The COVID-19 pandemic adversely affected Bangladesh economy, with official preliminary estimate showing a decline of GDP growth to 5.2 percent in FY20, from over 8 percent in FY19. In FY20, GDP per capita grew, albeit at a slower rate of 6.2 percent, to USD 1970 from USD 1856 in 2019.

At end-June 2019, annual population growth rate was 1.2%, with population reaching 165.6 million. In 2018, the working-age population (ages 15-64) was 67.1%, while total dependency ratio (population ages below-15 and 65+ per 100 working-age population) was 49%.

Income poverty incidence (national measure-upper poverty line) came down from 57% in 1991 to an estimated 20.5% at end-June 2019.

ILO estimates 61.1% of the working-age population are in the labor force in 2019; the female participation rate is only 38.3%.

---

1/ The fiscal year (FY) in Bangladesh covers July-Jun. GDP per capita data are based on calendar year, taken from the WDI. 2020 GDP per capita is the national estimate for FY20.
2/ Projection data from year 2020 are taken from United Nations, Department of Economic and Social Affairs, Population Division (2017). The population growth rates from year 2020 are five-year average growth projections, e.g. year 2020 data indicates average growth rate in 2015-2020.
3/ National measures of poverty for year 1991 and 1995 are taken, respectively, from Household Expenditure Survey 1991-1992 and Household Expenditure Survey 1995-1996. In national measure, up to 1991 a person having an intake of less than 2,122 kilo-calories daily was considered as absolute poor (upper poverty line), and one having an intake of below 1,805 kilo-calories was considered as hard-core poor. Since 1995, the ‘Cost of Basic Needs (CBN)’ method has been used. 2019 data is as on end of June 2019.
4/ Gini Index ranges from 0 to 100, higher value shows higher inequality. Gini index of 0 means perfect equality.
5/ National estimates of labor force participation rate for 2016 and 2017 are respectively of FY2016 and FY2017.
