General Department

Notes to the Financial Statements

as at July 31, 1999

General Department

The General Department consists of the General Resources Account, the Special Disbursement Account, and the Investment Account, which had not been activated at July 31, 1999.

General Resources Account

The General Resources Account holds the general resources of the IMF including currencies of the IMF's member countries, SDR holdings, and gold. These reflect the receipt of quota subscriptions, purchases and repurchases, collection of charges on members' use of IMF credit, payment of remuneration on members' creditor positions in the IMF, and borrowing and payment of interest on borrowing.

The IMF makes its resources available to its members in accordance with established policies by selling to members, in exchange for their own currencies, SDRs or currencies of other members. When members make purchases they incur an obligation to repurchase, within specified periods, the IMF's holdings of their currencies by payments in SDRs or other currencies determined by the IMF. The IMF's policies on the use of its general resources are intended to ensure that their use is temporary and will be reversed within the agreed repurchase periods.

The composition of the IMF's holdings of currencies changes as a result of the IMF's transactions, including purchases and repurchases. Currencies consist of currency holdings and notes payable on demand, which substitute for the members' currencies.

A member has a reserve tranche in the IMF to the extent that the IMF's holdings of its currency, excluding holdings that reflect the member's use of IMF credit, are less than the member's quota. A member's reserve tranche is considered a part of the member's external reserves, and it may draw on the reserve tranche at any time when it represents that it has a need. Reserve tranche purchases are not considered a use of IMF credit and are not subject to repurchase obligations or charges.

A member is entitled to repurchase at any time the IMF's holdings of its currency on which the IMF levies charges and is expected to make repurchases as and when its balance of payments and reserve position improve.

General Department

Notes to the Financial Statements

as at July 31, 1999

Special Disbursement Account

The Special Disbursement Account was activated on June 30, 1981 to receive transfers from the Trust Fund, which is being wound up. The Structural Adjustment Facility (SAF) was established in March 1986 within the Special Disbursement Account to provide balance of payments assistance on concessional terms to qualifying low-income developing country members.

The Special Disbursement Account is a part of the General Department of the IMF. The assets of the account are held separate from resources of other accounts of the General Department. Assets that exceed the needs of the account are transferred to the Reserve Account of the Enhanced Structural Adjustment Facility Trust (ESAF Trust), which is administered separately by the IMF as Trustee. Resources of the ESAF Trust Reserve Account that are determined to be in excess of its estimated needs are to be transferred back to the Special Disbursement Account. Upon liquidation of the ESAF Trust, the amounts remaining in the ESAF Trust Reserve Account after the discharge of all liabilities shall be transferred to the Special Disbursement Account. The IMF has also transferred certain resources derived from the termination of the 1976 Trust Fund to the ESAF Trust Subsidy Account. Upon liquidation of the ESAF Trust, any resources remaining in the ESAF Trust Subsidy Account will be returned to the Special Disbursement Account and the contributors of the ESAF Trust Subsidy Account.

1. Summary of Significant Accounting Practices

The IMF prepares its financial statements in accordance with generally accepted accounting principles that are in compliance with international accounting standards as they apply to the IMF. Further discussions of specific accounting principles and disclosure practices have been included in other notes.

Unit of Account

The accounts are expressed in terms of the SDR. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of a basket of currencies of five members. The IMF reviews the SDR valuation basket every five years. The currencies in the basket and their amounts are as follows:

General Department

Notes to the Financial Statements

as at July 31, 1999

Currency	Amounts
Euro (Germany)	0.228
Euro (France)	0.1239
Japanese yen	27.2
Pound sterling	0.105
U.S. dollar	0.5821

Valuation of Currencies

Each member is obligated to maintain the value of the balances of its currency held by the IMF in the General Resources Account in terms of the SDR. Currencies are valued in terms of the SDR on the basis of the representative exchange rate determined for each currency. Whenever the IMF revalues its holdings of a member's currency, a receivable or a payable is established for the amount of currency payable by or to the member in order to maintain the SDR value of the IMF's holdings of the currency. The balances of the receivables or payables are included in the IMF's total currency holdings.

Income Recognition and deferral

Income is recognized as it is earned, and expenses are recorded as they are incurred, except that income from charges from members that are overdue in settling their obligations to the IMF by six months or more is deferred and is recognized as income only when paid unless the member has remained current in settling charges when due. The IMF generates compensating income for the amount of charges being deferred through the burden-sharing mechanism (for a more detailed description of this mechanism, see Note 5).

