Additional information on the submission of the 2018 intermediate target data under DGI-2 Recommendation II.7

Dear colleagues,

During the Second Workshop on Securities Statistics that was held in Washington, DC on 21-22 March 2018, it was agreed to start the reporting of the self-commitments data for the intermediate objectives of Recommendation II.7 Reporting Template 1.1 at the latest with Q4/2018 data by beginning of May 2019 (i.e. with a timeliness of 4 months). As a follow-up, the WGSD circulated a stock-taking questionnaire in May 2018, in which G20 and FSB economies indicated their reporting plans for the submission of the 2018 intermediate reporting objectives.

This short note provides additional details regarding the submission process of the 2018 intermediate reporting objectives data to the BIS. If there are any further questions regarding the reporting of the new data that are not addressed by this note, please contact the BIS and the WGSD Secretariat at marjorie.santos@bis.org, tracy.chan@bis.org and g20-wgsd@ecb.int.

Start of reporting of new data

- All G20 and FSB economies, which are planning to report new data that have not been previously reported to the BIS as part of the 2018 intermediate objectives, are kindly asked to contact the BIS and WGSD Secretariat by e-mail at marjorie.santos@bis.org, tracy.chan@bis.org and g20-wgsd@ecb.int at least 2 months before the planned start of the reporting of the new data.

Submission of back data

- Back data for earlier reference periods should be reported with the first submission of the new data to the BIS.
Voluntary use of the DSD for Sector Accounts

- For those ten economies that are planning to report data in line with the DSD for Sector Accounts (NA_SEC), the Explanatory Note on Using the Sectoral Accounts Data Structure Definition (including its annex) provides detailed information on the relevant dimensions and code values of the DSD as well as a complete list of the DSD codes identifying the different breakdowns of the Reporting Templates for Recommendation II.7.
- The reporting in line with the DSD for Sector Accounts (NA_SEC) should be based on the latest version of the DSD, which is NA_SEC 1.10.
- In addition, the reporting should be based on the latest SDMX version, which is SDMX-ML 2.1.

Continuation of existing reporting

- Finally, please note that when starting the reporting of additional data that are part of the self-commitments for the 2018 intermediate objectives any existing reporting of securities statistics to the BIS should continue.
