2. Petroleum products	For petroleum products (including gasoline, kerosene, diesel oil and fuel oil, and liquefied petroleum gas), excise taxes are based on a rate-setting formula and are calculated based on a fixed average border price.		Rates: 25 percent for gasoline and 15 percent for all other products.
V. Customs duties			
1. Import duties	Assessed on the c.i.f. value of imports. For petroleum products (including gasoline, kerosene, diesel oil and fuel oil, and liquefied petroleum gas), import duties are set using a rate formula for petroleum products and are based on a quarterly average of the average border price.	Various exemptions are delineated in the customs code, the investment code, the mining code, specific agreements, and international agreements. Some exemptions are complete whereas others require payment of an administrative fee, at a rate of 5% of the c.i.f. value, or preferential reduced rates (mining code: 2 percent, 3 percent, 5 percent, of the c.i.f. value).	4 rates: (0, 5, 10 and 20 percent). Examples: 0 percent for banknotes and stamps; 5 percent for equipment; crude raw materials, agricultural inputs, livestock inputs, pharmaceutical inputs, milk and other preparations for children, and automated data processing machinery;
