

**Bangladesh: Second Review Under the Three-Year Arrangement Under the Extended Credit Facility and Request for Modification of Performance Criteria—Staff Report, Staff Supplement and Statement; Press Release on the Executive Board Discussion; and Statement by the Executive Director for Bangladesh**

In the context of the Bangladesh second review under the three-year arrangement under the Extended Credit Facility and request for modification of performance criteria, the following documents have been released and are included in this package:

- The staff report for the second review under the three-year arrangement under the Extended Credit Facility and request for modification of performance criteria prepared by a staff team of the IMF, following discussions that ended on April 2, 2013, with the officials of Bangladesh on economic developments and policies. Based on information available at the time of these discussions, the staff report was completed on May 14, 2013. The views expressed in the staff report are those of the staff team and do not necessarily reflect the views of the Executive Board of the IMF.
- A supplement dated May 14, 2013 on the Joint Debt Sustainability Analysis Update prepared by the staffs of the IMF and the World Bank.
- A staff statement of May 23, 2013 updating information on recent developments.
- A Press Release summarizing the views of the Executive Board as expressed during its May 29, 2013 discussion of the staff report that completed the request and/or review.
- A statement by the Executive Director for Bangladesh.

The documents listed below have been separately released.

Letter of Intent sent to the IMF by the authorities of Bangladesh\*  
Memorandum of Economic and Financial Policies by the authorities of Bangladesh\*  
Technical Memorandum of Understanding\*

\*Also included in Staff Report

The policy of publication of staff reports and other documents allows for the deletion of market-sensitive information.

## SECOND REVIEW UNDER THE THREE-YEAR ARRANGEMENT UNDER THE EXTENDED CREDIT FACILITY AND REQUEST FOR MODIFICATION OF PERFORMANCE CRITERIA

May 14, 2013

### KEY ISSUES

**Focus:** Discussions focused on program performance to date and commitments through June 2014. The program is broadly on track, and policies going forward are set to build on macroeconomic stabilization gains already achieved. In particular, they reflect a continuation of a prudent fiscal and monetary stance to anchor policies ahead of national elections, due by early 2014. New structural measures aim to further strengthen fiscal revenues, public debt management, and the financial sector, building on commitments already in place, and seeking to achieve the development priorities laid out in Bangladesh's Sixth Five-Year Plan (FY2011–15).

**Outlook and Risks:** The near-term outlook has weakened. While export growth has picked up and remittances remain supportive, weaker import and credit growth point to slowing domestic demand, and political tensions and nationwide strikes are taking a toll on economic activity. Near-term risks are to the downside. Domestically, the main risk stems from an intensification of civil strife. Exports could also be affected by the fallout from the recent building collapse. External risks arise from a renewed euro area shock or a global commodity price spike.

**Program:** The Executive Board approved a three-year ECF arrangement on April 11, 2012, in the amount of SDR 639.96 million (120 percent of quota), and completed the first review on February 20, 2013. For the second review, all periodic performance criteria were met at the end-December 2012 test date. Implementation of structural benchmarks for March 2013 has proceeded broadly as expected, including submission to Parliament of amendments to the Bank Companies Act and approval of a value added tax (VAT) implementation plan by the Minister of Finance.

**Staff views:** Staff recommends completion of the review and modification of performance criteria for 2013, consistent with the revised macroeconomic outlook, while preserving overall program objectives. The authorities have consented to publication of the staff report and the Letter of Intent and attachments.

Approved By  
**Markus Rodlauer**  
and **Peter Allum**

The second ECF review mission was held in Dhaka during March 20–April 2, 2013. The staff team comprised David Cowen (outgoing mission chief) and Rodrigo Cubero (incoming mission chief), Seng Guan Toh, Souvik Gupta, and Eteri Kvintradze (Resident Representative) (all APD); Stella Kaendera and Leandro Medina (FAD); and Lars Engstrom (SPR). Muneesh Kapur (OED) joined policy discussions. To-Nhu Dao and Ranee Sirihorachai (APD) assisted in preparing this report.

## CONTEXT AND PROGRAM PERFORMANCE

**1. The program is broadly on track against its overall objectives.** Macroeconomic pressures continue to ease, with rising reserves and underlying inflation moderating, supported by restrained fiscal and monetary policies. And the authorities continue to advance the structural reform agenda.

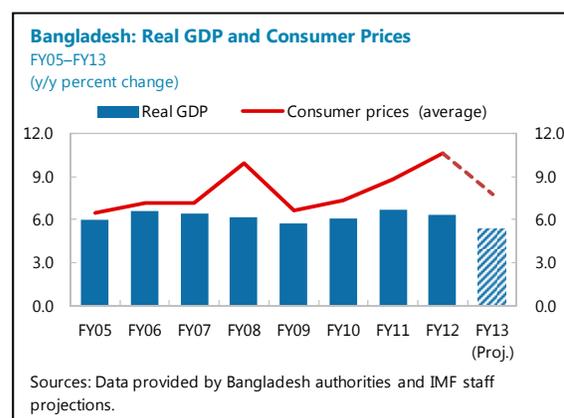

**2. Moreover, policy implementation has been largely in line with commitments.** At end-December 2012, the second test date under the ECF, all periodic performance criteria (PC) were met (Figure 1). Notably, the net international reserves (NIR) buildup exceeded the end-December 2012 target by over US\$3 billion. At the completion of the first review under the ECF in February 2013, a waiver was granted for nonobservance of the continuous ceiling on nonconcessional external debt, which resulted from new borrowing in January 2013 (Table 1 in the accompanying Memorandum of Economic and Financial Policies, MEFP). Most indicative targets (IT) for December 2012 and March 2013 were met, with a few exceptions noted below. Finally, key end-March 2013 structural benchmarks were completed (MEFP Table 2), namely submission to Parliament of banking law amendments as a centerpiece of banking reform efforts and the approval of a VAT implementation plan by the Minister of Finance.

**3. This review, however, takes place against the backdrop of deep political tensions.** Since February 2013, nationwide strikes (*hartals*) and episodes of violence have intensified. Most of these have been spurred by ongoing war crime trials (for crimes associated with the 1971 war of independence) involving several leaders of Bangladesh's largest Islamist party. These protests have since been joined by the main political opposition, which is demanding reinstatement of the previous system of a caretaker government to oversee the run up to national elections, expected by early 2014.

## MACROECONOMIC DEVELOPMENTS, OUTLOOK, AND RISKS

**4. Economic developments have been generally positive, but domestic strife is taking a toll on growth** (Figures 2–3).

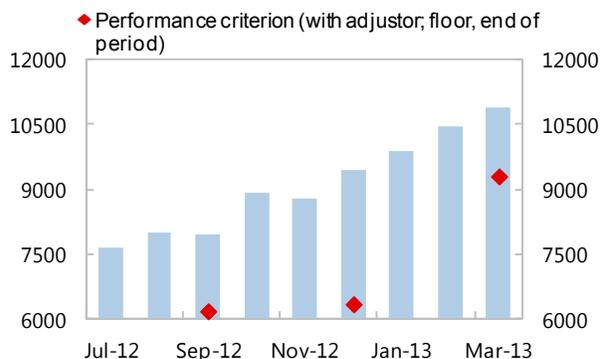

- **Growth.** While there has been some uptick in export performance and public investment is set to remain strong, these are expected to be offset by slower private investment and consumption, evidenced by slowing private credit and weak import growth. As a result, real GDP growth is

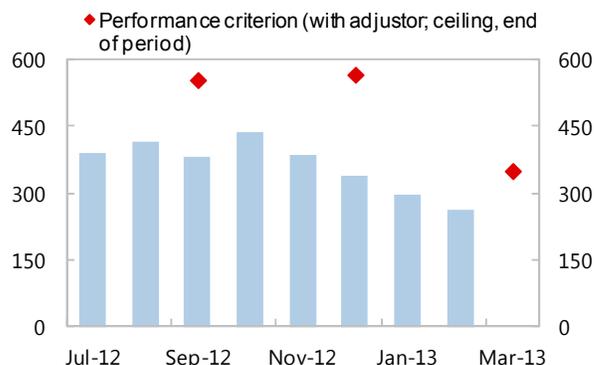

**Figure 1. Bangladesh: Selected Performance Criteria and Indicative Targets**

**Performance Criteria**

1/ Maturing in more than one year and contracted by the public sector and/or guaranteed by the central government or Bangladesh Bank.

projected to slow to 5.4 percent in fiscal year 2013 (FY13, July 2012–June 2013) from 6.3 percent in FY12 (Table 1). However, near-term growth projections are subject to greater-than-usual uncertainty, as the effects of ongoing disruptions are difficult to quantify.

- **Inflation.** Nonfood inflation has continued to fall, supported by policy tightening and taka appreciation. Headline inflation has remained moderate at 7.7 percent (y/y) in March 2013 compared to decade-highs of 12 percent in September 2011. However, supply disruptions due to *hartals* may have contributed to higher food inflation since February.<sup>1</sup>
- **Current account.** A stronger current account balance is expected in FY13 compared to FY12, arising from slower import growth combined with recovering exports and still-strong remittances (Table 2). Better export performance reflects predominantly a garment export recovery following demand stabilization in mature markets as well as some diversification to non-traditional markets.

- **Exchange rate and foreign reserves.** In addition to a stronger current account, oil import-related credits and aid disbursements have provided support to the overall balance of payments (BOP). Against this backdrop, the taka has appreciated by about 7 percent from its all-time low in early 2012, while gross foreign reserves (GIR) stood at US\$14.5 billion (3.8 months of imports) at end-April 2013, up by more than US\$5 billion from late 2011 lows.

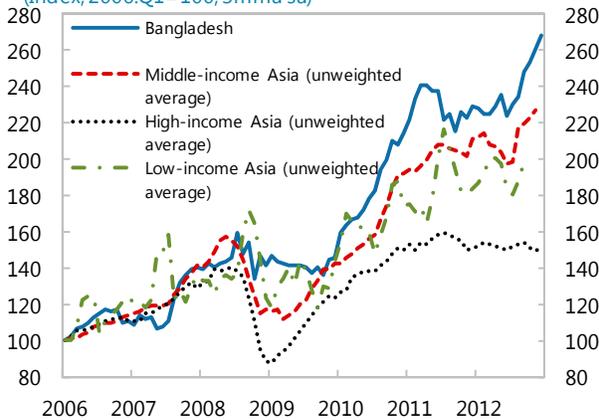

**5. For FY14, the growth outlook is less favorable than previously anticipated.** The growth outlook from FY14 onward has been marked down slightly compared to the first ECF review, factoring in the impact of political tensions and a more drawn-out implementation of the Padma Bridge project, following from the government’s decision in January 2013 to cease pursuit of financial support from the World Bank for the bridge’s construction. While supply disruptions may push up prices in the first half of FY14, by end-FY14 headline inflation is expected to decline

<sup>1</sup> Inflation data provided in this report use the FY96 base. The Bangladesh Bureau of Statistics intends to phase out fully this index later in 2013 and replace it with a FY06 base.

**Figure 2. Bangladesh: Exports and Remittances**

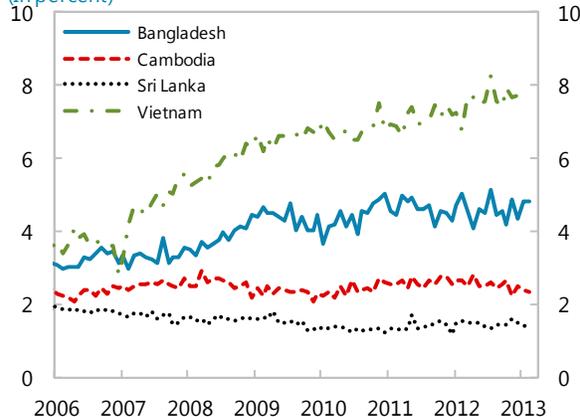

Export performance is holding up reasonably well compared to other parts of the region.

**Export Performance in Asia, Mar. 2006–Feb. 2013**  
(Index, 2006.Q1=100, 3mma sa)

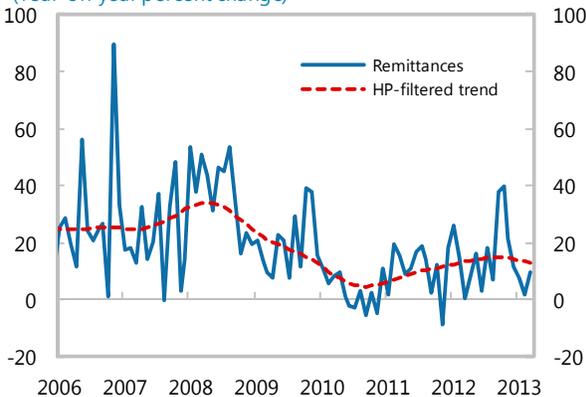

While market shares for garment exports to the U.S. have remained stable...

**Shares in U.S. Garment Market, Jan. 2006–Feb. 2013**  
(In percent)

Remittance growth, while still strong, has tapered off to some extent...

(Year-on-year percent change)

Sources: Data provided by the Bangladesh authorities; CEIC Data Company Ltd.; Eurostat; U.S. Department of Commerce; and IMF staff estimates.

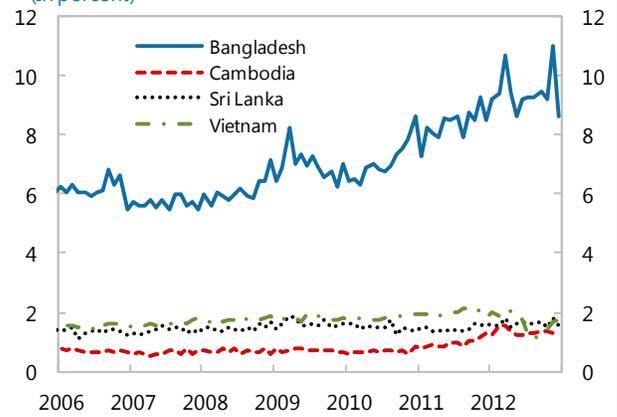

Robust export performance has been driven by ready-made garments, with some pickup since late 2012.

**Exports of Bangladesh, Mar. 2006–Mar. 2013**  
(Index, 2006.Q1=100, 3mma sa)

...those in the European Union have trended up, owing in part to shifts in supplier sourcing to Bangladesh.

**Shares in E.U. Garment Market, Jan. 2006–Dec. 2012**  
(In percent)

...reflecting slightly lower worker outflows since the global financial crisis.

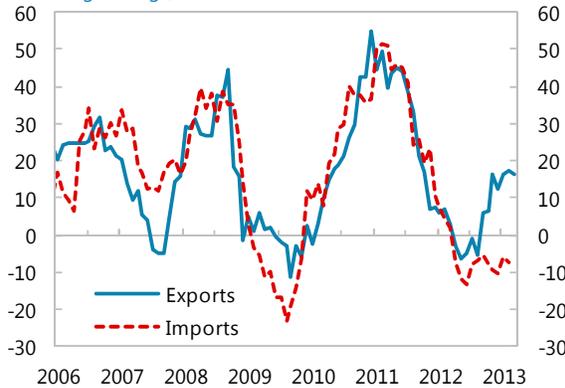

**Workers Moving Abroad, Dec. 2000–Feb. 2013**  
(In thousands, 12-month cumulative total)

**Figure 3. Bangladesh: Real and External Sector Developments**

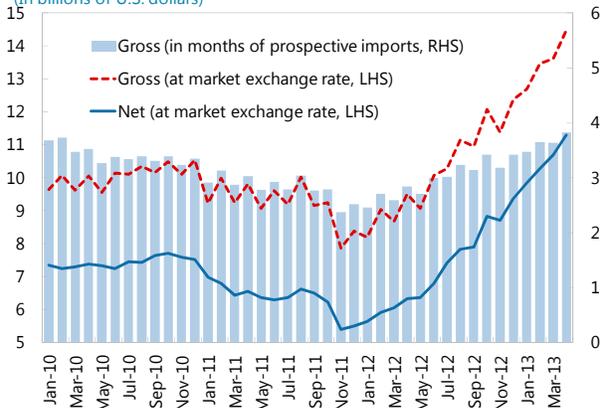

The increasing wedge between export and import growth points to a major pullback in non-export related imports, suggesting a slowdown in domestic economic activity.

**Exports and Imports, Jan. 2006–Mar. 2013**  
(Year-on-year percent change of three-month moving average)

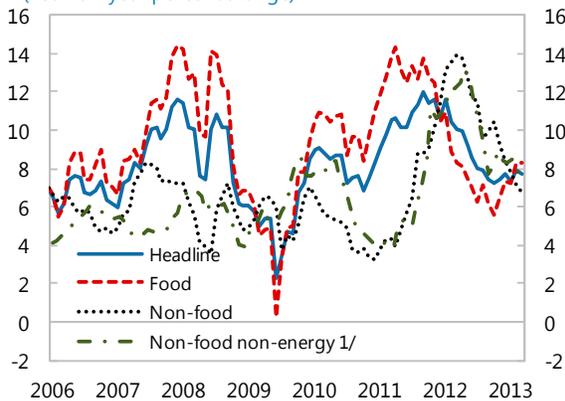

Against this backdrop, BB has built up its reserve buffer, comfortably exceeding program targets.

**International Reserves, Jan. 2010–Apr. 2013**  
(In billions of U.S. dollars)

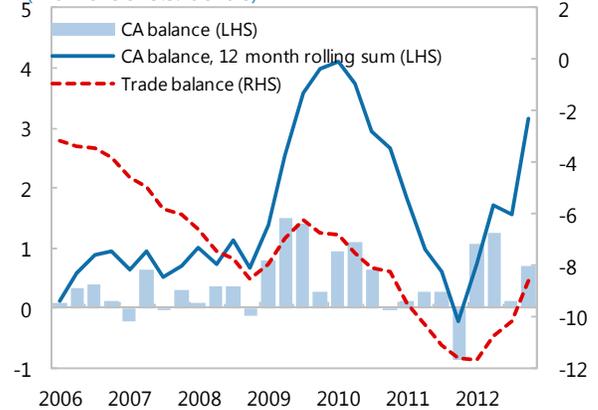

Headline inflation has moderated since early 2012, with a steady decline in nonfood inflation pointing to an easing of underlying pressures.

