

## EXTERNAL RELATIONS

During the 1995/96 financial year the Fund remained in the foreground of international attention through its activities in support of members in the aftermath of the Mexican financial crisis; its support of the economies in transition, especially Russia and Ukraine; and its assistance to members—notably Bosnia and Herzegovina—emerging from prolonged conflict. Efforts to contain the spillover effects from the Mexican crisis and the subsequent development of the Special Data Dissemination Standard (SDDS) as part of the Fund's response; the ongoing debate about the Fund's role in the globalization of capital markets; continuing discussions on the Eleventh General Review of Quotas and the proposed enlargement of the General Arrangements to Borrow (GAB); and the search for a solution to the burdens faced by the highly indebted poor countries—all served to focus unprecedented public attention on the Fund. In response to these growing demands, the Fund continued to expand its efforts to explain its work and policies to an ever-increasing international audience through contacts with the media, parliamentarians, and nongovernmental organizations and through its publications and the Internet.

### Information and Public Affairs

In both national and international forums, the Managing Director, the Deputy Managing Directors, and other senior staff delivered speeches on a broad range of domestic, regional, and global economic and financial issues. To supplement these efforts, the Managing Director held press conferences both at headquarters and overseas. To further the Fund's interests in greater openness regarding its operations, management and senior staff gave an increasing number of interviews to a broad spectrum of the media, both print and electronic. At the same time, Fund staff delivered papers to, and participated in, a wide range of seminars, conferences, and symposiums. To increase the knowledge of the media about the mandate and operations of the Fund, regional and special informational seminars for journalists and nonofficials—some in collaboration with other international or regional financial institutions—were held in Azerbaijan, Belarus, Bulgaria, Namibia, Panama, Russia, Senegal, Ukraine, Vietnam, and Zimbabwe.

The Fund's interactions with the international news media continued to increase during the financial year. Management and senior staff actively developed these contacts through press conferences, interviews, and briefings—both at headquarters and in the field—to explain major issues and developments. By the end of the financial year, more than 325 staff members had

taken media training courses to prepare themselves for press relations at headquarters and in member countries.

During 1995/96 the Fund also intensified its dialogue and educational effort, in the United States and abroad, with nongovernmental organizations, parliaments (with special emphasis on the U.S. Congress), research institutes, private sector businesses, religious groups, universities, and labor unions. To that end, economic forums, international seminars, and briefings were organized at Fund headquarters for representatives of these groups and the general public. Public affairs missions were conducted in the Baltic countries, Belarus, Bulgaria, Trinidad and Tobago, and Zimbabwe. In response to the growing demand for information on the Fund and its policies and activities—during the financial year more than 10,000 such requests were received by telephone or in writing—a series of fact sheets on the most frequently asked questions about the Fund, in addition to the press releases and news briefs issued regularly to the media, was prepared for distribution to the general public.

To expand the public's access to information about its activities and functions, the Fund maintained the Internet gopher site that it opened in 1995. Studies progressed to develop a public World Wide Web site, as well as an internal Web ("Intranet") site to enhance information sharing among Fund departments and between Fund and World Bank staff.

### Publications

The greater intensity of the Fund's other external relations activities during the financial year was met by an expansion of effort to make Fund publications more readily available to the international public.

With the acute interest in country and regional economic developments—some having systemic implications for the global economy—shown during the financial year, the country coverage of the Fund's publications increased. One hundred and thirty-six IMF Staff Country Reports, comprising background papers prepared in connection with the Fund's Article IV consultations with member countries, were issued in 1995/96, compared with 46 in 1994/95. In addition, 7 of the 11 volumes published in the Occasional Paper series in 1995/96 had a regional or country-specific focus. The 1995 *Annual Report* was redesigned and continued the expanded coverage of Fund policies and country developments that was begun in 1994, and the biannual (May and October) *World Economic Outlook* also continued its reporting of key international, regional, and country-specific economic developments

and trends. In addition to the coverage of the global economy in the *World Economic Outlook*, other volumes in the series of World Economic and Financial Surveys—*International Capital Markets*, *Private Market Financing for Developing Countries*, and *Official Financing for Developing Countries*—provided in-depth analyses of events affecting capital flows, emerging markets, and the heavily indebted poor countries.

The Fund published ten books in English on various economic and financial issues during the financial year, four of them on regional or country-specific topics. Of particular interest was the publication of *International Monetary Cooperation Since Bretton Woods*, by historian Harold James, which the Fund commissioned to mark its fiftieth anniversary. *Staff Papers*, the Fund's quarterly economic journal, also commemorated the fiftieth anniversary by a special section, "Celebrating Fifty Years of the International Monetary Fund," in the December 1995 issue. In the Working Papers and Papers on Policy Analysis and Assessment series, 130 and 7 papers, respectively, were issued during the financial year, and plans were approved to develop from these documents a new series to highlight research that merited wider dissemination.

