I. Financial Statements of the General Department

Report of Independent Auditors

To the Board of Governors of the International Monetary Fund

We have audited the accompanying financial statements of the General Department of the International Monetary Fund, which comprise the statements of financial position as of April 30, 2019 and 2018, and the related statements of comprehensive income, of changes in reserves, resources, and retained earnings and of cash flows for the years then ended.

We are independent of the Department in accordance with the ethical requirements that are relevant to our audit of the financial statements in the United States of America and with the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants*. We have fulfilled our other ethical responsibilities in accordance with these requirements.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Department's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting, unless management either intends to liquidate the Department or to cease operations or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Department's financial reporting process.

Auditors' Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether due to fraud or error. Reasonable assurance is a high level of assurance but is not a guarantee that an audit will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. We design audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error because fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

In making those risk assessments, we consider internal control relevant to the Department's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the Department's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation, structure, and content of the financial statements, including disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

As part of an audit, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Department's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report. However, future events or conditions may cause the Department to cease to continue as a going concern.
- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies or material weaknesses in internal control that we identify during our audit.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the General Department of the International Monetary Fund as of April 30, 2019 and 2018, and the results of its operations and its cash flows for the years then ended in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Other Matter

Our audit was conducted for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules appearing on pages 37 to 46 are presented for purposes of additional analysis and are not a required part of the financial statements. The information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves and other additional procedures, in accordance with auditing standards generally accepted in the United States of America. We also subjected the information to the applicable procedures required by International Standards on Auditing. In our opinion, the information is fairly stated, in all material respects, in relation to the financial statements taken as a whole.

Notes to the Financial Statements for the Financial Years Ended April 30, 2019, and 2018

1. Nature of operations

The International Monetary Fund (IMF) is an international organization with 189 member countries. The IMF's fundamental mission is to ensure the stability of the international monetary system. It does so in three ways: keeping track of the global economy and the economies of member countries; lending to countries with balance of payments difficulties; and giving practical help to members. It is headquartered in Washington, DC, U.S.A.

The IMF conducts its operations and transactions through the General Department. The General Department comprises three accounts: (i) the General Resources Account (GRA); (ii) the Investment Account (IA); and (iii) the Special Disbursement Account (SDA).

1.1 General Resources Account

The financial operations of the IMF with its members are primarily conducted through the GRA. The assets and liabilities in the GRA reflect the payment of member quota subscriptions, use and repayment of GRA credit, borrowings and repayments, collection of charges from borrowers, payment of remuneration on creditor positions and interest to lenders, and other operations.

A core responsibility of the IMF is to provide financial assistance to member countries experiencing actual or potential balance of payments problems. Upon the request of a member country, GRA resources are made available either under a financing arrangement or in the form of outright purchases (disbursements). An arrangement is a decision by the IMF Executive Board (Executive Board) that gives a member the assurance that the GRA stands ready to provide resources during a specified period and up to a specified amount, in accordance with the terms of the financing instrument.

The Stand-By Arrangement (SBA) is designed for members with medium-term balance of payments problems. The Extended Fund Facility (EFF) is an instrument for members with longer-term balance of payments problems that reflect structural impediments requiring fundamental economic reform. Resources under the SBA and the EFF are made available in phased installments as the member implements economic policies and measures specified under the arrangement.

The Flexible Credit Line (FCL) is available for members with very strong fundamentals, policies, and track records of policy implementation and is intended for crisis prevention and resolution. The Precautionary and Liquidity Line (PLL) is available for members with sound economic fundamentals but with some remaining vulnerabilities that preclude them from using the FCL. The FCL and the PLL provide up-front access to GRA resources.

The financing instrument for outright purchases (disbursements) is the Rapid Financing Instrument (RFI), which is used by members that face an urgent balance of payments need without the need or capacity for a full-fledged program.

1.2 Investment Account

The IA holds resources transferred from the GRA, which are invested to broaden the IMF's income base. The Rules and Regulations of the IA adopted by the Executive Board provide the framework for the implementation of the expanded investment authority authorized under the Fifth Amendment of the Articles of Agreement, which became effective in February 2011. The IA comprises two principal subaccounts: the Fixed-Income Subaccount and the Endowment Subaccount.

The Fixed-Income Subaccount holds resources transferred from the GRA that are not related to profits from gold sales. With a view to generating income while protecting the IMF's balance sheet, the investment objective of the Fixed-Income Subaccount is to produce returns in Special Drawing Rights (SDRs) terms in excess of the three-month SDR interest rate (see Notes 2.1 and 2.2) over time while minimizing the frequency and extent of negative returns and underperformance over an investment horizon of three to four years.

The Endowment Subaccount was credited with SDR 4.4 billion in profits from gold sales during financial years 2010 and 2011. The Endowment Subaccount's investment objective is to achieve a real return of 3 percent in U.S. dollar terms over the long term, consistent with the Endowment Subaccount's general objective to generate investment returns to contribute to covering the IMF's administrative expenditures, while preserving the long-term real value of these assets. The bulk of the assets are managed passively. The actively managed portfolio

represented about 4.4 percent at April 30, 2019, and may grow to up to 10 percent of the Endowment assets.

1.3 Special Disbursement Account

The SDA is the vehicle used to receive profits from the sale of gold held by the IMF at the time of the Second Amendment of the IMF's Articles of Agreement (April 1978). SDA resources can be used for various purposes, as specified in the Articles of Agreement, including transfers to the GRA for immediate use in operations and transactions, transfers to the IA, or operations and transactions that are not authorized by other provisions of the Articles but are consistent with the purposes of the IMF, in particular to provide balance of payments assistance on special terms to low-income member countries.

The SDA currently holds claims related to overdue outstanding loans extended under the Structural Adjustment Facility (SAF). Repayments of principal and interest from SAF loans are transferred from the SDA to the Reserve Account of the Poverty Reduction and Growth Trust (PRG Trust), which is administered separately by the IMF as Trustee.

1.4 Other entities administered by the IMF

The IMF also administers the Special Drawing Rights Department (SDR Department), trusts (Concessional Lending and Debt Relief Trusts), and accounts (Administered Accounts) established to perform financial and technical services consistent with the IMF's purposes. As the General Department does not have control over these entities, their financial statements are presented separately.

The resources of the SDR Department are held separately from the assets of all the other accounts owned or administered by the IMF. As specified in the IMF's Articles of Agreement, these resources may not be used to meet the liabilities, obligations, or losses incurred in the operations of the General Department (or vice versa), except that expenses of conducting the business of the SDR Department are paid by the General Department and are then reimbursed by the SDR Department.

The resources of the trusts and accounts are contributed by members, by other financial institutions, or by the IMF through the SDA. The assets and liabilities of the trusts and accounts are separate from the assets and liabilities of the General Department. The assets of the trusts and accounts cannot be used to meet the liabilities, obligations, or losses incurred in the operations of the General Department. The General Department is reimbursed for the expenses incurred in conducting the business of certain trusts and accounts in accordance with the IMF's Articles of Agreement and relevant decisions of the Executive Board.

2. Basis of preparation and measurement

The financial statements of the General Department are prepared in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB). The financial statements have been prepared under the historical cost convention, except for the revaluation of financial instruments at fair value through profit or loss.

2.1 Unit of account

The financial statements are presented in SDRs, which is the IMF's unit of account. The value of the SDR is determined daily by the IMF by summing specific amounts of the basket currencies in U.S. dollar equivalents on the basis of market exchange rates. The IMF reviews the composition of the SDR valuation basket at a minimum of five-year intervals. The last review was completed in November 2015, and the specific amounts of the currencies in the basket, effective October 1, 2016, were as follows:

| SDR basket currency | Amount |
|---------------------|----------|
| Chinese renminbi | 1.0174 |
| Euro | 0.38671 |
| Japanese yen | 11.900 |
| Pound sterling | 0.085946 |
| U.S. dollar | 0.58252 |

At April 30, 2019, 1 SDR was equal to US\$1.38576 (US\$1.43806 at April 30, 2018).

The next review of the method of valuation of the SDR will take place by September 30, 2021, unless developments in the interim justify an earlier review.

2.2 SDR interest rate

The SDR interest rate provides the basis for basic charges levied on credit outstanding (see Note 17), interest on SDR holdings (Note 6), remuneration paid on members' reserve tranche positions (Note 18), and interest on borrowings (Note 14).

The SDR interest rate is determined weekly by reference to a weighted average of yields or rates on short-term instruments in the money markets of the members whose currencies are included in the SDR valuation basket:

| SDR basket currency | Yield or rate |
|---------------------|---|
| Chinese renminbi | Three-month benchmark yield for China Treasury bonds as published by the China Central Depository and Clearing Co., Ltd. |
| Euro | Three-month spot rate for euro area central government bonds with a minimum rating of AA published by the European Central Bank |
| Japanese yen | Three-month Treasury discount bills |
| Pound sterling | Three-month Treasury bills |
| LLS dollar | Three-month Treasury hills |

The SDR interest rate is subject to a floor of 0.050 percent and is rounded to three decimal places.

The average SDR interest rate was 1.036 percent per annum and 0.676 percent per annum during the financial years ended April 30, 2019, and 2018, respectively.

2.3 Use of estimates and judgement

The preparation of financial statements requires management to make judgements, estimates, and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

The most significant estimates and judgements used in applying accounting policies include expected credit losses measurement for credit outstanding (see Notes 3.2.1.1 and 5.1), fair value measurement of financial instruments (see Notes 3.11 and 8), and actuarial assumptions used in calculating the net defined benefit asset/liability (see Note 11.3).

3. Summary of significant accounting policies

3.1 Financial instruments

IFRS 9, "Financial Instruments", as issued by the IASB in July 2014 was adopted with a date of initial application of May 1, 2018. The requirements of IFRS 9 represent a significant change from the standard it superseded, International Accounting Standard (IAS) 39, "Financial Instruments: Recognition and Measurement". See Note 3.12 for the effect of IFRS 9 adoption.

Measurement at initial recognition

Financial instruments are recognized when the General Department becomes a party to the contractual provisions of the instrument. At initial recognition, a financial instrument is measured at its fair value, which is best evidenced by the transaction amount.

Derecognition

Financial assets, or a portion thereof, are derecognized when the contractual rights to receive the cash flows from the assets have expired, or when they have been transferred and either (i) the General Department transfers substantially all the risks and rewards of ownership, or (ii) the General Department neither transfers nor retains substantially all the risks and rewards of ownership and the General Department has not retained control. Financial liabilities are derecognized when they are extinguished (i.e., when the obligation specified in the contract is discharged, canceled, or expires).

Classification and subsequent measurement of financial assets

A financial asset is classified on initial recognition based on two factors: the business model for managing the financial asset and its contractual cash flow characteristics.

Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost (AC). Interest income from these financial assets is included in the statements of comprehensive income using the effective interest method. Any gain or loss arising on derecognition is recognized in the statements of comprehensive income.

Financial assets that are held for collection of contractual cash flows and for selling, where the assets' cash flows represent solely payments of principal and interest, would be measured at fair value through other comprehensive income (FVOCI). The General Department did not have financial assets at FVOCI during the financial years ended April 30, 2019, and 2018.

All other financial assets that do not meet the criteria to be measured at AC or FVOCI are measured at fair value, with changes in fair value recognized in profit or loss (FVPL).

Impairment

At each reporting date, the General Department assesses on a forward-looking basis the expected credit losses (ECL) associated with its financial assets at AC and with the undrawn commitments under its financing arrangements for members. The measurement of ECL reflects: (i) an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes; (ii) the time value of money; and (iii) reasonable and supportable information that

is available without undue cost or effort at the reporting date about past events, current conditions, and forecasts of future economic conditions.

If ECL needed to be recognized, they would be recorded as impairment allowances for assets at AC and as a liability provision for undrawn commitments.

Should any financial asset become credit-impaired, interest income would be calculated for it by applying the effective interest rate to its amortized cost (i.e., net of the impairment allowance).

Classification and subsequent measurement of financial liabilities

Derivative financial liabilities are measured at fair value with changes in fair value recognized in profit or loss.

All other financial liabilities are measured at amortized cost. Interest expense from these financial liabilities is included in the statements of comprehensive income using the effective interest method.

3.2 Financial assets

3.2.1 Currencies

Currencies are financial assets that consist of members' currencies held by the GRA with the designated depositories, in the form of account balances or non-interest-bearing promissory notes that are encashable by the GRA on demand. All currencies in the GRA are classified at AC.

- Usable currencies are currencies of members considered to be in a sufficiently strong external position that they can be used to finance GRA transactions with other members.
- Currencies of members that are not considered to have a sufficiently strong balance of payments and reserves position to finance GRA transactions with other members are presented as other currencies.
- Holdings of member currencies that represent purchases of usable currencies or SDRs in exchange for their own currencies are presented as credit outstanding (see Note 3.2.1.1).

The currency balances in the statements of financial position include receivables and payables arising from the currency revaluations (see Note 5).

3.2.1.1 Credit outstanding and charges

Credit outstanding is a financial asset that represents financing provided to members under the various GRA financing facilities. Members receive financing in the GRA by purchasing SDRs or usable currencies in exchange for their own currencies. GRA credit is repaid by members by repurchasing holdings of their currencies in exchange for SDRs or usable currencies.

Charges and fees

The GRA earns interest, referred to as basic charges, on members' use of GRA credit (see Note 17). Basic charges are recognized using the effective interest method.

In addition to basic charges, outstanding GRA credit is also subject to level- and time-based surcharges (see Note 17). Surcharges are recognized when the relevant level- and time-based thresholds set by the Executive Board are reached.

Charges not received from members within the required timeframe are recovered by the GRA under the burden sharing mechanism, through adjustments to increase the rate of charge for debtor members and decrease the rate of remuneration on members' reserve tranche positions (see Note 13).

A service charge is levied by the GRA on all purchases except reserve tranche purchases. Service charges are paid when the purchases are made and are recognized as income upon payment.

A commitment fee is levied on the amount available for financing under an arrangement for each 12-month period. Commitment fees are refunded as the member makes purchases under the arrangement. At the arrangement's expiration or cancellation, any unrefunded amount is recognized as income. Pending refund or recognition as income, commitment fees are recognized as part of other liabilities in the statements of financial position.

Impairment of credit outstanding

The General Department's application of the impairment requirements of IFRS 9 is grounded in the context of the nature of the IMF's financing and its unique institutional status:

- The IMF has a unique relationship with its member countries, all of which are shareholders in the institution.
- IMF financing is linked to regular reviews of performance under a program of economic policies that the member commits to in order to overcome balance of payments problems, return to external viability, and repay the IMF.
- The IMF employs a comprehensive set of measures to mitigate credit risk (see Note 4.2.1).
- The IMF also has de facto preferred creditor status, which has been recognized by the official community and generally accepted by private creditors.

Taken together, these factors significantly reduce the likelihood of the General Department incurring credit losses.

The General Department has not recognized any impairment losses since inception. Also, unlike large financial institutions

in the private sector, the General Department's credit portfolio consists of a relatively small number of exposures to its member countries, with each member's circumstances varying. Therefore, a statistical approach to credit risk assessment, such as probability of default (PD) and loss given default (LGD) modeling, as typically followed in the financial sector is neither feasible nor appropriate for the General Department.

Similarly, the assessment of the General Department's credit risk cannot rely on external credit risk ratings. Due to its unique characteristics, the IMF's credit risk exposure is not comparable to sovereign credit risk faced by commercial financial entities and, as a cooperative member organization, the IMF does not produce its own internal credit rating grades. Accordingly, credit risk for the General Department is assessed holistically based on qualitative and quantitative considerations pertaining to each debtor member, such as the status of the economic programs underlying IMF financing, the member's cooperation on policy implementation and timely settlement of IMF financial obligations, and forward-looking assessment of the member's capacity to repay.

The General Department has developed a model for ECL estimation based on changes in credit quality since initial recognition where credit quality is referred to as Stage 1, Stage 2, and Stage 3. Credit outstanding for which credit risk has increased significantly since initial recognition (Stage 2), or that is credit-impaired (Stage 3), has its ECL measured on a lifetime basis. Credit outstanding for which there was no significant increase in credit risk since initial recognition (Stage 1) has its ECL measured as a portion of lifetime ECL that result from default events possible within the next 12 months.

The key judgements and assumptions adopted by the General Department in the measurement of ECL are discussed below:

(i) Definition of default and credit-impaired

For the purposes of application of IFRS 9, the General Department considers a member country to be in default when it is six months or more overdue in settling its financial obligations to the General Department. This rebuts the presumption in IFRS 9 that default does not occur later than 90 days past due, reflecting the nature of the IMF's financing and its unique institutional status, as well as consistency with the threshold for internal risk management purposes. Credit outstanding is considered credit-impaired when the obligation has defaulted.

(ii) Significant increase in credit risk

The General Department assesses whether a significant increase in credit risk has occurred on a member-by-member

basis by comparing the risk of default at the reporting date to the risk of default at the date of the most recent disbursement to the debtor member. The assessment is performed on each reporting date and takes into account a range of qualitative and quantitative criteria, including overdue obligations to the IMF, signals of non-cooperation by the member, and forward-looking indicators of capacity to repay the IMF. The criteria used to identify significant increases in credit risk are monitored and reviewed for appropriateness at least annually.

The assessment does not rely on any single factor and may, on the basis of other relevant considerations, rebut the presumption that credit risk has increased significantly when contractual payments are more than 30 days past due. During the financial years ended April 30, 2019, and 2018, the General Department did not have any debtor member more than 30 days past due, except for the members in protracted arrears (see Note 5.2).

(iii) Low credit risk

The General Department assumes that the credit risk of a member country has not increased significantly since initial recognition if the member is determined to have low credit risk at the reporting date.

Credit risk related to the General Department's exposure to a member country is considered low if: (i) it has a low risk of default; (ii) the member country has a strong capacity to meet its contractual cash flow obligations in the near term; and (iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the member country to fulfill its contractual cash flow obligations.

(iv) Measuring ECL

ECL are determined by comparing expected cash flows with contractual cash flows, and discounting the expected cash shortfalls at the effective interest rate, which is the basic rate of charge. ECL are estimated by assessing a range of possible outcomes in light of expected future economic conditions, weighted according to the assessed probability of each outcome. This entails considerable judgement and uncertainty about the estimates.

For the purpose of ECL measurement, financial safeguards that are integral to the IMF's financial structure and operations are also considered, such as the burden sharing mechanism to compensate the IMF for loss of income due to overdue payments (see Note 13).

Write-off

In the unlikely event that a member with credit outstanding withdraws from the Fund, repudiates its outstanding obligations to the Fund, and no prospects of recovering

amounts due to the Fund remain in the foreseeable future, the Fund would recognize the ultimate loss and the withdrawn member's credit outstanding to the General Department would be written off.

3.2.2 SDR holdings

SDR holdings represent SDRs held by the GRA (see Note 6). SDR holdings are measured at AC.

Interest on SDR holdings is recognized using the effective interest method.

3.2.3 Investments

Investments are financial assets that include equity securities, fixed-income securities, real estate investment trusts (REITs), short-term investments, fixed-term deposits, and derivative assets. Derivative liabilities are disclosed as part of other liabilities in the statements of financial position.

Investments in each of the two subaccounts are managed in accordance with the respective investment strategy (see Note 7) and their performance is evaluated on a fair value basis. The business model for the invested portfolios focuses on achieving fair value gains as opposed to collecting contractual cash flows. Accordingly, these securities are classified at FVPL. Funds pending suitable investment in accordance with the investment strategy may be kept in fixed-term deposits, which are measured at amortized cost.

Purchases and sales of investments are recognized on the trade date. The corresponding investment trades receivable or payable are recognized in other assets and other liabilities, respectively, pending settlement of a transaction.

Investment income comprises interest income on investments at AC, interest and dividend income, and realized and unrealized gains and losses from FVPL investments, including currency valuation differences arising from exchange rate movements against the SDR, net of all trading-related fees and commissions.

Interest income from investments is recognized using the effective interest method. Dividend income is recognized based on the ex-dividend date.

3.3 Cash and cash equivalents

Usable currencies and SDR holdings are considered cash and cash equivalents in the statements of cash flows.

3.4 Gold holdings

Gold holdings (acquired prior to the Second Amendment of the Articles of Agreement in April 1978) are carried at historical cost using the specific identification method. The carrying value is determined by the restrictions on the use of the IMF's gold holdings and the disposition of profits from the sale of gold. In accordance with the provisions of the Articles of Agreement, whenever the IMF sells gold that was held on the date of the effectiveness of the Second Amendment of the Articles, that portion of the proceeds equal to the historical cost must be placed in the GRA. Any proceeds in excess of the historical cost will be held in the SDA or transferred to the Endowment Subaccount of the IA (see Note 9). The IMF may also sell such gold holdings to those members that were members on August 1, 1975, in exchange for their currencies and at a price equal to the historical cost.

3.5 Property, plant and equipment and intangible

Property, plant and equipment and intangible assets are measured at cost less accumulated depreciation or amortization. Property, plant and equipment and intangible assets are capitalized and depreciated or amortized over the estimated remaining useful lives using the straight-line method. Buildings are depreciated over 30 years and other property, plant and equipment over three to 20 years. Leasehold improvements are depreciated over the term of the lease agreement. Software is amortized over three to five years.

3.6 Leases

The IMF has entered into operating lease agreements as a lessor and lessee. As a lessee, all the risks and benefits of ownership are retained by the lessor. Payments made under operating leases are recognized as an expense on a straight-line basis over the period of the lease. As a lessor, the IMF retains the leased assets in the statements of financial position and recognizes lease income on a straight-line basis over the period of the lease.

3.7 Post-employment benefits

The IMF sponsors various post-employment benefit plans for its employees, which include defined benefit and other post-employment benefits such as medical and life insurance benefits.

The net defined benefit liability or asset recognized in the statements of financial position is the present value of the defined benefit obligation less the fair value of the plan assets. Changes resulting from remeasurements are reported in other comprehensive income. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using market yields on high-quality corporate bonds using the projected unit credit method.

Net periodic pension cost includes service cost and net interest cost on the net defined benefit liability.

3.8 Financial liabilities

3.8.1 Special Contingent Account

The General Department has accumulated precautionary balances against possible credit default in the Special Contingent Account (SCA-1) under the burden sharing mechanism (see Note 13). Balances in the SCA-1 are akin to refundable non-interest-bearing deposits.

3.8.2 Borrowings

Borrowings are financial liabilities that represent financing received under the various borrowing arrangements (see Note 14).

Interest expense on borrowings is calculated by applying the effective interest method.

3.8.3 Quota subscriptions

Members' quota subscriptions are financial liabilities that represent subscription payments by members, including payments as a result of quota increases (see Note 15). An increase in quota subscription for an existing member becomes effective when the member consents to the quota increase and makes the actual payment (provided that any other requirements for the effectiveness of specific quota increase are met), and is recorded in the financial statements on the payment date. Typically, a quarter of a member's quota subscription (reserve asset portion) is paid either in SDRs or in the currencies of other members specified by the IMF, or in any combination of SDRs and such currencies, and the remainder is paid in the member's own currency.

Quota subscriptions are classified as liabilities in the statements of financial position, as they embody an unconditional repayment obligation in the case of a member's withdrawal from the IMF.

3.8.3.1 Reserve tranche positions and remuneration

In exchange for the reserve asset portion of its quota subscription payment, and from the use of the member's currency in the GRA's transactions or operations, a member acquires a reserve tranche position in the GRA. The reserve tranche is determined as the difference between the member's quota subscription and the GRA's holdings of its currency, excluding holdings that reflect the member's use of GRA credit and administrative balances (see Note 15). A member's reserve tranche is also considered a part of its international reserves and a liquid claim against the GRA that can be encashed by the member at any time upon the representation of a balance of payments need.

The GRA pays interest, referred to as remuneration, on a remunerated portion of the member's reserve tranche position (see Note 18). Remuneration expense is recognized on an accrual basis.

3.9 Provisions

Provisions in accordance with IAS 37, "Provisions, Contingent Liabilities and Contingent Assets", are recognized when the IMF has a current legal or constructive obligation as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. Provisions are measured at the present value of the amounts that are expected to be paid to settle the obligations.