**Consumer Price Index (CPI), Jan. 2006–Mar. 2013**  
(Year-on-year percent change)

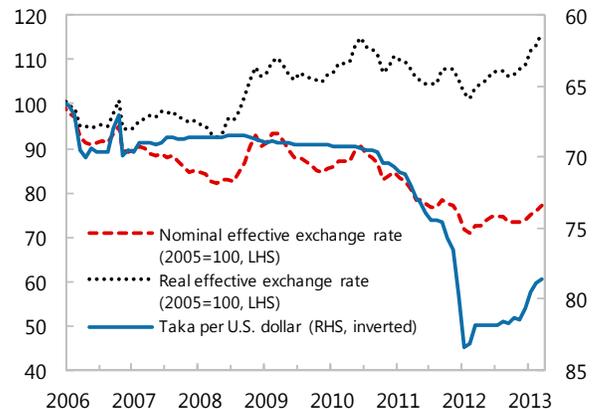

As a result of these developments and still supportive remittances, pressures on the current account have eased, with a surplus emerging in recent quarters.

**Current Account (CA) Balance, 2006.Q1–2012.Q4**  
(In billions of U.S. dollars)

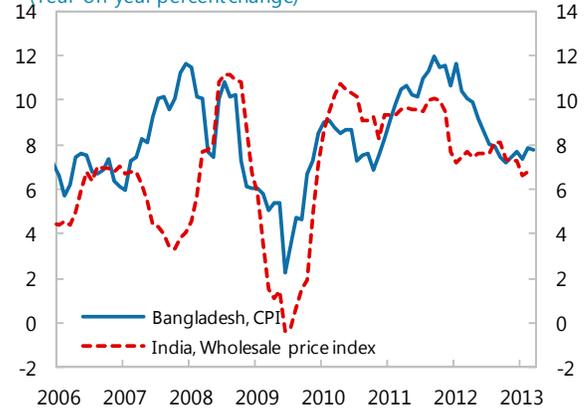

Nominal and real exchange rates have also strengthened, reflecting in part the more favorable current account.

**Exchange Rates, Jan. 2006–Mar. 2013**

Trends in inflation remain broadly similar to India, especially as nonfood price inflation converges.

**Regional Headline Inflation, Jan. 2006–Mar. 2013**  
(Year-on-year percent change)

Sources: Data provided by the Bangladesh authorities; CEIC Data Company Ltd.; and IMF staff estimates.

1/ Energy-related CPI components proxied by gross rent, fuel and lighting, and transport and communications.

further to below 7 percent (y/y) on restrained policies and easing supply constraints. The current account is projected to register a deficit of around ½ a percent of GDP in FY14, as imports are expected to rebound on stepped up infrastructure spending and some restocking after two years of import compression. Nevertheless, GIR are projected to rise to US\$16 billion by end-June 2014, as the modest current account deficit is expected to be offset by sustained official capital inflows.

**6. The balance of risks to near-term growth is to the downside** (Box 1). Domestic risks now predominate. In particular, escalating political tensions could possibly create broader disruptions to economic activity. The collapse in April 2013 of a building in an industrial district near Dhaka creates an additional downside risk to the readymade garment sector if exports are affected by industrial disturbances or reputational risks related to worker conditions in the sector. The authorities are framing a policy response to this risk (MEFP, ¶15). The deterioration in state-owned commercial bank (SOCB) finances also poses fiscal and financial stability risks. On the external front, main risks stem from a re-emergence of stress in the euro area, given Bangladesh's export concentration to the European Union, and from a global oil price shock. If any of these risks materializes, adjustments would have to come primarily through the exchange rate and automatic fiscal stabilizers. Monetary policy should remain appropriately restrained to contain inflation and protect reserves while ensuring an adequate supply of liquidity to the markets.

## POLICY DISCUSSIONS

**7. Discussions centered on policy actions under the ECF through June 2014, aimed at consolidating macroeconomic stabilization gains, advancing key structural reforms, and promoting sound economic governance to support growth.** The authorities' MEFP (Appendix 1) sets out new program commitments, extending quantitative targets through June 2014 (MEFP Table 1), and adding new structural benchmarks (MEFP Table 2). Proposed modifications to June 2013 program targets lock in reserve over-performance to reinforce buffers against the risk of BOP disruptions, while also providing modest flexibility in bank financing to the government to allow automatic stabilizers to work in light of weaker-than-anticipated growth. A relatively restrained monetary stance and continued exchange rate flexibility is envisaged to help preserve stability gains.

### A. Fiscal Policy and Debt Management: Sustaining Fiscal Prudence

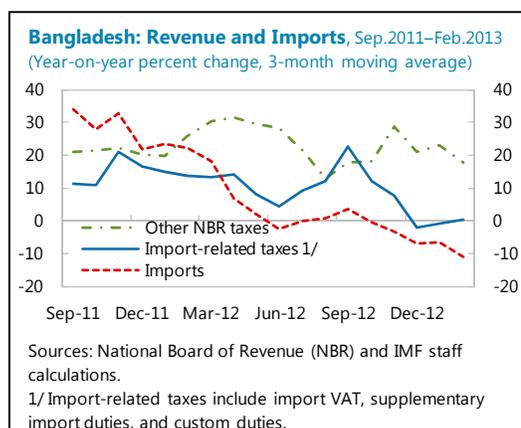

**8. Overview.** Fiscal reforms under the ECF-supported program aim at generating higher tax revenues, prioritizing and improving the targeting of public expenditure, and reinforcing debt sustainability. Together, these reforms will help build fiscal space to increase priority development spending, strengthen counter-cyclical buffers, and safeguard stability.

**Box 1. Bangladesh: Risk Assessment Matrix 1/**

| <b>Likelihood</b> | <b>Shock</b>   | <b>Vulnerabilities</b>   | <b>Potential Impact</b>   | <b>Policy Response</b>  |
|-------------------|--|--|---|---|
| Medium-High       | Intensification of domestic violence.  | Escalating violence would affect investment and growth.  | High: Growth prospects could be dampened by a loss of confidence and a slump in investment and consumption. BOP pressures could reemerge from lost export production.   | Automatic fiscal stabilizers should be allowed to operate, with greater exchange rate flexibility needed to reduce external pressures (complemented by monetary tightening if pressures are significant).   |
| Medium            | Stalled or incomplete delivery of euro area policy commitments (causing re-emergence of stress). | About half of exports go to the European Union (EU), with garments significantly increasing their EU market share over the past five years.              | High: Activity would be severely affected in the garment export sector. Balance of payments (BOP) pressures could intensify on a deeper export slump, destabilizing the exchange rate and pressuring reserves.  | Greater exchange rate flexibility would need to be coupled with moderate fiscal easing, as modest automatic stabilizers kick in, with possible budgetary provisions needed to top-up existing safety net schemes.   |
| Medium            | Further deterioration in state-owned commercial bank (SOCB) finances.                            | The SOCBs' financial health deteriorated in 2012, with three of them failing to meet the minimum risk-weighted capital requirements as of December 2012. | High: Potential recapitalization needs are around 1½ percent of GDP, including accounting for valuation adjustments treated as capital at these banks.  | The SOCBs should be held strictly accountable to the MOUs agreed with BB aimed at improving their financial performance. Stricter macro-prudential controls over their lending activities and more aggressive recovery of bad loans would be needed, backed by a broader strategy to improve their longer-term viability. |
| Medium            | Intensification of pre-election spending pressures.  | Lack of fiscal restraint ahead of national elections due by early 2014.  | Low-to-medium: Fiscal slippages resulting in higher bank borrowings could increase the devolvement burden on the banking sector and/or government's reliance on BB financing, with spillovers to inflation and monetary policy.   | Fiscal slippages would need to be addressed promptly. In addition, monetary targets would need to be adjusted and greater interest rate flexibility would need to be allowed to ensure a stable macroeconomic environment.  |
| Low-Medium        | Significant loss of ready-made garment orders due to buyer concerns about labor conditions.      | The garment sector accounts for nearly 80 percent of exports, and employs around 4 million workers, mostly women.  | High: Apart from the challenges for short-term macro stability, the loss of investment and jobs could raise poverty levels over the longer term.  | Macroeconomic management as in the case of euro-area or civil-strife-related shocks to exports discussed above, plus steps to establish reputable factory working conditions.   |
| Low               | Global oil price shock triggered by geopolitical events.   | Petroleum imports (in U.S. dollars) have more than doubled since FY10, driven by increased reliance on liquid fuel-fired power generation.               | Medium: The BOP would come under renewed pressure due to higher import bill. However, stronger remittances could partly offset the BOP pressure if higher oil price improves economic conditions in the Gulf countries, source of nearly two-third of the remittance inflows. On public finances, fuel related subsidies could destabilize the fiscal stance. | Timely adjustments to retail fuel prices guided by the government's existing formula could contain subsidies, temper demand, and protect reserves, backstopped by greater exchange rate flexibility.  |

1/ The Risk Assessment Matrix (RAM) shows events that could materially alter the baseline path (the scenario most likely to materialize in view of IMF staff). The relative likelihood of risks listed is the staff's subjective assessment of the risks surrounding the baseline. The RAM reflects staff views on the sources of risks and overall level of concerns as of the time of discussions with the authorities.

**9. Recent fiscal performance** (Figure 4). Fiscal performance in the first half of FY13 was broadly in line with the program. Tax collections by the National Board of Revenue (NBR) fell short by about 0.3 percent of GDP of the program IT in that period, partly reflecting the impact of slower import growth on supplementary duties and other import-related taxes. However, expenditure has been kept in check, including through contained energy-related subsidies following administered fuel price increases, even as implementation of capital spending in the Annual Development Plan (ADP) has improved. As a result, government borrowing from the banking system has remained within the program PC, and the fiscal deficit (excluding grants) is on track to meet the program target of 4.5 percent of GDP in FY13 (Tables 3–4).

**10. Fiscal policy stance** (MEFP, ¶2–3). For FY14, the authorities remain committed to a programmed budget deficit target (excluding grants) of 4.3 percent of GDP. Tax collections are likely to continue to suffer from slower imports and *hartal*-related disruptions, at least through the first half of FY14. In light of this, a modest modification of the government’s bank borrowing targets is proposed in the period to December 2013. The authorities have, however, committed to strengthening revenue in the near term through further removal of exemptions and phasing out of truncated bases for the VAT, and through stepped up tax enforcement efforts, including tighter audits.<sup>2</sup> Within the programmed spending envelope, the authorities intend to further raise social-related spending (an IT) as well as capital spending, including for a continuation of the Padma Bridge project.<sup>3</sup> Fiscal space will be carved out through continued containment of subsidy-related costs (see below). Over the medium term, a moderate consolidation path will continue to be pursued, while protecting social-related spending and increasing the ADP envelope to meet Bangladesh’s key social and development goals, as articulated in the authorities’ Sixth Five-Year Plan FY11–15.

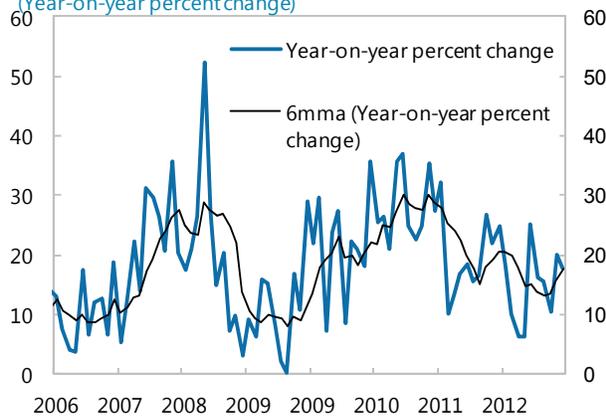

<sup>2</sup> The NBR is also seeking one-off revenues by recovering tax arrears from state owned enterprises and undertaking a comprehensive rollout of the Alternative Dispute Resolution mechanism at the customs level.

<sup>3</sup> The total cost of the Padma Bridge project is estimated by the authorities at US\$3.05 billion (2.4 percent of GDP). The authorities have indicated that the FY14 budget will include Tk 68 billion (about 0.7 percent of GDP) for the project, which has been accounted for within the fiscal targets agreed under the program. The baseline assumes continued implementation through FY17 (although more back-loaded than at the time of the first ECF review to reflect delays to date). The scope of the project, the oversight framework (for which the authorities want to engage the Asian Development Bank), and the overall financing package are still under consideration by the authorities, as they discuss options with different development partners. Part of the financing is expected to come from already-committed external resources (a credit line disbursement from India for US\$200 million and an Islamic Development Bank credit for US\$140 million). Also, the authorities are considering issuing a sovereign bond of between US\$500 million and US\$1 billion, but the timing of this is uncertain.

**Figure 4. Bangladesh: Fiscal Developments**

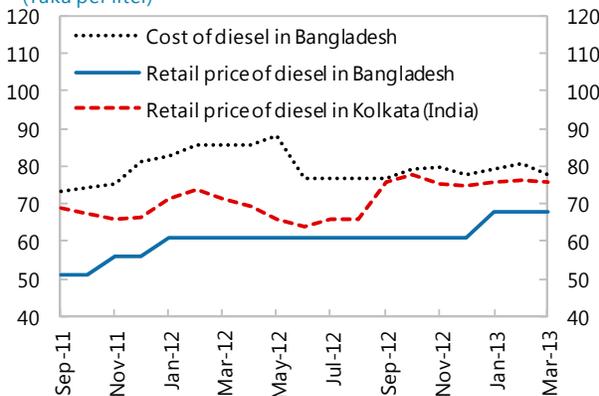

Administrative improvements drove up tax revenues between 2009 and 2011, but revenue growth has slowed more recently...

**NBR Revenue, Jul. 2006–Feb. 2013**  
(Year-on-year percent change)

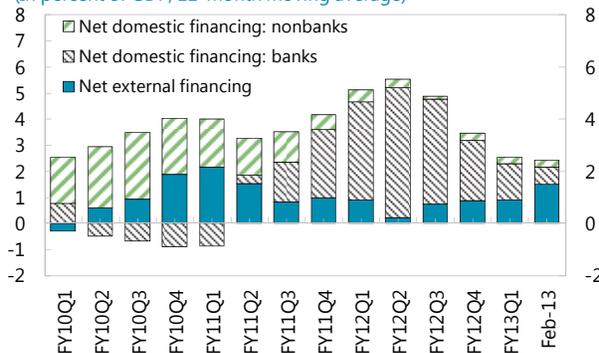

Retail fuel price increases have helped narrow the wedge with international and regional prices.

**Diesel Prices, Sep. 2011– Mar. 2013**  
(Taka per liter)

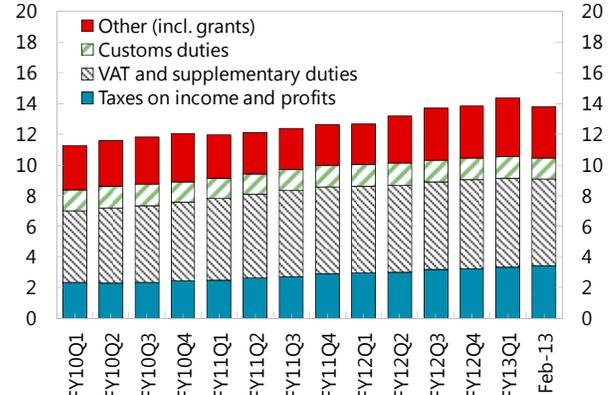

The fiscal balance has narrowed somewhat as a share of GDP, and the financing mix has shifted from domestic banks to external sources.

**Central Government: Sources of Financing**  
FY10.Q1–Feb. 2013  
(In percent of GDP; 12-month moving average)

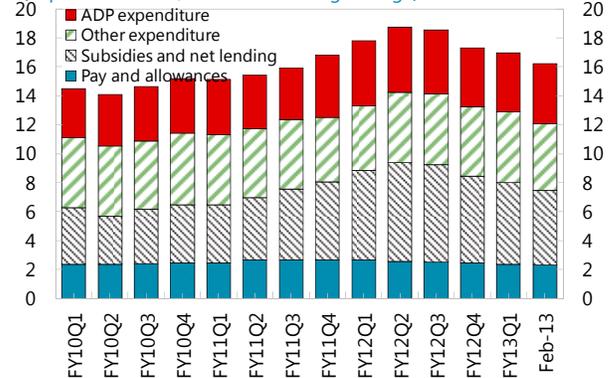

...driven in part by slower VAT and supplementary duty collections. The revenue-to-GDP ratio has stabilized.

**Central Government Revenue, FY10.Q1–Feb. 2013**  
(In percent of GDP; 12-month moving average)

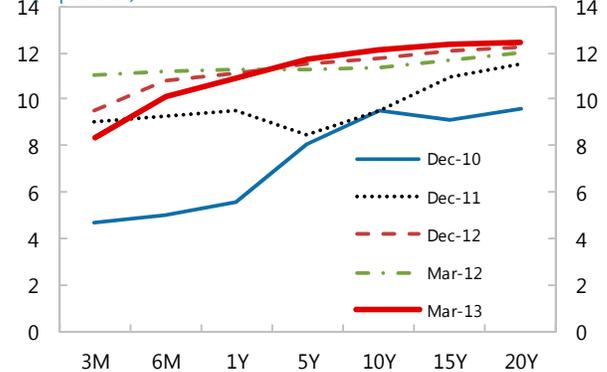

As a result, the fuel subsidy bill has moderated, helping reduce overall government expenditure as a share of GDP.

**Central Government Expenditure, FY10.Q1–Feb. 2013**  
(In percent of GDP; 12-month moving average)

Interest rates on Treasury bonds and bills rose between end-2010 and early 2012. Since then, the yield curve has steepened, reflecting an increased appetite for short-term instruments.

