current account and fiscal balances improve further

Current account balances (Percent of GDP and billions of U.S. dollars)

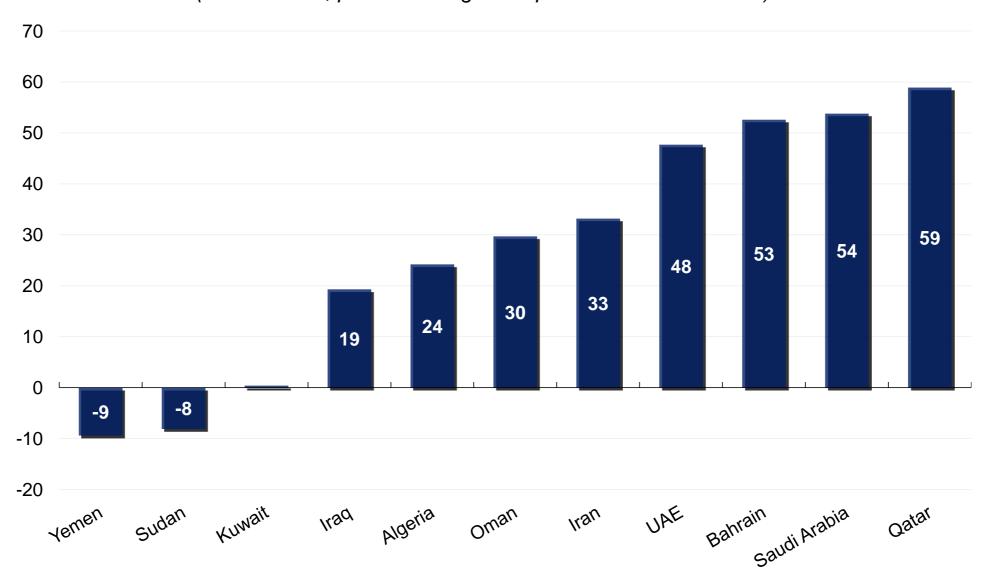

Sources: National authorities; and IMF staff calculations.

Overall fiscal balances (Percent of GDP) 30 **■**GCC Rest of oil exporters 24.7 25 20 15 9.7 10 8.3 6.1 5 3.0 0.3 -0.2 -0.4 -0.7 -2.6 -5 2008 2010 2011 2012 2009

... although spending has been ratcheting up

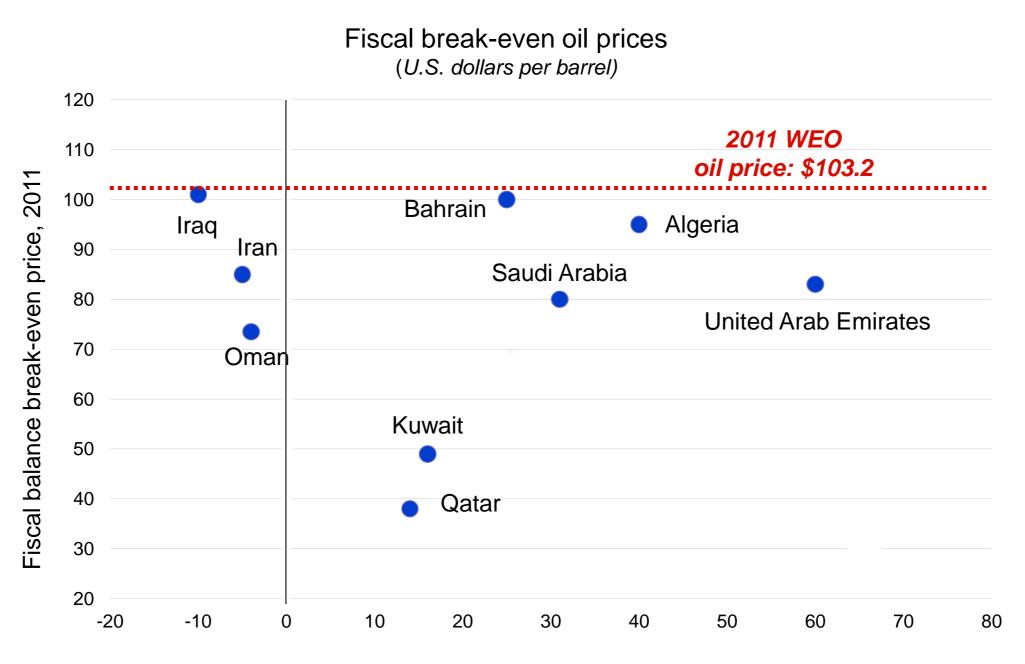

Total government expenditures

(2008 to 2011, percent change in expenditure in U.S. dollars)