3.10 Foreign currency translation

Transactions denominated in currencies and not in SDRs are recorded at the rate of exchange on the date of the transaction. Assets and liabilities denominated in other currencies are reported using the SDR exchange rate on the date of the financial statements. Exchange differences arising from the settlement of transactions at rates different from those at the originating date of the transactions are included in the determination of total comprehensive income.

3.11 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability or, in the absence of a principal market, in the most advantageous market.

A three-level fair value hierarchy is used to determine fair value under which financial instruments are categorized based on the priority of the inputs to the valuation technique. The fair value hierarchy has the following levels:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices)
- Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs)

When the inputs used to measure the fair value of an asset or liability fall within multiple levels of the hierarchy, the level within which the fair value measurement is categorized is based on the lowest-level input that is significant to the fair value measurement of the instrument in its entirety. Thus, a Level 3 fair value measurement may include inputs that are both observable and unobservable.

The valuation techniques used to determine fair value are described in Note 8.

3.12 New IFRS that became effective in the financial year ended April 30, 2019

3.12.1 IFRS 9, "Financial Instruments"

IFRS 9, "Financial Instruments", which replaces IAS 39, "Financial Instruments: Recognition and Measurement", is effective for annual periods starting on or after January 1, 2018, and was adopted on May 1, 2018. The requirements of IFRS 9 represent a significant change from IAS 39.

Classification and measurement

IFRS 9 requires financial assets to be classified at FVPL, FVOCI, or AC based on the entity's business model for managing the assets and their contractual cash flow characteristics. Financial liabilities are classified and measured at AC or FVPL (see Note 3.1).

The General Department has performed a detailed analysis of its business models for managing financial instruments and of their cash flow characteristics. The carrying amounts and measurement categories of financial assets and liabilities in accordance with IAS 39 and IFRS 9 at May 1, 2018 are as follows:

| | Carrying amount | Measurement o | ategory |
|--|-----------------|---------------|----------|
| (in mill | ions of SDRs) | IAS 39 | IFRS 9 |
| Financial assets: | | | |
| Usable currencies | 361,099 | AC | |
| Credit outstanding | 37,884 | AC | |
| Other currencies | 67,804 | AC | |
| SDR holdings | 26,472 | AC | |
| Investments (fixed-term deposits) | 2,322 | AC | |
| Investments (short-term investments) | 376 | AC | FVPL |
| Investments (derivative assets) | 55 | FVPI | <u>L</u> |
| Investments (other than fixed-term deposits, short-term investments, and derivative assets) | 18,076 | FVPL | _1 |
| Other financial assets | 532 | AC | |
| Financial liabilities: | | | |
| Special Contingent Account | 1,188 | AC | |
| Borrowings | 19,823 | AC | |
| Derivative liabilities | 39 | FVPI | _ |
| Other financial liabilities | 657 | AC | |
| Quota subscriptions | 475,473 | AC | |

 $^{^{\}rm 1}$ FVPL IAS 39 classification was designated, while IFRS 9 classification is mandatory.

As a part of the transition to IFRS 9, short-term investments of SDR 376 million were classified as FVPL in accordance with the business model for managing the invested portfolio as a whole. Previously such securities were classified at AC. The change in measurement category did not have an impact on the carrying amount of the instruments.

Impairment

IFRS 9 introduces a revised impairment model, which requires entities to recognize expected credit losses based on reasonable and available information about past periods, current circumstances, and forward-looking information that indicates the possibility of such losses. This model replaced the previous impairment model under which impairment was recognized only if a loss had already been incurred.

The General Department adapted its approach to assessing credit risk to comply with the revised impairment model under IFRS 9 (see Note 3.2.1.1).

Application of IFRS 9 impairment requirements to prior periods did not result in adjustments to the amounts previously recognized in the financial statements. No impairment had been recognized in accordance with IAS 39 at April 30, 2018. Similarly, no impairment had been recognized in accordance with IFRS 9 at May 1, 2018.

Other changes

IFRS 9 introduces amendments to a number of other standards, most notably IFRS 7, "Financial Instruments: Disclosures", and IAS 1, "Presentation of Financial Statements".

Application of IFRS 9 amendments to other standards resulted in presentational changes to the General Department's statements of comprehensive income necessary to comply with the new requirement in IAS 1 to disclose separately in the statements of comprehensive income interest income calculated using the effective interest method:

- "Surcharges" and "Basic charges" are now presented as separate lines in the statements of comprehensive income, whereas previously they were grouped in "Charges" and disclosed separately in the notes to the financial statements.
- Burden sharing adjustment to remuneration is now grouped with "Basic charges" in the statements of comprehensive income, whereas previously it was netted against "Remuneration". As a result of this presentational change, the basic charges and the remuneration expense for the year ended April 30, 2018 have both increased by SDR 2 million.

In addition, the following presentational change was made as at April 30, 2018 to better illustrate the nature of the derivative financial instruments:

 Derivative assets are now presented in the "Investments" line of the statements of financial position, while previously they were grouped with "Other assets". As a result of this change in presentation, the investments have increased and other assets have decreased by SDR 55 million as at April 30, 2018.

Transition to IFRS 9 adoption

Changes in accounting policies and presentation resulting from the adoption of IFRS 9 have been applied retrospectively. The consequential amendments to IFRS 7 disclosures have also been applied to all periods presented.

3.12.2 IFRS 15, "Revenue from Contracts with Customers"

IFRS 15, "Revenue from Contracts with Customers", is effective for annual periods starting on or after January 1, 2018, and was adopted by the General Department on May 1, 2018. IFRS 15 provides a principles-based approach for revenue recognition that applies to all contracts with customers except those related to financial instruments, leases, and insurance contracts. It requires an entity to recognize revenue as performance obligations are satisfied.

Adoption of IFRS 15 had no material effect on the financial statements of the General Department.

3.13 New standards and amendments to existing standards effective in future years

The following new standards and amendments to existing standards issued by the IASB will become effective in future financial years:

IFRS 16, "Leases", which replaced IAS 17, "Leases", was issued in January 2016 and is effective for annual periods starting or on after January 1, 2019. IFRS 16 will be adopted by the General Department for the financial year ending April 30, 2020. The standard requires lessees to recognize a "right-of-use asset" and a lease liability reflecting future lease payments for all but short-term leases and leases of low-value assets. The adoption of IFRS 16 is not expected to have a material effect on the General Department's financial statements.

Amendments to IAS 19, "Employee Benefits", issued in February 2018 are effective for annual periods starting on or after January 1, 2019. They will be adopted by the General Department for the financial year ending April 30, 2020. The amendments are not expected to have a material effect on the financial statements of the General Department.

4. Financial risk management

The General Department is exposed to various types of operational and financial risks, including credit, market, and liquidity risks.

4.1 Risk management framework

By virtue of its role established through the Articles of Agreement, the IMF faces a range of financial and nonfinancial risks. The Executive Board has approved a risk acceptance statement guiding risk acceptance and assessment across the IMF's activities. The IMF has adopted the three lines of defense model for risk management.

- Risks inherent in day-to-day operations are mitigated by establishing and maintaining a system of internal controls.
- A risk management function is responsible for developing and maintaining the risk management framework, fostering the development of risk management tools, and reporting on the General Department's overall risk profile, highlighting areas where additional mitigation efforts are needed.
- An internal audit function is responsible for providing an independent assessment of the effectiveness of governance and internal control processes.

Oversight is provided by committees established to monitor and make decisions in specific risk areas, which supports the cycle of risk assessment, ownership, and mitigation vis-à-vis risk acceptance.

4.2 Financial assets and liabilities other than investments

Financial assets and liabilities other than investments are exposed to credit, market, and liquidity risks.

4.2.1 Credit risk on financial assets and liabilities other than investments

Credit risk is the risk of suffering financial losses, should any of the IMF's members or counterparties fail to fulfill their financial obligations to the General Department. Credit risk arises on credit outstanding and undrawn committed amounts under approved financing arrangements.

Credit risk is inherent in the IMF's unique role in the international monetary system because the IMF has limited ability to diversify its credit portfolio and generally provides financing when other sources of credit are not available to a member. In addition, the IMF's credit concentration is generally high due to the nature of the financial assistance provided to its member countries.

Measures to help mitigate the IMF's credit risk include program design and conditionality, which serve to help member countries solve their balance of payments problems within the period of an IMF-supported program and to provide the needed assurances that the member will be able to repay the IMF. Other risk mitigating policies include access limits, monitoring and post-program monitoring, surcharge policies, preventive and remedial measures for dealing with overdue financial obligations, and the burden sharing mechanism (see Note 13).

The IMF has established limits on overall access to resources in the GRA, except for the FCL arrangements. The annual limit is currently set at 145 percent of a member's quota, with a cumulative limit of 435 percent of a member's quota (net of scheduled repurchases). Access in excess of these limits is granted in exceptional circumstances. Except for PLL arrangements, there is no pre-specified maximum on exceptional access to IMF resources, which is assessed on a case-by-case basis in accordance with the policy framework on exceptional access. The IMF assesses factors such as the size of balance of payments needs, the member's debt sustainability and its ability to regain access to financing from other sources, and the strength of policies to be adopted. There was one arrangement with exceptional access approved during the financial year ended April 30, 2019 (none during the financial year ended April 30, 2018).

FCL arrangements are not subject to any access limits. PLL arrangements have a cumulative access limit of 500 percent of quota (net of scheduled repurchases). Access under a six-month PLL arrangement is subject to a limit of 125 percent of quota. In exceptional circumstances where a member is experiencing or has the potential to experience larger short-term balance of payments needs due to the impact of exogenous shocks, including heightened regional or global stress conditions, access is subject to a higher limit of 250 percent of quota.

Disbursements under GRA arrangements are made in tranches and are subject to conditionality in the form of performance criteria, structural benchmarks, and prior actions.

In addition, the IMF has adopted a safeguards policy to mitigate the risk of misuse of resources and a misreporting policy to deal with incorrect reporting of data or performance against any conditions under an IMF-supported program. Safeguards assessments of member central banks are undertaken to provide the IMF with reasonable assurance that the central bank's legal structure, governance, control, reporting, and auditing systems are adequate to maintain the integrity of its operations and to manage resources, including IMF disbursements. When IMF resources are provided as direct budget financing to the government, the safeguards policy also requires that IMF disbursements be deposited at the central bank, and that an appropriate framework agreement between the central bank and the government be

in place to ensure timely servicing of the member's financial obligations to the IMF. Further, a fiscal safeguards review of a state treasury is required for cases where a member requests exceptional access, and at least 25 percent of IMF funds are expected to be used for direct budget financing.

The maximum credit risk exposure is the carrying value of the IMF's credit outstanding and undrawn commitments.

4.2.1.1 Credit outstanding

Credit outstanding comprised SDR 63,694 million and SDR 37,884 million at April 30, 2019, and 2018, respectively (see Note 5). The concentration of GRA outstanding credit by region was as follows:

| | April 30, 2019 | | April 30, 2018 | | |
|---------------------------------|--|--------|----------------|--------|--|
| | (in millions of SDRs and as a percentage total GRA credit outstanding) | | | | |
| Africa | 1,329 | 2.1% | 347 | 0.9% | |
| Asia and Pacific | 878 | 1.4% | 651 | 1.7% | |
| Europe | 16,496 | 25.9% | 22,447 | 59.3% | |
| Middle East and Central Asia | 15,651 | 24.5% | 13,572 | 35.8% | |
| Western Hemisphere | 29,340 | 46.1% | 867 | 2.3% | |
| Total | 63,694 | 100.0% | 37,884 | 100.0% | |

The use of credit in the GRA by the largest users was as follows:

| | April 30, 2019 | | April 30, | 2018 |
|-------------------------------|---|-------|-----------|-------|
| | (in millions of SDRs and as a percentage of total GRA credit outstanding) | | | |
| Largest user of credit | 28,014 | 44.0% | 9,041 | 23.9% |
| Three largest users of credit | 43,266 | 67.9% | 21,554 | 56.9% |
| Five largest users of credit | 54,582 | 85.7% | 29,715 | 78.4% |

The five largest users of GRA credit at April 30, 2019, in descending order, were Argentina, Ukraine, Greece, Egypt, and Pakistan (Greece, Ukraine, Pakistan, Egypt, and Portugal at April 30, 2018).

4.2.1.2 Undrawn commitments

Undrawn commitments under GRA arrangements comprised SDR 90,368 million and SDR 91,446 million at April 30, 2019, and 2018, respectively, and were represented as follows (see Schedule 3):

| _ | April 30, 2019 | | April 30, 2018 | |
|------------------|--|--------|----------------|--------|
| | (number of arrangements and undrawn commitment amount in millions of SDRs) | | | |
| Credit tranches: | | | | |
| SBA | 4 | 18,032 | 3 | 4,241 |
| FCL | 2 | 61,324 | 2 | 70,569 |
| PLL | 1 | 2,151 | 1 | 2,504 |
| EFF | 13 | 8,861 | 11 | 14,132 |
| Total | 20 | 90,368 | 17 | 91,446 |

4.2.2 Market risk on financial assets and liabilities other than investments

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate because of changes in market prices. Market risk for financial assets and liabilities other than investments includes interest rate risk and exchange rate risk.

4.2.2.1 Interest rate risk

Interest rate risk is the risk that future net cash flows will fluctuate because of changes in market interest rates. All interest-bearing financial instruments other than investments of the General Department accrue interest either at the SDR interest rate or at a rate that is linked to the SDR interest rate (see Note 2.2). Interest rate risk is primarily managed by linking the rate of charge directly, by means of a fixed margin, to the cost of financing (which is equal to the SDR interest rate).

4.2.2.2 Exchange rate risk

Exchange rate risk is the risk that the General Department's financial position and cash flows will be affected by fluctuations in foreign currency exchange rates.

- The General Department has no exchange rate risk exposure on its holdings of members' currencies in the GRA, because the members are maintaining the value of such holdings in SDR terms (see Note 5).
- The General Department has other assets and liabilities denominated in currencies other than SDRs, and makes administrative payments largely in U.S. dollars, but the exchange rate risk exposure associated with these activities is limited.
- The General Department has no exchange rate exposure from its current borrowing arrangements because all drawings are denominated in SDRs.

4.2.3 Liquidity risk on financial assets and liabilities other than investments

Liquidity risk is the risk to the General Department of non-availability of resources to meet the financing needs of members and its own obligations. The IMF must have usable resources available to meet members' demand for IMF financing. While the IMF's resources are largely of a revolving nature, uncertainties in the timing and amount of credit extended to members during financial crises expose the IMF to liquidity risk. Moreover, the IMF must also stand ready to provide resources for unexpected needs, for example, to (i) meet, upon a member's representation of need, potential demands for a drawing on the member's reserve tranche position and (ii) authorize drawings to meet demands for encashment of creditor claims under the New Arrangements to Borrow (NAB) or bilateral borrowing agreements (see Note 14).

The IMF manages its liquidity risk by closely scrutinizing developments in its liquidity position. The IMF's main liquidity measure—Forward Commitment Capacity (FCC)—represents the IMF's capacity to make new GRA resources available to its members (see Schedule 2).

Long-term liquidity needs are addressed by reviewing the adequacy of quota-based resources. General reviews of members' quotas are conducted at intervals of no more than five years to evaluate the adequacy of quota-based resources to meet members' demand for IMF financing. The IMF may also borrow to supplement its quota resources (see Note 14).

Short-term liquidity needs for financing activities are reviewed and approved by the Executive Board on a periodic basis through a financial transactions plan for quota resources, and the resource mobilization plan for borrowed resources.

4.2.3.1 Maturity profile of financial assets and liabilities other than investments

Depending on the type of financing instrument, repurchase periods for GRA credit vary from 3½ to 10 years. Scheduled and overdue repurchases of outstanding GRA credit are summarized below:

| | April 30, 2019 | April 30, 2018 |
|-----------------|----------------|----------------|
| Financial year | (in millions | of SDRs) |
| 2019 | _ | 4,358 |
| 2020 | 4,869 | 4,869 |
| 2021 | 4,578 | 4,578 |
| 2022 | 10,797 | 7,188 |
| 2023 | 19,410 | 5,785 |
| 2024 | 13,315 | 4,378 |
| 2025 and beyond | 10,476 | 6,479 |
| Overdue | 249 | 249 |
| Total | 63,694 | 37,884 |

In addition, SDR 9 million in overdue repayments of SAF loans in the SDA are included in other assets (see Note 12).

Repayments of outstanding borrowings are determined according to the schedule of repurchases of credit that was financed by borrowed resources. They also take into account the maximum maturities of outstanding borrowings.

Maximum maturities range from 5 to 10 years. Scheduled repayments of outstanding borrowings are summarized below:

| | April 30, 2019 | April 30, 2018 |
|-----------------|----------------|----------------|
| Financial year | (in millions | of SDRs) |
| 2019 | _ | 3,196 |
| 2020 | 3,391 | 3,391 |
| 2021 | 2,800 | 2,800 |
| 2022 | 2,768 | 4,423 |
| 2023 | 2,553 | 3,352 |
| 2024 | 1,969 | 2,407 |
| 2025 and beyond | 170 | 254 |
| Total | 13,651 | 19,823 |

Future interest on borrowings calculated at the SDR interest rate as at April 30, 2019 represents SDR 135 million for the financial year ending April 30, 2020. Thereafter, a total of SDR 221 million will be paid through the last repayment date.

Usable and other currencies, SDR holdings, and quota subscriptions do not have maturity dates.

4.3 Investments

Investments are exposed to credit and market risks.

4.3.1 Credit risk on investments

Credit risk on investments represents the potential loss if issuers and counterparties were to default on their contractual obligations.

Credit risk in the IA is minimized by limiting fixed-income investments to financial instruments with a credit rating equivalent to at least A (based on Standard & Poor's

long-term rating scale) for the Fixed-Income Subaccount, and at least BBB+ for sovereign bonds and BBB- for corporate bonds for the Endowment Subaccount, except for instruments issued by the Bank for International Settlements (BIS), which does not have a credit rating, central bank deposits, and short-term instruments. Minor holdings of corporate bonds of lower quality could be held by the managers if their credit rating has decreased below BBB- subsequent to the acquisition. See Notes 7.1 and 7.2 for eligible investment classes for the Fixed-Income and Endowment Subaccounts, respectively. Counterparty risk for derivative instruments is mitigated by strict exposure limits, credit rating requirements, and collateral requirements.

The carrying amount of the fixed-income securities represents the maximum exposure to credit risk. The maximum exposure to credit risk for derivative instruments is the amount of any unrealized gains on such contracts.

The credit risk exposure for fixed-term instruments in the IA was as follows:

| | Fixed-Income Subaccount April 30, 2019 April 30, 2018 | | | |
|-----------------|---|-------|--|--|
| | | | | |
| | (as a percentage of total investments in fixed-income securities) | | | |
| Not rated (BIS) | 39.3% | 41.0% | | |
| AAA | 16.4% | 17.4% | | |
| AA+ to AA- | 24.7% | 21.9% | | |
| A+ to A | 19.6% | 19.7% | | |
| Total | 100.0% 100.0% | | | |

The credit risk exposure for derivative instruments in the Fixed-Income Subaccount amounted to SDR 14 million and SDR 20 million at April 30, 2019, and 2018, respectively.

| | Endowment Subaccount | | |
|-----------------|---|--------|--|
| | April 30, 2019 April 30, 20 (as a percentage of total investments in fixed-income securities) | | |
| | | | |
| Not rated (BIS) | _ | 3.4% | |
| AAA | 6.1% | 9.2% | |
| AA+ to AA- | 56.5% | 48.6% | |
| A+ to A– | 23.3% | 22.4% | |
| BBB+ to BBB- | 14.0% | 16.4% | |
| BB+ | 0.1% | | |
| Total | 100.0% | 100.0% | |

The credit risk exposure for derivative instruments in the Endowment Subaccount amounted to SDR 8 million and SDR 35 million at April 30, 2019, and 2018, respectively.

4.3.2 Market risk on investments

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate because of changes in market prices. Market risk for investments includes interest rate risk, exchange rate risk, and other price risks.

The investment objectives of the Fixed-Income and Endowment Subaccounts differ, and the investment strategies, including asset allocation and risk tolerance, are tailored for each of the subaccounts, thereby exposing them to different types of market risk.

4.3.2.1 Fixed-Income Subaccount

The Fixed-Income Subaccount holds debt obligations of a broad range of issuers within limits defined by the Rules and Regulations of the IA (see Note 7.1 for the eligible investments). Market risk is mitigated through asset class diversification and within asset classes through broad security selection.

The Fixed-Income Subaccount authorizes the use of derivative instruments for managing interest rate risk, currency hedging, or reducing costs in the context of portfolio balancing, benchmark replication, and market access.

Exchange rate risk is mitigated by hedging investments denominated in non-SDR currencies into SDR basket currencies with the objective of preserving the Fixed-Income Subaccount's SDR basket composition.

4.3.2.2 Endowment Subaccount

For the passively managed portion of the portfolio, investments are divided into seven categories, which are subject to varying market risks and benefits from diversification properties (see Note 7.2 for the eligible investments). For the actively managed portion of the portfolio, the Rules and Regulations of the IA establish a bond/equity allocation, but no strategic asset allocation is set for the subcomponents of these two broad asset classes. Market risk is mitigated through asset class diversification and within asset classes through broad security selection.

The passively managed portion of the Endowment Subaccount authorizes derivative instruments for managing interest rate risk, currency hedging, or to reduce costs in the context of portfolio balancing, benchmark replication, and market access. The actively managed portion of the Endowment Subaccount permits wider use of derivative instruments, but subject to risk control parameters.

Because the IMF's administrative expenditures are largely in U.S. dollars and the Endowment Subaccount's general objective is to contribute to covering such expenditures (see Note 1.2), the performance of the Endowment Subaccount is measured in U.S. dollars as the base currency but reported

in SDRs. For the passively managed portion of the Endowment Subaccount, the Rules and Regulations of the IA provide for hedging against the exchange rate risk for fixed-income instruments denominated in developed market currencies vis-à-vis the U.S. dollar. For the actively managed portion, the managers have the discretion to hedge exchange rate risks. The valuation changes from the exchange rate fluctuations are included in the determination of investment income.

4.3.2.3 Value at Risk

Exposures to market risk, including interest rate, exchange rate, and other price risks, are measured using value at risk (VaR), which considers not only known market risks in each of the asset categories but also the effect of asset class diversification. The VaR estimates reported below represent the maximum potential loss in value of the assets over the next year due to adverse market movements with a 95 percent confidence level. Conversely, there is a 1 in 20 chance that annual losses on investment assets would be expected to equal or exceed the reported VaR. Losses in a single year could exceed the reported VaR by a significant amount.

VaR models are based predominantly on historical simulations and provide plausible future scenarios based on these simulations. There is no standard methodology for estimating VaR, and the modeling of the market risk characteristics of the investments involves many assumptions and approximations. Different assumptions or approximations could produce significantly different VaR estimates.

The VaR for the Fixed-Income Subaccount portfolio was as follows:

April 30, 2019 April 30, 2018

| | (in millions of SDRs) | |
|-------------------------------|-----------------------|------|
| Tranche 1 (see Note 7) | 64 | 54 |
| Tranche 2 (see Note 7) | 39 | 23 |
| Diversification effects | (39) | (27) |
| Total Fixed-Income Subaccount | 64 | 50 |

The VaR for the Endowment Subaccount portfolio was as follows:

April 30, 2019 April 30, 2018

| | (in millions of SDRs) | |
|---------------------------------------|-----------------------|-------|
| Passively managed portfolio: | | |
| Developed market equities | 276 | 312 |
| Emerging market equities | 108 | 79 |
| Developed market sovereign bonds | 59 | 70 |
| Developed market corporate bonds | 54 | 53 |
| Emerging market bonds | 20 | 43 |
| Inflation-linked bonds | 67 | 59 |
| Real estate investment trusts | 57 | 48 |
| Diversification effects | (203) | (170) |
| Total for passively managed portfolio | 438 | 494 |
| Actively managed portfolio: | | |
| Fixed-income securities | 10 | 6 |
| Equity securities | 18 | 9 |
| Diversification effects | (8) | (4) |
| Total for actively managed portfolio | 20 | 11 |
| Total Endowment Subaccount | 458 | 505 |

4.3.3 Maturity profile of investments

The maturities of the fixed-income securities and derivatives in the Fixed-Income Subaccount were as follows:

April 30, 2019 April 30, 2018

| Financial year | (in millions of SDRs) | | |
|-----------------|-----------------------|--------|--|
| 2019 | _ | 10,120 | |
| 2020 | 8,665 | 2,312 | |
| 2021 | 3,392 | 1,314 | |
| 2022 | 2,007 | 868 | |
| 2023 | 1,134 | 691 | |
| 2024 | 754 | 338 | |
| 2025 and beyond | 576 | 85 | |
| Total | 16,528 | 15,728 | |

The maturities of the fixed-income securities and derivatives in the Endowment Subaccount were as follows:

April 30, 2019 April 30, 2018

| Financial year | (in millions of SDRs) | | |
|-----------------|-----------------------|-------|--|
| 2019 | - | 268 | |
| 2020 | 236 | 359 | |
| 2021 | 380 | 336 | |
| 2022 | 406 | 321 | |
| 2023 | 395 | 321 | |
| 2024 | 371 | 223 | |
| 2025 and beyond | 1,572 | 1,478 | |
| Total | 3,360 | 3,306 | |

Investments in both subaccounts represent liquid investments, which could be sold earlier than their maturity, whenever necessary.

