Good Governance in Sub-Saharan Africa: Opportunities and Lessons
Monique Newiak, Alex Segura-Ubiergo, and Abdoul Aziz Wane

As governance and corruption issues take center stage in international debates, the IMF has introduced a new framework for more candid discussion of these issues with its member countries. This collection points to sound institutions as the means to ensure integrity in public affairs, which may be one of sub-Saharan Africa’s foremost milestones in its journey to sustainable development.

“I welcome this publication from the International Monetary Fund, which highlights the critical importance of governance and integrity in combating corruption. We urgently need to find innovative approaches to addressing corruption in all its manifestations. The focus of this text on identifying how reform pathways can be effective in fragile states is particularly welcome. Every corrupt deal that is struck reduces the resources available in the world’s poorest nations to meet the aspirations of their citizens for sustainable development.”
—Right Honorable Helen Clark, Chair of the Extractive Industries Transparency Initiative Board

“Governance is decisive in development. In Botswana it harnessed diamonds to become the fastest-growing economy in the world and escape mass poverty, while in Sierra Leone it turned diamonds into a disaster that crashed the society into deeper poverty and civil war. The staff of the African Department of the IMF has accumulated the region’s most comprehensive experience of how governance affects society, and this book distills its wisdom. The IMF cannot substitute for bad governance: each country is different, and the struggle for a state that works effectively for the goals of a society can only be won by the society itself. But this book will be valuable for the courageous people who will spread successes like Botswana’s around Africa.”
—Paul Collier, Professor of Economics and Public Policy, Oxford University

“Breaking from its narrower technocratic and financial focus of the past, six years ago the IMF recognized that weak governance and corruption are ‘macro-critical’ and paid more attention to these challenges. After the recent COVID-19 emergency financing period, it is welcome to see a serious IMF volume on governance coming to light, signaling that good governance matters for financial stability and development. The book rigorously draws from the knowledge of multiple staff authors, with a focus on Africa. We hope also to see major governance initiatives in the future addressing macro-critical aspects in other regions, since they afflict all corners of the globe.”
—Daniel Kaufmann, President Emeritus, Natural Resource Governance Institute, and former Director at the World Bank
Powering the Digital Economy: Opportunities and Risks of Artificial Intelligence in Finance
El Bachir Boukherouaa and Ghiath Shabsigh in collaboration with Khaled AlAjmi, Jose Deodoro, Aquiles Farias, Ebru S. Iskender, Alin Mirestean, and Rangachary Ravikumar

The full extent of the effects of artificial intelligence and machine learning and their application in finance cannot be fully understood at this time due to their quickly evolving nature. This paper discusses the impact of the rapid adoptions of these technologies in the financial sector.

Asset Purchase Programs in European Emerging Markets
Marco Arena, Rudolfs Bems, Nadeem Ilahi, Joewoo Lee, William Lindquist, and Tonny Lybeki

Several emerging market central banks in Europe deployed asset purchase programs (APPs) amid the 2020 pandemic. This paper attempts to understand what has made the so-far successful use of APPs in European emerging markets possible and ascertain whether these new tools can be extended beyond the initial pandemic response.

Feeling the Heat: Adapting to Climate Change in the Middle East and Central Asia
Christoph Duenwald, Yasser Abdih, Kerstin Gerling, Vahram Stepanyan, and others.

Climate change is among the many challenges facing the Middle East and Central Asia. Considering the physical, financial, and social risks posed by climate change, the central message of this paper is adapting policy responses to build more resilient economies and to make climate change issues a critical priority for economies in the region.

Promoting Inclusive Growth in the Middle East and North Africa: Challenges and Opportunities in a Post-Pandemic World
Roberto Cardarelli, Mercedes Vera Martin, and Subir Lall

With widespread inequality, high unemployment, and the expected entry of 27 million young people into the labor force over the next 10 years, countries across the Middle East and North Africa need to change their economic models to boost job creation and make sure that the benefits of economic development accrue more generally to all their citizens. This book provides a comprehensive overview of policies that will boost inclusive growth in the regional context within a resilient macroeconomic policy framework.

The Global Informal Workforce: Priorities for Inclusive Growth
Corinne Deléchat and Leandro Medina

“This pivotal book arrives right in time, with key insights for both policymakers and researchers on how to deal with these important issues.”

—Alejandro Izquierdo, Inter-American Development Bank

Customs Matters: Strengthening Customs Administration in a Changing World
Augusto Azael, Pérez Azzarraga, Tadatsugu Matsudaika, Gilles Montagnat-Rentier, János Nagy, and R. James Clark

New challenges have emerged for customs administration with the increasing volume of international trade, developments in new technologies, and changes in business models. This book analyzes the many changes and challenges currently facing customs administration while proposing ways to address potential issues. It outlines problems policymakers must consider as they develop their own road map for modernization reforms.

**Macroprudential Policy Survey Online**

The global financial crisis highlighted the need for dedicated macroprudential policy tools to safeguard financial stability and mitigate systemic risk.

The Macroprudential Policy Survey is a free and regularly updated database capturing information on the policy tools in use by the IMF’s membership. Countries are asked to report measures in line with the general definition of macroprudential policy: “the use of primarily prudential tools to limit systemic risk.”

This new database also features information on the institutional arrangements supporting macroprudential policy in IMF member countries. The survey information fills an important data gap for researchers and policymakers. It can be used to support research in this emerging area—for example, to assess the impact of measures on credit and asset prices. It will also help policymakers learn about the design of other IMF members’ policy measures.

IMF Publications Program

The IMF Publications Program is a fundamental part of the IMF’s broader outreach efforts. Each publication underpins IMF strategic positions and policy by disseminating global and regional surveillance products and analysis and expanding country-level outreach.

The IMF publishes a wide variety of books, periodicals, reports, and digital products covering global economics, international finance, monetary policy, statistics, exchange rates, and other global economic issues. IMF print and digital publications present analysis, research, policy advice, and data on economic and financial sector issues at the global, regional, and country levels.
About the IMF

The International Monetary Fund is an organization of 190 countries, working to foster global monetary cooperation, secure financial stability, facilitate international trade, promote high employment and sustainable economic growth, and reduce poverty around the world.