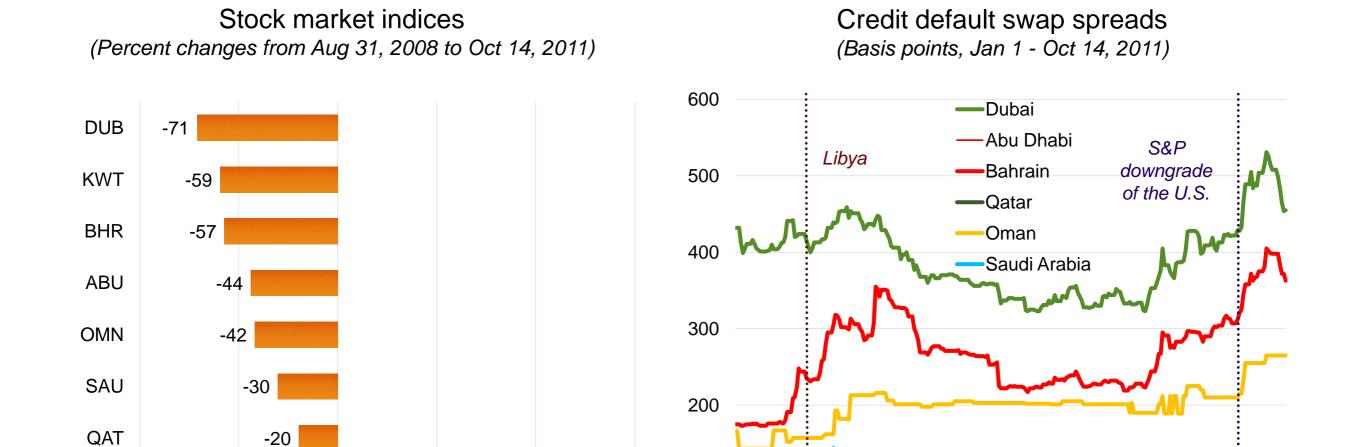

Vulnerability to downward oil price shocks has increased

Change in the fiscal balance break-even price 2008-11

Market conditions have not returned to pre-Lehman levels

Sources: Bloomberg; national authorities; and Markit.

Capital inflows are still modest by international standards

Sources: National authorities; and IMF staff calculations.

¹Annualized.

Policy to remain supportive, but prepare for the long run

Fiscal policy for the long haul:

- Some consolidation
- Diversify revenue base
- Assure efficient/equitable spending allocation
- Move away from product-based subsidies
- Budgets set in multiyear frameworks

Monetary policy for stability and growth:

- Tightening needed in some non-GCC countries
- Develop macroprudential toolkit & EWS