4.4 Post-employment benefit plans

The General Department is exposed to investment, liquidity, and longevity risks associated with post-employment benefit plans (the Plans). These risks are balanced against the need to meet the financial obligations of each plan. The Plans have adopted general guidelines on permissible investments and plan assets are invested according to a strategic asset allocation, which is expected to generate a rate of return at or in excess of the rate of growth in the Plans' liabilities. The strategic asset allocation is reviewed periodically by the Investment Committee. The strategic asset allocation is designed to minimize the level of portfolio market risk (volatility) for the targeted rate of return, while better aligning portfolio volatility with the potential volatility of the Plans' liabilities. Through a global, multiple-asset-class investment approach, the portfolio risk is reduced for any targeted rate of return, because asset class returns are not perfectly correlated as regional and global economic, financial, and political events unfold. The Plans do not utilize specific, targeted asset-liability matching instruments or strategies such as annuities, longevity swaps, cash flow matching, or duration matching.

The primary objective with respect to liquidity is to have sufficient liquid resources available to pay benefits when due. This risk is monitored to ensure that payments due to the participants and beneficiaries can be met from the holdings of cash and highly liquid investments of the Plans.

5. Currencies, including credit outstanding

Under the Articles of Agreement, members are required to maintain the value of the GRA's holdings of their currencies in terms of the SDR. Any depreciation or appreciation in a member's currency vis-à-vis the SDR gives rise to a currency valuation adjustment receivable or payable that must be settled by the member promptly after the end of the financial year or at other times as requested by the IMF or the member.

All holdings of members' currencies were last revalued at April 30, 2019. Currency holdings of SDR 464,022 million at April 30, 2019 included receivables and payables arising from those valuation adjustments of SDR 25,762 million and SDR 6,527 million, respectively (currency holdings of SDR 466,787 million at April 30, 2018, included receivables and payables of SDR 19,207 million and SDR 6,589 million, respectively).

5.1 Credit outstanding

At April 30, 2019, and 2018, members' use of GRA credit was represented by currency holdings of SDR 63,694 million and SDR 37,884 million, respectively.

Changes in the outstanding use of GRA credit under the various facilities of the GRA were as follows:

| | April 30, 2018 | Purchases | Repurchases | April 30, 2019 |
|-------------------------------|-------------------|--------------|-------------|-------------------|
| | | (in millions | of SDRs) | |
| Credit tranches: | | | | |
| SBA | | 29,014 | (2,363) | 31,777 |
| RFI | 1,163 | _ | (227) | 936 |
| EFF | 31,414 | 5,016 | (5,630) | 30,800 |
| Other facilities ¹ | 181 | | _ | 181 |
| Total credit outstanding | 37,884 | 34,030 | (8,220) | 63,694 |

¹ Other facilities include legacy credit under Enlarged Access, Compensatory and Contingency Financing Facility, and Supplementary Financing Facility.

| | April 30, 2017 | Purchases | Repurchases | April 30, 2018 |
|--------------------------|-------------------|-------------|-------------|-------------------|
| | | (in millio | ns of SDRs) | |
| Credit tranches: | | | | |
| SBA | 6,503 | 584 | (1,961) | 5,126 |
| RFI | 1,164 | _ | (1) | 1,163 |
| EFF | 40,450 | 3,610 | (12,646) | 31,414 |
| Other facilities | 183 | | (2) | 181 |
| Total credit outstanding | 48,300 | 4,194 | (14,610) | 37,884 |

Repurchases during the financial years ended April 30, 2019, and 2018, included advance repurchases of SDR 3,863 million and SDR 11,606 million, respectively.

The General Department has performed an impairment analysis of credit outstanding in accordance with its ECL model (see Note 3.2.1.1). Based on this analysis, no loss allowance was deemed to be necessary at April 30, 2019, and 2018. As described in Note 3.2.1.1, the impairment analysis of the General Department's credit outstanding takes into account the unique nature of the IMF's financing and its institutional status, and is performed holistically based on qualitative and quantitative considerations. In this context, the results of an impairment analysis at April 30, 2019, and 2018 are not materially sensitive to reasonable changes in input parameters of the ECL calculation.

5.2 Overdue obligations

At April 30, 2019, and 2018, two members were six months or more overdue in settling their financial obligations to the General Department as follows:

| | GRA repurchases and SAF loans | | GRA charges and SAF interest | |
|---------------------------------|-------------------------------------|----------|------------------------------------|------|
| | April 30 | | April 30 | |
| | 2019 | 2018 | 2019 | 2018 |
| | (ir | millions | of SDRs) |) |
| Total overdue | 257 | 257 | 861 | 857 |
| Overdue for six months or more | 257 | 257 | 859 | 854 |
| Overdue for three years or more | 257 | 257 | 850 | 847 |

The type and duration of the overdue amounts in the General Department were as follows at April 30, 2019:

| | GRA repurchase s and SAF loans | GRA charges and SAF interest | Total obligation | Longest overdue obligation |
|---------|--|------------------------------|------------------|----------------------------------|
| Somalia | 105 | 128 | 233 | July 1987 |
| Sudan | 152 | 733 | 885 | July 1985 |
| Total | 257 | 861 | 1,118 | |

6. SDR holdings

The General Department receives SDRs from members in the settlement of their financial obligations to the GRA and quota subscription payments. In addition, the GRA can use or receive SDRs in transactions and operations with members, including the provision of financial assistance to members, the receipt of charges and fees, and the payment of remuneration on reserve tranche positions or interest on borrowings to member countries and lenders.

At April 30, 2019, and 2018 the SDR holdings of the General Department comprised SDR 22,772 million and SDR 26,472 million, respectively.

The GRA earns interest on its SDR holdings at the same rate as other holders of SDRs. Interest on SDR holdings comprised SDR 252 million during the financial year ended April 30, 2019 (SDR 182 million for the financial year ended April 30, 2018).

7. Investments

Investments comprised the following:

| | April 30, 2019 | April 30, 2018 | | |
|-------------------------|-----------------------|----------------|--|--|
| | (in millions of SDRs) | | | |
| Fixed-Income Subaccount | 16,528 | 15,728 | | |
| Endowment Subaccount | 5,522 | 5,101 | | |
| Total | 22,050 | 20,829 | | |

During the financial year ended April 30, 2019, SDR 665 million was transferred from the GRA to the IA, as approved by the Executive Board (SDR 1,410 million during the financial year ended April 30, 2018).

7.1 Fixed-Income Subaccount

The Fixed-Income Subaccount comprises two tranches, a shorter-duration Tranche 1 and a longer-duration Tranche 2. Tranche 1 is managed actively within tight risk controls against a zero- to three-year government bond benchmark index. Tranche 2 is managed according to a buy-and-hold approach against a zero- to five-year government bond benchmark index and is being phased in over a five-year period, which commenced in 2017.

Both tranches can be invested in fixed-income securities issued by national governments of members, their central banks and official agencies, international financial institutions, and obligations of the BIS. Eligible investments in Tranche 1 also include fixed-income securities issued by subnational governments, corporate bonds, mortgage-backed and other asset-backed securities, and cash instruments with maturities of one year or less. Assets are being invested by external managers, except for short-term investments, fixed-term deposits, and medium-term instruments (BIS). Investments in the Fixed-Income Subaccount were as follows:

| | April 30, 2019 | | | |
|---|-----------------------|-------------|--------|--|
| | Tranche 1 | Tranche 2 | Total | |
| | (in millions of SDRs) | | | |
| At fair value through profit or loss: | | | | |
| International financial institutions obligations: | | | | |
| Medium-term instruments (BIS) | _ | 5,255 | 5,255 | |
| Others | 215 | 621 | 836 | |
| Sovereign bonds | 4,855 | 1,163 | 6,018 | |
| Corporate bonds | 2,596 | _ | 2,596 | |
| Securitized assets | 414 | | 414 | |
| Short-term investments | 182 | 77 | 259 | |
| Derivative assets | 14 | | 14 | |
| Total at fair value through profit or | | | | |
| loss | 8,276 | 7,116 | 15,392 | |
| At amortized cost: | | | | |

| | (in millions of SDRs) | | | |
| At fair value through profit or loss: | | | | |
| International financial institutions obligations: | | | | |
| Medium-term instruments (BIS) | - | 4,096 | 4,096 | |
| Others | 320 | 574 | 894 | |
| Sovereign bonds | 4,010 | 815 | 4,825 | |
| Corporate bonds | 2,958 | - | 2,958 | |
| Securitized assets | 403 | | 403 | |
| Short-term investments | 240 | 80 | 320 | |
| Derivative assets | 20 | | 20 | |
| Total at fair value through profit or | | | | |
| loss | 7,951 | 5,565 | 13,516 | |
| At amortized cost: | | | | |
| Fixed-term deposits | | 2,212 | 2,212 | |
| Total | 7,951 | 7,777 | 15,728 | |

Fair values of derivative assets and liabilities in the Fixed-Income Subaccount at April 30, 2019 were SDR 14 million and SDR 30 million, respectively (SDR 20 million and SDR 31 million for derivative assets and liabilities, respectively, at April 30, 2018). Notional values of derivative instruments were as follows:

| | April 30, 2019 | April 30, 2018 | |
|---------------------|-----------------------|----------------|--|
| | (in millions of SDRs) | | |
| Futures | | | |
| Long positions | 292 | 463 | |
| Short positions | 1,514 | 2,038 | |
| Currency forwards | 1,237 | 1,229 | |
| Interest rate swaps | 242 | 279 | |
| Currency swaps | 840 | 565 | |
| Options on futures | 1 | 1 | |
| Swaptions | 100 | _ | |

7.2 Endowment Subaccount

The assets of the Endowment Subaccount are invested in a globally diversified portfolio consisting of fixed-income and equity instruments (including REITs). Assets are invested by external managers, except for short-term investments and fixed-term deposits. The passively managed portfolio is invested in accordance with the strategic asset allocation in select investment categories approved by the Executive Board. Each investment category is invested to achieve exposure to broad characteristics of the specified asset class. The actively managed portfolio is invested in the same asset categories and has target shares for fixed-income instruments and equities without specific allocation requirements within those shares.

The Executive Board reviewed and amended the Rules and Regulations of the IA during the financial year ended April 30, 2018. The new strategic asset allocation, implemented during the financial year ended April 30, 2019, resulted in minor allocation changes between the investment categories for the passively managed portfolio and a shift in the fixed-income/equities ratio from 65/35 to 60/40. On May 13, 2019, the Executive Board approved the allocation of 5 percent of the passively managed portion of the Endowment assets to private infrastructure debt, and the related investment arrangements. Accordingly, the Rules and Regulations for the Investment Account were also amended and approved. The new investment arrangements are expected to be implemented during the financial year ending April 30, 2020.

Investments consisted of the following investment categories:

| April 3 | 30, 201 | 9 A | pril 3 | 30, 2 | 2018 |
|---------|---------|-----|--------|-------|------|
| | | | | | |

| | (in millions o | f SDRs) |
|---------------------------------------|----------------|---------|
| At fair value through profit or loss: | | |
| Passively managed portfolio: | | |
| Developed market sovereign bonds | 789 | 928 |
| Developed market corporate bonds | 1,036 | 694 |
| Emerging market bonds | 252 | 472 |
| Inflation-linked bonds | 1,043 | 942 |
| Developed market equities | 1,291 | 1,267 |
| Emerging market equities | 503 | 257 |
| Real estate investment trusts | 275 | 231 |
| Short-term investments | 80 | 53 |
| Total passively managed portfolio | 5,269 | 4.844 |
| Actively managed portfolio: | 5,255 | ,, |
| Fixed-income securities | 144 | 69 |
| Equity securities | 93 | 40 |
| Short-term investments | 8 | 3 |
| Total actively managed portfolio | 245 | 112 |
| Derivative assets | 8 | 35 |
| Total fair value through profit or | | |

5,522

5,522

Investment categories comprise funds managed to achieve exposure to broad characteristics of the specified asset class. Funds may include holdings in other asset classes. Market exposure may be achieved through derivative instruments, where necessary and as determined under the IA's Rules and Regulations.

loss

Total

At amortized cost:

Fixed-term deposits

Fair values of derivative assets and liabilities in the Endowment Subaccount at April 30, 2019 were SDR 8 million

and SDR 3 million, respectively (SDR 35 million and SDR 8 million for derivative assets and liabilities, respectively, at April 30, 2018). Notional values of derivative instruments were as follows:

| | April 30, 2019 | April 30, 2018 |
|-------------------|----------------|----------------|
| | (in millions | of SDRs) |
| Futures | | |
| Long positions | 37 | 9 |
| Short positions | 38 | _ |
| Currency forwards | 2,183 | 3,599 |

7.3 Investment income

Net income from investments consisted of the following:

| | 2019 | | | |
|---------------------------------------|----------------------------|-------------------------|-------|--|
| | Fixed-Income Subaccount | Endowment Subaccount | Total | |
| | (in millions of SDRs) | | | |
| Investment income on FVPL investments | 230 | 442 | 672 | |
| Interest income on investments at AC | 28 | 1 | 29 | |
| Investment fees | (7) | (5) | (12) | |
| Total | 251 | 438 | 689 | |

| | 2018 | | |
|---------------------------------------|----------------------------|------------------|-------|
| | Fixed-Income Subaccount | | Total |
| | (in mi | Illions of SDRs) | |
| Investment income on FVPL investments | 68 | 26 | 94 |
| Interest income on investments at AC | 29 | 1 | 30 |
| Investment fees | (6) | (6) | (12) |
| Total | 91 | 21 | 112 |

8. Fair value measurement

Valuation techniques used to value financial instruments include the following:

Level 1

4,991

110

5,101

The fair value of publicly traded investments is based on quoted market prices in an active market for identical assets without any adjustments (closing price for equities and derivative instruments and bid price for fixed-income securities). These investments are included within Level 1 of the fair value hierarchy.

Level 2

The fair value of fixed-income securities not actively traded is determined on the basis of a compilation of significant

observable market information, such as recently executed trades in securities of the issuer or comparable issuers and yield curves. The assessment also takes into account the inherent risk and terms and conditions of each security. Given that the significant inputs are observable, these securities are included within Level 2 of the fair value hierarchy.

The fair value of over-the-counter derivative instruments (foreign exchange forwards, currency/interest rate swaps) not actively traded is determined using a pricing model that incorporates foreign exchange spot and forward rates and interest rate curves. Given that the significant inputs into the pricing models are market observable, these instruments are included within Level 2 of the fair value hierarchy.

8.1 Investments

The following tables present the fair value hierarchy used to determine the fair value of investments in the IA:

| | April 30, 2019 | | | |
|------------------------------|---|--------------|--------|--|
| | Level 1: Quoted prices in active markets | Total | | |
| | (in milli | ons of SDRs) | | |

| Total | 2,411 | 18,503 | 20,914 | |

| | April 30, 2018 | | |
|--------------------------|-------------------------|---|-------|
| | Quoted prices in active | Level 2: Based on observable market data | Total |
| ' | (in milli | ions of SDRs) | |
| rring fair value measure | ments | | |

| Recurring fair value measureme | ents | | |
|--------------------------------|-------|--------|--------|
| Fixed-Income Subaccount | 15 | 13,501 | 13,516 |
| Endowment Subaccount | 1,843 | 3,148 | 4,991 |
| Total | 1,858 | 16,649 | 18,507 |

There were no Level 3 financial instruments at April 30, 2019, and 2018, and there have been no transfers between Level 1 and Level 2 during the period.

Investments in fixed-term deposits in the IA are generally of a short-term nature and are carried at amortized cost, which approximates fair value.

Derivative liabilities at April 30, 2019 comprised SDR 9 million valued based on quoted market prices (Level 1 in the fair value hierarchy) and SDR 24 million valued based on observable market data (Level 2 in the fair value hierarchy)

(SDR 19 million and SDR 20 million for Level 1 and Level 2, respectively, at April 30, 2018).

8.2 Credit outstanding

The IMF plays a unique role in providing balance of payments support to member countries. IMF financing features policy conditions that require member countries to implement macroeconomic and structural policies and are an integral part of IMF financing. These measures aim to help countries resolve their balance of payments problems while safeguarding IMF resources. The fair value of IMF credit outstanding as defined under IFRS 13 cannot be determined due to its unique characteristics, including the debtor's membership relationship with the IMF, and the absence of a principal or most advantageous market for IMF credit.

8.3 Other financial assets and liabilities

The carrying value of other financial assets and liabilities that are classified at AC represents a reasonable estimate of their fair value at April 30, 2019, and 2018.

9. Gold holdings

The IMF acquired its gold holdings from quota subscriptions and financial transactions prior to the entry into force of the Second Amendment of the Articles of Agreement (April 1, 1978). At April 30, 2019, and 2018, the IMF held gold of 2,814 metric tons, equal to 90.474 million fine troy ounces, at designated depositories. Gold holdings were valued at a historical cost of SDR 3,167 million at April 30, 2019, and 2018, based on a cost of SDR 35 per fine troy ounce.

At April 30, 2019, the market value of the IMF's holdings of gold was SDR 83.7 billion (SDR 82.6 billion at April 30, 2018).

10. Property, plant and equipment and intangible assets

Property, plant and equipment and intangible assets, net of depreciation and amortization, amounted to SDR 537 million and SDR 494 million at April 30, 2019, and 2018, respectively, and consisted of land, buildings, equipment, furniture, and software.

| | Land | Buildings | Other | Total |

| Net book value at April 30, 2018 | 95 | 239 | 160 | 494 |

Other property, plant and equipment included construction in progress of SDR 22 million at April 30, 2019 (SDR 27 million at April 30, 2018), related to the renovation of the IMF headquarters building. At April 30, 2019, the IMF had commitments of SDR 13 million for the renovation of the IMF headquarters building (SDR 41 million at April 30, 2018).

Depreciation and amortization expense of SDR 38 million and SDR 33 million is included in administrative expenses for the financial years ended April 30, 2019, and 2018, respectively.

11. Employee benefits

11.1 Overview of the Plans

The IMF has a defined benefit Staff Retirement Plan (SRP) that covers all eligible staff and a Supplemental Retirement Benefits Plan (SRBP) for a subset of participants of the SRP. The SRBP provides for the payment of benefits that otherwise would have been payable had the U.S. qualified plan benefits and compensation limits not applied. Participants in the SRP and SRBP (the pension plans) are entitled to unreduced annual pensions beginning at the normal retirement age of 62 or earlier if certain conditions of age and service are met. The mandatory retirement age is 65. The pension plans also provide an option for eligible staff to receive reduced pension benefits beginning at the age of 50. The level of pension benefits depends on the participants' length of service and highest three-year average gross compensation. Participants may also elect upon retirement to commute up to one-third of the lifetime pension benefits into a lump-sum payment.

The IMF provides other non-pension long-term benefits, including medical insurance, life insurance, separation and repatriation benefits, accrued annual leave up to 60 days, and associated tax allowances. The IMF has established a separate account, the Retired Staff Benefits Investment Account (RSBIA), to hold and invest resources set aside to fund the cost of certain of these post-retirement benefits.

The assets in the SRP, SRBP, and RSBIA (collectively, the Plans) are held separately from the assets of all other accounts of the IMF. In the event the IMF were to exercise its right to terminate the Plans, the assets of these plans would be used to satisfy all liabilities to participants, retired participants, and their beneficiaries, and all other liabilities of the pension plans. Any remaining assets would be returned to the GRA. The GRA meets the costs of administering the Plans, and the SRP and RSBIA reimburse the GRA for investment-related costs.

The Executive Board and the Pension Committee are responsible for the governance of the Plans. The Executive Board approves the funding framework and amendments to the Plans. The Pension Committee, consisting of members of the Executive Board and senior staff, has overall responsibility for carrying out the provisions of the SRP and the SRBP. The Pension Committee also undertakes periodic valuations of the assets and liabilities related to the Plans, and advises the Executive Board on the appropriate funding framework. It is supported by an Investment Committee to oversee the investments of the Plans.

11.2 Net defined benefit asset/liability and benefit costs

The amounts recognized in the statements of financial position were as follows:

| | Α | April 30, 2019 | | April 30, 2018 |
|-------------------------------|---------|-------------------------|----------|----------------|
| | | Other employee benefits | Total | Total |
| | | (in million | s of SDR | s) |
| Defined benefit obligation | (7,812) | (1,784) | (9,596) | (8,625) |
| Plan assets | 7,761 | 1,798 | 9,559 | 9,077 |
| Net defined benefit asset | _ | 113 | 113 | 472 |
| Net defined benefit liability | (51) | (99) | (150) | (20) |

The amounts recognized in the statements of comprehensive income were as follows:

| | | 2019 | | 2018 |
|---|------------------|-------------------------|-------|-------|
| | Pension benefits | Other employee benefits | Total | Total |
| | (| in millions of | SDRs) | |
| Service cost | 198 | 76 | 274 | 274 |
| Interest expense related to defined benefit obligation | 284 | 70 | 354 | 340 |
| Interest income related to plan assets | (297) | (68) | (365) | (340) |
| Net periodic pension cost | 185 | 78 | 263 | 274 |
| Remeasurement of net defined benefit liability | 308 | (80) | 228 | 215 |
| Return on plan assets excluding amounts included in interest income | 119 | 26 | 145 | (594) |
| Exchange differences | (11) | 3 | (8) | (2) |
| Amounts recognized in other comprehensive income | 416 | (51) | 365 | (381) |
| Total expense/(gain) recognized in statements of comprehensive income | 601 | 27 | 628 | (107) |

The reconciliation of the defined benefit obligation was as follows:

| | | 2019 | | 2018 |
|---|---------------------|-------------------------|----------|-------|
| | Pension benefits | Other employee benefits | Total | Total |
| | | (in millions | of SDRs) | |
| Defined benefit obligation at the beginning of the year | 6,923 | 1,702 | 8,625 | 8,433 |
| Current service cost | 198 | 76 | 274 | 274 |
| Interest expense | 284 | 70 | 354 | 340 |
| Employee contributions | 40 | | 40 | 37 |
| Actuarial loss due to demographic assumptions changes | 37 | 17 | 54 | 344 |
| Actuarial expense/(gain) due to financial assumptions changes | 271 | (97) | 174 | (129) |
| Benefits paid | (219) | (53) | (272) | (255) |
| Exchange differences | 278 | 69 | 347 | (419) |
| Defined benefit obligation at the end of the year | 7,812 | 1,784 | 9,596 | 8,625 |

The reconciliation of changes in the fair value of plan assets was as follows:

| | 2019 | | | 2018 |
|--|------------------|-------------------------|------------|-------|
| | Pension benefits | Other employee benefits | Total | Total |
| | | (in million | s of SDRs) | |
| Fair value of plan assets at the beginning of the year | 7,395 | 1,682 | 9,077 | 8,645 |
| Return on plan assets excluding interest income | (119) | (26) | (145) | 594 |
| Interest income | 297 | 68 | 365 | 340 |
| Employer contributions | 78 | 61 | 139 | 133 |
| Employee contributions | 40 | _ | 40 | 37 |
| Benefits paid | (219) | (53) | (272) | (255) |
| Exchange differences | 289 | 66 | 355 | (417) |
| Fair value of plan assets at the end of the year | 7,761 | 1,798 | 9,559 | 9,077 |

The fair value of major categories of plan assets was as follows:

| | Apr | il 30, 2019 | | April 30, 2018 |
|------------------------------------|---|--|---------|----------------|
| | Quoted market price in an active market | No quoted market price in an active market | Total | Total |
| | | (in millions (| of SDRs |) |
| Cash | 38 | _ | 38 | 183 |
| Global equities | 1,762 | 1,332 | 3,094 | 2,803 |
| Emerging market equities | 150 | 1,093 | 1,243 | 1,310 |
| Global fixed income | | 973 | 973 | 879 |
| High-yield fixed income | 26 | 1,044 | 1,070 | 898 |
| Real assets | 380 | 596 | 976 | 894 |
| Private equity and absolute return | | 2,165 | 2,165 | 2,110 |
| Total | 2,356 | 7,203 | 9,559 | 9,077 |

Participants in the pension plans contribute a fixed 7 percent of pensionable gross compensation. The actuarially determined employer contributions to the pension plans during the financial year ended April 30, 2019 amounted to 8.73 percent of pensionable gross compensation (6.08 percent of pensionable gross compensation during the financial year ended April 30, 2018). Under the IMF's funding framework, the budgetary allocations for payments to the pension plans have been set at 14 percent of pensionable gross compensation. The IMF expects to contribute SDR 145 million to the Plans during the financial year ending April 30, 2020.