## 11. Structural fiscal reforms.

- **Pressing ahead on tax and revenue administration reforms** (MEFP, ¶14). The authorities are committed to continuing to work on VAT implementation, a plan and timetable for which has been approved by the Minister of Finance (a March 2013 benchmark). They are now taking steps toward selecting a vendor for a tax automation system by December 2013 (a new benchmark). Progress has also been made towards automating issuance of taxpayer identification numbers (a June 2013 benchmark), for which a key remaining step is to establish a link with the national identification database.
- **Managing subsidy costs** (MEFP, ¶16). After a series of retail energy price adjustments over the past two years, the authorities intend to continue to adjust fuel prices if necessary to limit the wedge with international prices to the agreed 10 taka per liter,<sup>4</sup> while safeguarding the most vulnerable through increased transfers. Over the medium term, as better targeting mechanisms are developed, the authorities should gradually eliminate the wedge with international prices. The authorities will also exercise greater scrutiny of rental power plant contracts, which absorb a disproportionate share of subsidy costs (Box 2). Moreover, the expansion of base power capacity should allow a gradual phasing out of rental plants, and efforts to increase gas supply to base plants will further reduce generation costs. Further savings are expected after completion of efficiency audits of the fuel, electricity and fertilizer-related state-owned enterprises (SOEs), a June 2013 benchmark. To continue to bring subsidy costs fully on-budget, a plan setting out a schedule of disbursements from the government to the Bangladesh Petroleum Corporation (BPC) has been formalized and approved (a prior action). Timely government transfers to BPC will also help ensure observance of the IT on SOCB loans to SOEs, which was breached in December 2012 and in March 2013. The government remains committed to capitalizing all earlier subsidy-related loan losses at the SOCBs (equivalent to 0.5 percent of GDP), and to gradually phasing out external borrowing by BPC through oil-related suppliers credits (also an IT).
- **Ensuring sound debt management** (MEFP, ¶17). The authorities will focus external borrowing on high impact projects to meet critical development needs. They are also taking steps to strengthen debt management practices. The authorities have formally requested a Debt Management and Performance Assessment (DeMPA) from the World Bank, which will guide the finalization of a medium-term debt strategy by December 2013. The authorities have established a technical committee (a prior action) to monitor and report on all nonconcessional external borrowing and ensure compliance with the limits set in the ECF program. The committee will also draft revised terms of reference (TOR) for the Cabinet's Hard-Term Loan Committee (HTLC), with the notification for the revised TOR to be issued by June 2013 (a new benchmark). The revised TOR will: (i) ensure that the HTLC oversees all nonconcessional borrowing contracts, covering loans, guarantees, and trade credits (excluding normal import financing) by the public sector and for all purposes; and (ii) determine nonconcessionality based on the grant element of the credit, in line with international best practices.

<sup>4</sup> First ECF Review Staff Report, IMF Country Report No. 13/61 (March 2013).

### Box 2. Bangladesh: Rental Power Plants and Subsidy Costs

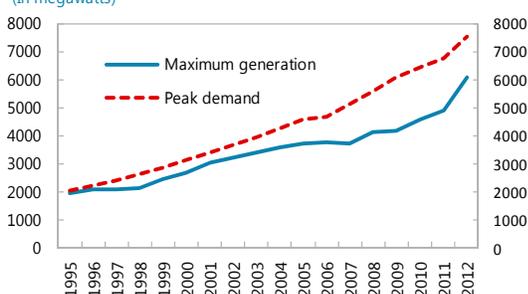

The authorities have made significant efforts to reduce power shortages in recent years by increasingly relying on rental power plants, but this has had a large impact on subsidy costs.

In the decade to 2010, the demand for electricity in Bangladesh far outpaced power generation capacity. To address the shortage, the government has since 2009 mostly relied on liquid-fuel-based rental power plants (RPPs). Indeed, power generated by RPPs increased from around 6 percent of total generation in 2009 to 27 percent in 2012 (Table 1).

This helped reduce the demand-generation gap from around 27 percent in 2011 (in percent of peak demand) to 19 percent in 2012.<sup>1</sup> Consistent with this, load shedding (i.e., rationing) has been reduced significantly, with shortfalls only binding during peak demand in summer months.<sup>2</sup>

Source: Bangladesh Power Development Board Annual Reports.

Note: Public Generation includes the Rural Electrification Board.

The reliance on RPPs has changed the balance of fuels used for electricity generation. About two-thirds of the total capacity from RPPs comes from liquid-fuel-fired plants (Table 2). Thus, oil-based generation (both diesel and furnace oil) has risen by almost 500 percent nation-wide since 2009 (Table 3).

**Table 2. Bangladesh: Rental Power Plants: Number and Generation Capacity**

Source: Bangladesh Power Development Board Annual Reports.

<sup>1</sup> Electricity generation, currently estimated at around 6,000 megawatts, is lower than capacity, estimated at 8,100 megawatts, due to out-of-operation plants (maintenance, rehabilitation, or overhauling), aging of plants, and gas shortages.

<sup>2</sup> The maximum load shedding decreased from 1,459 megawatts in 2010 to 1,058 megawatts in 2012.

## Box 2. Bangladesh: Rental Power Plants and Subsidy Costs (concluded)

In turn, the increasing reliance on liquid-fuel generation from RPPs has led to a surge in total energy-related subsidy costs for the government, from 0.1 percent of GDP in FY2010 to 1.6 percent in FY2012 (see Table 3 in the staff report). This has occurred through two channels:

- **Fuel subsidies.** The Bangladesh Petroleum Corporation (BPC) subsidizes fuel by selling it domestically at lower than international prices. The sharp rise in BPC's fuel subsidy bill from Tk 10 billion in FY2010 to Tk 86 billion (0.9 percent of GDP) in FY2012 was partly due to growing fuel sales to liquid-fuel-based electricity generators.
- **Electricity-related subsidies.** The Bangladesh Power Development Board (BPDB) provides several types of power subsidy. First, BPDB power tariffs charged to consumers are lower than the costs to BPDB of purchases from power generators. With growing reliance on high-cost oil-based power generation (rather than lower-cost gas, see Table 4), subsidy costs have risen significantly.<sup>3</sup> Second, under contracts between BPDB and RPPs, the BPDB guarantees access to fuel by RPPs at prices well below rates charged by BPC to other consumers. (Thus, for instance, diesel is sold to RPPs at Tk 26 per liter compared to a regular BPC price of Tk 68 per liter). This price difference is financed by BPDB. Last, the contracts between BPDB and RPPs guarantee a minimum fixed payment per month (a "rental") from BPDB, regardless of whether electricity is generated. Government transfers to BPDB cover these various subsidies, and have risen from Tk 9 billion in FY2010 to Tk 64 billion (0.7 percent of GDP) in FY2012. Reflecting these various factors, RPPs account for about 90 percent of the electricity subsidy bill, compared to their 30 percent contribution to electricity generation.

**Table 4. Bangladesh: Electricity Purchase and Generation Costs**

(Average cost per unit, in taka per kilowatt hour)

|                                    | 2009-10 | 2010-11 | 2011-12 |
|------------------------------------|---------|---------|---------|

1/ Owned by Public Entities, with most of shares held by BPDB and the rest distributed among Ministry of Finance, Ministry of Planning, Power Division, MOPEMR, and Energy Division.

2/ IPPs are permanent set ups, with long-term contracts and require 10 to 18 months to install. An IPP contractor procures plant equipment after getting the contract, while rental power contractors must already have all the equipment before getting the contract.

<sup>3</sup> In the current setup, BPDB functions as a single buyer, purchasing electricity from the public and private generators.

- **Strengthening public financial management (PFM)** (MEFP, ¶15). The authorities issued guidelines on budget monitoring and reporting under the Public Money and Budget Management Act in March 2013 (June 2013 benchmark). Building on IMF technical assistance (TA), the authorities are committed to placing limits by December 2013 on government borrowing from Bangladesh Bank (BB) through the overdraft facility, and to institutionalizing cash flow forecasting by March 2014.
- **Strengthening nonbank resource mobilization** (MEFP, ¶18). Sales of National Savings Certificates (NSCs), a retail savings instrument, are expected to improve following reforms to incentivize their use. Key among those reforms is bringing taxation of interest on NSCs in line with other government debt instruments by June 2013.

**12. Nonconcessional borrowing and debt sustainability.** The proposed debt ceilings are consistent with program objectives, including boosting spending in critical infrastructure projects and maintaining debt sustainability, and are underpinned by strengthened debt management practices, as noted above. At the time of the first ECF review, debt limits were set through December 2013. In extending targets for this review, staff proposes to modify the cumulative ceilings to reflect a further US\$0.75 billion (0.5 percent of GDP) by June 2014 for the existing pipeline of high impact projects, mainly for guarantees in the power sector, bringing the total ceiling for the cumulative stock since end-2011 to US\$4.5 billion (3.1 percent of GDP). This increase in the debt ceiling still maintains Bangladesh at a low risk of external debt distress.<sup>5</sup>

## B. Monetary and Exchange Rate Policy: Helping Anchor Macroeconomic Stability

**13. Overview and recent monetary developments** (Figure 5). Under the program, monetary and exchange rate policy aims to further reduce inflation and build a reserve buffer, supported by market-determined interest rates. In response to earlier policy tightening, private credit growth slowed substantially in 2012 and has decelerated further in early 2013. However, strong reserve accumulation by BB coupled with partial sterilization resulted in small overruns in the IT on reserve money at end-December 2012 and end-March 2013 (Table 5). In January 2013, BB cut repo rates by 50 basis points in view of declining inflation and rising downside risks to growth.

**14. Current policy stance.** Consistent with its latest monetary policy statement, BB is committed to maintaining a prudent monetary stance to safeguard macroeconomic stability and keep inflation in check, while allowing sufficient space for private credit growth. In this context, the reserve money ITs were kept broadly unchanged relative to the first ECF review. Staff and the authorities agreed that the current levels of policy rates were broadly appropriate, with further easing premature at this stage. To lock-in the over-performance on reserve accumulation and strengthen the external buffer for contingencies, a modification to the NIR PC target for end-

<sup>5</sup> See accompanying Debt Sustainability Analysis (DSA) Update, which incorporates remittance-adjusted thresholds as per the latest IMF guidance. The previous DSA Update was reported in IMF Country Report No. 13/61 (March 2013).

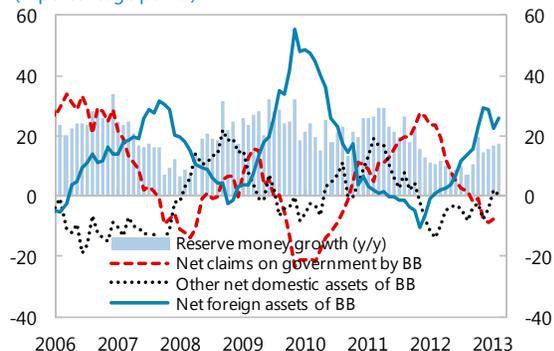

**Figure 5. Bangladesh: Monetary and Financial Market Developments**

Reserve money growth, which slowed in 2012, has been driven up by BB's large, and not fully sterilized, foreign exchange purchases.

**Contribution to Reserve Money Growth**

Jan. 2006–Feb. 2013

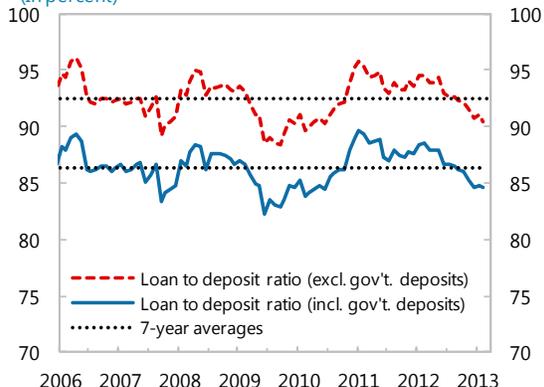

(In percentage points)

With a slowing credit uptake, loan-to-deposit ratios have fallen.

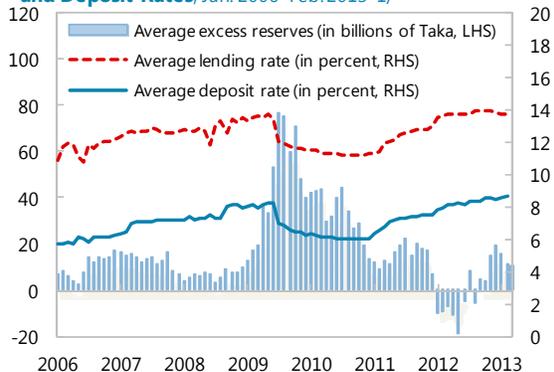

**Loan-to-Deposit Ratio, Jan. 2006–Feb. 2013**

(In percent)

After a period of increases, deposit and lending rates have stabilized.

**Commercial Banks' Excess Reserves and Lending and Deposit Rates, Jan. 2006–Feb. 2013 1/**

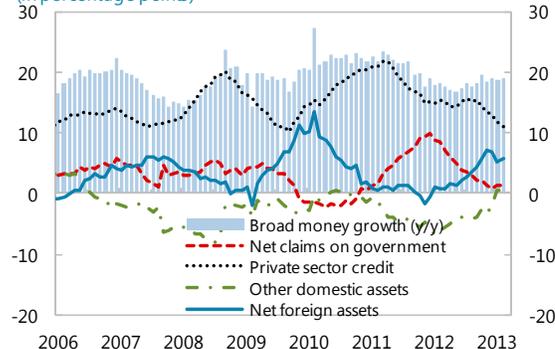

Similarly, broad money growth has picked up recently, with rising net foreign assets offsetting the impact of slower government and private sector borrowing.

**Contribution to Broad Money Growth**

Jan. 2006–Feb. 2013

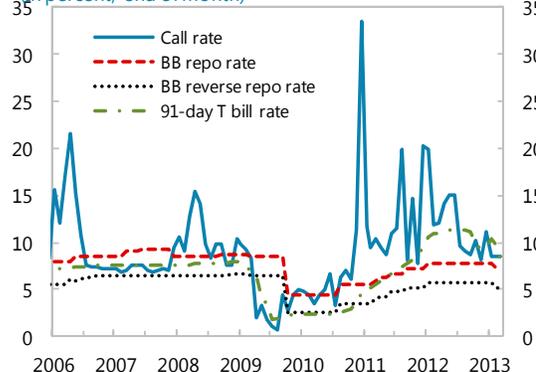

(in percentage points)

As external pressures eased, money market and Treasury rates have come off, with BB also cutting repo rates in January 2013.

**Interest Rates, Jan. 2006–Mar. 2013**

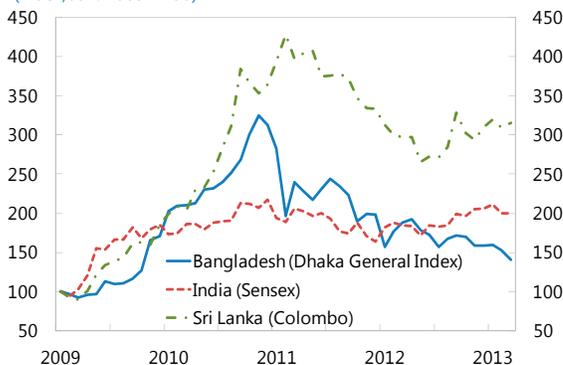

(In percent, end of month)

The Dhaka Stock Exchange is well off its December 2010 peak, and has weakened further in recent months as political tensions have increased.

**Stock Market Performance, Jan. 2009–Mar. 2013**

(Index; Jan. 2009 = 100)

Sources: Data provided by the Bangladesh authorities; CEIC Data Company Ltd.; and IMF staff estimates.

1/ The deposit and lending rate series have been redefined since July 2009.

June 2013 (raising it by about US\$1.2 billion) is being proposed, with BB's net domestic asset target lowered accordingly to protect the reserve money IT. Going forward, with reserve levels now approaching adequacy, the authorities committed to allowing more exchange rate flexibility and step up sterilization operations to ensure consistency with monetary targets.

## C. Financial Sector Reforms: Addressing Vulnerabilities and Bolstering Governance

**15. Overview and recent developments.** Program commitments in the financial sector center on strengthening financial sector governance, including improved risk management and operational controls by banks; clearer and expanded supervisory powers for BB; and stronger risk-based supervision. The financial position of the SOCBs has deteriorated further, reflecting a worsening in asset quality as well as the application of tighter loan classification and provisioning standards.<sup>6</sup> Thus, nonperforming loan (NPL) ratios for SOCBs as a group were 24 percent as of December 2012 (Table 6).

### 16. Structural reforms to strengthen and develop the financial system.

- **Bank Companies Act (BCA) amendments** (MEFP, ¶11). As a centerpiece of the authorities' efforts to strengthen the banking system, amendments to the BCA were sent to Parliament in March 2013 (a March 2013 benchmark). The amendments aim to broaden the supervisory mandate of BB, limit special treatments for the SOCBs, and strengthen commercial banks' governance and accountability (Box 3). BB is also preparing an order to revise capital market exposure limits for banks consistent with BCA amendments (also a March 2013 benchmark), with issuance of this now rescheduled for June 2013 as it is legally conditional on parliamentary passage of the BCA amendments.
- **Strengthening SOCBs** (MEFP, ¶12). To safeguard financial stability and mitigate fiscal risks, the authorities committed to taking the following measures to strengthen the SOCBs' performance and financial position and increase their operational independence:
  - (i) Revise the memoranda of understanding (MoU) with the four largest SOCBs by May 2013 to set targets for net loan growth based on BB's assessment of the financial position of each bank and consistent with program ceilings.
  - (ii) Complete special diagnostic examinations of the SOCBs (a June 2013 benchmark), focused on asset quality, liquidity management, and internal audit and control. Their findings will inform further revisions in the MoUs by September 2013 (a new benchmark), and will also inform BB-approved and time-bound restructuring plans to be adopted by the boards of the SOCBs.

<sup>6</sup> Box 5 in IMF Country Report No. 13/61 (March 2013) details the vulnerabilities and pressures at the SOCBs.

### Box 3. Bangladesh: Amendments to the Bank Companies Act

**Amendments to the Bank Companies Act (BCA) were sent to Parliament in March 2013.** The Act was first enacted in 1991 and has been amended twice, most recently in 2003. The current draft amendments underwent several consultations with stakeholders over the last two years and received IMF technical assistance.

**Reducing government involvement in prudential regulation and supervision.** Under the proposed amendments, the government will not be able to interfere with the autonomy of Bangladesh Bank (BB) in examining banks. Appeals from aggrieved banks on bank licensing will be referred to the BB Board, instead of the government. Further, the amendments eliminate the government's power to suspend the operation of the Act.