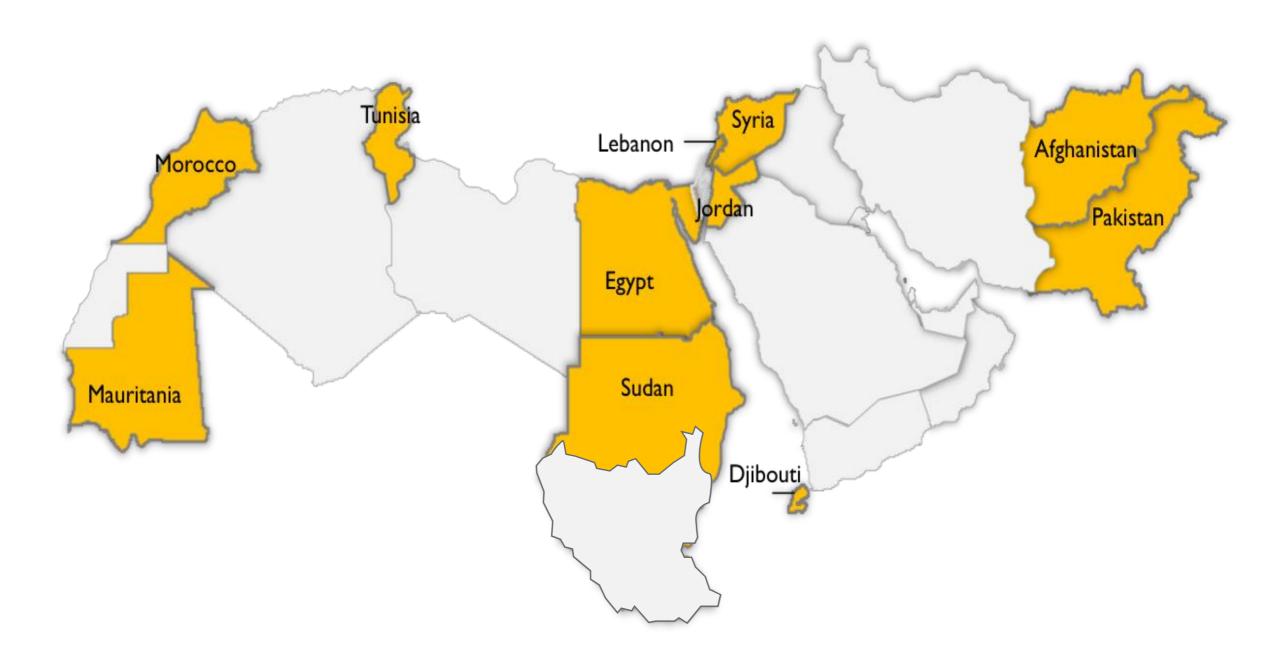

- Diversification
- Employment creation
- Inclusiveness

Structural reforms:

- Business environment and governance
- Employment promotion
- Bank governance and capital market development

MENAP oil importers

Challenges ahead

Increased uncertainty:

- Slow pace of political transformation
- Declining investment and tourism
- Impatient popular expectations

Weaker global outlook:

- Growth below trend
- Moderating inflation

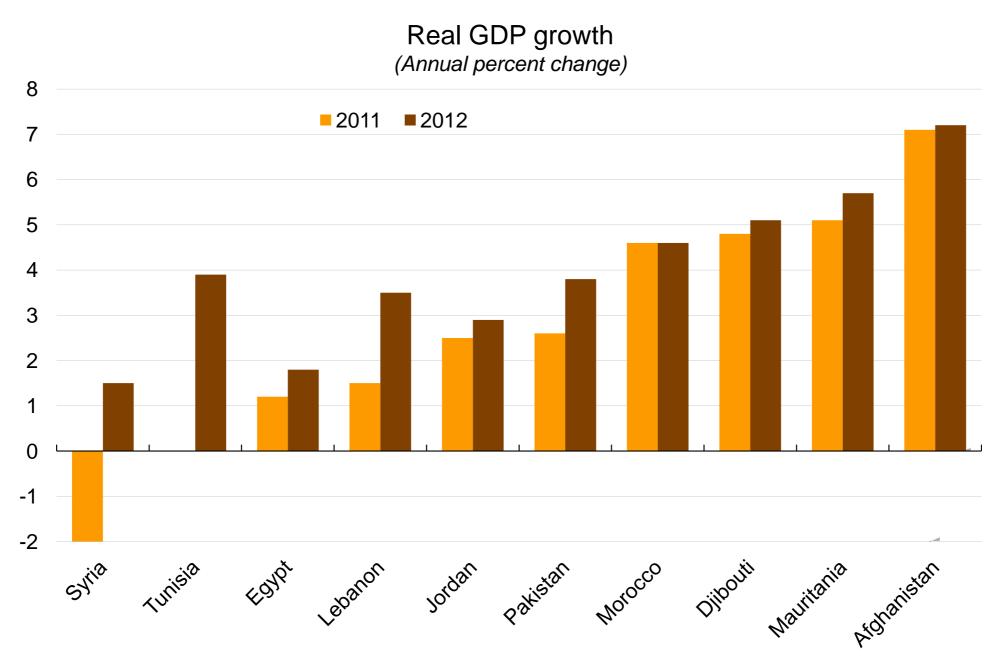

Advancing social cohesion with macroeconomic stability

Policy space is tight:

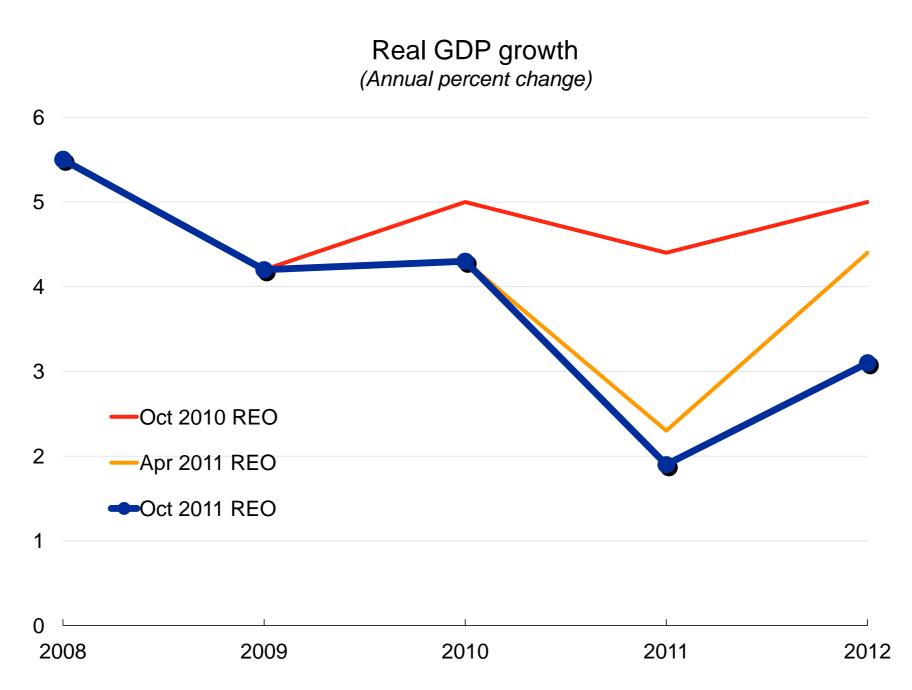

- Increased subsidies and transfers
- Large financing needs and rising costs

Uncertainty weighing on activity

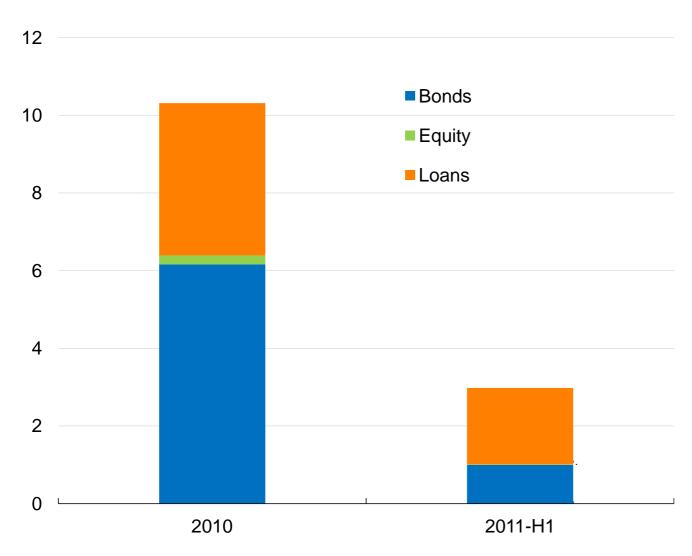

Growth forecasts have been revised downward

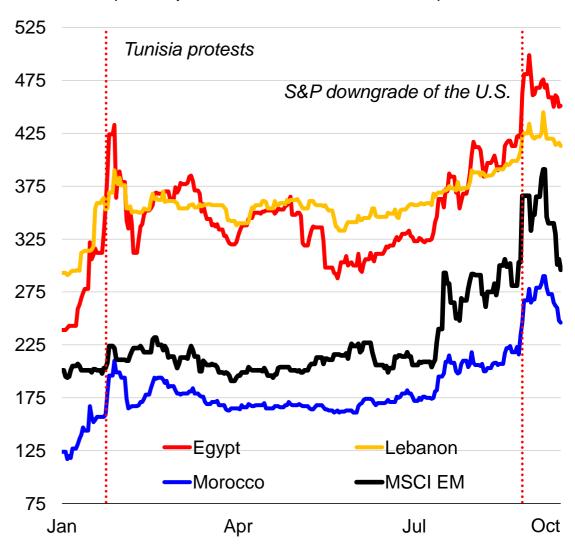

External financing constrained, more costly

International issuance of bonds, equity, and loans (Billions of U.S. dollars)