The expected pension and benefits payments to be paid out by the Plans over the next five years were as follows at April 30, 2019:

| | Pension benefits | Other employee benefits | Total |
|----------------|------------------|-------------------------------|-------|
| Financial year | (in n | nillions of SDRs) | |
| 2020 | 257 | 82 | 339 |
| 2021 | 276 | 62 | 338 |
| 2022 | 293 | 64 | 357 |
| 2023 | 310 | 68 | 378 |
| 2024 | 327 | 71 | 398 |

11.3 Principal actuarial assumptions

The IMF conducts a comprehensive analysis of the principal actuarial assumptions used in calculating the net defined benefit asset/liability every five years and reviews their applicability on an annual basis. The most recent five-year

analysis was completed in January 2016, and the principal actuarial assumptions were revised.

The principal actuarial assumptions used in the actuarial valuation were as follows:

| | April 30, 2019 | April 30, 2018 | |
|--|----------------|----------------|--|
| | (in percent) | | |
| Discount rate/expected return on plan assets | 3.86 | 4.05 | |
| Rate of salary increases (average) | 4.50 | | |
| Health care cost trend rate | 4.00–6.00 | 4.00–6.25 | |
| Inflation | 2.00 | | |
| Life expectancy: | (in years) | | |
| Male | 89 | | |
| Female | 93 | | |

The assumed retirement rate ranges from 5 percent at age 50 to 100 percent at age 65, and the assumed participation rate for medical benefits upon retirement is 85 percent.

The weighted average duration of the defined benefit obligation was 18.1 years as at April 30, 2019 (17.9 years as at April 30, 2018).

The following shows the sensitivity of the present value of the defined benefit obligation to changes in actuarial assumptions at April 30, 2019:

| Present value of the defined | | Increase in assumption | Decrease in assumption |
|------------------------------|--------------------------|------------------------|------------------------|
| benefit obligation | Change in assumption | (in millions | of SDRs) |
| Discount rate | 0.5% | Decrease by 760 | Increase by 870 |
| Rate of salary increases | 0.5% | Increase by 130 | Decrease by 120 |
| Health care cost trend rate | 0.5% | Increase by 160 | Decrease by 140 |
| Inflation rate | 0.5% | Increase by 570 | Decrease by 510 |
| Life expectancy | One year in longevity | Increase by 260 | |

The sensitivity analyses are based on a change in one assumption, while holding all other assumptions constant, so that the effects of correlation between the assumptions are excluded.

12. Other assets and liabilities

Other assets comprised the following:

April 30, 2019 April 30, 2018

| | (in millions of SDRs) | |
|--|-----------------------|-----|
| Basic charges receivable | 300 | 169 |
| Surcharges receivable | 142 | 62 |
| Investment trades receivable | 81 | 137 |
| Accrued interest and dividends on investments | 104 | 101 |
| Accrued interest on SDR holdings | 65 | 54 |
| Overdue SAF loans | 9 | 9 |
| Miscellaneous receivables and prepaid expenses | 68 | 68 |
| Total other assets | 769 | 600 |

Other liabilities comprised the following:

| | April 30, 2019 | April 30, 2018 | |
|---|-----------------------|----------------|--|
| | (in millions of SDRs) | | |
| Refundable commitment fees on active arrangements | 419 | 303 | |
| Investment trades payable | 169 | 354 | |
| Derivative liabilities (see Note 7) | 33 | 39 | |
| Miscellaneous payables | 371 | 270 | |
| Total other liabilities | 992 | 966 | |

13. Burden sharing and the Special Contingent Account

The IMF has adopted the burden sharing mechanism to cope with the financial consequences of member countries' failure to settle financial obligations to the GRA on time. Under the burden sharing mechanism, resources are generated by increasing the rate of charge and reducing the rate of remuneration to cover shortfalls in the GRA's income due to the nonpayment of charges. The burden sharing mechanism has also financed additions to the SCA-1, which offers protection against the risk of loss resulting from the ultimate failure of a member to repay its overdue obligations to the GRA.

Members that participated in burden sharing for overdue charges receive refunds to the extent that these charges are subsequently settled. Contributions to the SCA-1 are returned when there are no outstanding overdue repurchases and charges, or at such earlier time as the IMF may decide.

Overdue charges, net of settlements, that have resulted in adjustments to charges and remuneration for the year ended April 30, 2019 amounted to SDR 5 million (SDR 4 million for the year ended April 30, 2018). Cumulative overdue charges, net of settlements, that have resulted in adjustments to

charges and remuneration since May 1, 1986 (the date the burden sharing mechanism was adopted) amounted to SDR 727 million at April 30, 2019 (SDR 722 million at April 30, 2018). The cumulative refunds for the same period, resulting from the settlements of overdue charges for which burden sharing adjustments have been made, amounted to SDR 1,320 million at April 30, 2019, and 2018.

The SCA-1 balance amounted to SDR 1,188 million at April 30, 2019, and 2018. Effective November 1, 2006, the Executive Board decided to suspend, for the time being, further additions to the SCA-1. Accordingly, no additions have been made to the SCA-1 during the financial years ended April 30, 2019, and 2018.

14. Borrowings

The GRA can borrow to temporarily supplement its quota resources. The Executive Board has established guidelines on borrowing by the GRA to ensure that the financing of the GRA is managed in a prudent and systemic manner.

The GRA's main standing borrowing arrangement is the New Arrangements to Borrow (NAB). The GRA may also borrow under bilateral agreements, in particular loan and note purchase agreements (bilateral borrowing agreements). At April 30, 2019, the NAB credit arrangements amounted to SDR 181 billion and the bilateral borrowing agreements amounted to SDR 317 billion; see Schedules 4 and 5.

At April 30, 2018, the GRA also had the General Arrangements to Borrow (GAB), and an associated agreement with Saudi Arabia, both of which expired on December 25, 2018.

14.1 New Arrangements to Borrow

The NAB is a standing set of credit arrangements with 40 participants, of which 38 agreements were effective at April 30, 2019, and 2018. The NAB provides supplementary resources to the GRA as a second line of defense, when quota resources representing the first line of defense need to be supplemented in order to forestall or cope with an impairment of the international monetary system.

The NAB is renewed periodically; in November 2016, the NAB was renewed through November 2022. NAB resources become available upon activation, which requires the consent of participants representing 85 percent of total NAB credit arrangements of participants eligible to vote and the approval of the Executive Board. Drawings under the NAB can be made to finance purchases by borrowing members for outright purchases and under arrangements that were approved during the period when the NAB was activated. The NAB was deactivated in February 2016, and there were

no commitments under prior activation periods that could be financed with NAB resources as at April 30, 2019 (SDR 3,085 million remained available at April 30, 2018 to finance commitments approved during prior activation periods).

14.2 Bilateral Borrowing Agreements

Bilateral borrowing agreements are intended to serve as a third line of defense to IMF quotas and NAB resources. Currently effective bilateral borrowing agreements, which were signed under the 2016 framework, expire at end-December 2019 and are extendable for another year with creditors' consents.

At April 30, 2019, lenders' commitments under effective borrowing agreements totaled US\$439 billion, equivalent to SDR 317 billion (US\$453 billion equivalent to SDR 315 billion at April 30, 2018).

Resources under bilateral borrowing agreements can be activated only if the amount of IMF resources otherwise available for financing has fallen below a threshold of SDR 100 billion and either the NAB is activated or there are no available uncommitted NAB resources. Activation requires approval by creditors representing 85 percent of the total credit amount committed. Drawings under the borrowing agreements may be made to fund commitments approved during the term of the agreements during which they were active. Drawings are repayable in three months, but maturities can be unilaterally extended by the IMF for up to 10 years. Upon determination by the Executive Board that exceptional circumstances exist as a result of a shortage of resources in relation to obligations falling due, the IMF, with consent of lenders, may further extend the maturities of outstanding drawings under many of the borrowing agreements for up to an additional five years. Claims under the bilateral borrowing agreements are encashable on demand by lenders, subject to certain conditions.

14.3 Outstanding borrowings

Outstanding borrowings represent drawings under the NAB, are denominated in SDRs and carry the SDR interest rate.

During the financial year ended April 30, 2019, no drawings under the NAB occurred and repayments amounted to SDR 6,172 million (SDR 9 million and SDR 9,335 million, respectively, during the financial year ended April 30, 2018). Total outstanding NAB borrowings at April 30, 2019, and 2018, were SDR 13,651 million and SDR 19,823 million, respectively (see Schedule 4).

The average interest rate on outstanding borrowings was 1.036 percent per annum and 0.676 percent per annum for the financial years ended April 30, 2019, and 2018,

respectively. The interest expense on outstanding borrowings during the same periods was SDR 175 million and SDR 161 million, respectively.

15. Quota subscriptions

The IMF's resources are primarily provided by its members through the payment of quota subscriptions, which broadly reflect each member's relative position in the global economy. Quotas also determine each member's relative voting power, its share in SDR allocations, and its access to IMF resources.

The IMF conducts a general review of members' quotas at intervals of not more than five years. The review allows the IMF to assess the adequacy of quota resources to meet its financing needs and to allow for adjustments to members' quotas to reflect their relative positions in the world economy.

The Fourteenth General Review of Quotas became effective in January 2016. As at April 30, 2019, and 2018, 181 members had consented and paid in full their quota increases, amounting to SDR 237 billion. This amount represents over 99 percent of the total quota increases that members were eligible for as at January 26, 2016 (SDR 239 billion). No quota subscription payments took place during the year ended April 30, 2019 (SDR 90 million during the year ended April 30, 2018).

Members' quota subscriptions and reserve tranche positions were as follows:

| | April 30, 2019 | April 30, 2018 | |
|--|-----------------------|----------------|--|
| | (in millions of SDRs) | | |
| Quota subscriptions | 475,473 | 475,473 | |
| Total currency holdings | 464,022 | 466,787 | |
| Less: members' outstanding use of GRA credit | (63,694) | (37,884) | |
| Less: administrative balances | (20) | (16) | |
| | 400,308 | 428,887 | |
| Reserve tranche positions | 75,165 | 46,586 | |

16. Reserves of the General Resources Account

The GRA reserves consist of the Special Reserve and the General Reserve. The General Reserve may be used inter alia to meet capital losses and operational deficits, or for distribution. The Special Reserve can be used for the same purposes except distribution to members. At April 30, 2019, the balances of Special and General Reserves amounted to SDR 10,107 million and SDR 10,764 million, respectively (SDR 10,014 million and SDR 10,670 million, respectively, at April 30, 2018).

The Executive Board determines annually what part of the GRA net income will be placed to the General Reserve or the Special Reserve, and what part, if any, will be distributed. For the financial year ended April 30, 2019, the Executive Board decided to place to the two reserves in equal proportions the amount of SDR 187 million comprising the GRA net income shortfall of SDR 64 million and the income transferred from the Fixed-Income Subaccount of the IA of SDR 251 million (SDR 756 million comprising SDR 665 million and SDR 91 million, respectively, for the financial year ended April 30, 2018).

The GRA's precautionary balances consist of its reserves (excluding SDR 4.4 billion currently held in the Special Reserve, and attributable to the profits from the limited gold sales in 2009–10 that have been earmarked for the Endowment Subaccount) and the SCA-1 (see Note 13). As of April 30, 2019, and 2018, precautionary balances amounted to SDR 17.7 billion and SDR 17.5 billion, respectively. At the most recent review of the adequacy of precautionary balances in January 2018, the Executive Board supported retaining the medium-term indicative target for precautionary balances at SDR 20 billion and the minimum floor at SDR 15 billion.

17. Charges and fees

The average credit outstanding subject to charges amounted to SDR 50,639 million and SDR 43,432 million for the financial years ended April 30, 2019, and 2018, respectively.

The rate of charge levied on outstanding credit is equal to the basic rate of charge adjusted for burden sharing (see Note 13). The basic rate of charge is the SDR interest rate plus a fixed margin as determined by the Executive Board, which for the years ended April 30, 2019, and 2018, amounted to 100 basis points. The average rate of charge (adjusted for burden sharing) was 2.041 percent per annum and 1.681 percent per annum for the financial years ended April 30, 2019, and 2018, respectively.

Credit outstanding in excess of 187.5 percent of quota resulting from purchases in the credit tranches and under the EFF, is subject to a level-based surcharge of 200 basis points per annum above the basic rate of charge. An additional time-based surcharge of 100 basis points per annum applies to such credit outstanding for more than three years, except for purchases under the EFF, for which the additional surcharge of 100 basis points applies after 51 months.

Charges income consisted of the following:

| | 2019 | 2018 |
|--|-----------------------|-------|
| | (in millions of SDRs) | |
| Basic charges before burden sharing adjustment | 1,029 | 720 |
| Deferred basic charges recovered through: | | |
| Burden sharing adjustment to charges | 3 | 2 |
| Burden sharing adjustment to remuneration | 3 | 2 |
| Surcharges | 419 | 371 |
| Total charges | 1,454 | 1,095 |

During the year ended April 30, 2019, the IMF deferred charges due from overdue members in the amount of SDR 5 million (SDR 4 million during the year ended April 30, 2018) (see Note 13). These deferred charges were fully recovered through burden sharing proceeds to charges and remuneration of SDR 2.5 million each during the year ended April 30, 2019 (SDR 2 million each during the year ended April 30, 2018) (see also Note 18).

A service charge of 50 basis points is levied by the GRA on all purchases, except for reserve tranche purchases. A commitment fee is levied on the amount available for financing under an arrangement for each 12-month period and refunded as the member makes purchases under the arrangement. The commitment fee amounts to 15 basis points per annum for access up to 115 percent of quota, 30 basis points for access between 115 and 575 percent of quota, and 60 basis points for access in excess of 575 percent of quota. At the arrangement's expiration or cancellation, any unrefunded amount is recognized as income.

Service charges and commitment fee income consisted of the following:

| | 2019 | 2018 | |
|-----------------|-----------------------|------|--|
| | (in millions of SDRs) | | |
| Service charges | 170 | 21 | |
| Commitment fee | 83 | 323 | |
| Total charges | 253 | 344 | |

18. Remuneration of members' reserve tranche positions

Remuneration of members' reserve tranche positions amounted to SDR 552 million and SDR 272 million for the financial years ended April 30, 2019, and 2018, respectively.

A portion of the reserve tranche position is unremunerated. For a member that joined the IMF on or before April 1, 1978, the unremunerated portion is equal to 25 percent of the member's quota subscription on April 1, 1978 (that part of the

quota subscription that was paid in gold prior to the Second Amendment of the Articles). For a member that joined the IMF after that date, its unremunerated reserve tranche is a percentage of its initial quota equivalent to the ratio of total unremunerated reserve tranches for all other members to their total quota subscriptions when the new member joined the IMF. The average remunerated reserve tranche amounted to SDR 52,712 million and SDR 40,454 million during the financial years ended April 30, 2019, and 2018, respectively.

The rate of remuneration is currently equal to the SDR interest rate. Burden sharing adjustments reduce the rate of remuneration, but under the Articles of Agreement, the rate of remuneration may be no lower than 80 percent of the SDR interest rate. The average rate of remuneration (adjusted for burden sharing) for the financial years ended April 30, 2019, and 2018, was 1.031 percent per annum and 0.671 percent per annum, respectively. The amounts of burden sharing adjustments for the same periods are disclosed in Note 17.

19. Administrative expenses

Administrative expenses, most of which were incurred in U.S. dollars, were as follows:

| | 2019 | 2018 |
|---|--------------|----------|
| | (in millions | of SDRs) |
| Personnel | 571 | 544 |
| Pension and other long-term employee benefits | 263 | 274 |
| Travel | 93 | 87 |
| Other | 212 | 200 |
| | 1,139 | 1,105 |
| Reimbursements | (208) | (201) |
| Total administrative expenses | 931 | 904 |

Reimbursements represent repayment for the expenses incurred in conducting the business of the SDR Department, certain trusts and accounts administered by the IMF, and for the cost of the investment operations of the SRP and the RSBIA (see Notes 1.4 and 21).

20. Special Disbursement Account

Assets in the SDA can be used for special purposes authorized in the Articles of Agreement, including providing financial assistance on special terms to low-income member countries under the Structural Adjustment Facility and the Trust Fund.

20.1 Structural Adjustment Facility

The last SAF loan disbursement was made in 1995, and currently one member (Somalia) has overdue SAF

repayment obligations (see Note 12). Interest on SAF loans is levied at 0.5 percent per annum. All interest income is deferred.

20.2 Trust Fund

The SDA was initially activated to receive transfers from the Trust Fund. The IMF is the Trustee of the Trust Fund, which was established in 1976 to provide balance of payments assistance on concessional terms to eligible members that qualified for such assistance. The Trust Fund is in liquidation following its termination in 1981. Since that date, the activities of the Trust Fund have been confined to the conclusion of its affairs. The Trust Fund has no assets other than loans and interest receivable from Somalia and Sudan amounting to SDR 92 million at April 30, 2019, and 2018. All interest income is deferred.

Proceeds from the payments of SAF loans and Trust Fund loans are transferred from the SDA to the Reserve Account of the PRG Trust as contributions. During the financial years ended April 30, 2019, and 2018, there were no such transfers.

21. Related party transactions

The expenses of conducting the business of the SDR Department, the SRP, the SRBP, the RSBIA, and trusts administered by the IMF as Trustee are paid by the GRA. At the end of each financial year, reimbursements are made by the SDR Department (through assessments levied on SDR Department participants) and the PRG Trust in accordance with the IMF's Articles of Agreement and decisions of the Executive Board. The SRP and the RSBIA reimburse the GRA for the cost of the investment operations. The following summarizes the reimbursements to the GRA:

| | 2019 | 2018 |
|----------------|--------------|----------|
| | (in millions | of SDRs) |
| SDR Department | 3 | 3 |
| PRG Trust | 63 | 64 |
| SRP and RSBIA | 4 | 3 |

The General Department has transferred resources to the PRG Trust, PRGF-HIPC Trust, and CCR Trust to provide financial assistance to low-income countries. The following summarizes the cumulative inter-entity transfers from the IMF:

April 30, 2019, and 2018

 (in millions of SDRs)

 PRG Trust:

 Reserve Account
 2,697

 Subsidy Accounts
 1,018

 PRG-HIPC Trust
 1,239

 CCR Trust
 293

Disclosures on the remuneration of IMF key management personnel are included in Part 3 of the Annual Report, of which the financial statements of the General Department are an integral part.

Components may not sum exactly to totals because of rounding.

1 Includes nonnegotiable, non-interest-bearing notes that members are entitled to issue in substitution for currencies, and outstanding currency valuation adjustments.

2 Represents the percentage of total use of GRA resources (column A).

3 Loans under the Structural Adjustment Facility previously financed by the SDA.

4 Includes outstanding Trust Fund loans to Somalia (SDR 6.5 million) and Sudan (SDR 59.2 million).

5 Expects Leave as the Kinadom of Sugariland.

 $^{^{\}rm 5}$ Formerly known as the Kingdom of Swaziland.

⁶ Formerly known as the former Yugoslav Republic of Macedonia.
** Less than SDR 50,000 or 0.005 percent.

SCHEDULE 2: Financial Resources and Liquidity Position in the General Resources Account at April 30, 2019, and 2018

(in millions of SDRs)

| | 2019 | 2018 |
|---|----------|----------|
| Usable resources: | | |
| Usable currencies | 332,968 | 361,099 |
| SDR holdings | 22,772 | 26,472 |
| Available resources under borrowing arrangements ¹ | | 3,085 |
| Total usable resources ² | 355,740 | 390,656 |
| Undrawn balances under GRA arrangements: | | |
| Precautionary | (64,670) | (74,978) |
| Non-precautionary | (25,698) | (16,468) |
| Total undrawn balances under GRA arrangements | (90,368) | (91,446) |
| Uncommitted usable resources | 265,372 | 299,210 |
| Repurchases one-year forward ³ | 4,869 | 4,358 |
| Repayments of borrowing one-year forward ⁴ | (3,391) | (3,196) |
| Prudential balance ⁵ | (80,013) | (79,925) |
| One-year forward commitment capacity (FCC) ⁶ | 186,837 | 220,447 |
| Memorandum items: | | |
| Resources committed under borrowing arrangements | | |
| NAB ⁷ | 180,573 | 180,573 |
| Bilateral borrowing agreements | 316,742 | 315,024 |
| Quota subscriptions of members that finance IMF transactions | 400,067 | 399,626 |
| Liquid liabilities | | |
| Reserve tranche positions | 75,165 | 46,586 |
| Outstanding borrowings | 13,651 | 19,823 |

¹ The available resources under borrowing arrangements represent NAB financing from prior activation periods not yet drawn.

² Usable resources consist of (i) holdings of currencies of members considered by the IMF as having balance of payments and reserve positions sufficiently strong for their currencies to be used in transfers, (ii) SDR holdings, and (iii) any unused amounts under credit lines that have been activated.

Repurchases by member countries falling due during the coming 12-month period.
 Repayments of borrowings falling due during the coming 12-month period.

⁵ Prudential balance is set at 20 percent of quota subscriptions of members whose currencies are used in the financing of IMF transactions.

The FCC does not include bilateral commitments from members to boost the IMF's resources. These resources will be counted toward the FCC only once (i) individual bilateral agreements are effective and (ii) the associated resources are available for use by the IMF in accordance with the 2016 borrowing framework.

⁷ Outstanding drawings and commitments under the NAB cannot exceed SDR 180.6 billion.

SCHEDULE 3: Schedule of Arrangements in the General Resources Account for the Year Ended April 30, 2019

II. Financial Statements of the SDR Department

Report of Independent Auditors

To the Board of Governors of the International Monetary Fund

We have audited the accompanying financial statements of the Special Drawing Rights Department (SDR Department) of the International Monetary Fund ("Department"), which comprise the statements of financial position as of April 30, 2019 and 2018, and the related statements of comprehensive income for the years then ended.

We are independent of the Department in accordance with the ethical requirements that are relevant to our audit of the financial statements in the United States of America and with the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants*. We have fulfilled our other ethical responsibilities in accordance with these requirements.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Department's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting, unless management either intends to liquidate the Department or to cease operations or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Department's financial reporting process.

Auditors' Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether due to fraud or error. Reasonable assurance is a high level of assurance but is not a guarantee that an audit will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. We design audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error because fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

In making those risk assessments, we consider internal control relevant to the Department's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the Department's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation, structure, and content of the financial statements, including disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

As part of an audit, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Department's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report. However, future events or conditions may cause the Department to cease to continue as a going concern.
- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies or material weaknesses in internal control that we identify during our audit.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Special Drawing Rights Department of the International Monetary Fund as of April 30, 2019 and 2018, and the results of its operations for the years then ended in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Other Matter

Our audit was conducted for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules appearing on pages 57 to 63 are presented for purposes of additional analysis and are not a required part of the financial statements. The information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves and other additional procedures, in accordance with auditing standards generally accepted in the United States of America. We also subjected the information to the applicable procedures required by International Standards on Auditing. In our opinion, the information is fairly stated, in all material respects, in relation to the financial statements taken as a whole.