**Removing special treatments of the state-owned commercial banks (SOCBs).** Examples of exclusions of the SOCBs that would be eliminated includes those with respect to regulations on: paid-up and subscribed capital; election of new directors; dividend payments under certain cases; prohibition of common directors; and restricting BB's powers to regulate labor conditions for banks' employees. However, the state-owned specialized banks, which account for about 5½ percent of banking system assets, will continue to be excluded from these provisions.

**Strengthening bank governance and internal audit and control.** The amended Act will require prior approval from BB, except for the specialized banks, on appointment or removal of directors and top managers; "fit and proper" criteria for appointment of bank directors; at least four independent directors in a bank board within three years of the enactment of the Act; modifications in the tenure of directors; restriction on family links among the directors of a bank; and transparency in financial transactions with bank-related persons. Bank boards will be liable to establish policies and ensure regulatory compliance on internal audit and control and risk management. Common directorship across banks will be prohibited, except for specialized banks, and BB can remove such directors without any conditions attached to such an action. To become a bank's significant shareholder, prior approval from BB will be needed. Though BB will still not be able to remove government-appointed chairmen or directors, it will be allowed to remove government-appointed chief executive officers if necessary.

**Restricting banks' risk exposure.** The proposed amendments limit banks' capital market exposure, direct or indirect, to 25 percent of the sum of paid-up capital, share premium, statutory reserves, and retained earnings, to be attained over a period of three years from the enactment of the Act. At present this exposure is set at 10 percent of total liabilities. There are also provisions regarding general limits on loan exposure, lending to bank-related persons, and cross-ownership of banks.

**These amendments to the BCA represent a very important structural reform under the ECF-supported program.** To further strengthen BB's regulatory and supervisory powers in line with international best practice, additional reforms consistent with several other IMF recommendations should be considered in the future. These include: removal of special treatments to the specialized banks, which also accept deposits from the public; reducing total number of directors at bank boards; appointment of all independent directors of banks by bank shareholders, not by BB or the Securities and Exchange Commission; giving BB full authority to remove bank board members, including government-appointed directors; allowing appeals on BB decisions to be heard by an independent tribunal or by a court of competent jurisdiction, not by the BB's Board; and adopting a full-fledged legal setup for a modern bank resolution framework.

- (iii) Provide in the FY14 Budget an allocation for recapitalizing the SOCBs as a step to cover their capital shortfalls, with the actual injection of recapitalization funds conditional on the strengthening of the MoUs between the SOCBs and BB following the diagnostic examinations.<sup>7</sup>
- **Contingency planning** (MEFP, ¶13). In order to strengthen the financial sector policy framework, BB is working to prepare (i) a contingency plan, which will detail key steps and responses to be taken at various stages in the event of a banking crisis; and (ii) a lender of last resort policy, detailing the arrangements for emergency liquidity provision to the banking system. Finalization of these two components is a September 2013 benchmark.
  - **Securities market** (MEFP, ¶14). The Demutualization Act was passed by Parliament in April 2013. The Bangladesh Securities and Exchange Commission is continuing to work towards the approval of demutualization models and plans for both Dhaka and Chittagong stock exchanges (a June 2013 benchmark), based on the Demutualization Act.
  - **Developing FX markets** (MEFP, ¶19). With the improved balance of payments, banks had to sell foreign exchange (FX) to BB to stay within the relatively tight net open position (NOP) limits, set at 15 percent of risk-weighted capital. To foster domestic FX market development, BB revised the NOP limits in April 2013 by about 40 percent by updating the bank risk-weighted capital bases used for their calculation.
  - **Deepening government debt markets** (MEFP, ¶19). The authorities are committed to further deepening government debt markets. In April 2013, they announced measures to: (i) introduce a two-year Treasury bond to better match investor demand; (ii) remove the one-year holding period for nonresident holdings of Treasury securities; and (iii) introduce reissuance of existing Treasury bonds. BB also remains committed to further reducing devolvement of Treasury securities in order to restore the integrity of the primary dealer system.

## D. Enhancing the Regulatory Environment for Investment

**17. Structural reforms under the program.** The authorities are preparing a strategy paper to review the Foreign Exchange Regulation Act (a September 2013 benchmark) and, in particular, to lay out a roadmap towards exchange control liberalization, assisted by IMF TA. The objective of this reform is to facilitate foreign direct and portfolio investment (MEFP, ¶16).

---

<sup>7</sup> Based on information from the authorities, the baseline scenario reflects a partial SOCB recapitalization of Tk 20 billion in FY14. The magnitude of the additional recapitalization needed to restore SOCB capital to the regulatory minimum will depend on the findings from the ongoing diagnostic examinations, but on current information it is estimated at about 1½ percentage points of GDP if full write-off of nonperforming loans is assumed.

## OTHER PROGRAM ISSUES

- 18. Financing assurances.** The program remains fully financed (Tables 7, 8, and 9), aided by a stronger BOP compared to the time of the first review.
- 19. Safeguards recommendations** (MEFP, ¶10).<sup>8</sup> The authorities have selected a global audit firm (a prior action) to conduct a full external audit of BB's end-June 2013 accounts. Finalization of this audit by December 2013 is a structural benchmark. In other safeguard areas, the authorities are intent on strengthening BB's Audit Committee and internal audit capacity, working to put in place the recommendations provided by IMF TA.
- 20. Request for modification of program targets.** Targets have been extended to June 2014. As discussed above, staff proposes to modify several PCs for June 2013 and related ITs to December 2013. The PCs on NIR and NDA of BB need to be revised to lock-in over-performance on reserve accumulation, while containing overall reserve money growth. A modification to the ceiling on net claims on the central government by the banking system is proposed to provide flexibility for automatic stabilizers to work. Finally, a modification is proposed to the ceiling for September and December 2013 on nonconcessional external debt maturing in more than one year, to account for additional power sector-related guarantees in the pipeline.

## STAFF APPRAISAL

- 21. Program achievements.** Under the ECF arrangement, Bangladesh has made substantial progress in strengthening macroeconomic conditions and structural policies:
- The country is now in a better position to withstand adverse external shocks, with international reserve levels almost double the lows in late 2011. Notwithstanding the tepid global economic environment, exports have picked up and remittances remain strong. Headline inflation is now in single digits, and underlying inflation pressures have receded.
  - In structural areas, the new VAT law has now moved firmly into the implementation phase following passage by Parliament in late 2012. When fully implemented, it will modernize the tax system and generate substantial internal resources to raise development spending, in support of growth and poverty reduction. Amendments to the BCA have been recently submitted to Parliament, which will significantly strengthen governance in the banking system, enhancing the supervisory powers of BB to safeguard financial stability. Progress is also being made to diagnose critical weaknesses in the SOCBs, as an initial step toward strengthening their governance and financial position.
- 22. Challenges and risks.** The balance of risks is to the downside, with domestic factors predominating. An intensification of political tensions coupled with election-year uncertainty in

<sup>8</sup> An IMF safeguards assessment was completed in July 2011.

Bangladesh pose the most immediate challenge to policymakers, with growth already slowing. Downside risks are exacerbated by the possible fallout for garment exports from the recent building collapse. Deteriorating financial conditions at the SOCBs also pose increasing risks. On the external front, pressures appear manageable, but there can be significant negative spillovers in the event of renewed euro area stresses or commodity price spikes. Persevering with strong policy anchors and the buildup of policy buffers in the run-up to elections and beyond, as reflected in commitments under the ECF arrangement, will prove essential to mitigate the impact of political uncertainty on the economy.

**23. Fiscal policy.** The overall fiscal stance remains prudent. However, strong vigilance, guided by adherence to programmed deficit targets, is needed to contain spending pressures in the pre-election period. Tax revenue shortfalls are an immediate concern, and call for stepped up tax enforcement. VAT implementation needs to proceed as planned, with TIN automation and procurement of a VAT tax automation system now the foremost priority for action at the NBR. On expenditures, stronger execution of capital spending is welcome. At the same time, subsidy costs need to be further reduced to build up more space for development spending, including through a gradual replacement of subsidies by targeted cash transfers. On energy subsidies, following retail price adjustments over the past two years, the emphasis should increasingly be on other measures to reduce the subsidy bill, including greater scrutiny of contracts with high-cost rental power plants. Moreover, the ongoing and planned expansion of base power generation capacity should provide opportunities to gradually phase out rental plants.

**24. Debt management.** The authorities should continue to seek maximum concessionality in their external financing, with all nonconcessional borrowing regularly reviewed, monitored, and reported to ensure full transparency and sound governance. The strengthening of debt management practices now underway is a good step towards reinforcing debt sustainability. The forthcoming DeMPA assessment should inform a comprehensive medium-term debt strategy to be put in place by end-2013.

**25. Monetary policy and central bank safeguards.** Restrained monetary policy since late 2011 has brought down inflationary pressures and supported the rebuilding of reserves. With reserves now approaching comfortable levels, BB should reduce FX intervention and ensure observance of reserve money targets, raising its capacity to fully sterilize any market interventions. To strengthen the central bank's internal controls, the selection of a global audit firm to conduct the external audit of BB for FY13 is welcome.

**26. Financial sector reforms.** The authorities should press ahead with passage of the amendments to the BCA, which will empower BB to enhance its oversight and undertake needed regulatory reforms to address vulnerabilities in the banking system. The proposed BCA amendments submitted to Parliament reflect key recommendations by staff. The authorities should take steps to implement outstanding recommendations (Box 3, last paragraph) in due course to further strengthen the legal framework for bank supervision and resolution. The deterioration in the financial position of the SOCBs points to the need to step up governance, risk management and controls at these banks. The special diagnostic examinations now underway at the four largest of these banks should inform

revisions to their MoUs with BB, incorporating plans to restructure their operations. Any future recapitalization should be made conditional on such plans being adopted by the SOCBs' boards. Further steps to deepen the FX and government debt markets are also needed, while continuing to reduce devolvement.

**27. Investment climate reforms.** A comprehensive review of foreign exchange regulations is timely and would provide a firm guide to increasing the attractiveness of Bangladesh to FDI and portfolio investment flows. Envisaged steps to strengthen safety conditions for factory workers are also welcome.

**28. Staff recommendation.** All end-December 2012 (second test date) periodic PCs were met, and a waiver was granted at the time of the first review for the nonobservance in January 2013 of the continuous PC on nonconcessional external debt maturing in more than one year. Key structural benchmarks for March 2013 were also met. On this basis, staff recommends completion of the second review under the ECF arrangement and the approval of the request for modifying end-June 2013 performance criteria in line with the revised macroeconomic outlook, while preserving overall program objectives.

**Table 1. Bangladesh: Selected Economic Indicators, FY2010–15 1/**

Sources: Bangladesh authorities; and IMF staff estimates and projections.

1/ Fiscal year begins July 1.

2/ Includes non-ADP capital spending, net lending, food account surplus (-)/deficit (+), and extraordinary expenditures.

3/ Import numbers are based on payment settlements data up to FY10 and customs data starting in FY11, except FY12 program figures, which are based on payment settlements data.

4/ Excludes deposits held in offshore accounts of resident financial institutions, noninvestment grade sovereign bonds, and foreign exchange overdrafts provided by Bangladesh Bank to domestic banks.

Sources: Bangladesh authorities; and IMF staff estimates and projections.

1/ Fiscal year begins July 1.

2/ Import numbers are based on payment settlements data up to FY10 and customs data starting in FY11, except FY12 program figures which are based on payment settlements data. Use of customs data does not change the overall balance because the difference between customs and settlements data is offset by a corresponding revision of trade credits (net), as reported in the financial account.

3/ Excludes official capital grants reported in the capital account.

4/ Data on trade credits include service fees related to exports until FY12. To adjust for this inconsistency, an amount equal to 3 percent of exports is deducted from reported trade credits and added to current account service payments. The net effect is a decrease in the current account, while the overall BOP balance remains unchanged.

5/ Net international reserves (NIR) reported at market exchange rates. Excluded from NIR are deposits held in offshore accounts of resident financial institutions, non-investment grade sovereign bonds, and foreign exchange overdrafts provided by Bangladesh Bank to domestic banks.

Sources: Bangladesh authorities; and IMF staff estimates and projections.

1/ Fiscal year begins July 1. Cash basis, unless otherwise specified.

2/ Comprise budget allocations for safety net programs and other social-related spending, pensions and gratuities, and direct subsidies for food and to the agriculture and export sectors. Other subsidy-related costs (i.e., lending to large energy-related state-owned enterprises (SOEs)) are included in net lending.

3/ Includes Tk 27.0 billion in FY12 and Tk 55.2 billion projected in FY13 in special bonds issued to the state-owned commercial banks for the noncash securitization of past subsidy-related loans made to Bangladesh Petroleum Corporation, consistent with the earlier treatment in the fiscal accounts of similar operations. Bank financing excludes advances and deposits of semi-autonomous and autonomous bodies.

4/ Includes food account surplus (-)/deficit (+) and extraordinary expenditures.

5/ Comprise food and agriculture and export sector subsidies, as well as subsidy-based lending to large energy-related SOEs and payment of unsettled fertilizer subsidy commitments incurred in FY12 (equivalent to 0.5 percent of GDP).

Sources: Bangladesh Bank; and IMF staff calculations.

1/ From 2007, an adjustment is made to exclude special accounts set up in banks' balance sheets, which contain the accumulated losses arising from the difference in market and book value of assets. These amounts are deducted from banks' assets and from their regulatory capital.

2/ New loan classification and provisioning regulations became effective with the financial statement for end-December 2012.

3/ Bangladesh Bank defines return on equity (ROE) as the ratio of net income after provision and taxes to regulatory capital. June 2012 ROEs are based on annualized half-yearly net income after provision and taxes.

4/ Bangladesh Bank defines return on assets (ROA) as the ratio of net income after provision and taxes to total assets. June 2012 ROAs are based on annualized half-yearly net income after provision and taxes.

## Appendix I. Bangladesh—Letter of Intent

13 May, 2013

Ms. Christine Lagarde  
Managing Director  
International Monetary Fund  
Washington, D.C. 20431

Dear Ms. Lagarde:

Our economy continues to show favorable developments despite a challenging global environment. Exports are picking up, remittances remain strong and inflation pressures have eased over the past year, supported by our prudent fiscal and monetary policies and complemented by the support of the IMF's Extended Credit Facility (ECF). International reserves, by the program's definition, stood at US\$14.5 billion as of end-April 2013, almost double the lows in late 2011. Prudent policies have further strengthened our capacity to respond to shocks, and will provide an anchor to preserve macroeconomic stability as we approach national elections, due by January 2014.

Under our ECF-supported program, we met all the quantitative performance criteria (PC) as of end-December 2012, and most of the indicative targets at end-December 2012 and end-March 2013. We also met our key structural benchmarks. In this regard, I would like to inform you that the new VAT law, which was passed by the National Parliament in November 2012, is now firmly in the implementation phase, following my approval of an implementation plan and timetable. Draft amendments to the Bank Companies Act were also submitted to the National Parliament, aiming to strengthen banking system governance and the supervisory mandate of the central bank. We also confirm completion of all the prior actions under the second review of the ECF arrangement. These and other details of our policy program are set out in the attached Memorandum of Economic and Financial Policies (MEFP), which extends our commitments to end-June 2014.

To further buttress international reserves while preserving our monetary targets, we are requesting an increase in the end-June 2013 PC on net international reserves of Bangladesh Bank (BB), and an attendant reduction of the PC on BB's net domestic assets. We would also like to request a modest increase in the government's bank borrowing PC ceilings for June 2013, to account for slightly weaker-than-expected non-bank financing, with the overall fiscal deficit on track to meet the programmed target. Finally, we are requesting an increase in our nonconcessional debt ceiling to accommodate loan guarantees for critical power infrastructure for the period to June 2014. As the MEFP indicates, we are putting in place measures to strengthen our debt management practices, so as to ensure compliance with program targets.

We believe that our commitments, as outlined in the MEFP, are adequate to achieve program objectives, but we may consider further measures, as appropriate, for this purpose. In this context, the Government of the People's Republic of Bangladesh is requesting completion of the second review under the ECF arrangement and access to the third disbursement in the amount of SDR 91.423 million.

To ensure strong performance under the ECF arrangement, we will continue to maintain a close policy dialogue with the IMF and pursue technical assistance, as necessary, from the IMF and other development partners in support of our reform agenda. We will also consult with the IMF on the adoption of measures and in advance of revisions to the policies contained in the MEFP, in accordance with the IMF's policies on such matters. Moreover, we will provide the IMF with information in connection with our progress in implementing the policies and achieving the objectives of the program. We also authorize publication of this Letter of Intent and its attachments, as well as the accompanying staff report.

Sincerely yours,

/s/

Abul Maal Abdul Muhith  
Minister of Finance  
Government of the People's Republic of Bangladesh

Attachments: Memorandum of Economic and Financial Policies and Technical Memorandum of Understanding

# Attachment 1. Bangladesh—Memorandum of Economic and Financial Policies

May 13, 2013

*This memorandum updates the Memorandum of Economic and Financial Policies (MEFP) dated February 10, 2013 under the Government of Bangladesh's three-year Extended Credit Facility (ECF) arrangement, extending quantitative targets, structural benchmarks, and other reform commitments to end-June 2014.*

## I. RECENT DEVELOPMENTS

**1. Economic developments have been broadly in line with our program.** Despite global uncertainties, exports are picking up, remittances remain strong, reserves continue to rise, and inflation pressures have eased over the past year, supported by our restrained fiscal and monetary policies. However, there are signs that political tensions and episodes of violence in recent months may be affecting economic activity. The tragic building collapse in April 2013 in Savar may additionally impact the garment sector. To safeguard the macroeconomic stabilization gains achieved so far, our policies will remain prudent.