Capital Assets

Land, buildings, and equipment with a cost in excess of \$100,000, are capitalized at cost and depreciated using the straight-line method over the estimated useful lives of the assets, ranging from 3 years for equipment to 30 years for buildings.

General Department

Notes to the Financial Statements

as at July 31, 1999

2. Quotas, Currencies, and Securities

Each member is required to pay to the IMF the amount of its initial quota and subsequent increases partly in its own currency and the remainder in the form of reserve assets, except that in 1978 members were permitted to pay the entire increase in their own currencies. A member's quota is not increased until the member consents to the increase and pays the subscription. Each member has the option to substitute nonnegotiable and non-interest-bearing securities for the amount of its currency held by the IMF in the General Resources Account that is in excess of $\frac{1}{4}$ of 1 percent of the member's quota. These securities, which are part of the IMF's currency holdings, are encashable by the IMF on demand.

Changes in the IMF's holdings of members' currencies for the three months ended July 31, 1999 were as follows:

	July 31, 1999	April 30, 1999	Net Change
<i>In millions of SDRs</i>			
Members' quotas	209,696	207,983	1,713
Members' outstanding use of IMF credit in the GRA	57,080	60,651	(3,571)
Members' reserve			
tranche positions in the GRA	(59,960)	(63,610)	3,650
Other receivables	(56)	(56)	--
Administrative currency balances	(1)	(2)	1
 Currencies and securities	 <u>206,759</u>	 <u>204,966</u>	 <u>1,793</u>

On December 14, 1992, the Federal Republic of Yugoslavia (Serbia/Montenegro) agreed, as a successor state, to share in the assets and liabilities of the former Socialist Federal Republic of Yugoslavia, but has yet to succeed to IMF membership. IMF credit outstanding with respect to the Federal Republic of Yugoslavia (Serbia/Montenegro), amounted to SDR 56 million at July 31, 1999. This amount is included in charges, interest, and other receivables in the balance sheet.

General Department

Notes to the Financial Statements

as at July 31, 1999

Receivables and payables arising from valuation adjustments at July 31, 1999, amounted to SDR 7,030 million and SDR 496 million, respectively.

The IMF's holdings of members' currencies at July 31, 1999 are shown in Schedule 1.

3. *SDR Holdings*

SDRs are reserve assets created by the IMF and allocated to members participating in the SDR Department. Although SDRs are not allocated to the IMF, the IMF may acquire, hold, and dispose of SDRs through the General Resources Account. The IMF receives SDRs from members in the settlement of their financial obligations to the IMF and uses SDRs in transactions and operations between the IMF and its members. The IMF earns interest on its SDR holdings at the same rate as all other holders of SDRs.

4. *Gold Holdings*

The Articles of Agreement limit the use of gold in the IMF's operations and transactions. Any use provided for in the Articles requires the approval by 85 percent majority of the total voting power of the Executive Board. In accordance with provisions of the Articles, proceeds from the sale of gold in excess of the stipulated valuation, as described below, are to be transferred to the Special Disbursement Account, to the Investment Account, or to members that were members on August 31, 1975.

At July 31, 1999, the IMF held 3,217,341 kilograms equal to 103,439,916 fine ounces of gold at designated depositories. In accordance with the IMF's Articles of Agreement, gold is valued on the basis of 0.888671 gram of fine gold per SDR, which is equivalent to SDR 35 per fine ounce (except for 21,396 fine ounces of gold acquired in financial year 1993 from Cambodia at market value, equivalent to SDR 240.68 per fine ounce, amounting to SDR 5.1 million). This valuation is equal to the original cost at which the gold was acquired. As of July 31, 1999, the value of the IMF's holdings of gold calculated at the market price was SDR 19.4 billion.