Notes to the Financial Statements for the Financial Years Ended April 30, 2019, and 2018

1. Nature of operations

The Special Drawing Right (SDR) is an international interest-bearing reserve asset created by the International Monetary Fund (IMF) following the First Amendment of the Articles of Agreement in 1969. SDRs can be held and used only by participants in the SDR Department, by the IMF through the General Resources Account (GRA), and by certain official entities designated by the IMF and referred to as "prescribed holders". The value of the SDR as a reserve asset derives from the commitments of participants to hold and accept SDRs and to honor various obligations connected with the proper functioning of the SDR Department. At April 30, 2019, and 2018, all members of the IMF were participants in the SDR Department and 15 institutions were designated as prescribed holders.

Since the creation of the SDR in 1969, three general allocations and one special allocation of SDRs have been made, for a total of SDR 204.2 billion as at April 30, 2019, and 2018. Prescribed holders do not receive SDR allocations. Holders of SDRs earn interest on their SDR holdings. Participants pay charges on their cumulative SDR allocations. Both interest and charges are at the SDR interest rate. Participants that use their SDRs, and therefore hold fewer SDRs than their cumulative allocations, will pay more charges than they will receive interest on their holdings. Conversely, participants that hold more SDRs than their cumulative allocations will receive more interest than the charges they will pay on their holdings.

The resources of the SDR Department are held separately from the assets and liabilities of all the other accounts of, or administered by, the IMF. They may not be used to meet the liabilities, obligations, or losses of the IMF incurred in the operations of the General Department or other accounts, except that the SDR Department reimburses the General Department for expenses incurred in conducting the business of the SDR Department. Upon participants' termination of participation in, or liquidation of, the SDR Department, the IMF will provide to holders freely usable currencies or currencies of holders received from the participants in settlement of their obligations. A freely usable currency is a member's currency that the IMF has determined is widely used to make payments for international transactions and widely traded in the principal exchange markets. At present, the Chinese renminbi, euro, Japanese yen, pound sterling, and U.S. dollar are classified as freely usable currencies.

The SDR is also used by several international and regional organizations as a unit of account or as the basis for their units of account. Several international conventions and treaties also use the SDR as a unit of account.

1.1 Uses of SDRs

Participants and prescribed holders can use and receive SDRs in transactions and operations by agreement among themselves in accordance with the IMF's Articles of Agreement and decisions adopted by the IMF Executive Board. Participants may also conduct such transactions bilaterally with any participant or prescribed holder through voluntary trading arrangements to buy and sell SDRs. The role of the IMF in such transactions by agreement is to act as intermediary, matching participants in this managed market in a manner that meets, to the greatest extent possible, the requirements and preferences of the buyers and sellers of SDRs.

Participants can use SDRs in operations and transactions involving the GRA of the General Department, such as the payment of quota, payment of charges, and repurchases. The GRA can use SDRs in operations and transactions involving participants, such as purchases, payment of remuneration, and repayment of borrowings. If necessary, the IMF may also designate participants to provide freely usable currency in exchange for SDRs; in doing so, the IMF ensures that a participant can use its SDRs to obtain an equivalent amount of freely usable currency if it has a need because of its balance of payments, its reserve position, or developments in its reserves.

1.2 Allocations and cancellations of SDRs

The IMF has the authority to provide unconditional liquidity through general allocations of SDRs to participants in the SDR Department in proportion to their quotas in the IMF. The IMF cannot allocate SDRs to itself or to other holders it prescribes. In its decisions on general allocations of SDRs, the IMF, as prescribed under its Articles, has sought to meet the long-term global need to supplement existing reserve assets and avoid economic stagnation and deflation as well as excess demand and inflation.

A new IMF member that elects to participate in the SDR Department receives an initial allocation, consisting of an amount determined on the basis of its IMF quota under Article XVIII of the IMF's Articles of Agreement, and an amount in accordance with the special allocation of SDRs

under the Fourth Amendment of the Articles of Agreement. The latter, which came to effect in 2009, was intended to enable all members at the time and new members to participate in the SDR system on an equitable basis.

SDRs allocated under the special allocation to participants with overdue obligations to the IMF are held in an escrow account with the SDR Department and will be released to the participants upon their settlement of all overdue obligations (see Note 4).

The Articles of Agreement also provide for cancellations of SDRs, although to date there have been no cancellations.

2. Basis of preparation and measurement

The financial statements of the SDR Department are prepared in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB). The financial statements have been prepared under the historical cost convention.

The SDR Department is self-financed and does not have any equity as net cumulative allocations are equal to SDR holdings. It holds no cash or cash equivalents and as net operational income and net expenditure are always equal, it generates no income. Cash flows arising from operating activities are limited to the receipt of charges and assessments and payment of interest and administrative expenses. A statement of cash flows is not presented as it would not provide additional information beyond that already contained in the Statements of Comprehensive Income. Changes in SDR holdings are shown in Schedule 1.

2.1 Unit of account

The financial statements are presented in SDRs, which is the IMF's unit of account. The value of the SDR is determined daily by the IMF by summing specific amounts of the basket currencies in U.S. dollar equivalents on the basis of market exchange rates. The IMF reviews the composition of the SDR valuation basket at a minimum of five-year intervals. The specific amounts of the currencies in the basket, effective October 1, 2016, were as follows:

| SDR basket currency | Amount |
|---------------------|----------|
| Chinese renminbi | 1.0174 |
| Euro | 0.38671 |
| Japanese yen | 11.900 |
| Pound sterling | 0.085946 |
| U.S. dollar | 0.58252 |

At April 30, 2019, 1 SDR was equal to US\$1.38576 (US\$1.43806 at April 30, 2018). The next review of the

method of valuation of the SDR will take place by September 30, 2021, unless developments in the interim justify an earlier review.

2.2 SDR interest rate

The SDR interest rate is used to calculate the interest paid on holdings and charges received on allocations.

The SDR interest rate is determined weekly by reference to a weighted average of yields or rates on short-term instruments in the money markets of the SDR basket currencies as follows:

| SDR basket currency | Yield or rate |
|---------------------|---|
| Chinese renminbi | Three-month benchmark yield for China Treasury bonds as published by the China Central Depository and Clearing Co., Ltd. |
| Euro | Three-month spot rate for euro area central government bonds with a minimum rating of AA published by the European Central Bank |
| Japanese yen | Three-month Treasury discount bills |
| Pound sterling | Three-month Treasury bills |
| U.S. dollar | Three-month Treasury bills |

The SDR interest rate is subject to a floor of 0.050 percent and is rounded to three decimal places. The average interest rate was 1.036 percent and 0.676 percent per annum for the financial years ended April 30, 2019, and 2018, respectively.

2.3 Use of estimates and judgement

The preparation of financial statements requires management to make judgements, estimates, and assumptions that affect the application of the accounting policies and the reported amounts of assets, liabilities, income, and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

The most significant estimates and judgements used in applying accounting policies include assessing potential impairment of the participants' net obligations to the SDR Department (see Note 3).

3. Summary of significant accounting policies

3.1 Financial instruments

IFRS 9, "Financial Instruments", as issued by the IASB in July 2014 was adopted with a date of initial application of May 1, 2018. The requirements of IFRS 9 represent a

significant change from the standard it superseded, International Accounting Standard (IAS) 39, "Financial Instruments: Recognition and Measurement". See Note 3.5 for the effect of IFRS 9 adoption.

Classification and measurement

Financial instruments are recognized when the SDR Department becomes a party to the contractual provisions of the instrument. At initial recognition, a financial instrument is measured at its fair value, which is best evidenced by the transaction amount. Subsequently, financial instruments are measured at amortized cost.

Impairment

The incurred loss model of IAS 39 has been replaced by a forward-looking expected credit loss model, which applies to, inter alia, financial assets measured at amortized cost. An allowance for expected credit loss must be recognized for either 12-month or lifetime expected credit losses, depending on whether there has been a significant increase in credit risk since inception. In making such a determination, all relevant information, including forward-looking information that is available without undue cost or effort, should be considered.

At each reporting date, the SDR Department assesses on a forward-looking basis the expected credit losses (ECL) associated with its financial assets at amortized cost. The measurement of ECL reflects: (i) an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes; (ii) the time value of money; and (iii) reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions, and forecasts of future economic conditions.

If ECL needed to be recognized, they would be recorded as impairment allowances.

3.2 SDR allocations and holdings

Participants with holdings below their allocations have a net obligation to the SDR Department, which is presented as an asset in the statements of financial position. Participants with holdings in excess of their allocations have established a net claim on the SDR Department, which is presented in the statements of financial position as a liability.

Impairment of participants' net obligations to the SDR Department

The SDR Department's application of the impairment requirements of IFRS 9 is grounded in the context of the unique nature of its operations. The debtor positions in the SDR Department do not have maturity dates and could be held until the participant's withdrawal from the SDR Department or the liquidation of the SDR Department. The likelihood of the SDR Department incurring credit losses is

remote considering the IMF's unique relationship with its member countries (all of which are participants in the SDR Department), and its multilayered risk management framework. In addition, the IMF also has de facto preferred creditor status, which has been recognized by the official community and generally accepted by private creditors. Overdue charges, if any, would accrue interest at the SDR interest rate in perpetuity preserving the time value of money.

3.3 Interest and charges

Interest is accrued on holdings of SDRs, and charges are levied on each participant's cumulative SDR allocation at the SDR interest rate with the net result to be paid or received each quarter. Charges are also levied on any negative balance of the participant or unpaid charges. If sufficient SDRs are not received because charges are overdue, additional SDRs are temporarily created. This is in substance a receivable asset that is reversed when the participants pay the overdue charges. Interest and charges are settled by crediting and debiting the individual holdings accounts.

3.4 Assessment

The expenses of conducting the business of the SDR Department are paid by the IMF from the GRA, which is reimbursed by the SDR Department. For this purpose, the SDR Department levies an assessment on all participants in proportion to their cumulative allocations at the end of each financial year.

3.5 New International Financial Reporting Standards

The following new standards issued by the IASB and applicable to the SDR Department became effective in the financial year ended April 30, 2019.

IFRS 9, "Financial Instruments", which replaces IAS 39, "Financial Instruments: Recognition and Measurement", is effective for annual periods starting on or after January 1, 2018 and was adopted on May 1, 2018.

Transition to IFRS 9 adoption

The adoption of IFRS 9 did not have a material effect on the financial statements of the SDR Department. Changes in accounting policies resulting from the adoption of IFRS 9 have been applied retrospectively (see Note 3.2 for details).

IFRS 15, "Revenue from Contracts with Customers", is effective for annual periods starting on or after January 1, 2018, was adopted by the SDR Department on May 1, 2018. IFRS 15 provides a principles-based approach for revenue recognition that applies to all contracts with customers except those related to financial instruments, leases, and insurance contracts. It requires an entity to recognize revenue as performance obligations are satisfied.

Adoption of IFRS 15 did not have a material effect on the financial statements of the SDR Department.

4. Allocations and holdings

At April 30, 2019, and 2018, cumulative allocations to participants totaled SDR 204.2 billion.

Participants' net SDR positions were as follows:

| | | April 30, 2019 | 9 | | April 30, 2018 | 3 |
|------------------------|-------------------|-------------------|-------------|-------------------|-------------------|---------|
| | Below allocations | Above allocations | Total | Below allocations | Above allocations | Total |
| | | | (in millior | ns of SDRs) | | |
| Cumulative allocations | 116,973 | 87,185 | 204,158 | 132,271 | 71,887 | 204,158 |
| Holdings of SDRs | 87,377 | 92,923 | 180,300 | 100,264 | 76,367 | 176,631 |
| Net SDR positions | 29,596 | (5,738) | 23,858 | 32,007 | (4,480) | 27,527 |

The composition of SDR holdings was as follows:

| | April 30, 2019 | April 30, 2018 |
|---------------------------|----------------|----------------|
| | (in millio | ns of SDRs) |
| Participants | 180,300 | 176,631 |
| General Resources Account | 22,772 | 26,472 |
| Prescribed holders | 1,086 | 1,055 |
| Total holdings | 204,158 | 204,158 |

In accordance with the provision of the Fourth Amendment of the IMF's Articles of Agreement, SDRs are held in escrow on behalf of participants with overdue obligations to the General Department and the Poverty Reduction and Growth (PRG) Trust. At April 30, 2019, and 2018, SDR 20.3 million was held in escrow for Somalia (SDR 4.2 million) and Sudan (SDR 16.1 million). The SDRs held in escrow will be released to the participants upon the settlement of overdue obligations, and their allocations and holdings adjusted accordingly.

5. Related party transactions and administrative expenses

The GRA is a holder of SDRs and conducts operations and transactions with the SDR Department participants. The GRA's holdings of SDRs amounted to SDR 22.8 billion and SDR 26.5 billion at April 30, 2019, and 2018, respectively.

The expenses of conducting the business of the SDR Department, paid by the IMF from the GRA, and reimbursed by the SDR Department, were SDR 3 million for each of the financial years ended April 30, 2019, and 2018.

Supplemental Schedules

SCHEDULE 1: Statements of Changes in SDR Holdings for the Financial Years Ended April 30, 2019, and 2018

(in millions of SDRs)

| | 2019 | | 2018 | | | |
|--|--------------|---------------------------------|--------------------|--------------|---------------------------------|--------------------|
| | Participants | General Resources Account | Prescribed holders | Participants | General Resources Account | Prescribed holders |
| Total holdings, beginning of the year | 176,631 | 26,472 | 1,055 | 174,817 | 28,256 | 1,085 |
| Transactions by agreement: | | | | | | |
| Acquisitions | 6,322 | | 1 | 5,160 | | |
| Sales | (5,238) | | (1,085) | (3,957) | | (1,203) |
| Settlement of financial obligations | (87) | | 87 | (49) | | 49 |
| GRA operations: | | | | | | |
| Acquisitions in exchange for currencies of other members | 595 | (595) | | 707 | (707) | |
| Purchases | 5,399 | (5,399) | | 3,419 | (3,419) | |
| Repurchases | (1,072) | 1,072 | | (1,036) | 1,036 | |
| Repayment of borrowings | 62 | (62) | | 86 | (86) | |
| GRA charges | (1,241) | 1,241 | | (1,151) | 1,151 | |
| Service charges and commitment fees, net of refunds | (369) | 369 | | (375) | 375 | |
| Quota payments | | _ | - | (20) | 20 | |
| Remuneration | 456 | (456) | | 230 | (230) | |
| Interest on borrowings | 177 | (177) | | 146 | (146) | |
| Other IMF-related operations: | | | | | | |
| PRG Trust disbursements | 312 | | (312) | 229 | | (229) |
| PRG Trust loan repayments and interest | (965) | | 965 | (867) | | 867 |
| PRG Trust, PRG-HIPC Trust, and CCR Trust borrowings | (878) | | 878 | (870) | | 870 |
| PRG Trust, PRG-HIPC Trust, and CCR Trust borrowing repayments and interest | 429 | | (429) | 324 | | (324) |
| Refunds to contributors and other operations | 22 | | (22) | 2 | ** | (2) |
| SDR charges ¹ | (1,964) | | | (1,155) | | |
| SDR interest ¹ | 1,712 | 241 | 11 | 994 | 155 | 6 |
| Reimbursement of expenses (including SDR assessment) | (3) | 66 | (63) | (3) | 67 | (64) |
| Total holdings, end of the year | 180,300 | 22,772 | 1,086 | 176,631 | 26,472 | 1,055 |

Components may not sum exactly to totals because of rounding.

¹ The presentation of SDR interest and charges has been changed from net to gross presentation to be consistent with the presentation of all other transactions in the table.

** Less than SDR 500,000.

SCHEDULE 2: Allocations and Holdings of Participants at April 30, 2019

(in millions of SDRs)

| | | Holdings | | | |
|-----------------------------------|-------------|------------|---------------------------|---------------------------|--|

III. Financial Statements of the Concessional Lending and Debt Relief Trusts

Report of Independent Auditors

To the Board of Governors of the International Monetary Fund

We have audited the accompanying financial statements of the Poverty Reduction and Growth Trust (PRG Trust), the Trust for Special Poverty Reduction and Growth Operations for the Heavily Indebted Poor Countries and Interim ECF Subsidy Operations and related Umbrella Account for HIPC Operations (the PRG-HIPC Trust and related Umbrella Account), and the Catastrophe Containment and Relief Trust and the related Umbrella Account for CCR Operations (CCR Trust and related Umbrella Account) (collectively referred to as the "Concessional Lending and Debt Relief Trusts" or "Trusts"), which comprise the statements of financial position as of April 30, 2019 and 2018, and the related statements of comprehensive income and changes in resources and of cash flows for the years then ended.

We are independent of the Trusts in accordance with the ethical requirements that are relevant to our audit of the financial statements in the United States of America and with the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants*. We have fulfilled our other ethical responsibilities in accordance with these requirements.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Trusts' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting, unless management either intends to liquidate the Trusts or to cease operations or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Trusts' financial reporting process.

Auditors' Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether due to fraud or error. Reasonable assurance is a high level of assurance but is not a guarantee that an audit will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. We design audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is

higher than for one resulting from error because fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

In making those risk assessments, we consider internal control relevant to the Trusts' preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the Trusts' internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation, structure, and content of the financial statements, including disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

As part of an audit, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Trusts' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report. However, future events or conditions may cause the Trusts to cease to continue as a going concern.
- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies or material weaknesses in internal control that we identify during our audit.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of each of the Poverty Reduction and Growth Trust, the Trust for Special Poverty Reduction and Growth Operations for the Heavily Indebted Poor Countries and Interim ECF Subsidy Operations and the related Umbrella Account for HIPC Operations, and the Catastrophe Containment and Relief Trust and the related Umbrella Account for CCR Operations, as of April 30, 2019 and 2018, and the results of each of their operations and each of their cash flows for the years then ended in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Other Matter

Our audit was conducted for the purpose of forming an opinion on each Trust's financial statements taken as a whole. The supplemental schedules appearing on pages 87 to 95 are presented for purposes of additional analysis and are not a required part of the respective Trusts' financial statements. The information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the respective Trusts' financial statements. The information has been subjected to the auditing procedures applied in the audit of the respective Trusts' financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the respective Trusts'

financial statements or to their respective financial statements themselves and other additional procedures, in accordance with auditing standards generally accepted in the United States of America. We also subjected the information to the applicable procedures required by International Standards on Auditing. In our opinion, the information is fairly stated, in all material respects, in relation to the respective trust financial statements taken as a whole.

Notes to the Financial Statements for the Financial Years Ended April 30, 2019, and 2018

1. Nature of operations

The International Monetary Fund (IMF) is the Trustee of the following trusts:

- The Poverty Reduction and Growth Trust (PRG Trust)
- ii. The Trust for Special Poverty Reduction and Growth Operations for the Heavily Indebted Poor Countries and Interim ECF Subsidy Operations (the PRG-HIPC Trust) and the related Umbrella Account for HIPC Operations (the PRG-HIPC Umbrella Account)
- iii. The Catastrophe Containment and Relief Trust (CCR Trust) and the related Umbrella Account for CCR Operations (the CCR Umbrella Account)

Collectively, these trusts are referred to as the "Concessional Lending and Debt Relief Trusts" or the "Trusts". The Trusts provide loans on concessional terms and/or debt relief assistance to low-income member countries.

The assets and liabilities of each Trust are held separately from the assets and liabilities of all other accounts of, or administered by, the IMF. The Trusts' assets may not be used to discharge liabilities or to cover losses incurred in the administration of other accounts. Administrative expenses incurred by the Trusts are paid by the IMF and reimbursed by these Trusts in accordance with the IMF's Articles of Agreement and decisions of the IMF Executive Board. Resources not immediately needed in operations are invested as allowed by the instruments establishing the Trusts (Trust Instruments).

1.1 PRG Trust

Established originally as the Enhanced Structural Adjustment Facility Trust in December 1987, the PRG Trust provides loans on concessional terms to qualifying low-income member countries. The PRG Trust provides financial assistance tailored to the diverse needs of low-income countries with higher concessionality of financial support.

Financing is available under the following facilities:

 The Extended Credit Facility (ECF) for members with protracted balance of payments problems under three- to four-year arrangements, which may be extended up to a total of five years

- ii. The Standby Credit Facility (SCF) for actual or potential short-term balance of payments needs under one- to two-year arrangements
- iii. The Rapid Credit Facility (RCF) for urgent balance of payments needs, which provides financial support in outright loan disbursements

Until April 10, 2010, the PRG Trust provided loans under the Exogenous Shocks Facility (ESF) to facilitate member countries' adjustment to sudden and exogenous shocks.

The repayment terms of PRG Trust loans are 5½ to 10 years for the ECF, ESF, and RCF and four to eight years for the SCF, in equal semiannual installments. The structure of interest rates on PRG Trust lending is reviewed every two years by the IMF Executive Board.

The operations of the PRG Trust are conducted through four Loan Accounts, the Reserve Account, and four Subsidy Accounts.

The resources of the Loan Accounts consist of proceeds from borrowings, repayments of principal, and interest payments on loans extended by the Trust.

The resources held in the Reserve Account consist of transfers by the IMF from the Special Disbursement Account (SDA) and net earnings from investments. Reserve Account resources are to be used by the Trustee in the event that PRG Trust loan principal repayments and interest payments, together with the authorized interest subsidy, are insufficient to repay loan principal and interest on borrowings of the Loan Accounts.

The resources held in the Subsidy Accounts consist of grant contributions, borrowings, transfers from the SDA, transfers of earnings from other accounts administered by the IMF on behalf of donors (Administered Accounts), and net earnings from investments. The available resources in the Subsidy Accounts are drawn by the Trustee to pay the difference between the interest due on PRG Trust loans and the interest due on Loan Accounts borrowings.

1.2 PRG-HIPC Trust and the PRG-HIPC Umbrella Account

The PRG-HIPC Trust was established in February 1997 to provide assistance to low-income countries by providing grants or loans for purposes of reducing their external debt burden to sustainable levels.

The operations of the PRG-HIPC Trust are conducted through the PRG-HIPC Trust Account and the related Umbrella Account. Resources of the PRG-HIPC Trust Account consist of grant contributions, borrowings, transfers from the SDA, transfers of earnings from Administered Accounts, and net earnings from investments. Grants made by the PRG-HIPC Trust are administered in the PRG-HIPC Umbrella Account on behalf of the recipients.

1.3 CCR Trust and the CCR Umbrella Account

Established originally as the Post-Catastrophe Debt Relief (PCDR) Trust in June 2010, the CCR Trust provides balance of payments assistance in the form of grants to eligible low-income members following catastrophic natural or public health disasters.

The operations of the CCR Trust are conducted through three accounts: two earmarked accounts for Post-Catastrophe and Catastrophe Containment assistance and the General Account, containing non-earmarked funds available for both types of assistance. Resources of the CCR Trust consist of grant contributions, borrowings, transfers from the SDA, and net earnings from investments. Grants made by the CCR Trust are administered in the CCR Umbrella Account on behalf of the recipients.

2. Basis of preparation and measurement

The financial statements of the Trusts are prepared in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB). The financial statements have been prepared under the historical cost convention, except for the revaluation of financial instruments at fair value through profit or loss.

2.1 Unit of account

The financial statements are presented in SDRs, which the Trusts use as the unit of account. The value of the SDR is determined daily by the IMF by summing specific amounts of the basket currencies in U.S. dollar equivalents on the basis of market exchange rates. The IMF reviews the composition of the SDR valuation basket at a minimum of five-year intervals. The last review was completed in November 2015,

and the specific amounts of the currencies in the basket, effective October 1, 2016, were as follows:

| SDR basket currency | Amount |
|---------------------|----------|
| Chinese renminbi | 1.0174 |
| Euro | 0.38671 |
| Japanese yen | 11.900 |
| Pound sterling | 0.085946 |
| U.S. dollar | 0.58252 |

At April 30, 2019, 1 SDR was equal to US\$1.38576 (US\$1.43806 at April 30, 2018).

