New Features to support Microdata

January 25, 2021

Stratos Nikoloutsos / SDMX TWG TF2
Agilis Statistics & Informatics Ltd

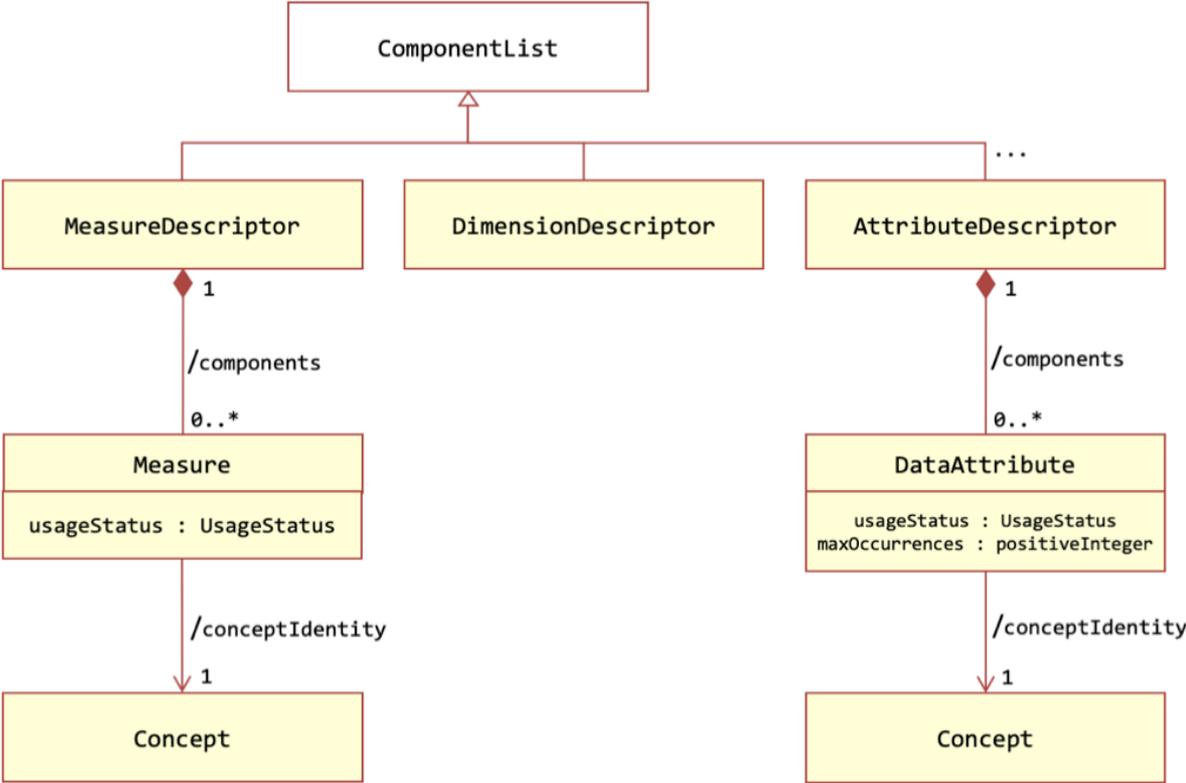

Overview

- Support multiple measures intuitively
 - Explicit Measure definition
 - Deprecate MeasureDimension
 - New DSD definition and dataset structure
- New data types for supporting microdata use-cases (applicable in Measures and Attributes)
 - Arrays
 - Multilingual texts

