The postcrisis rebound in net private capital flows was uneven across regions, with
the pace of recovery faster for regions that were more resilient in the recent crisis
(Asia, Latin America) than others.

IMF staff calculations.
Note: See Appendix 4.1 for a list of the economies included in the regional aggregates. The
group and regional aggregates exclude offshore financial centers. Total net private capital
flows do not equal the sum of the plotted components, because net derivative flows are not
plotted and there is a lack of data on the underlying composition for some economies.