The next review of the method of valuation of the SDR will take place by September 30, 2021, unless developments in the interim justify an earlier review.

2.2 SDR interest rate

The SDR interest rate is used to calculate interest on certain cash balances and borrowings. The SDR interest also provides the basis for setting the interest levied on outstanding loans (see Note 6.2) and interest calculated on certain borrowings.

The SDR interest rate is determined weekly by reference to a weighted average of yields or rates on short-term instruments in the money markets of the members whose currencies are included in the SDR valuation basket:

| SDR basket currency | Yield or rate |
|---------------------|---|
| Chinese renminbi | Three-month benchmark yield for China Treasury bonds as published by the China Central Depository and Clearing Co., Ltd. |
| Euro | Three-month spot rate for euro area central government bonds with a minimum rating of AA published by the European Central Bank |
| Japanese yen | Three-month Treasury discount bills |
| Pound sterling | Three-month Treasury bills |
| U.S. dollar | Three-month Treasury bills |

The SDR interest rate is subject to a floor of 0.050 percent and is rounded to three decimal places.

The average SDR interest rate was 1.036 percent per annum and 0.676 percent per annum during the financial years ended April 30, 2019, and 2018, respectively.

2.3 Use of estimates and judgement

The preparation of financial statements requires management to make judgements, estimates, and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

The most significant estimates and judgements used in applying accounting policies include expected credit losses measurement for PRGT outstanding loans (see Notes 3.1, 3.2, and 6.1) and fair value measurement of financial instruments (see Notes 3.3 and 9).

3. Summary of significant accounting policies

3.1 Financial instruments

IFRS 9, "Financial Instruments", as issued by the IASB in July 2014, was adopted with a date of initial application of May 1, 2018. The requirements of IFRS 9 represent a significant change from the standard it superseded, International Accounting Standard (IAS) 39, "Financial Instruments: Recognition and Measurement". See Note 3.6 for the effect of IFRS 9 adoption.

Measurement at initial recognition

Financial instruments are recognized when the Trusts become a party to the contractual provisions of the instrument. At initial recognition, a financial instrument is measured at its fair value, which is best evidenced by the transaction amount.

Derecognition

Financial assets, or a portion thereof, are derecognized when the contractual rights to receive the cash flows from the assets have expired, or when they have been transferred and either (i) the Trusts transfer substantially all the risks and rewards of ownership, or (ii) the Trusts neither transfer nor retain substantially all the risks and rewards of ownership and the Trusts have not retained control. Financial liabilities are derecognized when they are extinguished (i.e., when the obligation specified in the contract is discharged, canceled or expires).

Classification and subsequent measurement of financial assets

A financial asset is classified on initial recognition based on two factors: the business model for managing the financial assets; and its contractual cash flow characteristics.

Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost (AC). Interest income from these financial assets is included in the statements of comprehensive income using the effective interest method. Any gain or loss arising on

derecognition is recognized in the statements of comprehensive income.

Financial assets that are held for collection of contractual cash flows and for selling, where the assets' cash flows represent solely payments of principal and interest, would be measured at fair value through other comprehensive income (FVOCI). The Trusts did not have financial assets at FVOCI during the financial years ended April 30, 2019, and 2018.

All other financial assets that do not meet the criteria to be measured at AC or FVOCI are measured at fair value, with changes in fair value recognized in profit or loss (FVPL).

Impairment

At each reporting date, the Trusts assess on a forward-looking basis the expected credit losses (ECL) associated with their financial assets at AC and with the undrawn commitments under their lending arrangements. The measurement of ECL reflects: (i) an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes; (ii) the time value of money; and (iii) reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions, and forecasts of future economic conditions.

If ECL needed to be recognized, they would be recorded as impairment allowances for assets at AC and as a liability provision for undrawn commitments.

Should any financial asset become credit-impaired, interest income would be calculated for it by applying the effective interest rate to its amortized cost (i.e., net of the impairment allowance).

Classification and subsequent measurement of financial liabilities

Derivative financial liabilities are measured at fair value with changes in fair value recognized in profit or loss.

All other financial liabilities are measured at AC. Interest expense from these financial liabilities is included in the statements of comprehensive income using the effective interest method.

3.2 Financial assets and liabilities

3.2.1 Cash and cash equivalents

Cash and cash equivalents are financial assets measured at AC. They comprise cash on hand and demand deposits and other highly liquid short-term investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. Cash and cash equivalents are held for the purpose of meeting short-term

cash commitments rather than for investment or other purposes.

3.2.2 Investments

Investments represent financial assets that include short-term investments, fixed-term deposits, a range of fixed-income securities, equities (in the PRG Trust investment portfolio only), and derivative assets. Derivative liabilities are disclosed as part of other liabilities in the statements of financial position.

The Trusts' investment portfolios are managed under defined investment strategies, and their performance is evaluated on a fair value basis. As a result, these securities are classified at FVPL in accordance with their business model. A portion of the portfolios may be held in fixed-term deposits and measured at AC, pending investment in assets consistent with each Trust's investment strategy or as an investment decision to achieve specific objectives.

Purchases and sales of investments are recognized on the trade date. The corresponding investment trades receivable or payable are recognized in other assets and other liabilities, respectively, pending settlement of a transaction.

Investment income comprises interest income on investments at AC, interest and dividend income, and realized and unrealized gains and losses from FVPL investments, including currency valuation differences arising from exchange rate movements against the SDR, net of all trading-related investment fees.

Interest income from investments is recognized using the effective interest method. Dividend income is recognized based on the ex-dividend date.

3.2.3 Loans receivable

Loans receivable are financial assets that are measured at AC. They represent financing provided to low-income countries under the various PRG Trust financing facilities (see Note 1.1). Countries assessed by the IMF's Executive Board as being eligible for PRG Trust financing may receive financing in the PRG Trust as loan disbursements under arrangements or as outright disbursements (i.e., loans disbursed without an arrangement).

The PRG Trust levies interest on eligible low-income members' use of PRG Trust credit facilities (see Note 6.2). Interest income is recognized using the effective interest method, except for financial assets that have become credit-impaired. Should any such assets become credit-impaired, interest income would be calculated for them by applying the effective interest rate to their amortized cost (i.e., net of the impairment allowance).

Impairment of PRG Trust loans

The PRG Trust's application of the impairment requirements of IFRS 9 is grounded in the context of the nature of the PRG Trust's lending and the unique institutional status of the IMF, as Trustee:

- The IMF, as Trustee, has a unique relationship with its member countries, all of which are shareholders in the institution.
- PRG Trust lending is linked to regular reviews of performance under a program of economic policies that the member commits to in order to overcome balance of payments problems, return to external viability, and repay the PRG Trust.
- The IMF, as Trustee, employs a comprehensive set of measures to mitigate credit risk (see Note 4.2.1).
- The IMF, as Trustee, also has de facto preferred creditor status, which has been recognized by the official sector community and generally accepted by private creditors.

Taken together, these factors significantly reduce the likelihood of the PRG Trust incurring credit losses.

The PRG Trust has not recognized any impairment losses related to its lending activities since inception. Also, unlike large financial institutions in the private sector, the PRG Trust's credit portfolio consists of a relatively small number of exposures to low-income member countries, with each member's circumstances varying. Therefore, a statistical approach to credit risk assessment as typically followed in the financial sector is neither feasible nor appropriate for the PRG Trust.

Similarly, the assessment of the PRG Trust's credit risk cannot rely on external credit risk ratings. Due to its unique characteristics, the PRG Trust's credit risk exposure is not comparable to sovereign credit risk faced by commercial financial entities, and as a cooperative member organization, the IMF, as Trustee, does not produce its own internal credit rating grades. Accordingly, credit risk for the PRG Trust is assessed holistically based on qualitative and quantitative considerations pertaining to each debtor member, such as the status of the economic programs underlying PRG Trust lending, the member's cooperation on policy implementation and timely settlement of PRG Trust financial obligations, and forward-looking assessments of the member's capacity to repay.

The PRG Trust has developed a model for ECL estimation based on changes in credit quality since initial recognition, where credit quality is classified as Stage 1, Stage 2, or Stage 3. Loans for which credit risk has increased significantly since initial recognition (Stage 2), or that are credit-impaired (Stage 3), have their ECL measured on a lifetime basis. Loans for which there was no significant

increase in credit risk since initial recognition (Stage 1) have their ECL measured as a portion of lifetime ECL that result from default events possible within the next 12 months.

The key judgements and assumptions adopted by the PRG Trust in the measurement of ECL are discussed below:

(i) Definition of default and credit-impaired

For the purposes of the application of IFRS 9, the PRG Trust considers a member country to be in default when it is six months or more overdue in settling its financial obligations to the PRG Trust. This rebuts the presumption in IFRS 9 that default does not occur later than 90 days past due, reflecting the nature of the PRG Trust's financing and the unique institutional status of the IMF, as Trustee, as well as consistency with the threshold for internal risk management purposes. A loan is considered credit-impaired when the obligation has defaulted.

(ii) Significant increase in credit risk

The PRG Trust assesses whether a significant increase in credit risk has occurred on a member-by-member basis by comparing the risk of default at the reporting date to the risk of default at the date of the most recent disbursement to the debtor member. The assessment is performed on each reporting date and takes into account a range of qualitative and quantitative criteria, including overdue obligations to the PRG Trust, signals of non-cooperation by the member, and forward-looking indicators of capacity to repay the PRG Trust. The criteria used to identify significant increases in credit risk are monitored and reviewed for appropriateness at least annually.

The assessment does not rely on any single factor, and may, on the basis of other relevant considerations, rebut the presumption that credit risk has increased significantly when contractual payments are more than 30 days past due. During the financial years ended at April 30, 2019, and 2018, the PRG Trust did not have any debtor member more than 30 days past due.

(iii) Low credit risk

The PRG Trust assumes that the credit risk of a member country has not increased significantly since initial recognition if the member is determined to have low credit risk at the reporting date.

Credit risk related to the PRG Trust's exposure to a member country is considered low if: (i) it has a low risk of default; (ii) the member country has a strong capacity to meet its contractual cash flow obligations in the near term; and (iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the member country to fulfill its contractual cash flow obligations.

(iv) Measuring ECL

ECL are determined by comparing expected cash flows with contractual cash flows, and discounting the expected cash shortfalls at the effective interest rate, which is the interest rate for PRG Trust loans set by the IMF, as Trustee. ECL are estimated by assessing a range of possible outcomes in light of expected future economic conditions, weighted according to the assessed probability of each outcome. This entails considerable judgement and uncertainty about the estimates.

For the purpose of ECL measurement, financial safeguards that are integral to the PRG Trust's financial structure and operations are also considered.

Write-off

In the unlikely event that a member with outstanding loans to the PRG Trust withdraws from the IMF, repudiates its outstanding obligations to the PRG Trust, and no prospects of recovering amounts due to the PRG Trust remain in the foreseeable future, the PRG Trust would recognize the ultimate loss and the withdrawn member's outstanding loan to the PRG Trust would be written off.

3.2.4 Borrowings

Borrowings are financial liabilities measured at AC and represent financing received from lenders (see Note 7).

Interest expense on borrowings is calculated by applying the effective interest method.

3.3 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability or, in the absence of a principal market, in the most advantageous market.

A three-level fair value hierarchy is used to determine fair value under which financial instruments are categorized based on the priority of the inputs to the valuation technique. The fair value hierarchy has the following levels:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices)
- Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs)

When the inputs used to measure the fair value of an asset or liability fall within multiple levels of the hierarchy, the level within which the fair value measurement is categorized is based on the lowest-level input that is significant to the fair value measurement of the instrument in its entirety. Thus, a Level 3 fair value measurement may include inputs that are both observable and unobservable.

The valuation techniques used to determine fair value are described in Note 9.

3.4 Foreign currency translation

Transactions denominated in currencies and not in SDRs are recorded at the rate of exchange on the date of the transaction. Assets and liabilities denominated in other currencies are reported using the SDR exchange rate on the date of the financial statements. Exchange differences arising from the settlement of transactions at rates different from those at the originating date of the transaction are included in the determination of total comprehensive income.

3.5 Contributions

The Trusts accept contributions on such terms and conditions as agreed between the Trusts and the contributor. Contributions are recognized as income after the achievement of specified conditions and are subject to the bilateral agreements stipulating how the resources are to be used.

3.6 New International Financial Reporting Standards

3.6.1 IFRS 9. "Financial Instruments"

IFRS 9, "Financial Instruments", which replaces IAS 39, "Financial Instruments: Recognition and Measurement", is effective for annual periods starting on or after January 1, 2018, and was adopted by the Trusts on May 1, 2018. The requirements of IFRS 9 represent a significant change from IAS 39.

Classification and measurement

IFRS 9 requires financial assets to be classified at FVPL, FVOCI, or AC based on the entity's business model for managing the assets and their contractual cash flow characteristics. Financial liabilities are classified and measured at amortized cost or fair value through profit or loss (see Note 3.1).

The Trusts performed a detailed analysis of their business models for managing financial instruments and of their cash flow characteristics. The carrying amounts and measurement categories of financial assets and liabilities of the Trusts in accordance with IAS 39 and IFRS 9 at May 1, 2018 are compared as follows:

| | | PRG-HIPC | |
|---------------------------|-----------|-------------------|----------------------|
| | PRG Trust | Trust | IAS 39 IFRS 9 |
| | Carrying | amount | Measurement category |
| | | (in millions of S | DRs) |
| Financial assets: | | | |
| Cash and cash equivalents | 206 | 1 | AC |
| Other financial assets | 73 | 19 | AC |
| Loans receivable | 6,289 | _ | AC |
| Investments: | | | |
| Short-term investments | 72 | 5 | AC FVPL |
| Fixed-term deposits | 469 | 94 | AC |
| Fixed-income securities | 6,868 | 317 | FVPL ¹ |
| Derivative assets | 1 | _ | FVPL |
| Financial liabilities: | | | |
| Borrowings | 6,512 | 176 | AC |

93

AC

Other financial liabilities

As a part of the transition to IFRS 9, short-term instruments of SDR 72 million in the PRG Trust and SDR 5 million in the PRG-HIPC Trust were classified at FVPL in accordance with the business model for managing the invested portfolio as a whole. Previously such securities were classified at AC. The change in measurement category did not have an impact on the carrying amounts of the instruments.

The CCR Trust held SDR 146 million in cash and cash equivalents and no other financial assets or liabilities at May 1, 2018. Cash and cash equivalents were measured at AC under both IAS 39 and IFRS 9 at May 1, 2018.

In addition, a presentational change has been made to the PRG Trust's statement of financial position at April 30, 2018 to better illustrate the nature of the derivative financial instruments. Derivative assets are now included in the "Investments" line of the statements of financial position, while previously they were included in "Other assets". As a result of this change in presentation, investments have increased, and other assets have decreased by SDR 1 million, respectively, as at April 30, 2018.

Impairment

IFRS 9 introduces a revised impairment model, which requires entities to recognize expected credit losses based on reasonable and available information about past periods, current circumstances, and forward-looking information that indicates the possibility of such losses. This model replaced the previous impairment model under which impairment was recognized only if a loss had already been incurred.

 $^{^{\}rm 1}\,\mbox{FVPL}$ IAS 39 classification was designated, while IFRS 9 classification is mandatory.

The Trusts adapted their approach to assessing credit risk to comply with the revised impairment model under IFRS 9 (see Note 3.2.3).

Application of IFRS 9 impairment requirements to prior periods did not result in adjustments to the amounts previously recognized in the financial statements. No impairment had been recognized in accordance with IAS 39 and IAS 37 at April 30, 2018. Similarly, no impairment had been recognized in accordance with the IFRS 9 model at May 1, 2018.

Transition to IFRS 9 adoption

Changes in accounting policies and presentation resulting from the adoption of IFRS 9 have been applied retrospectively.

3.6.2 IFRS 15 "Revenue from Contracts with Customers"

IFRS 15, "Revenue from Contracts with Customers", is effective for annual periods starting on or after January 1, 2018, and was adopted by the Trusts on May 1, 2018. IFRS 15 provides a principles-based approach for revenue recognition that applies to all contracts with customers except those related to financial instruments, leases, and insurance contracts. It requires an entity to recognize revenue as performance obligations are satisfied.

Adoption of IFRS 15 did not have a material effect on the financial statements of the Trusts.

4. Financial risk management

4.1 Risk management framework

By virtue of their role established through the Trust Instruments, the Trusts face a range of financial and nonfinancial risks. The IMF, as Trustee, has adopted the three lines of defense model for risk management.

- Risks inherent in day-to-day operations are mitigated by establishing and maintaining a system of internal controls.
- A risk management function is responsible for developing and maintaining the risk management framework, fostering the development of risk management tools and reporting on the Trusts' overall risk profile, highlighting areas where additional mitigation efforts are needed.
- An internal audit function is responsible for providing an independent assessment of the effectiveness of governance and internal control processes.

Oversight is provided by committees established to monitor and make decisions in specific risk areas, which supports the cycle of risk assessment, ownership, and mitigation vis-à-vis risk acceptance.

4.2 Financial assets and liabilities other than investments

Financial assets and liabilities other than investments are exposed to credit, market, and liquidity risks.

4.2.1 Credit risk on financial assets and liabilities other than investments

Credit risk on loans receivable refers to potential losses owing to the inability, or unwillingness, of low-income countries to repay loans.

4.2.1.1 Credit risk management practices

Financing to low-income countries is provided in the PRG Trust under an arrangement, which is a decision of the IMF as Trustee that gives a member the assurance that the Trust stands ready to provide freely usable currencies or SDRs during a specified period and up to a specified amount, in accordance with the terms of the arrangement, or in the form of a one-off disbursement under the RCF. Upon approval of an arrangement by the Trustee, resources of the Loan Accounts of the PRG Trust are committed to qualifying members for a period from three and up to five years for ECF arrangements or from one to two years for SCF arrangements.

Disbursements under PRG Trust arrangements are made in tranches and are subject to conditionality in the form of performance criteria, structural benchmarks, and prior actions. Safeguards assessments of member central banks are undertaken to provide the Trustee with reasonable assurance that the central banks' legal structure, controls, financial reporting, and internal and external audit arrangements are adequate to maintain the integrity of their operations and help ensure that PRG Trust loan proceeds are used for intended purposes. Misreporting by member countries on performance criteria and other conditions for disbursement may entail early repayment of noncomplying disbursements.

Measures to help mitigate credit risk include policies on access limits, program design, monitoring, and economic policies that members agree to follow as a condition for PRG Trust financing, as well as post-program monitoring.

The PRG Trust has established limits on overall access to its resources. The amount of access in each individual case depends on relevant factors such as the nature of the country's balance of payments need, the strength of its adjustment program, its capacity to repay, and its previous outstanding use of PRG Trust credit. Annual access across all PRG Trust facilities is capped at 75 percent of a member's IMF quota, with a cumulative access limit of 225 percent of a member's IMF quota (net of scheduled repayments). The IMF, as Trustee, can approve access in excess of these limits in cases where the member is experiencing an exceptionally large balance of payments need and has a

comparatively strong adjustment program, among other conditions.

To protect PRG Trust lenders, Reserve Account resources are available to repay the lenders in the event of delays in repayment or nonpayment by borrowers. At April 30, 2019, and 2018, available resources in the Reserve Account were SDR 3,823 million (See Note 11) and SDR 3,797 million, respectively.

4.2.1.2 Credit risk exposure

The maximum credit risk exposure is the carrying value of the PRG Trust's outstanding loans and undrawn commitments under arrangements, which was SDR 7,366 million and SDR 8,220 million at April 30, 2019, and 2018, respectively.

At April 30, 2019, undrawn balances under 16 ECF arrangements were SDR 989 million (SDR 1,931 million under 19 ECF arrangements at April 30, 2018). Commitments and undrawn balances under current arrangements are presented in Schedule 2.

The concentration of PRG Trust outstanding loans by region was as follows:

| | April 30, 2019 | | April 30, 2018 | |
|------------------------------|---|--------|----------------|--------|
| | (in millions of SDRs and as a percentage of total outstanding loans) | | | entage |
| Africa | 5,061 | 79.4% | 4,791 | 76.2% |
| Asia and Pacific | 637 | 10.0% | 693 | 11.0% |
| Europe | 93 | 1.4% | 121 | 1.9% |
| Middle East and Central Asia | 479 | 7.5% | 550 | 8.8% |
| Western Hemisphere | 107 | 1.7% | 134 | 2.1% |
| Total | 6,377 | 100.0% | 6,289 | 100.0% |

The use of credit in the PRG Trust by the largest users was as follows:

| | April 30, 2019 | | April 30, 2018 | |
|-------------------------------|--|-------|----------------|-------|
| | (in millions of SDRs and as a pe of total outstanding loans | | | |
| Largest user of credit | 844 | 13.2% | 706 | 11.2% |
| Three largest users of credit | 2,082 | 32.6% | 1,984 | 31.6% |
| Five largest users of credit | 2,748 | 43.1% | 2,697 | 42.9% |

The five largest users of credit at April 30, 2019, in descending order, were Ghana, Côte d'Ivoire, Bangladesh, Kenya, and Cameroon (Côte d'Ivoire, Ghana, Bangladesh, Kenya, and Sierra Leone at April 30, 2018). Outstanding loans by member are presented in Schedule 1.

4.2.2 Market risk on financial assets and liabilities other than investments

Market risk on loans receivable and borrowings is the risk that the future cash flows of these financial instruments will fluctuate because of changes in interest and exchange rates.

4.2.2.1 Interest and exchange rate risks

Interest rate risk on loans is the risk that future net cash flows will fluctuate because of changes in market interest rates. The PRG Trust's subsidy resources consist of contributions and investment earnings to cover the interest shortfall arising from the difference between the market-based interest rate paid on borrowings and the concessional interest rate, if any, applicable to outstanding loans. Should such resources be deemed inadequate for this purpose, the PRG Trust instrument allows for an increase in the interest rate levied on outstanding loans and a transfer of investment income from the Reserve Account to the General Subsidy Account, subject to consultations with all creditors to the Loan Accounts on the adequacy of the Reserve Account to protect their claims.

Exchange rate risk is the risk that an entity's financial position and cash flows will be affected by fluctuations in foreign currency exchange rates. The exchange rate risk of the Trusts is mitigated by denominating all assets, liabilities, receipts, and payments in SDRs.

4.2.3 Liquidity risk on financial assets and liabilities other than investments

Liquidity risk is the risk of nonavailability of resources to meet the Trusts' financing needs and obligations.

4.2.3.1 Liquidity management

The IMF, as Trustee, conducts annual reviews to determine the adequacy of resources in the Trusts to provide financial assistance to eligible IMF members and to meet the Trusts' obligations.

The PRG Trust must have resources available to meet members' demand for credit. Uncertainties in the timing and amount of credit extended to members expose the PRG Trust to liquidity risk. For this purpose, the approval of new lending agreements is subject to the availability of uncommitted resources.

Resources in the Subsidy Accounts are expected to meet the estimated needs based on the level of loans outstanding and current forecast of future commitments. Should such resources be deemed inadequate for this purpose, the PRG Trust has measures to cover the shortfall, as mentioned in Note 4.2.2.1. Debt relief under the HIPC initiative has been provided to all eligible members that qualified for such debt relief in the PRG-HIPC Trust.

4.2.3.2 Resources available under borrowing agreements

PRG Trust resources available under borrowing and note purchase agreements in the Loan Accounts were SDR 14,921 million (See Schedule 3) and SDR 15,975 million at April 30, 2019, and 2018, respectively. The PRG Trust Subsidy Accounts had no undrawn amounts at April 30, 2019 (SDR 17 million at April 30, 2018). Resources available under PRG-HIPC and CCR Trust borrowing agreements have been fully drawn.

4.2.3.3 Maturity profile of loans and borrowings

The Trusts borrow on such terms and conditions as agreed between the Trustee and individual lenders. The repayment periods for the PRG Trust Loan Accounts borrowings typically match the maturity of the loans extended by the PRG Trust, which are to be repaid in equal semiannual installments beginning 5½ years from the date of each disbursement in the case of the ECF, ESF, and RCF and beginning four years from the date of each disbursement in the case of the SCF.