## II. FISCAL POLICY AND DEBT MANAGEMENT

**2. Fiscal performance in FY13.** We are on track to meet our FY13 fiscal target of an overall budget deficit (excluding grants) of 4.5 percent of GDP. Tax revenue has fallen short of program indicative targets (ITs), as supplementary duties and other taxes on imports have been lower than expected reflecting slower import growth. However, expenditure has been kept under control, in part through containment of fuel and electricity subsidies following administered fuel price increases. As a result, we have met our performance criterion (PC) on net credit to the central government (NCCG) by the banking system at end-December 2012—the second test date of the ECF arrangement. In the immediate term, we are seeking to buttress revenue collections through more aggressive tax enforcement, focusing on recovering arrears at state owned enterprises (SOEs), curbing leakages from bonded warehouses, and a comprehensive rollout of the Alternative Dispute Resolution mechanism at the customs level. We are also following through with implementation of the revenue measures announced in the FY13 budget.

**3. FY14 fiscal targets.** We are committed to adhering to a programmed budget deficit (excluding grants) target of 4.3 percent of GDP in FY14, anchored by restricting the change in NCCG to Tk 229 billion. While slowing economic activity could make tax revenue targets more challenging, we intend to strengthen revenue collections in FY14 by further removing exemptions and phasing out truncated bases for the value added tax (VAT), and strengthening auditing and compliance. On expenditures, following a series of retail price adjustments over the past 18 months, we will emphasize cost containment measures for fuel and electricity

subsidies. Within the programmed spending envelope, we intend to further boost social-related spending (an IT) and significantly increase capital spending in the Annual Development Program (ADP), including for a continuation of the Padma Bridge project, in order to meet our key social and developmental goals.

**4. Tax and revenue administration reforms.** We remain committed to further progress in modernizing our tax codes, broadening the tax base, and putting in place a sound tax administration framework. To this end, we are making progress towards automating issuance of taxpayer identification numbers (a June 2013 benchmark) and will address any regulatory hurdles to establish a link with the national identification database. We will also advance our VAT implementation plan, which was approved by the Minister of Finance in March 2013. In this regard, we will take steps towards finalizing a contract for a tax automation system by December 2013 (a new benchmark).

**5. Public financial management (PFM) reforms.** We issued guidelines on budget monitoring and reporting under the Public Money and Budget Management Act (a June 2013 benchmark). To strengthen cash and expenditure controls, we will place limits by December 2013 on government borrowing from Bangladesh Bank (BB) through the overdraft facility, and institutionalize cash flow forecasting, establishing a system of quarterly fund releases and developing monthly cash plans consistent with those releases by March 2014. We will also ensure that subsidy costs incurred by Bangladesh's Petroleum Corporation (BPC), Power Development Board (BPDB), and Chemical Industries Corporation (BCIC) are fully funded by timely transfers from the central government to prevent recurrence of the December 2012 breach of the IT on state-owned commercial bank (SOCB) loans to these SOEs.

**6. Subsidy costs and state enterprise reforms.** On energy subsidies, we commit to settle BPC's past-due subsidy-related loans held by the SOCBs through the issuance of special bonds by June 2013. As indicated in the previous paragraph, we remain intent on making timely budgetary transfers to BPC to cover subsidy costs, fully reflecting these in the FY14 Budget. This commitment has been formalized in a plan setting out the schedule of disbursements from the government to BPC through June 2013, and issuing instructions by the Ministry of Finance that BPC meet its foreign exchange needs through June 2013 by direct purchases from BB or the local market to reduce its dependency on short-term expensive borrowing (a prior action). Consistent with this and our overall objective of bringing subsidy costs on-budget, BPC's net short-term external borrowing will continue to be limited in 2013 (an IT). We also remain committed to capping the gap between international and domestic fuel prices to Tk 10 per liter on average to keep fuel subsidy costs in check, further adjusting prices if necessary. Further savings are expected to be identified after completion of efficiency audits of the fuel, electricity, and fertilizer-related SOEs (a June 2013 benchmark). New management has been put in place at Biman Bangladesh Airlines. Completion of a five-year strategic plan for Biman, expected by June 2013, will remain a pre-condition for any future government guarantees tied to aircraft purchases.

**7. External public debt management.** We will focus our external borrowing, including the contracting and guaranteeing of nonconcessional external debt, on high impact projects to meet our critical development needs. In this regard, we will take steps to strengthen our debt management practices ahead of any sovereign bond issuance. We will also formally request, by April 2013, a Debt Management and Performance Assessment (DEMPA) from the World Bank, the results of which will guide our medium-term debt strategy, to be finalized by December 2013. We will establish a technical committee on nonconcessional external borrowing chaired by an Additional Secretary/a Joint Secretary in the Ministry of Finance (a prior action). This committee will meet monthly, beginning immediately after its formation, to monitor and report on nonconcessional borrowing to ensure compliance with the limits set in the ECF program. In addition, the committee will draft revised terms of reference (TOR) for the Cabinet's Hard-Term Loan Committee (HTLC). The notification for the revised TOR will be issued by June 2013 (a new benchmark). The revised TOR will: (i) ensure that the HTLC oversees all nonconcessional borrowing contracts, covering loans, guarantees, and trade credits (excluding normal import financing) by the public sector and for all purposes; and (ii) determine nonconcessionality based on the grant element of the credit, in line with international best practices.

**8. National Savings Certificates (NSC).** A government committee has provided recommendations on reforming the NSC scheme, which were finalized in March 2013, in order to incentivize these retail saving instruments as a source of non-bank government financing. Consistent with the recommendations, we plan to bring taxation of interest on NSCs in line with other government debt instruments by June 2013. For other recommendations we will also work out a time-bound implementation plan.

### III. MONETARY POLICY AND CENTRAL BANK OPERATIONS

**9. Monetary and exchange rate policy.** We will maintain a prudent monetary stance to safeguard macroeconomic stability and keep inflation in check, while allowing adequate space for private credit growth. We exceeded our end-December 2012 net international reserves (NIR) target (a PC) by over US\$3 billion (program definition). Bangladesh Bank will continue to accumulate reserves when market conditions are appropriate, and will step up sterilization of foreign exchange intervention to protect program targets. To further deepen the foreign exchange and government debt markets, in April 2013 we have: (i) raised limits on banks' net open positions; (ii) introduced a two-year Treasury bond to better match investor demand; and (iii) removed the one-year holding period for nonresident holdings of Treasury securities. We also remain committed to gradually reducing the devolvement of Treasury securities in order to restore the integrity of the primary dealer system.

**10. External audit of BB.** We are undertaking steps towards completion of a full external audit of BB by a global audit firm (a December 2013 benchmark). Selection of a global audit firm for these purposes is a prior action for this review.

#### IV. FINANCIAL SECTOR REFORMS

**11. Bank Companies Act (BCA) amendments.** As a centerpiece of our efforts to strengthen the banking system, amendments to the BCA were submitted to Parliament in March 2013. They aim to strengthen the supervisory mandate of BB, limit special treatments for SOCBs, and strengthen commercial banks' governance and accountability. We are also taking steps to revise, through an order to be issued by BB, stock market exposure limits for banks consistent with the BCA amendments. This was a March 2013 benchmark, but given the delay in the passage of the BCA amendments, it has now been rescheduled to June 2013.

**12. Strengthening SOCBs.** Given the deteriorating financial conditions of the SOCBs, our focus will be on measures to strengthen the SOCBs' performance and financial position and increase their operational independence in order to safeguard the banking system and minimize fiscal risks. To this end, we will:

- Revise the MOUs with the four largest SOCBs by May 2013 to set targets for net loan growth based on BB's assessment of the financial position of each bank and consistent with program ceilings.
- Complete special diagnostic examinations of the SOCBs (a June 2013 benchmark), focused on asset quality, liquidity management, and internal audit and control. Their findings will inform further revisions in the MOUs by September 2013 (a new benchmark). These examinations will also inform BB-approved and time-bound restructuring plans to strengthen the financial positions of these banks, to be adopted by the boards of the SOCBs.
- Include, in the FY14 Budget, a provision for recapitalization of the SOCBs as a step to cover their capital shortfalls. The provision of recapitalization funds by the government will be conditional on the formalization of MOUs between the SOCBs and BB reflecting the results of the diagnostics examinations.

**13. Bank resolution framework.** BB is making progress towards adoption of a bank resolution framework (a September 2013 benchmark), having already put in place a number of elements needed for such a framework. Building on this, and to finalize the framework, we are preparing (i) a contingency plan which will detail key steps and responses needed in such situations; and (ii) a lender of last resort policy.

**14. Securities market.** The Demutualization Act was passed by Parliament in April 2013. Consistent with this act, we will continue to work towards the approval by the Bangladesh Securities and Exchange Commission of demutualization models and plans for both Dhaka and Chittagong stock exchanges (a June 2013 benchmark).

#### V. LABOR, TRADE AND INVESTMENT CLIMATE REFORMS

**15. Labor conditions.** Following the Savar tragedy, we are working, in consultation with our international business and development partners, to address safety issues in readymade

garment factories across the country. We have set up a Cabinet committee to scrutinize safety measures in the sector, and are also revising the building code to prevent recurrence of such regrettable loss of life.

**16. Foreign Exchange Regulations Act (FERA) and regulations.** We are continuing work on reviewing the FERA (September 2013 benchmark). As part of this work, BB is preparing draft amendments to the FERA, guided by views of all stakeholders, and we will prepare a strategy paper laying out the roadmap towards exchange control liberalization, assisted by development partners, with a view to facilitate FDI and portfolio investment.

## VI. PROGRAM MONITORING

**17.** Progress under our program will continue to be monitored through PCs and ITs, structural benchmarks, and other necessary measures, with semi-annual program reviews. Quantitative PCs and ITs for June, September, and December 2013 and for March and June 2014 are set out in Table 1 and structural benchmarks are set out in Table 2. They are guided by the attached Technical Memorandum of Understanding, as amended. The third and fourth reviews are expected to take place on or after November 1, 2013 and May 1, 2014.

Table 1: Bangladesh: Quantitative Performance Criteria (PC) and Indicative Targets (IT) 1/

| Budgetary transfers for settling fertilizer subsidy commitments incurred in FY12 (July 2011-June 2012) (cumulative change from the beginning of the fiscal year, in billions of taka), program level  | ...                | ...               | ...       |         | ...                  | ...               | 12        |         | ...                 | ...               | ...       |         | 55                  | ...        | 55                 | 0        | 0                  | 0        | 0                    |          |                    |  |                |  |

1/ Fiscal year begins July 1.

2/ Evaluated at the program exchange rate.

3/ The adjustors are specified in the Technical Memorandum of Understanding. Accordingly, the floor on NIR of BB will be adjusted upward (downward) and the ceiling on NCCG by the banking system and the ceiling on NDA of BB will be adjusted downward (upward) by the amount of support received from bilateral and multilateral donors in excess (short) of the programmed level. The floor on NIR of BB will be adjusted upward and the ceiling on NCCG by the banking system and the ceiling on NDA of BB will be adjusted downward by the amount of suppliers' credit and other short-term financing for oil imports in excess of the programmed level. From March 2013, the ceiling on NCCG by the banking system will be adjusted downward by the amount of budgetary transfers for settling fertilizer subsidy commitments incurred in FY12 short of the programmed level.

4/ The ceiling on NCCG by the banking system excludes special bonds, Tk 27.0 billion issued in FY12 (July 2011-June 2012) and Tk 55.2 billion programmed in FY13 (July 2012-June 2013), by the central government to the state-owned commercial banks for the securitization of loans made by these banks to BPC prior to FY12 to cover shortfalls in government budgetary transfers for fuel-related subsidy costs incurred by BPC.

5/ These performance criteria are applicable on a continuous basis, i.e. the targets are monitored continuously during each period.

6/ Outturns have been revised downward following verification. As a result of new borrowing in January 2013, total new nonconcessional external debt maturing in more than one year, contracted by the public sector and/or guaranteed by the central government or BB since the start of the ECF arrangement was US\$2,436 million as of the completion of the first review on February 20, 2013, against the ceiling of US\$1,000 million. A waiver for the nonobservance of this continuous PC was granted by the IMF Executive Board on February 20, 2013.

7/ Collections by the National Board of Revenue only.

8/ Outstanding funded loans of Sonali Bank, Janata Bank, Agrani Bank, Rupali Bank, and BASIC Bank to BPC, BPDB, and BCIC.

9/ Comprising Sonali Bank, Janata Bank, Agrani Bank, and Rupali Bank.

| Table 2. Bangladesh: Structural Benchmarks (Existing and Proposed)<br>Under the ECF Arrangement   |            |  |  |
|---|------------|--|--|
| Actions   | Date       | Macroeconomic<br>Criticality   | Status   |
| <b>Prior Actions:</b>   |            |  |  |
| Establish a technical committee to monitor external nonconcessional borrowing   |            | To strengthen external public debt management  | Completed.   |
| Selection of a global audit firm for full external audit of Bangladesh Bank (BB) for the financial year 2012–13.  |            | To strengthen internal operations and controls of Bangladesh Bank                                    | Completed.   |
| Adopt a plan setting out the schedule of subsidy cost disbursements to Bangladesh Petroleum Corporation (BPC) through June 2013 and issuing instructions for BPC to procure the associated foreign exchange from BB.  |            | To bring subsidy costs on-budget and reduce BPC's dependency on expensive short-term external credit | Completed.   |
| <b>Structural Benchmarks:</b>   |            |  |  |
| Approval by the Minister of Finance of a value added tax (VAT) implementation plan and timetable and a new organizational structure of the National Board of Revenue (NBR).   | March 2013 | To increase tax revenue  | Met. Approval by the Minister of Finance was granted on March 27, 2013.  |
| Submit amendments to the Banking Companies Act (BCA) to the National Parliament, giving BB the sole legal supervisory and regulatory authority over commercial banks and expanding fit and proper criteria for all commercial banks to all major shareholders, board members, and executive officers. | March 2013 | To strengthen risk management and improve bank governance  | Met. Submitted to Parliament Secretariat on March 31, 2013.  |
| Issue a BB order, consistent with the amended BCA, establishing a limit on a commercial bank's shareholdings in the stock market to 25 percent of its total regulatory capital.   | June 2013  | To strengthen banks' financial position  | Not met as scheduled for March 2013. Rescheduled to June 2013 because the order legally requires passage of amendments to BCA by Parliament. |
| Automate taxpayer identification number issuance, including links to the national identification number system.   | June 2013  | To increase tax revenue  |  |

Under the ECF Arrangement (concluded)**

| Actions   | Date           | Macroeconomic<br>Criticality                   | Status  |
|---|----------------|--|---|
| <b>Structural Benchmarks (continued):</b>   |                |  |   |
| Approval by the Bangladesh Securities and Exchange Commission of a demutualization model and plan for the Dhaka and Chittagong stock exchanges.   | June 2013      | To strengthen the financial sector             |   |
| Issue guidelines and procedures on budget monitoring and reporting in accordance with the Public Money and Budget Management Act.   | June 2013      | To strengthen budget monitoring and controls   | Met. Guidelines issued in March 2013.                 |
| Complete efficiency audits by the Office of the Auditor General of the Bangladesh Petroleum Corporation, Bangladesh Power Development Board and Bangladesh Chemical Industries Corporation. | June 2013      | To minimize fiscal transfers and risks         |   |
| Complete special diagnostic examinations by BB at the four largest state-owned commercial banks focused on asset quality, liquidity management, and internal audit and controls.            | June 2013      | To strengthen financial sector soundness       |   |
| Issue notification for revised terms of reference for the Cabinet's Hard Term Loan Committee  | June 2013      | To strengthen external public debt management  | New benchmark under the second review of the program. |
| Finalize a bank resolution framework, comprising a contingency plan and lender of last resort policy at BB.   | September 2013 | To reduce systemic risks                       |   |
| Complete a review of the Foreign Exchange Regulation Act.   | September 2013 | To strengthen the trade and investment climate |   |
| Revise the memoranda of understanding with the four largest state-owned commercial banks to address key shortcomings identified by the special diagnostic examinations.                     | September 2013 | To strengthen the banking system               | New benchmark under the second review of the program. |
| Engage and complete a full external audit for the financial year of 2012-13 of BB by a global audit firm.   | December 2013  | To strengthen internal operations and controls |   |
| Selection of a vendor for a tax automation system for VAT   | December 2013  | To strengthen tax revenue administration       | New benchmark under the second review of the program. |

## Attachment 2. Bangladesh—Technical Memorandum of Understanding

May 13, 2013

1. This Technical Memorandum of Understanding (TMU) defines the variables subject to quantitative performance criteria and indicative targets under the Extended Credit Facility (ECF) arrangement, as specified in the Memorandum of Economic and Financial Policies (MEFP). It also describes the methods to be used to assess program performance and information requirements to ensure adequate monitoring of the targets.
2. Under the ECF arrangement, the program exchange rate is Bangladesh taka (Tk) 74.23 per U.S. dollar, as agreed at the time of approval of the ECF arrangement in April 2012. Foreign currency accounts denominated in currencies other than the U.S. dollar and monetary gold will first be valued in U.S. dollars as at the exchange rates and gold prices prevailing on June 30, 2011, and then be converted to Bangladesh taka.
3. The data listed in Table 1 will be provided for monitoring performance under the program based on data templates agreed with IMF staff. Under each section, reporting responsibilities are indicated. The best available data will be submitted, so that any subsequent data revisions will not lead to a breach of quantitative performance criteria or benchmarks. All revisions to data will be promptly reported to IMF staff.

### I. QUANTITATIVE PERFORMANCE CRITERIA AND INDICATIVE TARGETS

4. Quantitative performance criteria for end-June 2013 and end-December 2013 and quarterly indicative targets from end-June 2013 through end-June 2014 are set out in Table 1 of the Memorandum of Economic and Financial Policies. The continuous performance criteria for each specific period are also set out in this table, and will be monitored continuously during these periods.
5. Performance criteria under the ECF arrangement have been established with respect to a:
  - Floor on the level of net international reserves of Bangladesh Bank (BB), calculated as an end-of-period stock;
  - Ceiling on the level of net domestic assets of BB, calculated as an end-of-period stock; and
  - Ceiling on the change in net credit to the central government from the banking system, calculated as a cumulative flow from the beginning of the fiscal year (FY) (i.e., FY12 is July 1, 2011–June 30, 2012).

