... as an increasingly solid recovery in the U.S. economy...

- 2014Q2 rebound after temporary setback in Q1
- Signs of firming recovery continue to accumulate
- U.S. economy projected to grow at 3+ percent in 2014H2
- Labor market slack declined, but remains sizeable
... contrasts with weak activity in many other parts of the world, notably the euro area.

Sources: Haver Analytics; Bloomberg Analytics; and IMF staff calculations.
China is expected to grow above 7 percent, but the massive post-2008 credit boom casts a shadow.

Supportive policy measures should help to achieve the full-year GDP growth target...

... but financial risks related to past credit growth and the property sector are significant.

Sources: CEIC; and IMF staff calculations.

1 In percent of 4Q rolling sum of quarterly GDP.

Against this backdrop, Latin America and the Caribbean is facing a lackluster outlook for growth…

Latin America and the Caribbean: Real GDP Growth

(Percent)

Sources: IMF, World Economic Outlook; and IMF staff calculations.
... partly reflecting softness in global commodity markets, amid China’s slowdown...

Latin America and China: Annual Real GDP Growth
(Percent)

Sources: IMF, World Economic Outlook; and IMF staff calculations.

1 PPP-weighted average of Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Paraguay, Peru, Uruguay, and Venezuela.

2 PPP-weighted average of Costa Rica, El Salvador, Guatemala, Honduras, Mexico, and Nicaragua.
... following a terms-of-trade boom that had brought extraordinary income windfalls.

Latin America: Total Exports¹
(Index: 2003=100)

Volume  Value²

Latin America: Commodity Income Windfall, 1970–2012¹
(Cumulative windfall as share of annual GDP)

Sources: IMF, World Economic Outlook.
¹ Simple average of Latin American countries.
² Total exports in U.S. dollars deflated by the U.S. producer price index.

Sources: IMF, International Financial Statistics; and IMF staff estimates.
¹ Cumulative income windfall from start to peak of each identified episode.
Beyond weaker commodity prices, domestic policy uncertainties have also dampened confidence lately.

- In some countries, short-term uncertainty is a price worth paying for reforms with high long-run payoff (e.g., Mexico).

- In other cases, however, investor confidence has weakened amid perceptions of policy drift and lack of reform momentum.

Growth expectations have been revised downward significantly, led by investment...

LAC: Current WEO Path for GDP and Components Relative to Sep. 2011 WEO Projections¹
(Percent)

Sources: IMF, *World Economic Outlook*; and IMF staff calculations.
¹ Ratio of GDP levels between October 2014 and September 2011 WEO projections. A value of 100 indicates no difference between the two projections; values below 100 indicate downward revisions.
² Weighted by the value of exports of goods and services in U.S. dollars. Excludes Dominica, Grenada, Guyana, Jamaica, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, and Suriname due to data constraints.

LA6: Real Investment Growth¹
(Percent)

Sources: IMF, *World Economic Outlook*; and IMF staff calculations.
¹ Simple average of Brazil, Chile, Colombia, Mexico, Peru, and Uruguay.
… underscoring the need for structural reforms to ease supply bottlenecks and boost productivity.

Priorities differ by country, but generally include:

- Addressing infrastructure bottlenecks
- Enhancing educational outcomes
- Improving the business environment

Sources: OECD, PISA (2012); World Bank, Ease of Doing Business database (2013); World Economic Forum, Global Competitiveness Report (2014–15); and IMF staff calculations.

¹ The scale reflects the percentile distribution in all countries for each respective survey; higher scores reflect higher performance; PISA: Program for International Student Assessment; WB: World Bank; WEF: World Economic Forum.

The resulting high public debt burdens in turn are weighing on confidence and growth.

General Government Debt, 2013
(Percent of GDP, world sample of 177 countries)

Source: IMF, *World Economic Outlook.*
In a few countries, citizenship-by-investment programs have provided relief...

- CBI inflows have surged in recent years
- Impact on **St. Kitts and Nevis** and **Dominica** is already large
- New programs just launched in **Antigua and Barbuda** and **Grenada** could also yield significant resources

- These inflows have already led to a robust recovery in St. Kitts and Nevis and could help support an economic recovery and improve macro balances in a few other economies

**CBI Inflows in St. Kitts and Nevis and Dominica**

(Percents of GDP)

Sources: National authorities; and IMF staff calculations.
... but prudent management is key to containing the risks associated with these programs.

- **Large, volatile CBI inflows may increase macro vulnerability**
  - Economic overheating creates risks of Dutch Disease
  - Reduced fiscal discipline leading to increased dependence
  - Higher external vulnerability with risks of sudden stops

- **A prudent CBI framework is critical**
  - Pacing and regulating inflows into the private sector
  - Saving a significant share of public sector inflows to build fiscal buffers and reduce debt, while allowing for sustainable use of resources consistent with absorptive capacity
  - Enforcing a strict due diligence process and a prudent governance framework to reduce sustainability risks
Fiscal vulnerabilities are mirrored by very weak external positions, both public and private…

Outline: Testing Times for...

• The World
• The LAC Region
• The Caribbean
  – Growth
  – Fiscal
  – External
  – Financial

– Going Forward
To address these challenges, a multi-pronged strategy is needed, combining fiscal adjustment...

- Fiscal adjustment must be at the heart of any permanent solution, and underpinned by structural changes:

  - Improve fiscal policy frameworks and PFM
  - Reform public sector employment and wage setting
  - Fiscal Responsibility Legislation and fiscal rules
  - Streamline tax incentives and introduce regional coordination
  - Rationalize the size of the public sector
  - Judicious management of citizenship program revenues
…with financial sector clean-up and steps to boost competitiveness.

• Financial sector priorities in the ECCU:
  – Upgrade supervision and regulation to international norms
  – Asset quality reviews of banks
  – Strengthening banks’ financial positions

• Improved competitiveness is key to restoring growth and external sustainability:
  – Intensify efforts to improve the business climate
  – Liberalize labor markets and improve training
  – Prioritize public investment to address infrastructure bottlenecks
A difficult road ahead, but some reasons for optimism….

- Policymakers’ increasing willingness to take decisive action to make fundamental changes: e.g., Jamaica, Grenada, St. Kitts and Nevis

- Promising opportunities in health and education tourism, that offer high potential for growth and employment

- A lower oil bill?

- Potential “game-changing” opportunities to reduce energy costs, via increased use of natural gas and renewable energy
Jamaica’s recent progress in strengthening fiscal and external positions is an encouraging example.

External Current Account and Primary Fiscal Balances