Certain creditors of the PRG Trust participate in a voluntary "encashment" regime, under which they can seek early repayment of outstanding claims in case of balance of payments needs, provided they allow drawings under their own agreements for encashment by other participating creditors. Early repayment is subject to availability of resources under borrowing agreements with other lenders. The borrowings of the PRG Trust Subsidy Accounts and the PRG-HIPC and CCR Trusts are repayable in one installment at their maturity dates.

Drawings under some PRG Trust borrowing agreements in the Loan Accounts may have shorter initial maturities (e.g., six months) that can be extended, at the sole discretion of the Trustee, up to the maturity dates of the corresponding Trust loans for which they were drawn.

Scheduled repayments of PRG Trust outstanding loans are summarized below:

| | 2019 | 2018 |
|--------------------------------|--------------|----------|
| Financial year ending April 30 | (in millions | of SDRs) |
| 2019 | _ | 958 |
| 2020 | 891 | 899 |
| 2021 | 866 | 866 |
| 2022 | 817 | 817 |
| 2023 | 731 | 731 |
| 2024 | 758 | 710 |
| 2025 and beyond | 2,314 | 1,308 |
| Total | 6,377 | 6,289 |

Scheduled repayments of outstanding borrowings in the PRG Trust Loan and Subsidy Accounts are summarized below:

| | PRG Trust Accounts | | | | |
|--------------------------------|--------------------|-------------|------------|---------|--|
| | Loa | an | Subsi | Subsidy | |
| | 2019 | 2018 | 2019 | 2018 | |
| Financial year ending April 30 | | (in million | s of SDRs) | | |
| 2019 | _ | 2,822 | _ | 25 | |
| 2020 | 2,999 | 584 | 2 | 2 | |
| 2021 | 472 | 472 | _ | _ | |
| 2022 | 413 | 413 | 116 | 116 | |
| 2023 | 428 | 428 | 9 | 9 | |
| 2024 | 512 | 477 | 42 | 6 | |
| 2025 and beyond | 1,565 | 1,058 | 108 | 100 | |
| Total | 6,389 | 6,254 | 277 | 258 | |

Future interest payments on outstanding borrowings in the PRG Trust, calculated using the interest rate effective as at April 30, 2019 are summarized below:

| | PRG Trust Accoun | | |
|--------------------------------|-----------------------|---------|--|
| | Loan | Subsidy | |
| Financial year ending April 30 | (in millions of SDRs) | | |
| 2020 | 55 | 1 | |
| 2021 | 45 | 1 | |
| 2022 | 36 | 1 | |
| 2023 | 28 | _ | |
| 2024 | 22 | _ | |
| 2025 and beyond | 39 | _ | |
| Total | 225 | 3 | |

Scheduled repayments of outstanding borrowings in the PRG-HIPC and CCR Trusts summarized below:

| | PRG-HIPC Trust | | CCR Trust | |
|--------------------------------|----------------|--------------|------------------|------|
| | 2019 | 2018 | 2019 | 2018 |
| Financial year ending April 30 | | (in millions | of SDRs) | |
| 2019 | | 121 | _ | _ |
| 2020 | 28 | 16 | _ | _ |
| 2021 | 39 | 39 | _ | _ |
| 2022 | _ | _ | _ | _ |
| 2023 | _ | _ | _ | _ |
| 2024 | 22 | _ | 12 | _ |
| 2025 and beyond | _ | _ | 6 | _ |
| Total | 89 | 176 | 18 | _ |

There were no future interest payments expected on outstanding borrowings in the PRG-HIPC and CCR Trusts at April 30, 2019.

4.3 Investments

4.3.1 Credit risk on investments

Credit risk on investments represents the potential loss that the Trusts may incur if issuers and counterparties default on their contractual obligations.

4.3.1.1 Credit risk management practices

PRG Trust Investments

Credit risk is managed by limiting fixed-income investments to financial instruments with a credit rating equivalent to BBB— or higher (based on Standard & Poor's rating scale) for corporate bonds (external managers may continue to hold corporate bonds which fall below BBB— after acquisition), and BBB+ or higher for other fixed-income investments (government bonds and official-sector fixed-income investments), except for Bank for International Settlements (BIS) obligations, central bank deposits, and uninvested cash balances. Counterparty risk for derivative instruments is mitigated by strict exposure limits, credit rating requirements, and collateral requirements.

PRG-HIPC and CCR Trusts Investments

Credit risk is minimized by limiting the range of investments to high-quality short-duration fixed-income securities, which include marketable obligations issued by (i) national governments of members, their central banks, or their national official institutions, (ii) international financial organizations, (iii) deposits with a commercial bank, national official financial institution of a member, or an international financial institution, including the BIS. Credit risk is also minimized by limiting eligible investments to marketable securities rated A or higher by Standard & Poor's.

4.3.1.2 Credit risk exposure

The carrying amount of the fixed-income securities represents the maximum exposure to credit risk. The maximum exposure to credit risk for derivative assets is the amount of any unrealized gains on such contracts.

The credit risk exposure related to the PRG and PRG-HIPC Trusts' nonderivative investments was as follows:

| | PRG Tr | ust | PRG-HIPC | Trust |
|-----------------------------|----------|-------------|-----------------|-------------|
| | April 30 | | April 30 | |
| | 2019 | 2018 | 2019 | 2018 |
| | (as a pe | rcentage of | total investmer | nts) |
| BIS obligations (not rated) | 51.5 | 61.1 | 100.0 | 23.8 |
| AAA | 14.2 | 12.8 | _ | 41.1 |
| AA+ to AA- | 18.1 | 15.7 | _ | 21.0 |
| A+ to A- | 12.3 | 10.4 | _ | 14.1 |
| BBB+ to BBB- | 3.9 | | | |
| Total | 100.0 | 100.0 | 100.0 | 100.0 |

The credit risk exposure related to the CCR Trust investments at April 30, 2019 was limited to BIS obligations that are not rated (no investments at April 30, 2018).

The credit risk exposure related to derivative assets in the PRG Trust was SDR 2 million and SDR 1 million at April 30, 2019, and 2018, respectively.

4.3.2 Market risk on investments

The investment objectives and strategies of the Trusts, including asset allocation and risk tolerance, expose the Trusts' investments to market risk (See Note 5).

4.3.2.1 Interest and exchange rate risks

Market risks on the PRG and PRG-HIPC Trusts' investment portfolios include interest and exchange rate risks. These risks are mitigated by (i) ensuring diversification at the portfolio level through a target asset allocation and within asset class components through concentration and exposure limits, (ii) setting duration limits for fixed income components, (iii) aligning or hedging the currency exposure of short-term investments, short-duration fixed-income securities, and corporate bonds with the SDR currency basket, and (iv) permitting the use of derivatives for managing interest rate and exchange rate risks. The CCR Trust invests in fixed-term deposits, which are denominated in SDRs and carry a fixed rate of interest.

4.3.2.2 Value at Risk

Exposures to market risk are measured using value at risk (VaR), which considers not only known market risks in each of the asset categories but also the effect of asset class diversification. The VaR estimates reported below represent the maximum potential loss in value of the assets over the next year due to adverse market movements, with a 95 percent confidence level. Conversely, there is a 1 in 20 chance that annual losses on investment assets would be expected to equal or exceed the reported VaR. Losses in a single year could exceed the reported VaR by a significant amount.

VaR models are based predominantly on historical simulations and provide plausible future scenarios based on these simulations. There is no standard methodology for estimating VaR, and the modeling of the market risk characteristics of the investments involves many assumptions and approximations. Different assumptions or approximations could produce significantly different VaR estimates.

The VaR was as follows:

| | PRG Trust April 30 | | PRG-HIPC Trust | |
|-------------------------|--------------------|--------------|----------------|------|
| | | | April 3 | 30 |
| | 2019 | 2018 | 2019 | 2018 |
| | | (in millions | of SDRs) | |
| Equity securities | 103 | _ | _ | _ |
| Fixed-income securities | 46 | 25 | 2 | 2 |
| Diversification effects | (41) | _ | _ | _ |
| Total | 108 | 25 | 2 | 2 |

4.3.3 Liquidity risk on investments

Liquidity risk on investments refers to the risk that an investment will not have an active buyer or seller when traded.

4.3.3.1 Liquidity management

The liquidity position of each Trust is closely monitored by maintaining liquidity projections to ensure day-to-day servicing needs are met. To minimize the risk of loss from liquidating investments, the Trusts hold resources in readily marketable short-term financial instruments to meet anticipated liquidity needs.

4.3.3.2 Maturity profile of investments

The maturities of short-term investments, fixed-term deposits, fixed-income securities, and derivative assets were as follows:

| | PRG Trust | PRG-HIPC Trust | CCR Trust |
|-----------------|--------------|----------------------|--------------|
| | | April 30, 2019 | |
| Financial year | | in millions of SDRs) | |
| 2020 | 3,780 | 162 | 18 |
| 2021 | 1,415 | 97 | _ |
| 2022 | 1,182 | 73 | _ |
| 2023 | 202 | _ | _ |
| 2024 | 112 | _ | _ |
| 2025 and beyond | 399 | _ | _ |
| Total | 7,090 | 332 | 18 |

| | PRG Trust | PRG-HIPC Trust | CCR Trust |
|----------------|--------------|-----------------------|--------------|
| | | April 30, 2018 | |
| Financial year | | (in millions of SDRs) | |
| 2019 | 3,660 | 130 | _ |
| 2020 | 2,397 | 126 | _ |
| 2021 | 1,298 | 160 | _ |
| 2022 | 50 | _ | _ |
| 2023 | 5 | _ | _ |
| Total | 7,410 | 416 | _ |

5. Investments

On March 22, 2017, the Executive Board approved new guidelines for investing PRG Trust assets. The guidelines provide for an investment strategy that is geared to generate a nominal return of 90 basis points over the six-month SDR interest rate over time. The PRG Trust assets are being phased in over a three-year period and invested in a diversified portfolio of high-quality fixed-income instruments and equity securities.

The investment strategy for the PRG-HIPC and CCR Trusts seeks to enhance returns subject to liquidity requirements and limits the risk of impairment over an investment horizon

of no more than three years. The PRG-HIPC Trust's liquid investments are held in short-term investments up to one year and the remainder in short-duration fixed-income securities.

Investments comprised the following:

| | PRG Trust | | PRG-HIPC Trust | |
|-------------------------|-----------|--------------|----------------|------|
| | April 30 | | April 30 | |
| | 2019 | 2018 | 2019 | 2018 |
| | | (in millions | of SDRs) | |
| Short-term investments | 62 | 72 | 6 | 5 |
| Equity securities | 533 | _ | _ | _ |
| Fixed-term deposits | 896 | 469 | 139 | 94 |
| Fixed-income securities | 6,130 | 6,868 | 187 | 317 |
| Derivative assets | 2 | 1 | _ | _ |
| Total | 7,623 | 7,410 | 332 | 416 |

The CCR Trust held fixed-term deposits of SDR 18 million at April 30, 2019 (no investments at April 30, 2018).

Derivative assets and derivative liabilities (see Note 8) were SDR 2 million and SDR 7 million, respectively, at April 30, 2019 (SDR 1 million and zero, respectively, at April 30, 2018).

The notional value of derivative financial instruments held in the PRG Trust was as follows:

| | April 30, 2019 | April 30, 2018 |
|------------------------|----------------|----------------|
| | (in millions | s of SDRs) |
| Currency swaps | 142 | 24 |
| Forwards | 351 | _ |
| Futures | | |
| Long positions | 353 | 161 |
| Short positions | 252 | 145 |
| Call options purchased | _ | 3 |
| Call options sold | | 3 |

Net investment income for the PRG and PRG-HIPC Trusts comprised the following:

| | PRG Trust | | PRG-HIP | C Trust |
|--|-----------|--------------|----------|---------|
| | 2019 | 2018 | 2019 | 2018 |
| | | (in millions | of SDRs) | |
| Investment income on investments at FVPL | 168 | 18 | 5 | (1) |
| Interest income on investments at AC | 15 | 9 | 1 | 1 |
| Investment fees | (3) | (2) | _ | _ |
| Net investment income | 180 | 25 | 6 | _ |

The CCR Trust's net investment income comprised only interest income on investments at AC and was SDR 1 million for the financial years ended April 30, 2019, and 2018, respectively.

6. Loans receivable

6.1 Changes in outstanding loans

Changes in PRG Trust outstanding loans were as follows:

| | | Lo | an facilitie | s | |
|----------------|-------|--------|--------------|------|-------|
| | ECF | ESF | RCF | SCF | Total |
| | | (in mi | llions of SD | Rs) | |
| April 30, 2018 | 5,247 | 346 | 413 | 283 | 6,289 |
| Disbursements | 969 | _ | 85 | | 1,054 |
| Repayments | (684) | (218) | (44) | (20) | (966) |
| April 30, 2019 | 5,532 | 128 | 454 | 263 | 6,377 |
| April 30, 2017 | 5,004 | 565 | 442 | 266 | 6,277 |
| Disbursements | 831 | _ | 12 | 36 | 879 |
| Repayments | (588) | (219) | (41) | (19) | (867) |
| April 30, 2018 | 5,247 | 346 | 413 | 283 | 6,289 |

The PRG Trust has performed an impairment analysis in accordance with its ECL model (see Note 3.2.3). Based on this analysis, no loss allowance was deemed to be necessary at April 30, 2019, and 2018. As described in Note 3.2.3, the impairment analysis of the PRG Trust's outstanding loans took into account the unique nature of the PRG Trust's financing and institutional status of the IMF, as Trustee. The analysis was performed holistically based on qualitative and quantitative considerations. In this context, the results of the PRG Trust's impairment analysis at April 30, 2019, and 2018, were not materially sensitive to reasonable changes in input parameters of the ECL calculation.

6.2 Interest on outstanding loans

The Executive Board sets the interest rates on ECF and SCF loans based on the SDR interest rate as follows:

| ECF | SCF |
|---------|--|
| (in per | cent) |
| | _ |
| _ | 0.25 |
| 0.25 | 0.50 |
| 0.50 | 0.75 |
| | (in pero ———————————————————————————————————— |

Effective December 4, 2018, the Executive Board set interest rates under ECF and SCF loans at zero percent per annum through June 30, 2019. An interest waiver on outstanding ESF loans is also in effect through end-June 2019. The interest rate on financial assistance provided under the RCF is permanently set at zero. The interest rate applicable to PRG Trust loans was zero for financial years 2019 and 2018.

On May 24, 2019, the Executive Board set the interest rate on outstanding ECF and SCF loans at zero percent per annum, effective July 1, 2019, through the next review in June 2021 and extended the interest waiver on outstanding ESF loans until they are fully repaid by November 2020 or

until the time of the next review in June 2021. In addition, the Executive Board modified the PRG Trust interest mechanism for ECF and SCF loans based on the SDR interest as follows:

| | ECF and SCF |
|--|--------------|
| Average SDR interest rate for the latest 12-month period | (in percent) |
| Less than 2% | _ |
| Between 2% and 5% | 0.25 |
| Greater than 5% | 0.50 |

7. Borrowings

7.1 Changes in outstanding borrowings

Changes in the outstanding borrowings in the PRG Trust Loan and Subsidy Accounts were as follows:

| | PRG Trust A | Accounts | |
|----------------|-------------|-------------------|---------|
| | Loan | Subsidy | Total |
| | (in | millions of SDRs) | |
| April 30, 2018 | 6,254 | 258 | 6,512 |
| Borrowings | 1,054 | 159 | 1,213 |
| Repayments | (919) | (140) | (1,059) |
| April 30, 2019 | 6,389 | 277 | 6,666 |
| April 30, 2017 | 6,244 | 261 | 6,505 |
| Borrowings | 879 | 8 | 887 |
| Repayments | (869) | (11) | (880) |
| April 30, 2018 | 6,254 | 258 | 6,512 |

During the financial year ended April 30, 2019, SDR 121 million of PRG-HIPC Trust outstanding borrowings reached maturity and were either repaid to lenders, renewed or extended in the PRG-HIPC Trust, or transferred by lenders to another trust. This resulted in the following:

| | Amount |
|----------------------------|-----------------------|
| | (in millions of SDRs) |
| Repayment of borrowings | 55 |
| Transfers to the PRG Trust | 24 |
| Transfers to the CCR Trust | 13 |
| Renewal of borrowings | 16 |
| Extension of borrowings | 13 |
| Total | 121 |

The breakdown of the transfers to the PRG and CCR Trusts is as follows:

| | Amount |
|------------------------|-----------------------|
| | (in millions of SDRs) |
| PRG Trust | |
| Bank Negara Malaysia | 7 |
| Saudi Arabia | 17 |
| Total PRG Trust | 24 |
| CCR Trust ¹ | |
| Bank of Finland | 6 |
| Bank of Thailand | 6 |
| Vietnam | 1 |
| Total CCR Trust | 13 |
| Total | 37 |

¹ Transfers made by Fiji and Tonga were less than SDR 0.5 million combined.

During the financial year ended April 30, 2019, total borrowings and repayments in the PRG-HIPC Trust were SDR 21 million and SDR 108 million, respectively, due to the renewals, repayments, and transfers, and an additional SDR 5 million in new borrowings. This resulted in PRG-HIPC Trust outstanding borrowings of SDR 89 million at April 30, 2019 (SDR 176 million at April 30, 2018).

Transfers to the CCR Trust (SDR 13 million) and an additional SDR 5 million in new borrowings during the financial year ended April 30, 2019 resulted in CCR Trust outstanding borrowings of SDR 18 million at April 30, 2019 (no borrowings at April 30, 2018).

7.2 Interest on outstanding borrowings

The weighted average interest rate on PRG Trust variable interest rate borrowings was 0.80 percent per annum and 0.57 percent per annum for the financial years ended April 30, 2019, and 2018, respectively. Most PRG-HIPC and CCR Trust borrowings carry a fixed interest rate.

8. Other assets and liabilities

8.1 Interest receivable and other assets

PRG Trust interest receivable and other assets were SDR 89 million at April 2019 (SDR 73 million at April 2018), and comprised investment trades receivable (SDR 56 million) and accrued interest and dividends on investments (SDR 33 million).

PRG-HIPC Trust interest receivable and other assets were SDR 1 million at April 30, 2019, and comprised accrued interest on investments. Interest receivable and other assets were SDR 19 million at April 30, 2018, and comprised investment trades receivable (SDR 17 million) and accrued interest on investments (SDR 2 million).

8.2 Interest payable and other liabilities

PRG Trust interest payable and other liabilities were SDR 125 million at April 30, 2019 (SDR 93 million at April 30, 2018), and comprised investment trades and fees payable (SDR 83 million), deposits (SDR 20 million), accrued interest on borrowings (SDR 15 million), and derivative liabilities (SDR 7 million).

The PRG-HIPC Trust had no interest payable and other liabilities at April 30, 2019. Interest payable and other liabilities were SDR 21 million at April 30, 2018, and comprised investment trades payable.

9. Fair value measurement

Valuation techniques used to value financial instruments include the following:

Level 1

The fair value of publicly traded investments and derivative instruments (futures and options) is based on quoted market prices in an active market for identical assets without any adjustments (closing price for equities and derivative instruments and bid price for short-term investments). These investments are included within Level 1 of the fair value hierarchy.

Level 2

The fair value of fixed-income securities not traded in active markets is determined on the basis of a compilation of significant observable market information, such as recently executed trades in securities of the issuer or comparable issuers and yield curves. The assessment also takes into account the inherent risk and terms and conditions of each security. Given that the significant inputs are observable, these securities are included within Level 2 of the fair value hierarchy.

The fair value of over-the-counter derivative instruments (foreign exchange forwards and currency swaps) not actively traded is determined by using a pricing model that incorporates foreign exchange spot and forward rates and interest rate curves. Given that the significant inputs into the pricing models are market observable, these instruments and are included within Level 2 of the fair value hierarchy.

9.1 Investments

The following tables present the fair value hierarchy used to determine the fair value of investments in the PRG and PRG-HIPC Trusts:

| | Level 1 | Level 2 | Total |
|-----------------------------------|---------|----------------|-------|
| | Α | pril 30, 2019 | |
| Recurring fair value measurements | (in m | illions of SDI | Rs) |
| PRG Trust | 587 | 6,140 | 6,727 |
| PRG-HIPC Trust | 6 | 187 | 193 |
| | | pril 30, 2018 | |
| PRG Trust | 73 | 6,868 | 6,941 |
| PRG-HIPC Trust | 5 | 317 | 322 |

There were no Level 3 investments at April 30, 2019, and 2018, and there were no transfers of investments between Level 1 and Level 2 during the financial years ended April 30, 2019, and 2018.

Fixed-term deposits are generally of a short-term nature and are carried at AC, which approximated fair value at April 30, 2019, and 2018.

9.2 Loans receivable

The PRG Trust, and the IMF as Trustee, plays a unique role in providing balance of payments support to member countries. PRG Trust financing features policy conditions that require member countries to implement macroeconomic and structural policies, and are an integral part of PRG Trust lending. These measures aim to help countries solve their balance of payments problems while safeguarding Trust resources. The fair value of PRG Trust loans receivable as defined under IFRS 13 cannot be determined due to their unique characteristics, including the debtor's membership relationship with the IMF, the Trustee, and the absence of a principal or most advantageous market for PRG Trust loans.

9.3 Other financial assets and liabilities

The carrying value of borrowings (see Note 7) and other assets and liabilities (see Note 8) accounted for at AC, except derivative liabilities, represents a reasonable estimate of their fair value at April 30, 2019, and 2018.

Based on the fair value hierarchy, SDR 1 million in derivative liabilities were categorized as Level 1 and SDR 6 million as Level 2 at April 30, 2019 (no derivative liabilities at April 30, 2018). There were no transfers of derivative liabilities between Level 1 and Level 2 during the financial years ended April 30, 2019, and 2018.

10. Related party transactions

The expenses of administering the business of the Trusts are paid by the IMF from the General Resources Account (GRA) annually. The PRG Trust reimbursed the GRA SDR 63 million and SDR 64 million during the financial years ended April 30, 2019, and 2018, respectively.

There were no reimbursements to the GRA from the PRG-HIPC and CCR Trusts during the financial years ended April 30, 2019, and 2018.

In addition to bilateral contributions from member countries, the IMF also made contributions to the Trusts to meet the financing needs of low-income countries. Cumulative contributions from the IMF were as follows:

April 30, 2019, and 2018

| | (in millions of SDRs) |
|----------------------------|-----------------------|
| PRG Trust Reserve Account | 2,697 |
| PRG Trust Subsidy Accounts | 1,018 |
| PRG-HIPC Trust | 1,239 |
| CCR Trust | 293 |
| Total | 5,247 |

11. Combining statements of financial position and statements of comprehensive income and changes in resources

The combining statements of financial position and statements of comprehensive income and changes in resources of the PRG Trust are presented below. The same statements are not presented for the PRG-HIPC and CCR Trusts as the financial positions of the respective umbrella accounts remained unchanged for the financial years ended April 30, 2019, and 2018.

PRG Trust—Combining Statements of Financial Position at April 30, 2019, and 2018

Components may not sum exactly to totals due to rounding.

¹ Includes contributions to the following earmarked subsidy accounts: Extended Credit Facility, Standby Credit Facility, Rapid Credit Facility, Poverty Reduction and Growth

Facility, and the Exogenous Shocks Facility.

Includes voluntary contributions made by IMF members following the distributions from the IMF's General Reserve of SDR 0.7 billion and SDR 1.75 billion in October 2012 and 2013, respectively, attributable to windfall gold sales profits.

Formerly known as the Kingdom of Swaziland.
 Formerly known as the former Yugoslav Republic of Macedonia.

^{**} Less than SDR 50,000.