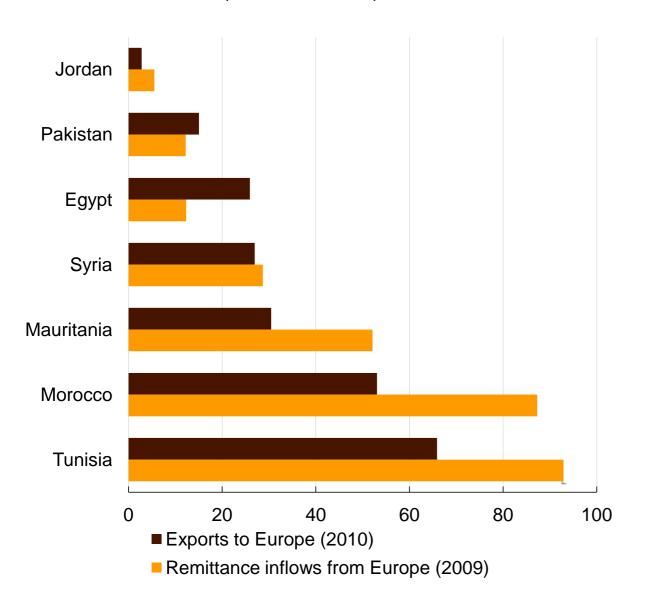

Sources: Bloomberg; Dealogic; and Markit.

Credit default swap spreads (Basis points, Jan 1 - Oct 14, 2011)

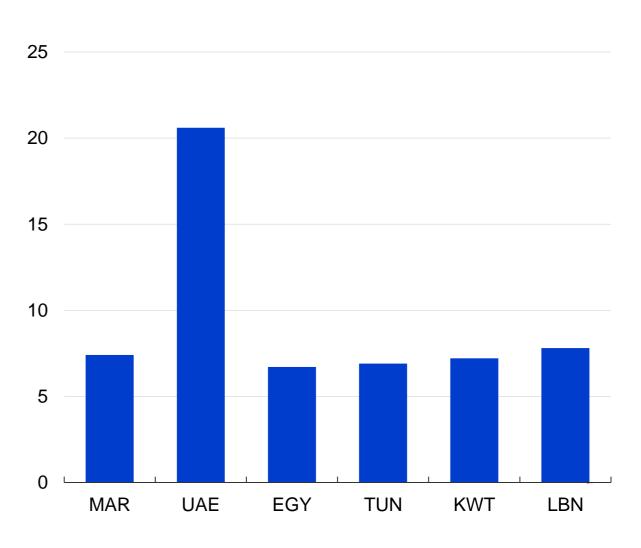

MENA links with Europe: downside risks

Trade and remittances linkages with Europe (Percent of total)