6. Performance criteria applicable on a continuous basis have been established with respect to a:
- Ceiling on new medium- and long-term nonconcessional external debt (maturing in more than one year) contracted by the public sector and/or guaranteed by the central government or BB, calculated in cumulative terms from December 31, 2011;
  - Ceiling on new short-term nonconcessional external debt (maturing in one year or less) contracted by the public sector and/or guaranteed by the central government or BB, calculated in cumulative terms from December 31, 2011; and
  - Ceiling on the accumulation of new external payment arrears by the public sector, calculated in cumulative terms from December 31, 2011.
7. Indicative targets have been established with respect to a:
- Ceiling on the level of reserve money, calculated as an end-of-period stock;
  - Ceiling on the net change in suppliers' credit and other short-term financing for oil imports, calculated in cumulative terms from June 30, 2011;
  - Ceiling on the net change in funded loans made by the state-owned commercial banks (SOCBs) to Bangladesh Petroleum Corporation (BPC), Bangladesh Power Development Board (BPDB) and Bangladesh Chemical Industries Corporation (BCIC), calculated in cumulatively from the beginning of the fiscal year;
  - Floor on tax revenue of central government, calculated cumulatively from the beginning of the fiscal year; and
  - Floor on social-related spending by central government, calculated cumulatively from the beginning of the fiscal year.
  - A ceiling (aggregate) on net loans and advances of the four largest SOCBs (Agrani, Janata, Rupali, and Sonali).
8. Adjustors to the measurement of performance criteria are (i) budget support to the central government from bilateral and multilateral agencies, calculated cumulatively from the beginning of the fiscal year; (ii) net lending by the government to the BPC and BPDB calculated cumulatively from the beginning of the fiscal year (this adjustor will be removed from March 2013); (iii) suppliers' credit and other short-term financing for oil imports; and (iv) budgetary transfers for settling fertilizer subsidy commitments incurred in FY12 (this adjustor will be introduced from March 2013).

## II. INSTITUTIONAL DEFINITIONS

9. The central government is defined as all budgetary units of the government of Bangladesh. It captures balances in the Treasury accounts and for special projects outside the Treasury accounts (as will be measured by government lending funds reported in the monetary accounts).
10. The public sector is defined as the central government, BB, nonfinancial public enterprises, departments, and autonomous and semi-autonomous bodies of all ministries and divisions.
11. Deposit money banks (DMBs) include commercial banks (state-owned, Islamic, private, and foreign-owned) and specialized banks, on which BB compiles data for the monthly monetary survey.
12. Nonbank claims on the central government represent the sum of cash receipts from sales of National Savings Certificates and Treasury bill and bond holdings outside BB and the DMBs, as reported by National Savings Directorate and BB's Debt Management Department.

## III. MONETARY AGGREGATES

### A. Reserve Money

13. A ceiling applies on the level of reserve money, which comprises currency issued by BB (excluding BB holdings of currency) plus deposits of DMBs held at BB. Reserve money excludes DMBs' foreign currency clearing accounts at BB and nonbank deposits at BB.

### B. Net International Reserves of Bangladesh Bank

14. A floor applies to the level of net international reserves (NIR) of BB. The floor on NIR of BB will be adjusted upward (downward) by the amount of budget support from bilateral and multilateral agencies in excess (short) of the programmed level. The floor on NIR of BB will be adjusted upward by the amount of suppliers' credit and other short-term financing for oil imports in excess of the programmed level.
15. For program monitoring purposes, NIR of BB is defined as gross international reserves (GIR) less international reserve liabilities. For program monitoring purposes, the stock of foreign assets and foreign liabilities of BB shall be valued at the program exchange rate in U.S. dollars, as described in paragraph 2.
16. Gross international reserves of BB are defined as the sum of:
- Foreign currency assets in convertible currencies held abroad and as vault cash that are under the direct and effective control of BB, readily available for intervention in the foreign exchange market or the direct financing of balance of payments imbalances, and which have received investment grade rating by at least two of the following three rating agencies: Moody's, (a rating of at least Baa), Standard & Poors (a rating of at least BBB-) and Fitch (a rating of at least BBB-), or held with an investment-grade institution;

- The reserve position of Bangladesh in the IMF;
- Holding of SDRs; and
- Monetary gold.

Excluded from the definition of GIR are:

- Foreign currency assets that are in any way encumbered or pledged, including, but not limited to, reserve assets used as collateral or guarantee for third-party external liabilities, BB's blocked account with the Central Bank of Iraq, and BB's deposits with Rupali Bank (Pakistan) and with Sonali Bank (U.K.) in relation to guarantees provided to Biman Bangladesh Airlines;
- Foreign currency assets in nonconvertible currencies and precious metals other than gold, including BB's Silver Acquisition Account;
- Non-investment grade foreign currency sovereign bonds;
- Foreign currency claims on entities incorporated in Bangladesh, including funds lent out through the Foreign Exchange Overdraft Facility (FXOD) and funds invested in offshore banking units (OBUs) of domestic banks and subsidiaries or branches of international banks in Bangladesh;
- Any other foreign currency claims on residents; and
- Capital subscriptions in international institutions.

17. International reserve liabilities of BB are defined as the sum of:

- All outstanding liabilities of Bangladesh to the IMF; and
- Foreign currency liabilities in convertible currencies to residents and nonresidents, including liabilities to the Asian Clearing Union; the Foreign Currency Clearing Account (i.e., the total amount of DMBs' foreign currency deposits held at BB) ; foreign currency deposits held by the central government and state-owned enterprises at BB; and forward contracts, foreign currency swaps, and other futures market contracts.

### C. Net Domestic Assets of Bangladesh Bank

18. A ceiling applies to the level of net domestic assets (NDA) of BB. The ceiling on NDA of BB will be adjusted downward (upward) by the amount of budget support from bilateral and multilateral agencies in excess (short) of the programmed level. The ceiling on NDA of BB will be adjusted downward by the amount of suppliers' credit and other short-term financing for oil imports in excess of the programmed level.

19. For program monitoring purposes, NDA of BB is defined as the difference between reserve money and the sum of NIR of BB and other net foreign assets (NFA) of BB valued in taka using the program exchange rates specified in paragraph 2. Any revisions to the historical stock of reserve money based on changes to the accounting treatment of the profit/loss account of BB will be notified to the IMF immediately and used to adjust monetary aggregates by an equivalent amount, as deemed appropriate. Other NFA of BB includes:

- Foreign assets related to holdings of foreign currency deposits and securities not included in NIR of BB, and loans, shares, financial derivatives, or other accounts receivable with nonresidents (including BB's blocked account with the Central Bank of Iraq and deposits with Rupali Bank (Pakistan) and with Sonali Bank (U.K.) in relation to guarantees provided to Biman Bangladesh Airlines); holdings of noninvestment grade foreign currency bonds; and other foreign assets that are not included in NIR of BB, as defined in Section III. B (including the Silver Acquisition Account); and
- Other foreign liabilities that are not included in international reserve liabilities of BB, as defined in Section III. B.

Other NFA does not include funds invested in OBUs of resident domestic banks and subsidiaries or branches of resident foreign banks in Bangladesh. These funds are included as a part of NDA of BB.

#### **D. Net Credit to the Central Government by the Banking System**

20. A ceiling applies on the change in net credit to the central government (NCCG) by the banking system measured cumulatively from the beginning of the fiscal year. The ceiling on NCCG by the banking system will be adjusted upward (downward) by the amount of budget support from bilateral and multilateral agencies short of (in excess of) the programmed level. The ceiling on NCCG by the banking system will be adjusted downward by the amount of suppliers' credit and other short-term financing for oil imports in excess of the programmed level and by the amount of net lending by the central government to the BPC and the BPDB short of the programmed level. From March 2013, the adjustor on NCCG on the amount of net lending by the central government to the BPC and BPDB short of the programmed level will be removed. In addition, from March 2013, the ceiling on NCCG by the banking system will be adjusted downward by the amount of budgetary transfers for settling fertilizer subsidy commitments incurred in FY12 short of the programmed level. The ceiling on NCCG by the banking system excludes special bonds issued by the central government to the SOCBs for the securitization of loans made by these banks to the BPC prior to FY12 to cover shortfalls in government budgetary transfers for fuel subsidy-related costs incurred by the BPC.

21. For program monitoring purposes, NCCG by the banking system is defined as the sum of net claims of BB and DMBs on the central government. For program monitoring purposes, from March 2013, NCCG by the banking system will be defined to exclude deposits of and credit to autonomous and semi-autonomous bodies of the government (Table 2 of the TMU).

### **E. Funded Loans by State-Owned Commercial Banks to State-Owned Enterprises**

22. A ceiling applies on the net change in funded loans by selected banks to state-owned enterprises. Funded loans are defined as cash lending by Sonali Bank, Janata Bank, Agrani Bank, Rupali Bank, and BASIC Bank to BPC, BPDB and BCIC (see Table 3).

## **IV. FISCAL AGGREGATES**

### **A. Tax Revenue**

23. A floor applies on tax revenue of central government measured cumulatively from the beginning of the fiscal year.

24. For program monitoring purposes, tax revenue is defined as collections by the National Bureau of Revenue that have been transferred to the Controller General of Accounts.

### **B. Social-Related Spending**

25. A floor applies on social-related spending by central government cumulatively from the beginning of the fiscal year.

26. For program monitoring purposes, social spending comprises all spending categories of the Ministry of Primary and Mass Education; Ministry of Education; Ministry of Health, Family, and Welfare; and all expenditures on social safety net programs in the budget economic codes listed in Table 4. Safety net programs hosted in one of these ministries already included in this definition will be deducted from the total to avoid double counting.

## **V. EXTERNAL DEBT**

### **A. Medium- and Long-Term External Debt**

27. A continuous ceiling applies to new nonconcessional external debt with nonresidents with original maturities of more than one year contracted by the public sector and/or guaranteed by the central government or BB. The ceiling applies to debt and commitments contracted or guaranteed for which value has not yet been received. This applies to private debt for which official guarantees have been extended and which, therefore, constitutes a contingent liability of the central government or BB.

28. For program monitoring purposes, the definition of debt is set out in Point 9 of the Guidelines on Performance Criteria with Respect to External Debt in Fund Arrangement Executive Board Decision No. 6230-(79/140), as subsequently amended, including by Executive Board Decision No. 14416-(09-91), effective December 1, 2009 (see Annex I). External debt is defined by the residency of the creditor, excluding any taka-denominated treasury bonds and any U.S. dollar-denominated bonds issued by the central government's Directorate of National Savings that are held by nonresidents (see TMU paragraph 29).

29. Excluded from the ceiling are (i) the use of IMF resources; (ii) concessional debts; (iii) debts incurred to restructure, refinance, or prepay existing debts, to the extent that such debt is incurred on more favorable terms than the existing debt and up to the amount of the actually restructured/refinanced/prepaid debt; (iv) any taka-denominated treasury bonds held by nonresidents; and (v) any U.S. dollar-denominated bonds issued by the central government's Directorate of National Savings that are held by nonresidents.

30. For program purposes, the guarantee of a debt arises on any explicit legal obligation of the central government or BB to service debt in the event of nonpayment by the main obligor (involving payments in cash or in kind).

31. For program purposes, a debt is concessional if it includes a grant element of at least 35 percent, calculated as follows: the grant element of a debt is the difference between the net present value (NPV) of debt and its nominal value, expressed as a percentage of the nominal value of the debt. The NPV of debt at the time of its contracting is calculated by discounting the future stream of payments of debt service due on this debt. The discount rates used for this purpose are the currency specific commercial interest reference rates (CIRRs), published by the Organization for Economic Cooperation Development (OECD). For debt with a maturity of at least 15 years, the ten-year-average CIRR will be used to calculate the NPV of debt and, hence, its grant element. For debt with a maturity of less than 15 years, the six-month average CIRR will be used. To both the ten-year and six-month averages, the same margins for differing repayment periods as those used by the OECD would continue to be added (0.75 percent for repayment periods of less than 15 years, 1 percent for 15 to 19 years, 1.15 percent for 20 to 29 years, and 1.25 percent for 30 years or more).

## **B. Short-Term External Debt**

32. A continuous ceiling applies to new nonconcessional debt with nonresidents with original maturities of up to and including one year contracted by the public sector and/or guaranteed by the central government or BB. The ceiling applies to debt and commitments contracted or guaranteed for which value has not yet been received. This applies to private debt for which official guarantees have been extended and which, therefore, constitute a contingent liability of the central government or BB.

33. For program monitoring purposes, the definition of debt is set out in Point 9 of the Guidelines on Performance Criteria with Respect to External Debt in Fund Arrangement approved by the Executive Board Decision No. 6230-(79/140), as subsequently amended, including by Executive Board Decision No. 14416-(09-91), effective December 1, 2009 (see Annex I). External debt is defined by the residency of the creditor, excluding any taka-denominated treasury bills or BB bills held by nonresidents (see TMU paragraph 34).

34. Excluded from the ceiling are (i) debts classified as international reserve liabilities of BB; (ii) debts incurred to restructure, refinance, or prepay existing debts, to the extent that such debt is incurred on more favorable terms than the existing debt and up to the amount of the actually restructured/refinanced/prepaid debt; (iii) taka-denominated treasury bills and BB bills held by

nonresidents; (iv) concessional debts; (v) normal import financing; (vi) suppliers' credit and other short-term financing for oil imports from the Islamic Development Bank (IsDB) and other official entities; and (vii) forward contracts, foreign currency swaps, other futures market contracts, and short-term liabilities of the banking system. A financing arrangement for imports is considered to be "normal" when the credit is self-liquidating.

### **C. Suppliers' Credit and Other Short-Term Financing for Oil Imports**

35. A ceiling applies on the net change in suppliers' credit and other short-term financing for oil imports.

36. For program monitoring purposes, suppliers' credit is defined in Annex I. Other short-term financing for oil imports comprises financing received for this purpose from the IsDB and other official entities and through syndicated loans, which is contracted by the public sector and/or guaranteed by the central government or BB.

## **VI. EXTERNAL PAYMENT ARREARS**

37. A continuous ceiling applies on the accumulation of new external payments arrears by the public sector.

38. For program monitoring purposes, external payments arrears comprise external debt and debt-service obligations (principal and interest) that have not been paid at the time they are due, as specified in the contractual agreements. However, for program purposes, overdue debt and debt-service obligations that are in dispute will not be considered as external payment arrears.

**Table 1. Bangladesh: Data Reporting Requirements**

| Item  | Reporting agency  | Periodicity  |
|---|---|--|
| <b>I. Monetary, exchange rate, and interest rate data</b>   | <b>Bangladesh Bank (BB)</b>                             |  |
| Daily exchange rates (taka per U.S. dollar)—weighted-average, open market (buy and sell rates), interbank (high and low rates), and BAFEDA member rates.  | BB  | Daily, next working day                                    |
| Daily foreign exchange interbank market trading spot, forward, and swap volume  | BB  | Daily, next working day                                    |
| Net open position of deposit money banks  | BB  | Daily, next working day                                    |
| Stock of gross international reserves (GIR), Asian Currency Unit liabilities, Foreign Exchange Clearing Account balances, Foreign exchange overdraft balance (FXOD) and exchange rate valuation changes to GIR. | BB  | Daily, next working day                                    |
| Detailed data on the composition of GIR, including currency composition   | BB  | Daily, next working day                                    |
| Stock of GIR, net international reserves (NIR), NFA including subcomponents, both at program and market exchange rates.   | BB  | Daily, next working day                                    |
| Stock of noninvestment grade bonds by name of issuer, investment rating, and currency composition   | BB  | Monthly, within two weeks of the end of each month         |
| Sales and purchases of foreign exchange by BB   | BB  | Daily, next working day                                    |
| Daily bank and call money market rates  | BB  | Daily, next working day                                    |
| Daily BB repo and reverse repo rates and interbank repo and reverse repo rates (weighted average yields)  | BB  | Daily, next working day                                    |
| Daily BB repo and reverse repo and interbank repo and reverse repo trading volumes (billions of taka)   | BB  | Daily, next working day                                    |
| Daily volume of open market operations (sales and purchases) by BB (billions of taka)   | BB  | Daily, next working day                                    |
| Stock of reserve money and its components   | BB  | Daily, next working day                                    |
| Excesses/shortfalls of DMBs' reserves   | BB  | Daily, next working day                                    |
| Bangladesh Bank's balance sheet and off-balance items by currency representation  | BB  | Monthly, within two weeks of the end of each month         |
| Treasury bill and bond auction reports, including range of bids submitted by primary dealers  | BB  | Weekly, within one week of the end of each week            |
| Weekly retirement of government securities and outstanding balances of Treasury bills and bonds   | BB  | Weekly, within one week of the end of each week            |
| Bangladesh Bank bills and auction reports   | BB  | Weekly, within one week of the end of each week            |
| Balance sheet of BB (form 10 G)   | BB  | Monthly, within six weeks of the end of each month         |
| Balance sheet (aggregate) of commercial banks (form 20 G)   | BB  | Monthly, within six weeks of the end of each month         |
| Monetary survey (form 30 G)   | BB  | Monthly, within six weeks of the end of each month         |
| Foreign assets and liabilities of BB  | BB  | Monthly, within six weeks of the end of each month         |
| Foreign exchange cash flow of BB  | BB (Foreign Reserve and Treasury Management Department) | Monthly, within five working days of the end of each month |