5. *IMF Operations*

The IMF's financial resources are made available to members under a number of policies and facilities that differ in the type of balance of payments need they seek to address, in the length of repurchase period, the charges levied on outstanding use of IMF credit, and in the degree of conditionality attached to them. Changes in the outstanding use of IMF credit under the various facilities during the three months ended July 31, 1999 were as follows:

General Department

Notes to the Financial Statements

as at July 31, 1999

	April 30, 1999	Purchases	Repurchases	July 31, 1999
<i>In millions of SDRs</i>				
Regular facilities	24,534	1,457	1,875	24,116
Extended Fund Facility	15,800	664	337	16,127
Supplemental Reserve Facility	12,655	--	3,340	9,315
Systemic Transformation				
Facility	3,364	--	143	3,221
Enlarged access	1,307	--	179	1,128
Compensatory and				
Contingency Financing Facility	2,845	224	40	3,029
Supplementary Financing				
Facility	146	--	2	144
Total	<u>60,651</u>	<u>2,345</u>	<u>5,916</u>	<u>57,080</u>

Members' use of IMF resources is shown in Schedule 1; scheduled repurchases in the General Resources Account and repayments of loans to the Special Disbursement Account are shown in Schedule 3. As of July 31, 1999, use of credit in the General Resources Account by the largest users was as follows:

	<i>In millions of SDRs and percent of total GRA credit</i>
Largest user of credit	12,428 21.8%
Three largest users of credit	26,613 46.6%
Five largest users of credit	38,345 67.2%

General Department

Notes to the Financial Statements

as at July 31, 1999

Arrangements in the General Department

At July 31, 1999, the undrawn balances under the 22 arrangements that were in effect in the General Department amounted to SDR 20,639 million. These arrangements are listed in Schedule 4.

Charges

The IMF levies periodic charges on its holdings of members' currencies that derive from their use of IMF credit. The rate of charge is set as a proportion of the SDR interest rate. This rate is adjusted periodically to offset the effect on the IMF's income of the deferral of unpaid charges and to finance the additions to the first Special Contingent Account, as discussed below. A surcharge progressing from 300 basis points above the rate of charge up to 500 basis points applies to use of credit under the Supplemental Reserve Facility. Special charges are levied on holdings that are not repurchased when due, and on overdue charges that are not settled when due. Special charges do not apply to members that are six months or more overdue to the IMF. A service charge is levied by the IMF on each purchase, except on a reserve tranche purchase. A stand-by fee is charged on Stand-By and Extended Arrangements. This fee is refunded in proportion to purchases made under the arrangement. At July 31, 1999, the total holdings on which the IMF levied charges amounted to SDR 57,080 million. Charges due to the IMF at July 31, 1999 amounted to SDR 1,628 million.

Remuneration

The IMF pays remuneration on a member's remunerated reserve tranche position. A remunerated reserve tranche position is the amount by which the member's norm exceeds the IMF's holdings of its currency, excluding holdings that derive from the use of IMF credit. The norm, which varies for each member, on average amounted to 96.2 percent of quota at July 31, 1999. The rate of remuneration is equal to the SDR interest rate and is adjusted, subject to a specific floor, to offset the effect of the deferral of charges on income and to finance the additions to the first Special Contingent Account, as discussed below.

At July 31, 1999, total creditor positions on which the IMF paid remuneration amounted to SDR 53,425 million.

General Department

Notes to the Financial Statements

as at July 31, 1999

Overdue Obligations

At July 31, 1999, six members were six months or more overdue in settling their financial obligations to the IMF and four of these members were overdue to the General Department. In addition, the Federal Republic of Yugoslavia (Serbia/Montenegro) was also six months or more overdue in meeting its financial obligations to the IMF. Credit extended to these members and the Federal Republic of Yugoslavia (Serbia/Montenegro) through the General Resources Account and the Special Disbursement Account amounted to SDR 1,135 million as of July 31, 1999.

GRA repurchases, SAF loan repayments, GRA charges, and SAF interest that are six months or more overdue to the General Department were as follows:

	Repurchases and SAF Loans	Charges and SAF Interest
<i>In millions of SDRs</i>		
Total overdue	1,135	966
Overdue for six months or more	1,127	946
Overdue for three years or more	1,066	824

General Department

Notes to the Financial Statements

as at July 31, 1999

The type and duration of these arrears as of July 31, 1999, were as follows:

	Repurchases and SAF Loans	Charges and SAF Interest	Total Obligation	Longest Overdue Obligation
<i>In millions of SDRs</i>				
Congo, Democratic Republic of	300.7	63.0	363.7	May 1991
Liberia	201.5	216.7	418.2	April 1985
Somalia	105.5	80.0	185.5	July 1987
Sudan	471.6	588.1	1,059.7	July 1985
Yugoslavia, Federal Republic of (Serbia/Montenegro)	56.1	18.0	74.1	September 1992
Total	<u>1,135.4</u>	<u>965.8</u>	<u>2,101.2</u>	