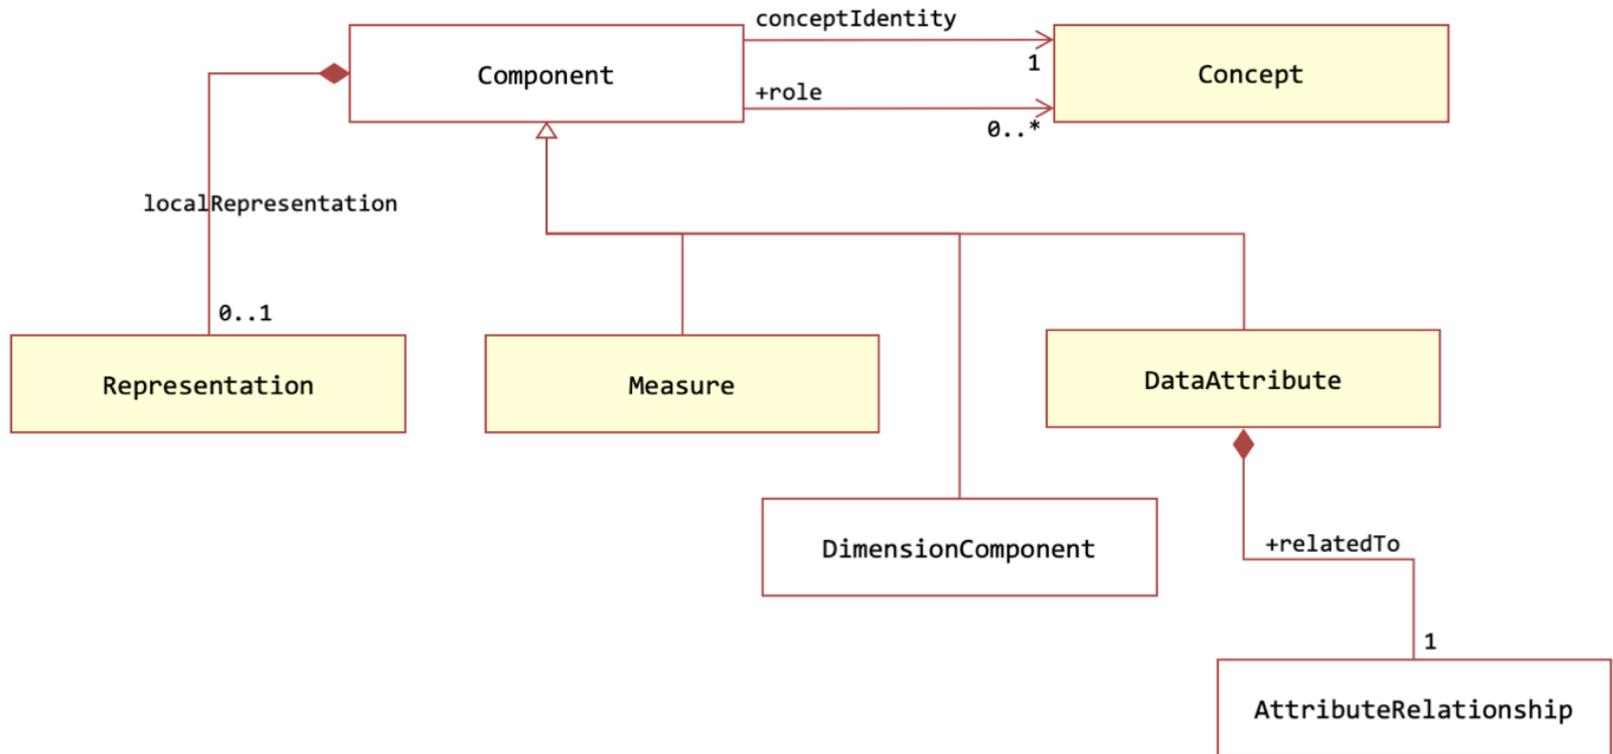

Multiple Measures

- New MeasureDescriptor
 - Multiple Measures may be defined (0..*)
 - Measures are defined like any other Component (id, ConceptRef, Representation) + a usageStatus (mandatory|conditional)
 - Deprecated MeasureDimension
- New Attribute relationship
 - Attributes may be related to one or more Measures
 - Does not affect Dataset structure (only provides semantics)
