Preface	v
I Overview	1
II Anatomy of Capital Account Crises: Balance Sheet Vulnerabilities and Crisis Triggers	3
Balance Sheet Vulnerabilities	3
Conclusions	7
III Toward Crisis Prevention: Precautionary Arrangements	8
Characteristics of Precautionary Programs	8
Program Choice	11
Market Response	14
Conclusions	15
IV Programs for Preventing Capital Account Crises	17
Theoretical Considerations	18
Empirical Analysis	19
Conclusions	28
References	30
Box	
3.1. Are Precautionary Programs “Weaker” Than Drawing Programs?	13
Figures	
2.1. Selected Macroeconomic Indicators	4
3.1. Nonprecautionary and Precautionary Arrangements: Macroeconomic Developments	10
3.2. Nonprecautionary and Precautionary Arrangements: External Sector Developments	11
4.1. Selected Economic Indicators: Medians for Capital Account Crisis and Control Group Countries	22
4.2. Selected External and Policy Indicators: Medians for Capital Account Crisis and Control Group Countries	23
4.3. Probability of a Crisis With and Without IMF Financing	27
4.4. Marginal Impact of IMF Financing, Given Country Fundamentals	27
Tables	
2.1. Taxonomy of Vulnerability and Triggers in Recent Capital Account Crises	5

2.2. Average Corporate Debt-to-Equity Ratios in Selected Countries	6
3.1. Characteristics of General Resources Account Arrangements, 1992–2005	9
3.2. Initial Conditions	12
3.3. Program Choice Model Estimates	14
3.4. Determinants of Sovereign Bond Spread	15
4.1. Classification of Capital Account Crisis and Control Group Episodes	21
4.2. Number of Observations in Each Group	24
4.3. Logit Estimation Results	25
4.4. IMF Financing Relative to IMF Quota Among Capital Account Crisis Countries	28

The following conventions are used in this publication:

- In tables, a blank cell indicates “not applicable,” ellipsis points (. . .) indicate “not available,” and 0 or 0.0 indicates “zero” or “negligible.” Minor discrepancies between sums of constituent figures and totals are due to rounding.
- An en dash (–) between years or months (for example, 2005–06 or January–June) indicates the years or months covered, including the beginning and ending years or months; a slash or virgule (/) between years or months (for example, 2005/06) indicates a fiscal or financial year, as does the abbreviation FY (for example, FY2006).
- “Billion” means a thousand million; “trillion” means a thousand billion.
- “Basis points” refer to hundredths of 1 percentage point (for example, 25 basis points are equivalent to $\frac{1}{4}$ of 1 percentage point).

As used in this publication, the term “country” does not in all cases refer to a territorial entity that is a state as understood by international law and practice. As used here, the term also covers some territorial entities that are not states but for which statistical data are maintained on a separate and independent basis.