**Table 1. Bangladesh: Data Reporting Requirements (continued)**

| Item  | Reporting agency  | Periodicity  |
|---|---|--|
| <b>II. Fiscal data</b>  | <b>Ministry of Finance(MOF)</b>                                   |  |
| Fiscal outturn, including financing of the overall fiscal balance   | MOF (Finance Division (FD))/ Controller General of Accounts (CGA) | Monthly, within six weeks of the end of each month                               |
| Revenue, by type of tax and nontax revenues (with main subheadings)   | MOF (FD)/CGA  | Monthly, within six weeks of the end of each month                               |
| Privatization receipts  | MOF (FD)/CGA  | Monthly, within six weeks of the end of each month                               |
| National Bureau of Revenue collections (by type of tax and subheadings)   | NBR   | Monthly, within six weeks of the end of each month                               |
| Recurrent expenditure, including spending on pay and allowances, goods and services, interest payments (domestic and foreign), subsidies, transfers, and block allocations (with main subheadings)                      | MOF (FD)/CGA  | Monthly, within six weeks of the end of each month                               |
| Breakdown of subsidies by main categories (agriculture, fertilizer, food, exports, and others)  | MOF (FD)/CGA  | Monthly, within six weeks of the end of each month                               |
| Outstanding payments due to settle commitments arising from fertilizer subsidies  | MOF(FD)/CGA)  | Monthly, within six weeks of the end of each month                               |
| Fertilizer subsidy commitments in FY13, both actual and projections, by regularly monitoring the trade gap between import costs and sales revenue as per the monitoring framework.                                      | MOF (FD)  | Monthly, within six weeks of the end of each month                               |
| Social spending (see Table 4)   | MOF (FD)/CGA  | Quarterly, within six weeks of the end of each quarter                           |
| Food account surplus/deficit  | MOF (FD)/CGA  | Monthly, within six weeks of the end of each month (quarterly for detailed data) |
| Annual Development Program (ADP) expenditure funded by (i) the central government and (ii) foreign grants and loans, included in the budget, including separately for Padma Bridge (domestically and externally funded) | MOF (FD)/CGA  | Monthly, within six weeks of the end of each month (quarterly for detailed data) |
| Non-ADP capital spending (including main subheadings) and net lending (including by receipts and payments, including a breakdown by state-owned enterprises (SOEs))   | MOF (FD)/CGA  | Monthly, within six weeks of the end of each month                               |
| Extraordinary expenditures (by type)  | MOF (FD)/CGA  | Monthly, within six weeks of the end of each month                               |
| Foreign financing, comprising (i) disbursements and amortization of program and project loans; and (ii) changes in external debt arrears, classified into principal and interest arrears                                | MOF (FD)/CGA  | Monthly, within six weeks of the end of each month                               |
| Disbursements of program and project grants   | MOF (FD)/CGA  | Monthly, within six weeks of the end of each month                               |
| Foreign financing, comprising (i) disbursements and amortization of program and project loans; and (ii) changes in external debt arrears, classified into principal and interest arrears                                | MOF (Economic Relations Division (ERD))                           | Monthly, within four weeks of the end of each month                              |
| Disbursements of program and project grants by donor  | MOF (ERD)   | Monthly, within four weeks of the end of each month                              |
| Domestic financing, comprising (i) borrowing from and repayment to BB, DMBs, and nonbanks; (ii) changes in deposits held in BB, DMBs, and other deposit-taking institutions (see Table 2)                               | MOF(FD)/CGA/BB  | Monthly, within six weeks of the end of each month                               |

**Table 1. Bangladesh: Data Reporting Requirements (continued)**

| Item   | Reporting agency                                 | Periodicity  |
|--|--|--|
| Balancing items reported by the CGA  | MOF (FD)/CGA                                     | Monthly, within six weeks of the end of each month                                 |
| <b>III. State-owned enterprise data</b>  | <b>MOF</b>                                       |  |
| See Table 3 on key financial indicators for Bangladesh Power Development Board (BPDB), Bangladesh Petroleum Corporation (BPC), and Bangladesh Chemical Industries Corporation (BCIC).  | MOF (FD/SOE Monitoring Unit)/BPC                 | Quarterly, within six weeks of the end of each quarter                             |
| <b>IV. Debt data</b>   | <b>MOF/BB/National Savings Directorate (NSD)</b> |  |
| New external debt obligations contracted and/or guaranteed (concessional and nonconcessional) by the government of Bangladesh, BB, nonfinancial public enterprises, departments and autonomous and semi-autonomous bodies of all ministries and divisions (i.e. the public sector), including details on the amounts, terms, and conditions of each new obligation | MOF (ERD)/BB                                     | Monthly, within six weeks of the end of each month                                 |
| Total amount disbursed for each loan and guarantee included under the ceiling on nonconcessional external debt   | MOF (FD)   | Quarterly, within six weeks of the end of each quarter                             |
| Stock of outstanding external debt (short-term and medium- and long-term obligations) of the public sector, by creditor (in original currency and U.S. dollars)  | MOF (ERD)/BB                                     | Quarterly, within eight weeks of the end of the quarter                            |
| Stock of arrears on external debt contracted or guaranteed by the public sector by creditor (in original currency and U.S. dollars)  | MOF (ERD)/BB                                     | Monthly, within six weeks of the end of each month                                 |
| Stock of domestic debt, including the outstanding balance of Treasury bills, Treasury bonds, as well as breakdown of instruments of the National Savings Directorate (i.e. National Savings Certificates)  | MOF (FD)/BB/NSD                                  | Monthly, within six weeks of the end of each month                                 |
| Projections of daily individual oil-related payments by commercial banks.  | BB   | Monthly, two weeks in advance of the beginning of each month                       |
| <b>V. Financial data</b>   | <b>BB</b>  |  |
| Financial soundness indicators of DMBs   | BB (Department of Off-Site Supervision (DOS))    | Quarterly, within eight weeks of the end of the quarter                            |
| Bank-by-bank data for the DMBs on credit to the private sector, as reported to BB for the purpose of compiling the monetary survey   | BB   | Monthly, within six weeks of the end of each month                                 |
| Bank-by-bank data for the DMBs on deposit and advance position   | BB   | Weekly data reported on a monthly basis, within two weeks of the end of each month |
| Compliance of state-owned commercial banks (SOCBs) with memoranda of understanding   | BB (DOS)   | Quarterly, within six weeks of the end of the quarter                              |
| Net loans and advances and components for each of the four largest SOCBs (Agrani, Janata, Rupali, and Sonali).   | BB   | Quarterly, within six weeks of the end of each quarter                             |
| External borrowing in foreign currency by each SOCB from nonresident institutions  | BB   | Within a week from the date of approval by BB                                      |
| Total capital market exposure and total share holding (in percent of total liabilities) of DMBs, and their exposures via subsidiaries  | BB (DOS)   | Monthly, within six weeks of the end of each month                                 |
| Risk-weighted capital asset ratios and asset quality indicators of DMBs  | BB (DOS)   | Quarterly, within six weeks of the end of each month                               |
| Stock of loans extended to SOEs (BPC, BPDB, BCIC) by SOCBs (Sonali, Agrani, Janata, Rupali) and BASIC bank, both funded and unfunded loans   | BB (DOS)   | Monthly, within four weeks of the end of each month                                |

**Table 1. Bangladesh: Data Reporting Requirements (concluded)**

| <b>Item</b>  | <b>Reporting agency</b>                      | <b>Periodicity</b>                                   |
|--|--|--|
| <b>VI. External data</b>   | <b>BB/Other agencies</b>                     |  |
| Detailed balance of payments   | BB   | Monthly, within six weeks of the end of each month   |
| Export data by goods   | Export Promotion Bureau                      | Monthly, within four weeks of the end of each month  |
| Import letters of credit (settlement, opening, and outstanding)                | BB   | Monthly, within four weeks of the end of each month  |
| Remittances and manpower exports   | BB/Bureau Manpower, Employment, and Training | Monthly, within two weeks of the end of each month   |
| <b>VII. Other data</b>   | <b>Bangladesh Bureau of Statistics (BBS)</b> |  |
| National accounts, by expenditure and by production, in nominal and real terms | BBS  | Annual, within three months of the end of each year  |
| Overall consumer price index   | BBS  | Monthly, within six weeks of the end of each month   |
| Industrial production statistics   | BBS  | Monthly, within eight weeks of the end of each month |

**Table 2. Bangladesh: Components of Domestic Bank Financing of the Central Government**

| A new data reporting format is being established, as follows:   |                         |                    |
|---|-------------------------|--------------------|
| <b>Item</b> (in Tk millions)  | <b>Reporting agency</b> | <b>Periodicity</b> |
| Bank financing  | Bangladesh Bank         | All quarterly      |
| Bangladesh Bank   |                         |                    |
| Change in claims on government (excluding change in claims on autonomous and semi-autonomous bodies)                    |                         |                    |
| <i>Of which:</i> Change in ways and means balance   |                         |                    |
| Change in overdraft   |                         |                    |
| Change in overdraft block   |                         |                    |
| Change in holdings of Treasury bills and bonds  |                         |                    |
| Change in government currency liabilities   |                         |                    |
| Change in accrued interest  |                         |                    |
| Change in government deposits and lending funds (excluding change in deposits of autonomous and semi-autonomous bodies) |                         |                    |
| Change in government deposits   |                         |                    |
| Change in government lending funds  |                         |                    |
| <i>Memorandum items:</i>  |                         |                    |
| Change in credit to autonomous and semi-autonomous bodies   |                         |                    |
| Change in deposits of autonomous and semi-autonomous bodies   |                         |                    |
| Commercial banks  |                         |                    |
| Change in claims on government (excluding change in claims on autonomous and semi-autonomous bodies)                    |                         |                    |
| <i>Of which:</i> change in holdings of Treasury bills and bonds   |                         |                    |
| Change in advances and bills to ministries (of food and others)   |                         |                    |
| Change in accrued interest  |                         |                    |
| Change in government deposits and lending funds (excl. change in deposits of autonomous and semi-autonomous bodies)     |                         |                    |
| Change in government deposits   |                         |                    |
| Change in government lending funds  |                         |                    |
| <i>Memorandum items:</i>  |                         |                    |
| Change in credit to autonomous and semi-autonomous bodies   |                         |                    |
| Change in deposits of autonomous and semi-autonomous bodies   |                         |                    |

**Table 3. Bangladesh: Template for Key Financial Indicators of Bangladesh Petroleum Corporation (BPC), Bangladesh Power Development Board (BPDB), and Bangladesh Chemical Industries Corporation (BCIC)**

| Name of company (BPC, BPDB, or BCIC)  | Periodicity   |             |
|---|---------------|-------------|
| <b>Item</b> (in millions of taka)   | All quarterly |             |
| Tax payments, due to the National Bureau of Revenue (NBR)   |               |             |
| Tax payments, paid to the NBR   |               |             |
| Debt service payments, due to the government  |               |             |
| Debt service payments, paid to the government   |               |             |
| Quarterly profit (loss) reported by company   |               |             |
| Transfers received from the budget  |               |             |
| New interest-bearing loans received from the budget   |               |             |
| Outstanding stock of funded loans from state-owned commercial banks (SOCBs)   |               |             |
| <b>Additional items (for BPC only)</b>  |               | All monthly |
| <i>Financing requirements:</i> (in millions of taka, unless otherwise indicated)  |               |             |
| Oil import costs  |               |             |
| Costs of operating BPC  |               |             |
| Repayments of SOCB loans  |               |             |
| Repayments to Islamic Development Bank (IsDB) (in millions of U.S. dollar)  |               |             |
| Repayment of deferred payments (other suppliers' credit) (in millions of U.S. dollar)   |               |             |
| Repayment of syndicated loans   |               |             |
| Increase in assets (inventories, cash, etc.)  |               |             |
| Other   |               |             |
| <i>Sources of financing:</i> (in millions of taka, unless otherwise indicated)  |               |             |
| Sales revenue   |               |             |
| Other income  |               |             |
| Gross disbursements of loans from SOCBs   |               |             |
| Gross disbursements from IsDB (in millions of U.S. dollar)  |               |             |
| Gross disbursements of deferred payments (other suppliers' credit) (in millions of U.S. dollar)   |               |             |
| Gross disbursement of syndicated loans  |               |             |
| Net lending from the government   |               |             |
| Increase in payables  |               |             |
| <i>Other items:</i>   |               |             |
| Exchange rate imputed for estimated outturns (taka per U.S. dollar)   |               |             |
| Demand volumes of petroleum products (kerosene (SKO), diesel (HSD), furnace oil (FO), petrol (MS), octane (HOBC), and jet fuel (JET-A-1)) |               |             |

**Table 4. Bangladesh: Safety Net Programs**

|  | <b>Programs</b>  | <b>Name of Ministry</b>                 | <b>Code</b> |
|--|--|---|-------------|
| <b>(A.1) Cash Transfer (Allowances) Programs &amp; Other Activities:</b> |  |   |             |
| (A.1.1) Social Protection  |  |   |             |
| 1  | Old Age Allowance  | Ministry of Social Welfare              | 3960        |
| 2  | Allowances for the Widow, Deserted and Destitute Women               | Ministry of Social Welfare              | 3965        |

## Annex I. Guidelines on Performance Criteria with Respect to External Debt

Excerpt from Executive Board Decision No. 6230-(79/140), subsequently amended, including by Executive Board Decision No. 14416-(09-91), effective December 1, 2009.

9. (a) For the purpose of this guideline, the term “debt” will be understood to mean a current, i.e., not contingent, liability, created under a contractual arrangement through the provision of value in the form of assets (including currency) or services, and which requires the obligor to make one or more payments in the form of assets (including currency) or services, at some future point(s) in time; these payments will discharge the principal and/or interest liabilities incurred under the contract. Debts can take a number of forms, the primary ones being as follows:

(i) loans, i.e., advances of money to the obligor by the lender made on the basis of an undertaking that the obligor will repay the funds in the future (including deposits, bonds, debentures, commercial loans and buyers’ credits) and temporary exchanges of assets that are equivalent to fully collateralized loans under which the obligor is required to repay the funds, and usually pay interest, by repurchasing the collateral from the buyer in the future (such as repurchase agreements and official swap arrangements);

(ii) suppliers’ credits, i.e., contracts where the supplier permits the obligor to defer payments until sometime after the date on which the goods are delivered or services are provided; and

(iii) leases, i.e., arrangements under which property is provided which the lessee has the right to use for one or more specified period(s) of time that are usually shorter than the total expected service life of the property, while the lessor retains the title to the property. For the purpose of the guideline, the debt is the present value (at the inception of the lease) of all lease payments expected to be made during the period of the agreement excluding those payments that cover the operation, repair or maintenance of the property.

(b) Under the definition of debt set out in point 9 (a) above, arrears, penalties, and judicially awarded damages arising from the failure to make payment under a contractual obligation that constitutes debt are debt. Failure to make payment on an obligation that is not considered debt under this definition (e.g., payment on delivery) will not give rise to debt.

## SECOND REVIEW UNDER THE THREE-YEAR ARRANGEMENT UNDER THE EXTENDED CREDIT FACILITY AND REQUEST FOR MODIFICATION OF PERFORMANCE CRITERIA—DEBT SUSTAINABILITY ANALYSIS UPDATE

Approved By  
**Markus Rodlauer and Peter Allum (IMF)**  
**Ernesto May and Jeffrey Lewis (IDA)**

Prepared by  
International Monetary Fund  
International Development Association

*This debt sustainability analysis (DSA) updates the joint IMF/IDA DSA from January 30, 2013, reflecting the most recent macroeconomic developments and borrowing needs.<sup>1</sup> In line with interim guidance, remittances have been added to three debt burden indicators and thresholds have been adjusted accordingly. As a result, these debt indicators are not directly comparable with those from previous DSAs. The results indicate that Bangladesh remains at a low risk of debt distress.<sup>2</sup>*

**1. Main changes in assumptions.** Since the previous DSA update, conducted in the context of the first review under the Three-Year Arrangement under the Extended Credit Facility, key updates are:<sup>3</sup>

- **Growth.** Real GDP growth for the FY13–18 period has been marked down to an annual average of 6.3 percent (compared to 6.8 percent in the previous DSA) given the weaker domestic and global environment. Revisions to long-term assumptions are minor. All growth projections assume that the authorities are pursuing policies that maintain macroeconomic stability, promote broad-ranging structural reforms, and strengthen the trade and investment climate.
- **Primary fiscal deficit.** Over the medium term (FY13–18), the primary fiscal deficit is lower than in the previous DSA by 0.2 percent of GDP a year on average, reflecting a revised capital spending profile under the Annual Development Program.

<sup>1</sup> In line with the 2010 Staff Guidance Note, a full joint LIC DSAs is expected to be prepared once every three years for PRGT-eligible IDA-only countries. In between, short annual updates are expected to be produced unless macroeconomic conditions since the last full DSA have significantly changed. See *Staff Guidance Note on the Application of the Joint Fund-Bank Debt Sustainability Framework for Low-Income Countries* ([www.imf.org](http://www.imf.org)) and [IDA/SECM2010-0029](http://IDA/SECM2010-0029).

<sup>2</sup> The DSA presented in this document is based on the standard low-income countries (LIC) DSA framework. See *Debt Sustainability in Low-Income Countries: Further Considerations on an Operational Framework, Policy Implications* ([www.imf.org](http://www.imf.org)) and [IDA/SECM2004/0629](http://IDA/SECM2004/0629). Under the Country Policy and Institutional Assessment (CPIA), Bangladesh is rated as a medium performer, with an average rating of 3.43 during 2009–11, and the DSA uses the indicative threshold for countries in this category.

<sup>3</sup> IMF Country Report No. 13/61 (March 2013).

- **External borrowing.** While the time profile of external borrowing is slightly revised, total amounts remain essentially unchanged.<sup>4</sup>
- **Domestic borrowing.** The definition of domestic borrowing has been extended to include domestic bank borrowing by SOEs, which corresponded to 1.4 percent of GDP at end-FY12. This stock is assumed to remain constant at 1.4 percent of GDP over the medium and long term.

## BASELINE SCENARIO

**2. External debt.** The present value (PV) of external debt-to-GDP is expected to fall over the long run to 14 percent by FY33. While all external debt indicators remain well below the policy-dependent debt burden thresholds under the baseline scenario, the debt service-to-revenue ratio would exceed the 20 percent threshold in FY14 in the case of a one-time 30 percent nominal depreciation relative to the baseline in FY14. However, the breach is temporary and caused by maturing short-term oil-related suppliers' credits, most of which are expected to be rolled over and refinanced by new short-term credits.

**3. Public sector debt.** The PV of public sector debt-to-GDP ratio is projected to remain broadly constant over the next five years and then fall gradually to 30 percent of GDP by FY33. In addition to the risks tested in the scenario analysis, contingent fiscal liabilities arising from potential recapitalization costs for state-owned commercial banks (SOCBs) could materialize, leading to an increase in debt ratios.<sup>5</sup>

## ALTERNATIVE SCENARIO

**4. Alternative assumptions and outcome.** The alternative scenario (Figure 3 and Table 6) assumes that (i) a sovereign bond, which the authorities have been considering for some time, is issued in FY14 for a total amount of US\$1 billion with a 10-year maturity and (ii) Bangladesh proceeds with new nonconcessional borrowing of US\$6 billion to construct two 1,000 megawatt nuclear reactors during FY17–21, with the range of current cost estimates cited in Bangladesh at US\$4–8 billion (although these figures need to be verified by feasibility studies).<sup>6</sup> Within that range, the risk of external debt distress remains low.