Strengthened Cooperative Strategy

The IMF follows a cooperative strategy aimed at resolving the issue of overdue obligations to the IMF. Three major elements form the basis of the cooperative strategy: (1) preventive measures, (2) remedial and deterrent measures, and (3) intensified collaboration and the rights approach. Under the intensified collaborative approach, the IMF has developed IMF-monitored programs and rights accumulation programs, which permit a member with protracted arrears to the IMF to establish a track record of performance related to policy implementation and payments. A rights accumulation program allows the member to earn rights toward future financing through the implementation of a comprehensive economic program. Rights would be encashed under a successor arrangement after clearance of arrears and when all the requirements for that successor arrangement are met.

General Department

Notes to the Financial Statements

as at July 31, 1999

Deferred Income and Special Contingent Accounts

It is the policy of the IMF to exclude from current income and record as deferred income charges due by members that are six months or more overdue in meeting payments to the IMF unless the member is current in the payment of charges. Deferred income amounted to SDR 969.6 million at July 31, 1999.

Since May 1, 1986, the IMF has adopted decisions whereby debtor and creditor members share equally the financial consequences of overdue obligations. An amount equal to deferred charges (excluding special charges) is generated and included in the IMF's income by an adjustment to the rate of charge and the rate of remuneration. These adjustments also finance the accumulation of precautionary balances that are held in the Special Contingent Accounts (see following paragraphs). The proceeds from the subsequent settlement of overdue charges are distributed to members that paid additional charges or received reduced remuneration when and to the extent that deferred charges that gave rise to adjustments are paid.

In view of the existence of protracted overdue obligations, the IMF accumulates precautionary balances, *inter alia*, in the Special Contingent Accounts. At July 31, 1999, the balances held in the first and second Special Contingent Accounts (SCA-1 and SCA-2) amounted to SDR 2,023 million, of which SDR 1,023 million was held in the SCA-1. The SCA-1 is financed by quarterly adjustments to the rate of charge and the rate of remuneration. Balances in the SCA-1 are to be distributed to the members that share the cost of financing it when there are no outstanding overdue charges and repurchases, or at such earlier time as the IMF may decide.

The SCA-2 was established on July 1, 1990 as part of the strengthened cooperative strategy to accumulate SDR 1.0 billion over a period of approximately five years through a further adjustment to the rate of charge and the rate of remuneration. Financing of the SCA-2 was completed during financial year 1997. The resources accumulated in the SCA-2 safeguard against potential losses arising from purchases made under a successor arrangement after a rights accumulation program has been successfully completed by members with protracted arrears to the IMF at the end of 1989, while at the same time providing additional liquidity to assist in financing such purchases. Refunds of contributions are to be made after all repurchases under the rights approach have been made, or at such earlier date as the IMF may determine. Outstanding credit in the General Resources Account following the completion and encashment of rights accumulation programs amounted to SDR 407 million at July 31, 1999.

General Department

Notes to the Financial Statements

as at July 31, 1999

The adjustments to charges and remuneration for deferred charges and SCA-1 during the three months ended July 31, 1999 were as follows:

	<u>Adjustments to</u>		
	<u>Charges</u>	<u>Remuneration</u>	<u>Total</u>
<i>In millions of SDRs</i>			
Deferred charges	4.4	4.2	8.6
SCA-1	16.2	16.6	32.8
Refunds of deferred charges	--	--	--
Burden-sharing contributions net of refunds	<u>20.6</u>	<u>20.8</u>	<u>41.4</u>

The cumulative charges, net of settlements, that have been deferred since May 1, 1986 and have resulted in adjustments to charges and remuneration, amounted to SDR 781 million at July 31, 1999. The cumulative refunds for the same period, resulting from the settlements of deferred charges for which burden-sharing adjustments have been made, amounted to SDR 963 million.