IV. Financial Statements of the Administered Accounts

Report of Independent Auditors

To the Board of Governors of the International Monetary Fund

We have audited the accompanying financial statements of each of the accounts of the International Monetary Fund listed in the table below (the "Administered Accounts"), which comprise the statements of financial position as of the dates listed in the table below, and the related statements of comprehensive income and changes in resources and of cash flows for the periods listed in the table below.

| Administered Admin | ccounts (1) |
|--|--|
| Administered Account – Japan (Japan) | SCA-1/Deferred Charges Administered Account (SCA-1/Deferred Charges) |
| Framework Administered Account for Technical Assistance Activities (Framework-TA) | Interim Administered Account for Windfall Gold Sales Profits (Windfall Gold Sales Profits) |
| Framework Administered Account for Selected Fund Activities (Framework-SFA) | Interim Administered Account for Remaining Windfall Gold Sales Profits (Remaining Windfall Gold Sales Profits) |
| Administered Account People's Bank of China (People's Bank of China) | Administered Account – Switzerland (Switzerland) |
| Supplementary Financing Facility Subsidy Account (SFF Subsidy) | Administered Account for Interim Holdings of Voluntary Contributions (Interim Holdings) |
| Post-SCA-2 Administered Account (Post-SCA-2) | |
| (1) As of and for the years ended April 30, 2019 and 20 | 18 |

We are independent of the Administered Accounts in accordance with the ethical requirements that are relevant to our audit of the financial statements in the United States of America and with the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants*. We have fulfilled our other ethical responsibilities in accordance with these requirements.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Administered Accounts' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting, unless management either intends to liquidate the Administered Accounts or to cease operations or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Administered Accounts' financial reporting process.

Auditors' Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of

America and International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether due to fraud or error. Reasonable assurance is a high level of assurance but is not a guarantee that an audit will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. We design audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error because fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

In making those risk assessments, we consider internal control relevant to the Administered Accounts' preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the Administered Accounts' internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation, structure, and content of the financial statements, including disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

As part of an audit, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Administered Accounts' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report. However, future events or conditions may cause the Administered Accounts to cease to continue as a going concern.
- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies or material weaknesses in internal control that we identify during our audit.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of each of the Administered Accounts indicated in the table above as of April 30, 2019 and 2018, and the results of each of their operations and each of their cash flows for the years then ended in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Other Matter

Our audit was conducted for the purpose of forming an opinion on each of the Administered Accounts' financial statements taken as a whole. The supplemental schedules appearing on pages 111 to 114 are presented for purposes of additional analysis and are not a required part of the respective Administered Accounts' financial statements. The information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the respective Administered Accounts' financial statements. The information has been subjected to the auditing procedures applied in the audit of the respective Administered Accounts' financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the respective Administered Accounts' financial statements or to the respective Administered Accounts' financial statements themselves and other additional procedures, in accordance with auditing standards generally accepted in the United States of America. We also subjected the information to the applicable procedures required by International Standards on Auditing. In our opinion, the information is fairly stated, in all material respects, in relation to the respective Administered Accounts' financial statements taken as a whole.

¹There was no cash movement in Administered Account for Interim Holdings of Voluntary Contributions for Fund Activities (Interim Holdings) during the years ended April 30, 2019, and 2018. The accompanying notes are an integral part of these financial statements.

Notes to the Financial Statements for the Financial Years Ended April 30, 2019, and 2018

1. Nature of operations

At the request of members, the International Monetary Fund (IMF) has established special-purpose accounts (the Administered Accounts) to administer contributed resources provided to fund financial and technical services consistent with the purposes of the IMF. The instruments establishing the Administered Accounts provide the terms and conditions, as agreed with the IMF and contributing members, under which the resources may be used. The assets and liabilities of each account and each subaccount are separate from the assets and liabilities of all other accounts of, or administered by, the IMF. The assets of each account and each subaccount are not to be used to discharge liabilities or to cover losses incurred in the administration of other accounts.

1.1 Technical Assistance Accounts

1.1.1 Administered Account—Japan (Japan)

The account was established in March 1989 to administer resources provided by Japan—and, under a subsequent amendment, by other countries with Japan's concurrence—that are to be used to assist certain members with overdue obligations to the IMF. The resources of the account are to be disbursed in amounts specified by Japan and to members designated by Japan. Effective March 5, 2008, the instrument governing the account was amended to allow the provision of assistance to these members in the context of an internationally agreed comprehensive package that integrates arrears clearance and subsequent debt relief. The account can be terminated by the IMF or by Japan at any time. Upon termination of the account, any remaining resources in the account are to be returned to Japan.

1.1.2 Framework Administered Account for Technical Assistance Activities (Framework—TA)

The account was established by the IMF in April 1995 to receive and administer contributions that are to be used to finance technical assistance activities of the IMF. During the financial year ended April 30, 2015, the account was terminated. The account is in the process of liquidation, and any funds remaining in the account will either be refunded to the contributors or, at their request, transferred to the Framework Administered Account for Selected Fund Activities.

1.1.3 Framework Administered Account for Selected Fund Activities (Framework—SFA)

The account was established in March 2009 to administer externally contributed resources that are to be used to finance selected IMF activities, including the full range of IMF technical assistance activities provided to recipients.

The financing of selected Fund activities is implemented through the establishment and operation of subaccounts within the Framework—SFA. At April 30, 2019, there were 48 subaccounts; one new subaccount was established during each of the financial years ended April 30, 2019, and 2018. Disbursements are made from the respective subaccounts under the Framework—SFA to the General Resources Account to reimburse the IMF for costs incurred in connection with activities financed by the respective subaccounts. Framework—SFA resources are to be used in accordance with terms and conditions established by the IMF, with the concurrence of contributors. Resources in Framework—SFA subaccounts may be transferred to other subaccounts if the terms and conditions of the subaccounts so provide.

The Framework—SFA may be terminated by the IMF at any time with the concurrence of all contributors and the Managing Director. A subaccount thereof may also be terminated by the contributor of the resources to the subaccount or, in the case of a subaccount comprising resources from more than one contributor, by all the contributors participating in the subaccount at the time of termination, provided that a contributor to such a subaccount may cease its own participation in the subaccount at any time without termination of the subaccount. The disposition of any balances, net of liabilities and commitments under the activities financed, is governed by the conditions agreed between the IMF and the contributor(s). Absent such agreement, the balances are returned to the contributor(s) upon withdrawal from or termination of the subaccount.

1.1.4 Administered Account People's Bank of China (People's Bank of China)

The account was established in June 2012 to administer and invest resources provided by the People's Bank of China to support the IMF's technical assistance and training programs. During the financial year ended April 30, 2018, the instrument governing the account was amended to extend the termination date of the account to October 1, 2022. The account will be terminated upon completion of operations, or at such earlier time by the IMF in consultation with the

People's Bank of China. Once the obligation to repay the outstanding deposit has been discharged and the final payment of interest has been made, any surplus remaining in the account will be transferred to the People's Bank of China.

1.2 Interim Holdings of Resources Accounts

1.2.1 Supplementary Financing Facility Subsidy Account (SFF Subsidy)

The account was established in December 1980 to assist low-income member countries to meet the costs of using resources made available through the IMF's Supplementary Financing Facility and under the policy on exceptional access. All repurchases under these policies were due on or before January 31, 1991, and the final subsidy payments were approved in July 1991. However, one member (Sudan), overdue in the payment of charges to the General Department of the IMF at April 30, 2019, remains eligible to receive previously approved subsidy payments of SDR 0.9 million at April 30, 2019, and 2018, once its overdue charges are settled. Accordingly, the account remains in operation and has retained amounts for payment to Sudan once the overdue charges are paid.

1.2.2 Post-SCA-2 Administered Account (Post-SCA-2)

The account was established in December 1999 for the temporary administration of resources transferred by members following the termination of the second Special Contingent Account (SCA-2) in the General Department of the IMF, prior to the final disposition of those resources in accordance with members' instructions. Instructions on final disposition from five of the 42 members that had resources held in this account are still pending; consequently, their resources remain in the account (see Schedule 1). The account will be terminated upon completion of its operations.

1.2.3 SCA-1/Deferred Charges Administered Account (SCA-1/Deferred Charges)

The account was established in March 2008 as an interim vehicle to hold and administer members' refunds resulting from the distribution of certain SCA-1 balances and from the payment of deferred charges adjustments that had been made in respect of overdue charges attributed to Liberia. Following Liberia's arrears clearance, members were given the option to temporarily deposit their refunds into this account pending their decisions as to the final disposition of those resources. The account was to be terminated three years from the effective date of decisions establishing the account. This termination date was extended five times, most recently to March 13, 2020, by the IMF Executive Board at the request of the remaining contributors. Instructions on final disposition from one member are still pending; consequently, resources remain in the account (see Schedule 1).

1.2.4 Interim Administered Account for Windfall Gold Sales Profits (Windfall Gold Sales Profits)

The account was established in October 2012 to temporarily hold and administer contributions representing all or a portion of members' shares of the partial distribution of amounts in the IMF's General Reserve attributable to windfall gold sales profits. Members were given the option to temporarily deposit the proceeds from the distribution into this account pending their decisions as to the final disposition of these resources. The account will be terminated on October 11, 2019, or as promptly as practicable following the receipt of instructions from all contributors regarding the distribution of the resources in the accounts, whichever is earlier. Any balances remaining in the account upon termination are to be transferred to the respective contributors. Instructions on final disposition from five members that had resources held in this account are still pending; consequently, their resources remain in the account (see Schedule 1).

1.2.5 Interim Administered Account for Remaining Windfall Gold Sales Profits (Remaining Windfall Gold Sales Profits)

The account was established in October 2013 to temporarily hold and administer contributions representing all or a portion of members' shares of the final distribution of amounts in the IMF's General Reserve attributable to remaining windfall gold sales profits. Members were given the option to temporarily deposit the proceeds from the distribution into this account pending their decisions as to the final disposition of these resources. The account will be terminated on October 9, 2020, or as promptly as practicable following the receipt of instructions from all contributors regarding the distribution of the resources in the accounts, whichever is earlier. Any balances remaining in the account upon termination are to be transferred to the respective contributors. Instructions on final disposition from six members that had resources held in this account are still pending; consequently, their resources remain in the account (see Schedule 1).

1.2.6 Administered Account—Switzerland (Switzerland)

The account was established in February 2017 to facilitate the settlement of payments under the bilateral financing agreement between the Swiss National Bank (SNB) and the National Bank of Ukraine (NBU). The account will be terminated upon agreement between the SNB and the IMF, following consultations between the SNB and the NBU.

1.2.7 Administered Account for Interim Holdings of Voluntary Contributions for Fund Activities (Interim Holdings)

The account was established in April 2010 to receive and hold externally contributed resources for an interim period until such time as they can be transferred to other Trusts or accounts administered by the IMF. The resources deposited into the Interim Holdings Account will ultimately fund activities for which understandings or modalities to use those

resources are not yet finalized. The account may be terminated by the IMF at any time, and uncommitted resources in the account at the time of termination are to be returned to the contributors. There were no balances in this account at April 30, 2019, and 2018, and no transactions for the financial years then ended.

2. Basis of preparation and measurement

The financial statements of the Administered Accounts are prepared in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB). The financial statements have been prepared under the historical cost convention, except for the revaluation of financial instruments at fair value through profit or loss.

2.1 Unit of account

2.1.1 Japan, Framework—TA, Framework—SFA, Interim Holdings, and Switzerland

The functional and reporting currency of these accounts is the U.S. dollar. All transactions and operations of these accounts, including the transfers to and from these accounts and interest payments, are denominated in U.S. dollars. Contributions denominated in other currencies are converted into U.S. dollars upon receipt of the funds.

2.1.2 SFF Subsidy, Post-SCA-2, SCA-1/Deferred Charges, People's Bank of China, Windfall Gold Sales Profits, and Remaining Windfall Gold Sales Profits

The financial statements for these accounts are presented in SDRs. The SDR is the General Department's unit of account. Its value is determined daily by the IMF by summing specific amounts of the basket currencies in U.S. dollar equivalents on the basis of market exchange rates. Contributions denominated in other currencies are converted into the component currencies in the SDR basket upon receipt of the funds.

The IMF reviews the composition of the SDR valuation basket at a minimum of five-year intervals. The latest review was completed in November 2015. The specific amounts of the currencies in the SDR basket, effective October 1, 2016, were as follows:

| SDR basket currency | Amount |
|---------------------|----------|
| Chinese renminbi | 1.0174 |
| Euro | 0.38671 |
| Japanese yen | 11.900 |
| Pound sterling | 0.085946 |
| U.S. dollar | 0.58252 |

At April 30, 2019, one SDR was equal to US\$1.38576 (US\$1.43806 at April 30, 2018). The next review of the method of valuation of the SDR will take place by September 30, 2021, unless developments in the interim justify an earlier review.

2.2 SDR interest rate

The SDR interest rate is used to calculate interest income on resources held in SDRs. The SDR interest rate also provides the basis for interest expense on borrowings (see Note 6).

The SDR interest rate is determined weekly by reference to a weighted average of yields or rates on short-term instruments in the money markets of the members whose currencies are included in the SDR valuation basket:

| SDR basket currency | Yield or rate |
|---------------------|---|
| Chinese renminbi | Three-month benchmark yield for China Treasury bonds as published by the China Central Depository and Clearing Co., Ltd. |
| Euro | Three-month spot rate for euro area central government bonds with a minimum rating of AA published by the European Central Bank |
| Japanese yen | Three-month Treasury discount bills |
| Pound sterling | Three-month Treasury bills |
| U.S. dollar | Three-month Treasury bills |

The SDR interest rate is subject to a floor of 0.050 percent and is rounded to three decimal places. The average SDR interest rate was 1.036 percent per annum and 0.676 percent per annum for the financial years ended April 30, 2019, and 2018, respectively.

2.3 Use of estimates and judgement

The preparation of financial statements requires management to make judgements, estimates, and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

The most significant estimates and judgments used in applying accounting policies include fair value measurement of financial instruments (see Note 3.8).

3. Summary of significant accounting policies

3.1 Financial instruments

IFRS 9, "Financial Instruments", as issued by the IASB in July 2014, was adopted with a date of initial application of

May 1, 2018. The requirements of IFRS 9 represent a significant change from the standard it superseded, International Accounting Standard (IAS) 39, "Financial Instruments: Recognition and Measurement" (see Note 3.9).

3.2 Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits and other highly liquid short-term investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. Cash and cash equivalents are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

3.3 Investments

Investments held in the People's Bank of China account are managed in accordance with the Administered Accounts' risk management and investment strategy, and their performance is evaluated on a fair value basis. As a result, these securities are classified at fair value through profit or loss (FVPL) in accordance with their business model. Funds pending suitable investment in accordance with the investment strategy are kept in fixed-term deposits, which are measured at amortized cost. The valuation techniques to determine fair value are described in Note 5.

3.3.1 Recognition

Investments are initially recognized on the trade date at which an account becomes a party to the contractual provisions of the instrument.

3.3.2 Derecognition

Investments are derecognized on the trade date when the contractual rights to the cash flows from the asset expire, or when substantially all the risks and rewards of ownership of the investment are transferred.

3.3.3 Interest and investment Income

Interest and investment income comprises interest income on cash and cash equivalents and investments, realized gains and losses, and unrealized gains and losses, including currency valuation differences arising from exchange rate movements against the functional currency. Interest income is recognized on an accrual basis under the effective interest method.

3.4 Borrowings

Borrowings are initially recognized at fair value of the amount drawn and are subsequently measured at amortized cost using the effective interest method.

3.5 Contributions

Contributions are recognized in the financial statements after the achievement of specified conditions and are subject to the bilateral agreements stipulating how the resources are to be used.

3.6 Operating expenses

Operating expenses consist of reimbursements to the IMF for program and administrative costs incurred on behalf of technical assistance activities for selected accounts, as agreed between the IMF and contributing members to the Administered Accounts.

3.7 Foreign currency translation

Transactions in currencies other than the reporting currency are recorded at the rate of exchange on the date of the transaction. Assets and liabilities denominated in other currencies are reported using the exchange rate on the date of the financial statements. Exchange differences arising from the settlement of transactions at rates different from those on the date of the transactions are included in the determination of total comprehensive income.

3.8 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability or, in the absence of a principal market, in the most advantageous market.

A three-level fair value hierarchy is used to determine fair value under which financial instruments are categorized based on the priority of the inputs to the valuation technique. The fair value hierarchy has the following levels:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices)
- Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs)

When the inputs used to measure the fair value of an asset or liability fall within different levels of the fair value hierarchy, the level within which the fair value measurement is categorized is based on the lowest-level input that is significant to the fair value measurement of the instrument in its entirety. Thus, a Level 3 fair value measurement may include inputs that are both observable and unobservable.

3.9 New International Financial Reporting Standards

The following new standards issued by the IASB and applicable to the Administrative Accounts became effective in the financial year ended April 30, 2019.

IFRS 9, "Financial Instruments", which replaces IAS 39 "Financial Instruments: Recognition and Measurement", is effective for annual periods starting on or after January 1, 2018, and was adopted on May 1, 2018. The requirements of IFRS 9 represent significant changes from IAS 39.

Classification and Measurement

IFRS 9 requires financial assets to be classified at fair value through profit or loss, fair value through other comprehensive income, or amortized cost based on the entity's business model for managing the assets and their contractual cash flow characteristics. Financial liabilities are classified and measured at amortized cost or fair value through profit or loss.

Impairment

The incurred loss model of IAS 39 has been replaced by a forward-looking expected credit loss impairment model.

Transition to IFRS 9 adoption

The adoption of IFRS 9 did not have a material effect on the financial statements of the Administered Accounts. Changes in accounting policies resulting from the adoption of IFRS 9 have been applied retrospectively (see Note 3.3 for details).

IFRS 15, "Revenue from Contracts with Customers", is effective for annual periods starting on or after January 1, 2018, and was adopted by the Administered Accounts on May 1, 2018. IFRS 15 provides a principle-based approach for revenue recognition that applies to all contracts with customers except those related to financial instruments, leases, and insurance contracts. It requires an entity to recognize revenue as performance obligations are satisfied.

The adoption of IFRS 15 did not have a material effect on the financial statements of the Administered Accounts.

4. Financial risk management

In administering contributed resources and funding financial and technical services, the Administered Accounts have exposure to credit, liquidity, and market risks.

4.1 Credit risk

Credit risk on investment activities represents the potential loss that the Administered Accounts may incur if obligors and counterparties default on their contractual obligations. Credit risk is minimized by holding resources at the Bank for International Settlements (BIS), an international financial institution that provides financial services to central banks and other international financial institutions.

4.2 Liquidity risk

Liquidity risk is the risk of nonavailability of resources to meet financing needs and obligations. Liquidity risk is monitored to ensure that upcoming payments or transfers can be met from the Administered Accounts' cash and highly liquid investments. For the People's Bank of China account, the principal resources are invested with the objective to generate income to support the agreed technical assistance and training activities while preserving the principal in nominal terms. The maturity of the investments matches the repayment of the principal to the People's Bank of China due in October 2022.

4.3 Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate because of changes in market prices. Market risk includes interest rate risk and exchange rate risk.

4.3.1 Interest rate risk

Interest rate risk is the risk that future net cash flows will fluctuate because of changes in market interest rates. The People's Bank of China account invests in BIS fixed-term deposits, which are measured at amortized cost and medium-term instruments (MTIs), which are subject to mark-to-market interest rate risk.

4.3.2 Exchange rate risk

Exchange rate risk is the risk that the entity's financial position and cash flows will be affected by fluctuations in prevailing foreign currency exchange rates. Exchange rate risk is managed, to the extent possible, by holding all financial assets and liabilities in the functional currency of each account or, in the case of accounts whose unit of account is the SDR, in the constituent currencies included in the SDR valuation basket. The exchange rate risk on investments held by the People's Bank of China account is managed by investing in MTIs and fixed-term deposits denominated in the constituent currencies included in the SDR's valuation basket with the relative amount of each currency matching its weight in the SDR basket. In addition, the currency composition of the account is adjusted periodically to align with the SDR basket; therefore, exchange rate risk is minimal.

4.3.3 Value at Risk

Exposures to market risk are measured using value at risk (VaR). The VaR estimates reported below represent the maximum potential loss in value of the assets over the next year due to adverse market movements, with a 95 percent confidence level. Conversely, there is a 1 in 20 chance that

annual losses on investment assets would be expected to equal or exceed the reported VaR. Losses in a single year could exceed the reported VaR by a significant amount.

VaR models are based predominantly on historical simulations and provide plausible future scenarios based on these simulations. There is no standard methodology for estimating VaR, and the modeling of the market risk characteristics of the investments involves many assumptions and approximations. Different assumptions or approximations could produce significantly different VaR estimates.

The VaR was SDR 3 million as at April 30, 2019 (SDR 4 million as at April 30, 2018).

5. Investments

The investments of the People's Bank of China account comprised the following:

| | April 30, 2019 | April 30, 2018 | | | | | |
|---|-----------------------|----------------|--|--|--|--|--|
| | (in millions of SDRs) | | | | | | |
| Fixed-term deposits | 16.5 | 18.0 | | | | | |
| Fixed-income securities (BIS medium-term instruments) | 149.6 | 145.6 | | | | | |
| Total | 166.1 | 163.6 | | | | | |

The fixed-term deposits and fixed-income securities held at April 30, 2019 mature in financial years 2020 and 2023, respectively (financial year 2019 and 2023, respectively, for fixed-term deposits and fixed-income securities held at April 30, 2018).

MTIs are not traded in an active market; consequently, their fair value is determined based on a compilation of significant observable market information such as recently executed trades in securities of the issuer or comparable issuers and yield curves. The investments are categorized as Level 2 based on the fair value hierarchy.

Investment income for the Administered Accounts consisted of interest income only, except for the People's Bank of China account, whose investment income (loss) comprised the following:

| | 2019 | 2018 |
|--|-------------|------------|
| | (in million | s of SDRs) |
| Investment income/(loss) on FVPL investments | 4.2 | (2.0) |
| Interest income on investments at amortized cost | 0.7 | 0.6 |
| Total | 4.9 | (1.4) |

6. Borrowings

The People's Bank of China account was funded by an SDR 170 million loan from the People's Bank of China on July 2, 2012. Upon its initial maturity on July 2, 2017, the loan was renewed for another five years. The interest on the loan is one-tenth of 1 percent per annum, payable annually, but only if the net investment earnings on the corresponding investment exceed that amount per annum.

7. Operating expenses

The expenses of conducting the activities of the Administered Accounts are paid by the General Department of the IMF, and partial reimbursements are made by selected accounts. Framework—SFA Account reimbursements of US\$12.4 million and US\$12.2 million are included in operating expenses in the statements of comprehensive income and changes in resources during the financial years ended April 30, 2019, and 2018, respectively.

8. Transfers

The Switzerland account transfers amounting to US\$5.2 million during the financial year ended April 30, 2019 (US\$4.2 million during the financial year ended April 30, 2018) consist of the settlement of resources contributed by the Swiss National Bank and payments made by the National Bank of Ukraine under the bilateral financing agreement.

Transfers of resources between other accounts and Trusts administered by the IMF during the financial years ended April 30, 2019, and 2018, were as follows:

| | | 2019 | 2018 | |
|---|--|-----------------------|------|--|
| Transfer from | Transfer to | (in millions of SDRs) | | |
| People's Bank of China account | Framework—SFA | 3.7 | 0.5 | |
| Windfall Gold Sales Profits | Refunds to contributors | 6.3 | 0.7 | |
| Windfall Gold Sales Profits | Poverty Reduction and Growth (PRG) Trust | | 9.2 | |
| Remaining Windfall Gold Sales Profits | Refunds to contributors | 15.6 | 1.6 | |
| Remaining Windfall Gold Sales Profits | PRG Trust | <u>—</u> | 23.1 | |

Supplemental Schedules

SCHEDULE 1: Selected Interim Holdings of Resources Administered Accounts—Balances, Contributions, Interest Earned, and Transfers for the Financial Year Ended April 30, 2019

| | Beginning balance | Contributions/ transfers in | Interest earned | Transfers out | Ending balance | |

Components may not sum exactly to totals because of rounding.

¹ The schedule does not include the People's Bank of China Administered Account, for which resources are provided in the form of loans, not contributions.

² Net of refunds of contributions to donors owing to termination of projects financed by resources in the Administered Accounts and transfers between subaccounts within the Framework—SFA.

³Disbursements have been made from contributions as well as from funds generated on them, net of reimbursements, if applicable, for payments made previously.

⁴ Information is provided for active subaccounts only.

⁵ Subaccount was established in August 2017.

⁶ Subaccount was established in September 2018.

^{**} Less than US\$50,000.
