January 2013

This presentation represents the views of the author and should not be attributed to the IMF, its Executive Board, or its management.
Plan of Presentation

I. Trends and drivers of public pension spending in advanced and emerging economies

II. Fiscal context and projected spending increases

III. Risks to projections

IV. Conclusions
I. Trends and drivers of public pension spending
After rapid increases over 1970-1990, reforms have slowed the growth of public pension spending in advanced economies.

Sources: OECD, EC, ILO, UN, and IMF staff estimates.
Note: The average includes Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, the United Kingdom, and the United States. The lowest/highest refers to the single country with the lowest/highest spending.
Higher replacement rates and aging have driven spending in advanced economies

Evolution of Public Pension Expenditures in Advanced Economies, 1970–2010
(Percent of GDP)

Sources: OECD, EC, ILO, UN, and IMF staff estimates.
Trends vary across countries

Sources: OECD, ILO, UN, and IMF staff estimates.
Higher replacement rates and aging have driven spending in advanced economies

Evolution of Public Pension Expenditures in Advanced Asia and Pacific, 1990–2010
(Percent of GDP)

Sources: OECD, ILO, UN, and IMF staff estimates.
Higher replacement rates and aging have driven spending in advanced economies

Evolution of Public Pension Expenditures in Advanced Asia and Pacific, 1990–2010
(Percent of GDP)

Sources: OECD, ILO, UN, and IMF staff estimates.
Large increases in pension spending in emerging economies, but from low level in Asia

Evolution of Public Pension Expenditures in Emerging Economies, 1990–2010
(Percent of GDP)

Sources: OECD, EC, ILO, UN, and IMF staff estimates.

Note: Emerging Europe includes Bulgaria, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Russia, Turkey, and Ukraine. Emerging Asia includes China, India, Indonesia, Malaysia, Pakistan, Philippines, and Thailand. Other emerging includes Argentina, Brazil, Chile, Colombia, Egypt, Jordan, Mexico, Saudi Arabia, and South Africa.
Higher replacement rates and aging have driven spending in emerging economies

Evolution of Public Pension Expenditures in Emerging Economies, 1990–2010 (Percent of GDP)

Sources: OECD, EC, ILO, UN, and IMF staff estimates.
Variation in spending reflects differences in aging, system generosity, and coverage rates.

**Pension Spending, Replacement Rates, and Aging, 2010**

Sources: OECD, EC, ILO, UN, and IMF staff estimates.
II. Fiscal context and projected spending increases
Debt ratios remain at historic levels in advanced economies

Public Debt, percent of GDP

Advanced
Emerging

World War II
Great Recession

Advanced
Emerging

Source: IMF.
Substantial adjustment is needed to bring debt ratios to appropriate levels in advanced economies.

Illustrative Adjustment Needs, percent of GDP

Source: IMF.
Emerging economies are in a stronger overall fiscal position, but some countries are vulnerable.
Implications for fiscal policy and pensions

- Fiscal adjustment needs are high in many advanced economies
- Measure of needed fiscal adjustment does not take into account projected increases in pension and public health spending
- Containing increases in pension spending may be needed to support fiscal adjustment
- Emerging economies have more fiscal space
Pension spending pressures will intensify in many countries between 2010 and 2030

Increase in Pension Spending, 2010–2030
(Percent of GDP)

Sources: OECD, EC, ILO, UN, and IMF staff estimates.
Enacted reforms are expected to help contain impact of population aging on spending in advanced economies.

Evolution of Public Pension Expenditures, 2010–2030
(Percent of GDP)

Sources: OECD, EC, ILO, UN, and IMF staff estimates.
Enacted reforms are expected to help contain impact of population aging on spending in most emerging regions except for Asia.

Evolution of Public Pension Expenditures, 2010–2030
(Percent of GDP)

Sources: OECD, EC, ILO, UN, and IMF staff estimates.
III. Considerable uncertainty and upside risks to projections

</tr>
<tr>
<td>Shortfalls in private DB plans (DB plans 30 percent or more underfunded in 2009)</td>
<td>Belgium, Japan, and Sweden</td>
</tr>
<tr>
<td>High share in private DC plans (Pension fund assets &gt;40 percent of GDP)</td>
<td>Australia, Canada, Denmark, Finland, Iceland, Ireland, Netherlands, Switzerland, the United Kingdom, and the United States</td>
</tr>
</tbody>
</table>
IV. Conclusions

- Public pension spending has increased in advanced and emerging economies since 1970s
- Aging will put pressure on pension spending in coming decades, with many emerging economies starting from lower levels
- Upside risks to projections and uncertainties
- Containing increases in pension spending in advanced economies may be needed to support fiscal adjustment
- Some but not all emerging economies have fiscal space that could be used to expand pension coverage
Thank you!