6. Other Assets

Other assets include capital assets which at July 31, 1999 amounted to SDR 224.7 million and consisted of:

	<i>In millions of SDRs</i>	
Land and buildings	295.9	
Equipment	34.7	
	<hr/>	
	330.6	
Less accumulated depreciation	105.9	
	<hr/>	
	224.7	

General Department

Notes to the Financial Statements

as at July 31, 1999

7. Reserves

The IMF determines annually what part of its net income shall be placed to the General Reserve or to the Special Reserve, and what part, if any, shall be distributed. The Articles of Agreement permit the IMF to use the Special Reserve for any purpose for which it may use the General Reserve, except distribution. An administrative deficit for any financial year must be charged first against the Special Reserve. The IMF has decided that for the financial year 2000 the net operational income generated from the use of resources under the SRF, after meeting the expenses of conducting the ESAF Trust, shall be transferred to the General Reserve.

8. Borrowing

Under the General Arrangements to Borrow (GAB), the IMF may borrow up to SDR 18.5 billion when supplementary resources are needed, in particular, to forestall or to cope with an impairment of the international monetary system. The GAB became effective on October 24, 1962, and has been extended through December 25, 2003. The GAB was activated on July 20, 1998. Interest on borrowing under the GAB is calculated at the SDR interest rate.

Under the New Arrangements to Borrow (NAB), the IMF may borrow up to SDR 34 billion of supplementary resources. The NAB is the facility of first and principal recourse, but it does not replace the GAB which will remain in force. Outstanding drawings and commitments under these two borrowing arrangements are limited to a combined total of SDR 34 billion. The NAB became effective on November 17, 1998 and was activated on December 2, 1998. Interest on borrowing under the NAB is payable to the participants at the SDR interest rate, plus 100 basis points for the first year, augmented by one-third of an increase of 50 basis points for each six-month period thereafter up to a maximum increase of one-third of 200 basis points. As a condition for the activation of the NAB, the IMF will be required to transfer to the ESAF-HIPC Trust an amount equal to 100 basis points above the rate of charge levied on outstanding SRF purchases under the arrangement that was originally financed by the NAB, augmented by one-third of an increase of 50 basis points for each six-month period thereafter up to a maximum increase of one-third of 200 basis points.

General Department

Notes to the Financial Statements

as at July 31, 1999

9. Administrative Expenses

The administrative expenses for the three months ended July 31, 1999 were as follows:

		<i>In millions of SDRs</i>
Personnel		76.2
Travel		15.6
Other		20.9
Less reimbursements for the administration of the SDR Department		(0.9)
		—
Total administrative expenses, net of reimbursements		111.8
		=====

The General Resources Account is to be reimbursed annually for expenses incurred in administering the Special Disbursement Account and the ESAF Trust; however, following the establishment of the SRF and the consequent increase in net operational income, the Board decided to forgo reimbursement of the expenses incurred in administering the ESAF Trust for financial years 1998, 1999, and 2000 and to transfer the amounts that would otherwise have been reimbursed to the GRA from the ESAF Trust Reserve Account, through the Special Disbursement Account, to the ESAF-HIPC Trust.

The IMF has a funded defined-benefit Staff Retirement Plan and a funded defined-benefit Supplemental Retirement Benefits Plan ("the Plans") covering nearly all staff. Contributions to the Plans and all other assets, liabilities, and income of the Plans are administered separately from the General Department and can be used only for the benefit of the participants in the Plans and their beneficiaries. Participants contribute a fixed percentage of their pensionable remuneration. The IMF contributes the remainder of the cost of funding the Plans and pays certain administrative costs of the Plans. The IMF uses the aggregate cost method for determining its pension cost. Under this method, the IMF contributions, including those for cost of living adjustments and for experience gains and losses, are spread over the expected future working lifetimes of the participants in the plans. The funding and cost of the Plans for the year beginning May 1, 1999 are based on an actuarial valuation at April 30, 1998.

General Department

Notes to the Financial Statements

as at July 31, 1999

The IMF provides certain health care benefits to retirees that elect to continue participation in its medical benefits and group life insurance plans through retirement. Participants and the IMF contribute toward meeting the costs of these benefits. The IMF's cost, which includes a past-service obligation, is actuarially determined using the projected unit credit method; the funding and cost for the year ended April 30, 2000 were based on an actuarial valuation at May 1, 1999. The IMF has established a Retired Staff Benefits Investment Account to hold and invest the resources contributed by the IMF toward the payment of these benefits.

1/ Includes nonnegotiable, non-interest-bearing notes that members are entitled to issue in substitution for currencies, and outstanding currency valuation adjustments.

