Location: IMF-Singapore Regional Training Institute, 79 Robinson Rd  
CapitaSky Level 16-01, Singapore 068897

*Many countries in the world are keenly interested in Central Bank Digital Currency (CBDC) developments, some have been researching and even launched pilots, and a few have already started to issue CBDCs. Based on the experiences so far, the IMF will be launching a virtual CBDC Handbook that provides information about emerging good practices that might be useful for policymakers, academics, and the informed public alike. As part of STI's 25<sup>th</sup> anniversary celebration, this event will provide an overview of key insights and discuss next steps. The event is hybrid and open to the public and media.*
