1/ The Eurosystem includes all Member States that had adopted the Euro at the time to which the data refer and the ECB.

2/ Discrepancies between the Eurosystem and the total obtained by adding each Member State's data are due to gold valuation. ECB and Eurosystem holdings of gold are valued using the gold fixing at 3 p.m. prevailing at the end of the appropriate period and converted into Euro using the reference rate of the last day of the reference period. Some Member States report data using the gold fixing at 10:30 a.m. prevailing at the end of the appropriate period.