<sup>4</sup> Under the ECF arrangement, the performance criterion (ceiling) on new nonconcessional external debt is assumed to rise over time to accommodate the new borrowing.

<sup>5</sup> The baseline scenario already reflects recapitalization costs of Tk 55 billion in FY13 to cover Bangladesh Petroleum Corporation-related losses for SOCBs, as well as a further partial SOCB recapitalization of Tk 20 billion in FY14. In addition, Fund staff estimates that the fiscal costs of restoring SOCB capital to the regulatory minimum in case of full write-off of non-performing loans would amount to about 1½ percentage points of GDP. The estimated costs, however, could go up following findings from the ongoing diagnostic examinations of SOCBs by Bangladesh Bank.

<sup>6</sup> Feasibility studies would need to ascertain the costs of risk mitigation associated with the health, safety, and environmental hazards posed by nuclear power in a high population country like Bangladesh. For more details, see the previous DSA.

Sources: Data provided by Bangladesh authorities; and IMF staff estimates and projections.

1/ Historical averages and standard deviations are generally derived over the past 10 years, subject to data availability.

2/ Central government gross debt, including debt owed to the IMF, plus external borrowing by public enterprises that is supported by central government guarantees, including short-term oil-related suppliers' credits. The years in the table refers to fiscal years. For example, 2012 refers to July 2011–June 2012.

3/ Derived as  $[r - g - p(1+g)] / (1+g+p+gp)$  times previous period debt ratio, with  $r$  = nominal interest rate;  $g$  = real GDP growth rate, and  $p$  = growth rate of GDP deflator in U.S. dollar terms.

4/ Includes exceptional financing (i.e., changes in arrears and debt relief); changes in gross foreign assets; and valuation adjustments. For projections also includes contribution from price and exchange rate changes.

5/ Assumes that PV of private sector debt is equivalent to its face value.

6/ Current-year interest payments divided by previous period debt stock.

7/ Reduced grant element in 2014 as a result of the issuance of a sovereign bond.

8/ Defined as grants, concessional loans, and debt relief.

9/ Grant-equivalent financing includes grants provided directly to the government and through new borrowing (difference between the face value and the PV of new debt).

| B4. Net non-debt creating flows at historical average minus one standard deviation in 2014-2015 4/  | 18          | 15   | 12   | 10   | 7    | 6    | <b>9</b>  | 7    |
| B5. Combination of B1-B4 using one-half standard deviation shocks   | 18          | 16   | 13   | 10   | 7    | 6    | <b>9</b>  | 7    |
| B6. One-time 30 percent nominal depreciation relative to the baseline in 2014 5/  | 18          | 21   | 16   | 12   | 9    | 8    | <b>9</b>  | 9    |
| <i>Memorandum item:</i>   |             |      |      |      |      |      |           |      |
| Grant element assumed on residual financing (i.e., financing required above baseline) 6/  | 14          | 14   | 14   | 14   | 14   | 14   | <b>14</b> | 14   |
| Sources: Country authorities; and staff estimates and projections.  |             |      |      |      |      |      |           |      |
| 1/ Variables include real GDP growth, growth of GDP deflator (in U.S. dollar terms), non-interest current account in percent of GDP, and non-debt creating flows.   |             |      |      |      |      |      |           |      |
| 2/ Assumes that the interest rate on new borrowing is by 2 percentage points higher than in the baseline., while grace and maturity periods are the same as in the baseline.  |             |      |      |      |      |      |           |      |
| 3/ Exports values are assumed to remain permanently at the lower level, but the current account as a share of GDP is assumed to return to its baseline level after the shock (implicitly assuming an offsetting adjustment in import levels). |             |      |      |      |      |      |           |      |
| 4/ Includes official and private transfers and FDI.   |             |      |      |      |      |      |           |      |
| 5/ Depreciation is defined as percentage decline in dollar/local currency rate, such that it never exceeds 100 percent.   |             |      |      |      |      |      |           |      |
| 6/ Applies to all stress scenarios except for A2 (less favorable financing) in which the terms on all new financing are as specified in footnote 2.   |             |      |      |      |      |      |           |      |

Sources: Data provided by Bangladesh authorities; and IMF staff estimates and projections.

1/ Historical averages and standard deviations are generally derived over the past 10 years, subject to data availability.

2/ Central government gross debt, including debt owed to the IMF, plus domestic bank borrowing by the nonfinancial public sector and external borrowing by public enterprises that is supported by central government guarantees, including short-term oil-related suppliers' credits. The years in the table refers to fiscal years. For example, 2012 refers to July 2011–June 2012.

3/ Gross financing need is defined as the primary deficit plus debt service plus the stock of short-term debt at the end of the last period.

4/ Revenues excluding grants.

5/ Debt service is defined as the sum of interest and amortization of medium and long-term debt.

6/ Reduced grant element in 2014 as a result of the issuance of a sovereign bond.

Sources: Data provided by Bangladesh authorities; and IMF staff estimates and projections.

1/ Historical averages and standard deviations are generally derived over the past 10 years, subject to data availability.

2/ Central government gross debt, including debt owed to the IMF, plus external borrowing by public enterprises that is supported by central government guarantees, including short-term oil-related suppliers' credits.

3/ The years in the table refers to fiscal years. For example, 2012 refers to July 2011-June 2012.

4/ Derived as  $[r - g - p(1+g)] / (1+g+p+gp)$  times previous period debt ratio, with  $r$  = nominal interest rate;  $g$  = real GDP growth rate, and  $p$  = growth rate of GDP deflator in U.S. dollar terms.

5/ Includes exceptional financing (i.e., changes in arrears and debt relief); changes in gross foreign assets; and valuation adjustments. For projections also includes contribution from price and exchange rate changes.

6/ Assumes that PV of private sector debt is equivalent to its face value.

7/ Current-year interest payments divided by previous period debt stock.

8/ Reduced grant element in 2014 as a result of the issuance of a sovereign bond.

9/ Defined as grants, concessional loans, and debt relief.

9/ Grant-equivalent financing includes grants provided directly to the government and through new borrowing (difference between the face value and the PV of new debt).

**Statement by the Staff Representative on Bangladesh**  
**May 23, 2013**

1. This statement provides an update on information that has become available since the issuance of the staff report on May 14, 2013. It does not alter the thrust of the staff appraisal.

**Recent data releases relevant for program monitoring:**

2. Preliminary data indicate that tax revenue collection by the National Board of Revenue since the beginning of the fiscal year was Tk 723 billion as of end-March 2013, compared to a program floor (indicative target) of Tk 757 billion. The resulting shortfall (Tk 34 billion or 0.3 percent of GDP) reflects continued weakness in collections from customs duties and supplementary duties.

3. Despite weaker-than-expected tax revenue, preliminary estimates put net credit to the central government by the domestic banking system since the beginning of the current fiscal year at Tk 66 billion as of end-March 2013, compared to the program ceiling (indicative target) of Tk 138 billion. This mainly reflects lower-than-projected spending so far.

# IMF Executive Board Completes Second Review Under the ECF Arrangement for Bangladesh and Approves US\$136.6 Million Disbursement

Press Release No.13/193  
May 29, 2013

The Executive Board of the International Monetary Fund (IMF) today completed the second review of Bangladesh's economic program under a three-year arrangement supported by the Extended Credit Facility (ECF). The completion of the review enables an immediate disbursement of the third installment under the ECF arrangement for an amount equivalent to SDR 91.423 million (about US\$136.6 million), bringing the total amount disbursed equivalent to SDR 274.269 million (about US\$409.7 million).

The Executive Board approved a three-year ECF arrangement for Bangladesh on April 11, 2012 (see Press Release No. 12/129) for a total amount equivalent to SDR 639.96 million (about US\$956 million), or 120 percent of quota.

Following the Executive Board's discussion of Bangladesh, Mr. Naoyuki Shinohara, Deputy Managing Director and Acting Chair, made the following statement:

"Bangladesh's program under the Extended Credit Facility is broadly on track. Macroeconomic pressures have eased, with reserves rising and underlying inflation moderating, supported by restrained fiscal and monetary policies. Notwithstanding the challenging global environment, exports have picked up and remittances remain strong. However, growth is slowing and could weaken further given downside risks. It will be important to maintain sound policy anchors and keep up the reform momentum.

"Fiscal policy has remained on track, but tax collections need to be strengthened and the tax base broadened. Continued policy discipline is also needed during the pre-election period. To further expand space for development spending, subsidy costs should be further reduced while protecting subsidies targeted at the poor. Public debt management needs to be strengthened through better monitoring and transparency

and by taking full advantage of concessional borrowing opportunities.

“Bangladesh Bank’s prudent monetary policy has helped bring down inflation, while rebuilding international reserves. Going forward, greater exchange rate flexibility and stepped up sterilization operations will be important to contain monetary growth.

“Structural reforms have also moved forward. Timely implementation of the new value added tax will help increase revenues and modernize the tax regime. Timely passage of the banking law amendments recently introduced in parliament will strengthen financial sector governance and keep risks in check, especially those arising from state-owned banks. Continued improvement in labor conditions in the garment sector, in coordination with international business and development partners, would be welcome.”

**Statement by Mr. Rakesh Mohan, Executive Director for Bangladesh  
and Mr. Koodathumuriyil Verghese Eapen, Senior Advisor  
May 23, 2013**

1. The Bangladesh authorities wish to thank the IMF Mission for their positive engagement during the Second Review mission during March/April 2013 for the Extended Credit Facility (ECF) arrangement. The authorities would like to emphasize the following to supplement their request to complete the second review under the ECF arrangement and to access the third disbursement in the amount of SDR 91.423 million under the program.

**Overall outlook and developments**

2. As brought out in the staff report, Bangladesh has made substantial progress in strengthening macroeconomic conditions and structural policies under the ECF arrangement. The economy continues to exhibit favorable developments despite a challenging global environment. Exports are picking up, remittances remain strong and inflation pressures have eased over the past year, supported by prudent fiscal and monetary policies, complemented by the support of the ECF arrangement. International reserves by the program's definition, stood at US\$14.5 billion as of end-April 2013, almost doubling the equivalent import cover compared to late 2011.

3. All the quantitative performance criteria (PC) as of end-December 2012, and most of the indicative targets at end-December 2012 and end-March 2013 under the ECF arrangement have been met as also have key structural benchmarks. The new value added tax (VAT) law which was passed by the National Parliament in November 2012 is now in the implementation phase, following the approval of an implementation plan and timetable. Draft amendments to the Bank Companies Act aiming to strengthen banking system governance and the supervisory mandate of the Bangladesh Bank (BB) have also been submitted to the National Parliament. All the prior actions under the second review of the ECF arrangement have been completed. These and other details of the policy program are set out in the Memorandum of Economic and Financial Policies (MEFP), which extends the authorities' commitments to end-June 2014.

4. The authorities are of the opinion that prudent policies have strengthened the economy's capacity to respond to shocks and will also provide an anchor to preserve macroeconomic stability as the country approaches national elections, due by January 2014. However, they acknowledge that there are some signs that- political tensions and episodes of violence in recent months may be affecting economic activity.

5. In addition, the tragic building collapse in April 2013 in Savar on the outskirts of Dhaka may impact the garment sector. The authorities have taken various steps to allay international and domestic concerns in the wake of this tragedy. They have closed down as many as 20 factories, which were not fulfilling prescribed safety norms. In addition, they are working in consultation with international business and development partners to

address safety issues in readymade garment (RMG) factories across the country. They have set up a Cabinet Committee to scrutinize safety measures in the sector and are also revising the building code to prevent recurrence of such incidents. They have also set up a Committee to revise the minimum wage. The authorities wish to assure everyone that they will do all that is required to try and ensure that such incidents do not recur.

6. The authorities feel that it is also important to place this in context. Following the removal of various restrictions in international trade in textiles in the first decade of this century, Bangladesh has quickly moved to become one of the leading RMG exporters in the world. The country has earned foreign exchange equivalent of US\$ 19.1 billion during 2011-12 from the sector. More importantly, the development of the sector has also proved to be an agent of social change. There are around 3.6 million employees in the sector, of which, around 2.88 million are women. The success of the RMG export sector is often seen as the reason for improvement in the overall position of women in the country. It may be noted that population growth and the fertility rate in Bangladesh is lower than the South Asian average.

### **Fiscal policy**

7. Turning to more general policy issues, Bangladesh is on track to meet the 2013 fiscal target of an overall budget deficit (excluding grants) of 4.5 percent of GDP. Though tax revenue has fallen short of program indicative targets as supplementary duties and other taxes on imports have been lower than expected reflecting slower import growth, expenditure has been kept under control, in part through containment of fuel and electricity subsidies following administered fuel price increases. In the immediate term, the authorities are seeking to buttress revenue collections through more aggressive tax enforcement focusing on recovering arrears at state owned enterprises (SOEs), curbing leakages from bonded warehouses and by a comprehensive rollout of the Alternative Dispute Resolution mechanism at the customs level. They are also following through with the implementation of the revenue measures announced in the 2013 fiscal budget.

8. The authorities are also committed to adhering to a programmed budget deficit (excluding grants) target of 4.3 percent of GDP in fiscal year 2014. While slowing economic activity could make tax revenue targets more challenging, they intend to strengthen revenue collections in fiscal 2014 by further removing exemptions and phasing out truncated bases for the VAT, as well as strengthening auditing and compliance. On the expenditure side, following a series of retail price adjustments over the past 18 months, they will emphasize cost containment measures for fuel and electricity subsidies. They intend to further boost social-related spending and significantly increase capital spending in the Annual Development Program (ADP), within the programmed spending envelope including the continuation of the Padma Bridge project, in order to meet key social and developmental goals.

## **Debt management**

9. The latest debt sustainability analysis (DSA), which updates the joint IMF/IDA DSA from January 30, 2013 reflecting the most recent macroeconomic developments and borrowing needs, indicates that Bangladesh remains at a low risk of debt distress. The authorities will focus on external borrowing, including the contracting and guaranteeing of nonconcessional external debt and on high impact projects to meet critical development needs. They will take steps to strengthen debt management practices ahead of any sovereign bond issuance. They have requested, a Debt Management and Performance Assessment (DEMPA) from the World Bank, the results of which will guide their medium-term debt strategy, to be finalized by December 2013.

10. The authorities have also already established a technical committee on nonconcessional external borrowing chaired by a senior official in the Ministry of Finance. This Committee will meet monthly to monitor and report on nonconcessional borrowing to ensure compliance with the limits set in the ECF program. In addition, the committee will draft revised terms of reference (TOR) for the Cabinet's Hard-Term Loan Committee (HTLC). The notification for the revised TOR will be issued by June 2013 and will: (i) ensure that the HTLC oversees all nonconcessional borrowing contracts, covering loans, guarantees and trade credits (excluding normal import financing) by the public sector and for all purposes; and (ii) determine nonconcessionality based on the grant element of the credit, in line with international best practices.

## **Monetary Policy and Bangladesh Bank operations**

11. The authorities will continue to maintain a prudent monetary stance to safeguard macroeconomic stability and keep inflation in check, while allowing adequate space for private credit growth. The end-December 2012 net international reserves (NIR) target (a PC) has been exceeded by over US\$3 billion (program definition). The BB will continue to accumulate reserves when market conditions are appropriate and will step up sterilization of foreign exchange intervention to protect program targets. To further deepen the foreign exchange and government debt markets, steps have been taken in April 2013 to: (i) raise limits on banks' net open positions; (ii) introduce a two-year Treasury bond to better match investor demand; and (iii) remove the one-year holding period for nonresident holdings of Treasury securities. The authorities also remain committed to gradually reducing the devolvement of Treasury securities.

12. The authorities are also undertaking steps towards completion of a full external audit of BB by a global audit firm (a December 2013 benchmark). They have already selected the firm, which was a prior action for this review.

## **Financial sector reforms**

13. As a centerpiece of the efforts to strengthen the banking system, amendments to the Bank Companies Act (BCA) were submitted to Parliament in March 2013. The authorities aim to strengthen the supervisory mandate of BB, limit special treatments for

State Owned Commercial Banks (SOCBs) and strengthen commercial banks' governance and accountability. The authorities are also taking steps to revise, through an order to be issued by BB, stock market exposure limits for banks consistent with the BCA amendments. Given the deteriorating financial conditions of the SOCBs, the focus will be on measures to strengthen the SOCBs' performance and financial position and increase their operational independence in order to safeguard the banking system and minimize fiscal risks as brought out in the MEFP.

14. The BB is also making progress towards adoption of a bank resolution framework, having already put in place a number of elements needed for such a framework. Further, the Demutualization Act was passed by Parliament in April 2013. Consistent with this act, the authorities will continue to work towards the approval by the Bangladesh Securities and Exchange Commission of demutualization models and plans, for both the Dhaka and the Chittagong stock exchanges.

### **The ECF arrangement going ahead**

15. To further buttress international reserves while preserving monetary targets, the authorities request an increase in the end-June 2013 PC on net international reserves of the BB and an attendant reduction of the PC on BB's net domestic assets. They would also like to request a modest increase in the government's bank borrowing PC ceilings for June 2013, to account for slightly weaker-than-expected non-bank financing, with the overall fiscal deficit on track to meet the programmed target. They also request an increase in the non-concessional debt ceiling to accommodate loan guarantees for critical power infrastructure for the period to June 2014. As indicated earlier, they are putting in place measures to strengthen debt management practices, so as to ensure compliance with program targets.

16. The authorities will continue to maintain close policy dialogue with the IMF to ensure strong performance under the ECF arrangement. They will request for technical assistance as necessary from the IMF and other development partners, in support of their reform agenda. They will also consult with the IMF on the adoption of measures and in advance of revisions to the policies contained in the MEFP, in accordance with the IMF's policies on such matters. Moreover, they will provide the IMF with information in connection with progress in implementing the policies and achieving the objectives of the program. They also authorize publication of the Letter of Intent and its Attachments, as well as the staff report.