2/ Includes the share of the Federal Republic of Yugoslavia (Serbia/Montenegro) in the liabilities of the former Socialist Federal Republic of Yugoslavia, although this state has not succeeded to Fund membership.

3/ The Special Disbursement Account (SDA) of the General Department provides financing under Structural Adjustment Facility (SAF) and Enhanced Structural Adjustment Facility (ESAF) arrangements.

4/ For information purposes only. The ESAF Trust provides financing under ESAF arrangements and is not a part of the General Department.

5/ Includes outstanding Trust Fund loans to Liberia (SDR 23.6 million), Somalia (SDR 6.5 million), and Sudan (SDR 59.2 million).

6/ Less than SDR 500.

Liquid Liabilities	
Reserve tranche positions ^{6/}	59,960,488
Liquidity Ratio ^{7/}	96.3%
Memorandum Item	
Resources available under borrowing arrangements	34,000,000

^{1/} Sundry assets, net of sundry liabilities reflect current assets (charges, interest, and other receivables) and other assets which include capital assets (land, buildings, and equipment), net of sundry liabilities (remuneration payable and other liabilities).

^{2/} Resources regarded as non-usable in the financing of the IMF's ongoing operations and transactions are (1) gold holdings, (2) currencies of members that are using IMF credit, (3) currencies of other members with relatively weak external positions, and (4) sundry assets, net of sundry liabilities.

^{3/} Usable resources consist of (1) holdings of currencies of members considered by the Executive Board as having balance of payments and reserve positions sufficiently strong for their currencies to be used in transfers, (2) SDR holdings, and (3) any unused amounts under credit lines that have been activated.

^{4/} Amounts committed under arrangements, which reflect undrawn balances committed under operative stand-by and extended arrangements, other than precautionary arrangements, are deducted from the total of usable resources, as are one-half of the amounts committed under precautionary arrangements. The Executive Board has decided that minimum working balances be set at 10 percent of the quotas of members deemed sufficiently strong for their currencies to be used in operations and transactions.

^{5/} Net uncommitted usable resources are defined as usable resources less resources committed under arrangements and minimum working balances, as described above. The amount represents the resources available to meet requests for use of IMF credit under new credit arrangements and for members' use of their reserve positions in the IMF.

^{6/} Liquid liabilities consist of (1) members' reserve tranche positions, and (2) the amount of any outstanding borrowing by the IMF under the GAB or NAB. Both reserve tranche positions and outstanding lending under the GAB and NAB (together called members' reserve positions in the IMF) are part of members' international reserves. The IMF cannot challenge a request by a member to draw on its reserve position when developments in its balance of payments or reserve position make this necessary, and the IMF must therefore at all times be in a position to meet such requests.

^{7/} The liquidity ratio is a measure of the IMF's liquidity position, represented by the ratio of its net uncommitted usable resources to its liquid liabilities. While this ratio is neither a fixed nor a minimum ratio, historically it has not fallen below 25-30 percent of liquid liabilities for any length of time, thereby ensuring the IMF's capacity to meet members' requests.

General Department
Schedule of Repurchases and Repayments of Loans
as at July 31, 1999

(In thousands of SDRs)

Financial Year Ending April 30	General Resources Account 1/	Special Disbursement Account

SDR Department

Notes to the Financial Statements as at July 31, 1999

SDR Department

All transactions and operations involving SDRs are conducted through the SDR Department. At July 31, 1999, all members of the IMF were participants in the SDR Department. SDRs are reserve assets allocated by the IMF to members that are participants in the SDR Department in proportion to their quotas in the IMF. Six allocations have been made (in 1970, 1971, 1972, 1979, 1980, and 1981) for a total of SDR 21.4 billion. A proposed amendment of the IMF's Articles of Agreement has been approved to allow for a special one-time allocation of SDRs equal to 21.4 billion. The amendment will enter into force after three-fifths of the members, having 85 percent of the total voting power, have accepted it. Upon termination of participation or liquidation of the SDR Department, the IMF will provide to holders the currencies received from the participants in settlement of their obligations. The IMF is empowered to prescribe official entities as holders of SDRs; at July 31, 1999, 15 institutions have been prescribed as holders. These prescribed holders do not receive allocations.