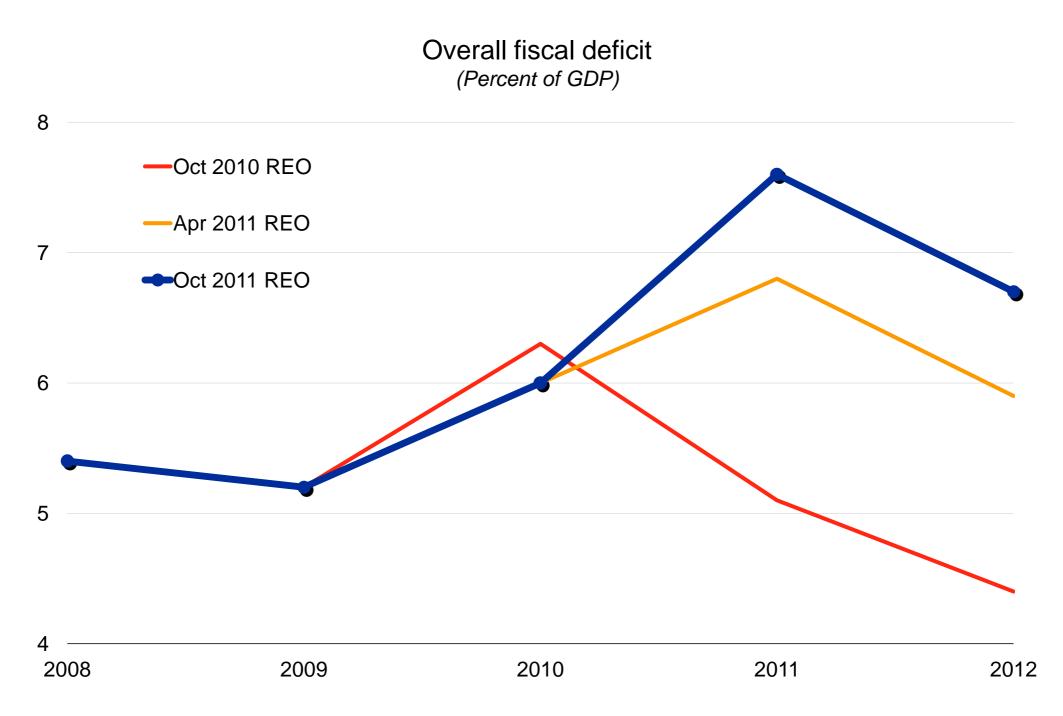

Cross-border lending by European banks (Percent of GDP, March 2011)

Sources: Bank for International Settlements; Bloomberg; and Markit.

The 2012 fiscal outlook has worsened

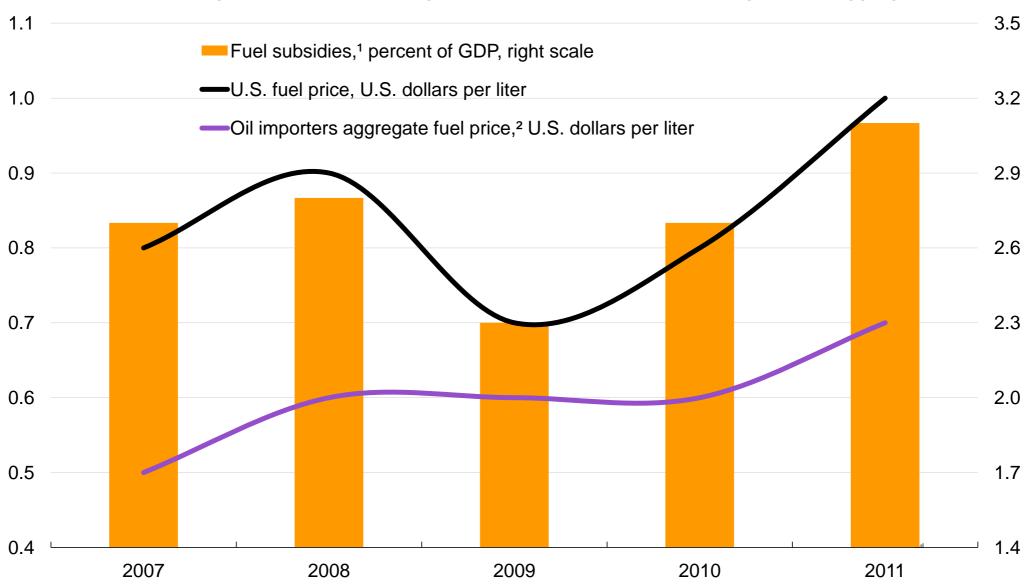

Fuel price pass-through decreased, subsidies increased...

