

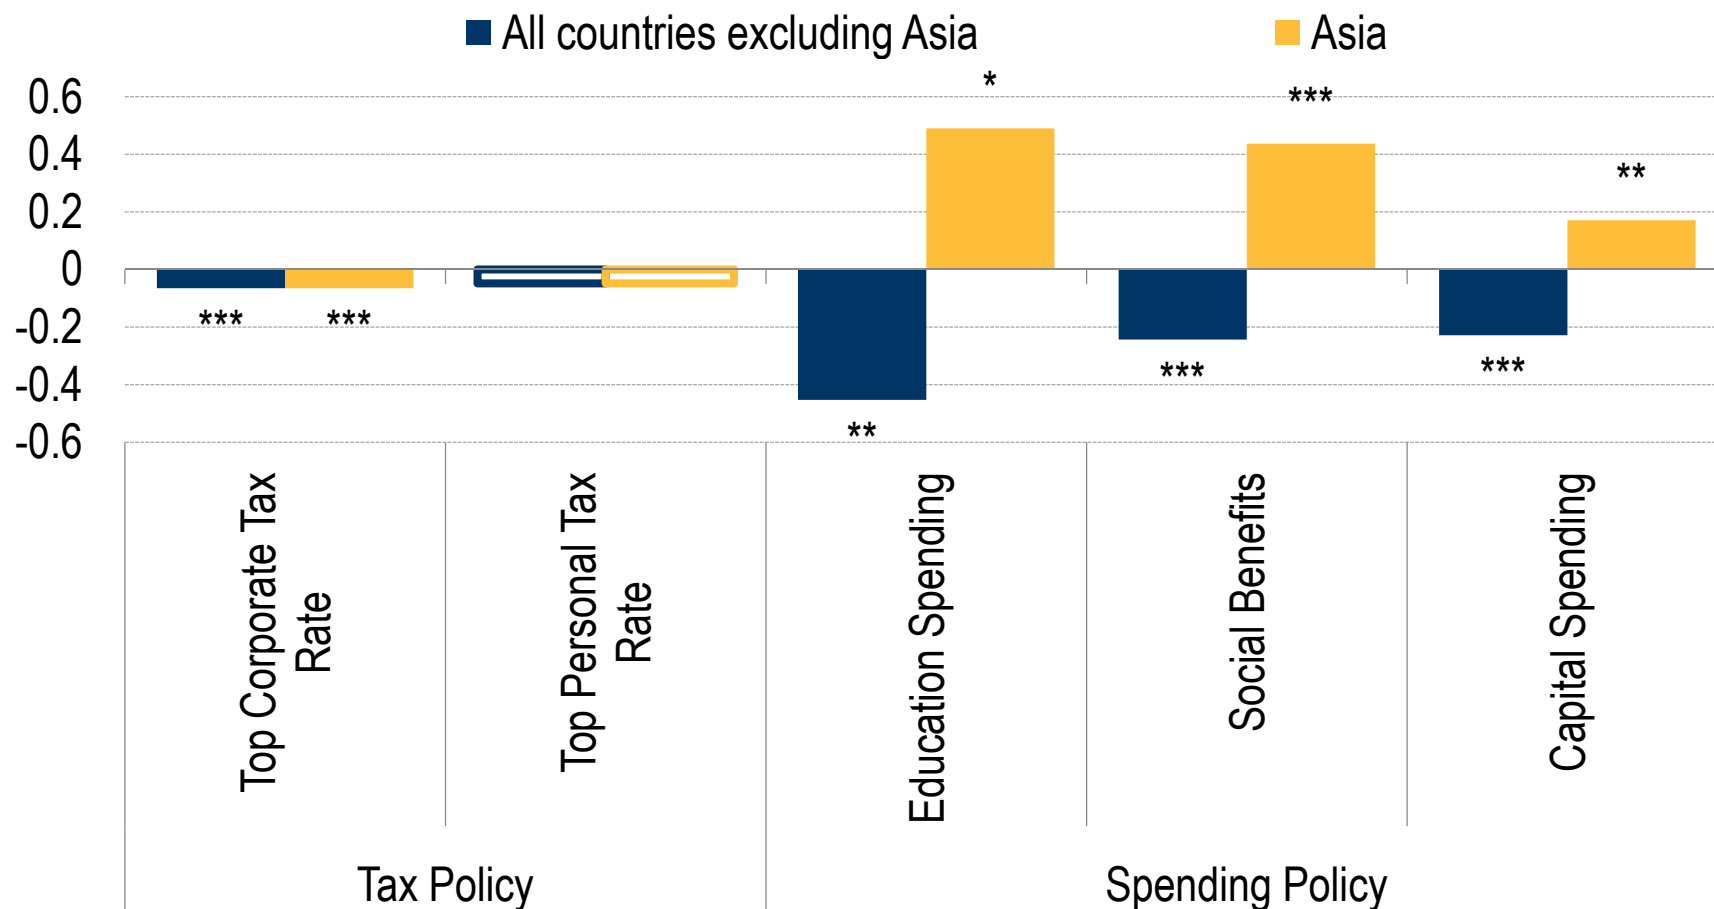

Figure 4.21. Asia: Fiscal Policy

Source: IMF staff estimates.

Note: Bars represent coefficients of regression explaining the Gini Index. Empty bars indicate the coefficients are not significant. The bar for Asia reflects total effect of the policy variable(s) on Asian countries, which is the sum of the average coefficient and the coefficient for the interaction term.

*** $p < 0.01$, ** $p < 0.05$, * $p < 0.1$