During the financial year, the *IMF Survey*, the Fund's biweekly newsletter featuring articles on Fund policies and activities and global economic and financial developments, expanded its coverage of country and staff Working Paper analyses, dedicated an expanded issue to the March 1996 seminar on the future of the SDR, and continued its regular interviews with senior Fund officials. The annual *IMF Survey Supplement on the IMF* was streamlined to give greater prominence to the technical assistance activities of the Fund and was made available in Arabic, German, and Russian in addition to the regular English, French, and Spanish editions. The

monthly *IMF Memorandum* for the press, which highlights key indicators from the Fund's major statistical publications, was expanded and redesigned.

Efforts continued to explore the potential of the Internet and other advanced technology to serve the Fund's informational interests, including promotion of its publications. As well as speeches by management, country reports, and information briefs, the full text of *Finance and Development*, the quarterly periodical published jointly by the Fund and the World Bank, was made available on the Internet (address: <http://www.worldbank.org/fandd>). In addition, the *IMF Survey* introduced on the Internet a recurring listing of recent Fund publications and information. Development continued toward making *Balance of Payments* and *Direction of Trade* databases available on CD-ROM.

In addition to the annual *Catalog of Publications*, new monthly listings of Fund publications were made available in booklet and electronic form. Possibilities for copublishing in Arabic were explored with publishers in the Middle East. Contacts with international distributors of Fund publications were strengthened and actively developed by enlisting distributors in Argentina, Greece, Russia, Sweden, Switzerland, and Turkey. Fund publications were represented at major international book fairs held during the financial year. Special efforts were made to expand the reach of Fund publications in the transition economies. To guide the Fund's publication effort in reaching the widest possible audience, a marketing plan for publications covering 1995–97 was completed and endorsed by Fund management. Notable features of the plan include measures to improve order fulfillment and customer service through a new external vendor and the retraining and redeployment of existing staff.

A complete list of publications issued during the financial year appears in Table IV.1.

Table IV.1

## PUBLICATIONS ISSUED, FINANCIAL YEAR ENDED APRIL 30, 1996

## Reports and Other Documents

*Annual Report of the Executive Board for the Financial Year Ended April 30, 1995*  
(English, French, German, and Spanish). Free.

*Exchange Arrangements and Exchange Restrictions, Annual Report 1995*  
\$70.00 (\$35.00 to full-time university faculty members and students).

*Selected Decisions of the International Monetary Fund and Selected Documents, Twentieth Issue*  
(English). Free.

*Summary Proceedings of the Fiftieth Annual Meeting of the Board of Governors* (1995). Free.

*Summary Proceedings of the Forty-Ninth Annual Meeting of the Board of Governors* (1994). Free.

## Periodic Publications

*Balance of Payments Statistics Yearbook*  
Vol. 46. A two-part yearbook. \$56.00 a year.

*Direction of Trade Statistics*  
Quarterly, with yearbook. \$96.00 a year. \$48.00 to full-time university faculty members and students. \$30.00 for yearbook only.

*Government Finance Statistics Yearbook*  
Vol. 19, 1995 (Introduction and titles of lines in English, French, and Spanish). \$54.00.

*International Financial Statistics*  
Monthly, with yearbook (English, French, and Spanish). \$218.00 a year. \$109.00 to full-time university faculty members and students. \$50.00 for yearbook only.

*Staff Papers*  
Four times a year. \$50.00 a year. \$25.00 to full-time university faculty members and students.

The five publications listed above may be obtained at a special rate of \$330.00 (\$165.00 to full-time university faculty members and students). Magnetic tape subscriptions to *Balance of Payments Statistics Yearbook*, *Direction of Trade Statistics*, *Government Finance Statistics Yearbook*, and *International Financial Statistics* are also available. *International Financial Statistics* is also available on CD-ROM. Price information is available on request.

*The IMF Committee on Balance of Payments Statistics, Annual Report, 1995.*

*Finance and Development*  
Issued jointly with the World Bank; quarterly (English, Arabic, Chinese, French, German, Portuguese, and Spanish). Free.  
Airspeed delivery, \$20.00.

*IMF Survey*  
Twice monthly, but only once in December (English, French, and Spanish). Private firms and individuals are charged at an annual rate of \$79.00.
