

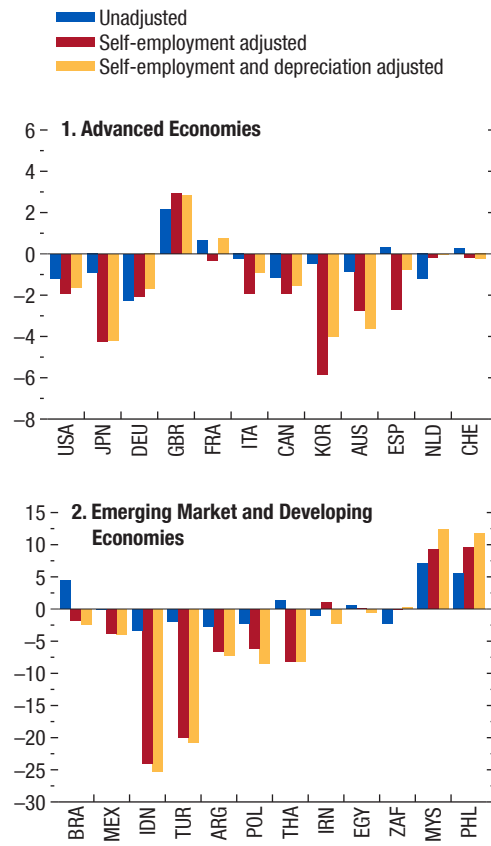

Figure 3.4.3. Long Changes in Unadjusted and Adjusted Labor Shares, 1991–2014
(Percentage points per 10 years)

Sources: CEIC database; Karabarbournis and Neiman (2014); national authorities; Organisation for Economic Co-operation and Development; World Bank, World Development Indicators database; and IMF staff calculations.
 Note: Long changes refer to the predicted values of regressions of the variable on a time trend, reported in units per 10 years. Data labels in the figure use International Organization for Standardization (ISO) country codes.