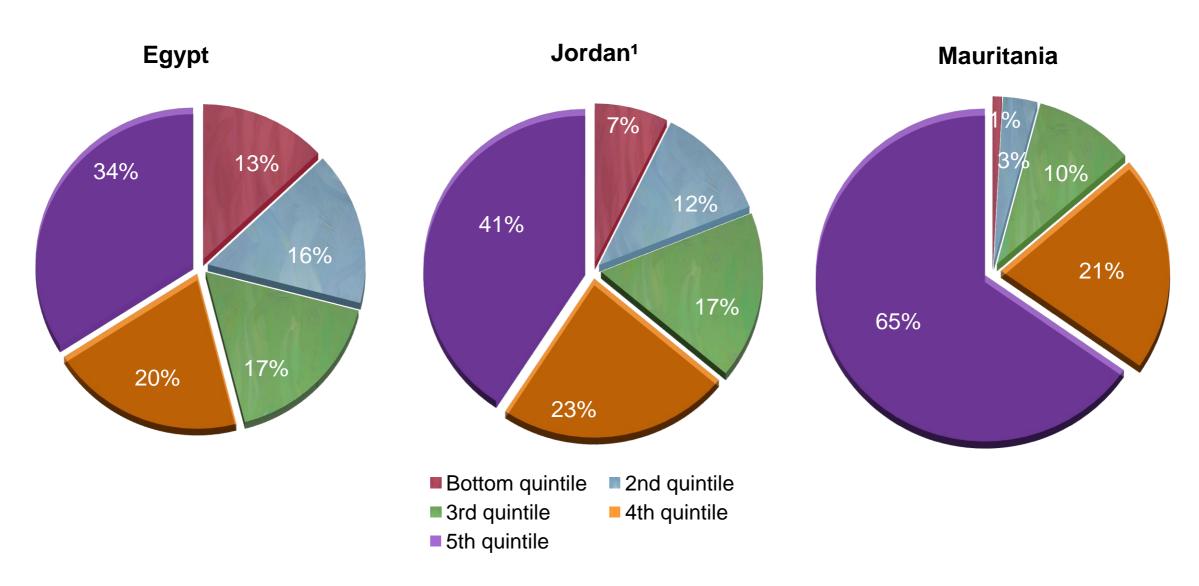

²Includes Egypt, Jordan, Lebanon, Mauritania, Morocco, Pakistan, and Syria.

¹Includes Egypt, Jordan, Lebanon, Mauritania, Morocco, and Tunisia.

... and mostly benefit the wealthy

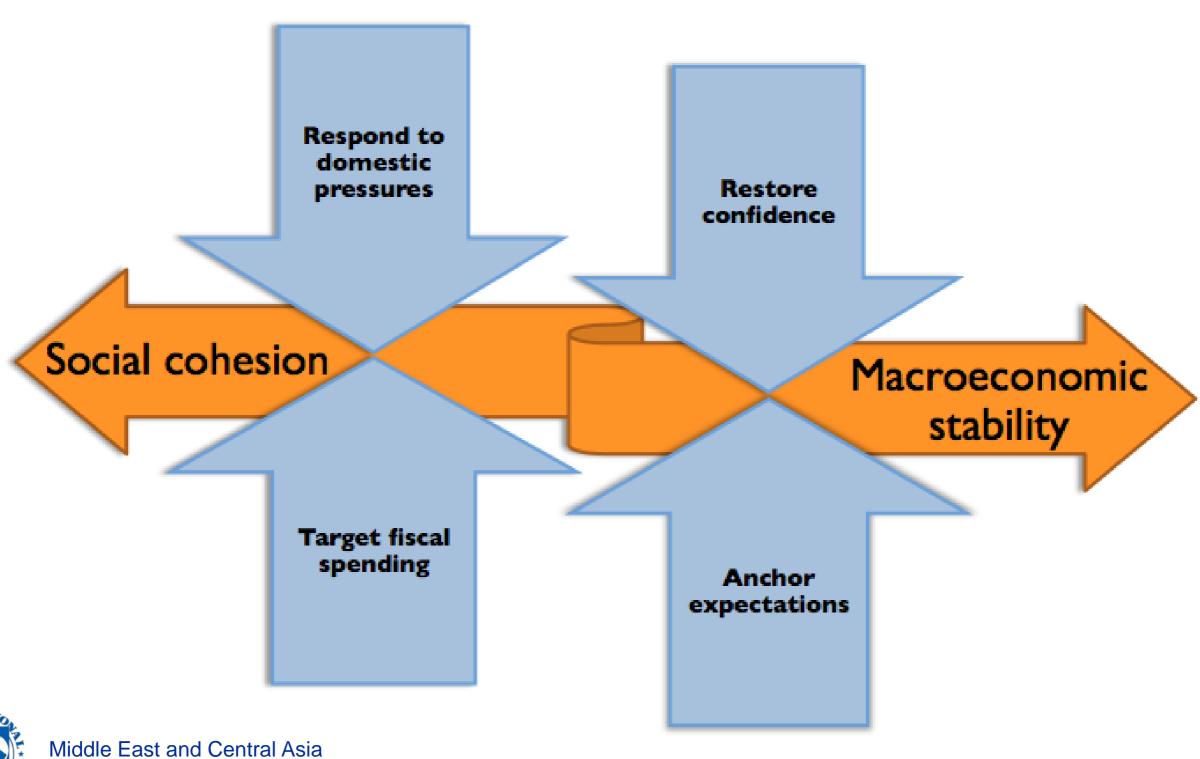

Share of benefits from energy subsidies (Percent of total)

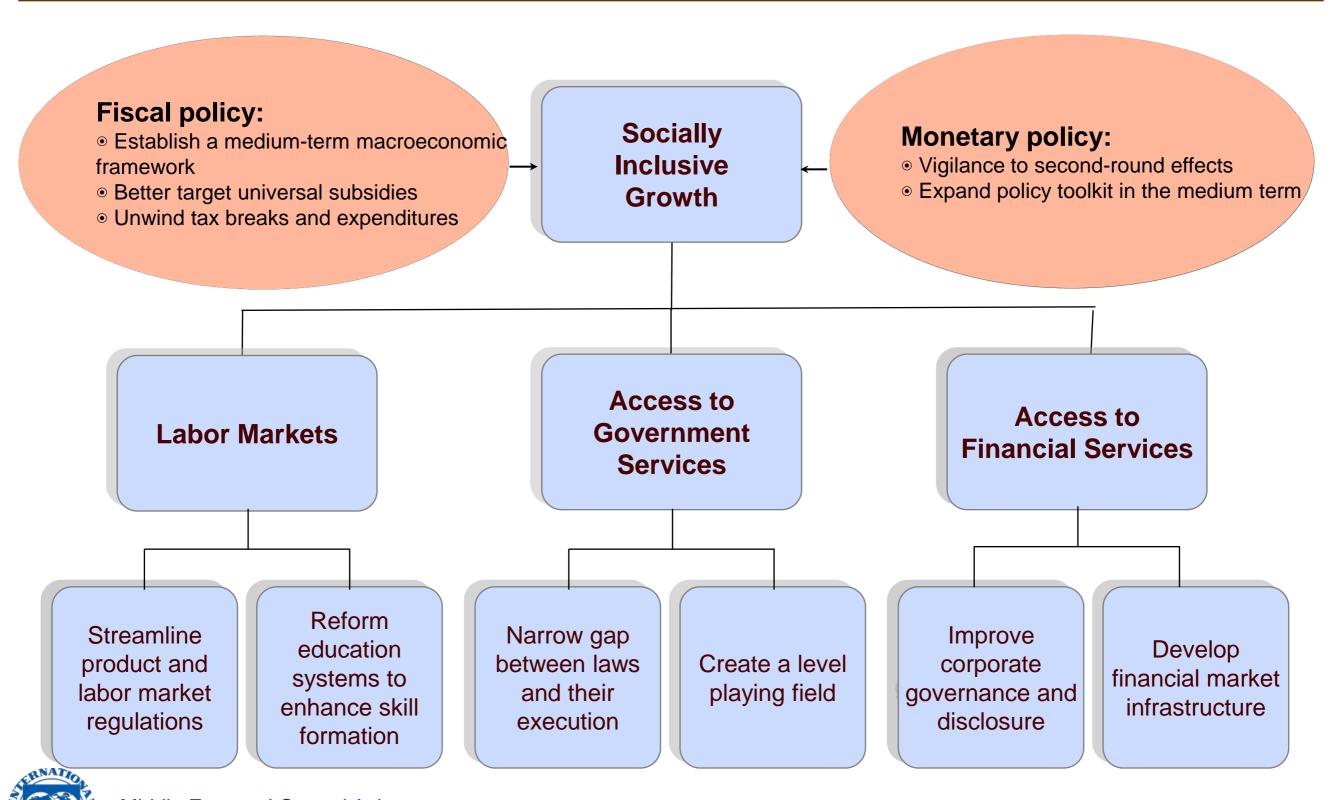

Sources: National authorities; IMF staff calculations based on information in the 2008 household survey for Jordan and Mauritania, and World Bank PSIA (2005) for Egypt.

¹For Jordan, the distribution of gains accounts for both the direct and indirect effect of price subsidies. The latter refers to the impact of energy price subsidies on the price of other consumed goods and services that use energy in their production and distribution.

Short-term policy challenges

Opportunity to develop a medium-term policy agenda for shared prosperity