Uses of SDRs

Participants and prescribed holders can use and receive SDRs in transactions and operations by agreement among themselves. Participants can also use SDRs in operations and transactions involving the General Resources Account, such as the payment of charges and repurchases. The IMF ensures, by designating participants to provide freely usable currency in exchange for SDRs, that a participant can use its SDRs to obtain an equivalent amount of currency if it has a need because of its balance of payments or its reserve position or developments in its reserves.

1. Unit of Account

The accounts are expressed in terms of the SDR. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of a basket of currencies of five members. The IMF reviews the SDR valuation basket every five years. The currencies in the basket and their amounts are as follows:

SDR Department

Notes to the Financial Statements as at July 31, 1999

Currency	Amounts
Euro (Germany)	0.228
Euro (France)	0.1239
Japanese yen	27.2
Pound sterling	0.105
U.S. dollar	0.5821

2. Interest, Charges, and Assessment

Interest is paid on holdings of SDRs. Charges are levied on each participant's net cumulative allocation plus any negative balance of the participant or unpaid charges. Interest on SDR holdings is paid, and charges on net cumulative allocations are collected quarterly. Interest and charges are levied at the same rate and are settled by crediting and debiting individual holdings accounts on the first day of the subsequent quarter. The SDR Department is required to pay interest to each holder, whether or not sufficient SDRs are received to meet the payment of interest. If sufficient SDRs are not received, because charges are overdue, additional SDRs are temporarily created.

At July 31, 1999, charges amounting to SDR 95.2 million were overdue to the SDR Department. At July 31, 1999, six members were six months or more overdue in meeting their financial obligations to the IMF, and five of these members were six months or more overdue to the SDR Department. In addition, the Federal Republic of Yugoslavia (Serbia/Montenegro) was also six months or more overdue in meeting its financial obligations. While the Federal Republic of Yugoslavia (Serbia/Montenegro) agreed to its share in the assets and liabilities of the former Socialist Federal Republic of Yugoslavia in the IMF, it has not succeeded to membership in the IMF as of July 31, 1999, and, consequently, it is not a participant in the SDR Department.

Charges due from members and the Federal Republic of Yugoslavia (Serbia/Montenegro) that are six months or more overdue to the SDR Department were as follows:

In millions of SDRs

Total	95.2
Overdue for six months or more	88.8
Overdue for three years or more	55.7

SDR Department

Notes to the Financial Statements as at July 31, 1999

The amount and duration of arrears were as follows:

	Total	Longest Overdue Obligation
<i>In millions of SDRs</i>		
Afghanistan, Islamic State of	4.0	February 1996
Congo, Democratic Republic of	8.9	November 1996
Iraq	38.0	November 1990
Liberia	18.2	August 1988
Somalia	7.1	February 1991
Yugoslavia, Federal Republic of (Serbia/Montenegro)	<u>19.0</u>	November 1992
Total	<u>95.2</u>	

The rate of interest on the SDR is determined by reference to a combined market interest rate, which is a weighted average of yields or rates on short-term instruments in the capital markets of France, Germany, Japan, the United Kingdom, and the United States. The combined market interest rate used to determine the SDR interest rate is calculated each Friday, using the yields or rates of that day. The SDR interest rate, which is set equal to the combined market interest rate, enters into effect on the following Monday and applies through the following Sunday.

The expenses of conducting the business of the SDR Department are paid by the IMF from the General Resources Account, which is reimbursed in SDRs by the SDR Department at the end of each financial year. For this purpose, the SDR Department levies an assessment on all participants in proportion to their net cumulative allocation.

Enhanced Structural Adjustment Facility Trust

Notes to the Financial Statements

as at July 31, 1999

Purpose

The Enhanced Structural Adjustment Facility Trust ("the Trust"), for which the IMF is Trustee, was established in December 1987 and was extended and enlarged in February 1994 to provide loans on concessional terms to qualifying low-income developing country members. The resources of the Trust are separate from the assets of all other accounts of, or administered by, the IMF and may not be used to discharge liabilities or to meet losses incurred in the administration of other accounts.

The operations of the Trust are conducted through a Loan Account, a Reserve Account, and a Subsidy Account.

Loan Account

The resources of the Loan Account consist of the proceeds from borrowing, repayments of principal, and interest payments on loans extended by the Trust. Resources of the Loan Account are committed to qualifying members for a three-year period, upon approval by the Trustee, in support of the member's macroeconomic and structural adjustment programs. Interest on the outstanding loan balances is currently set at the rate of $\frac{1}{2}$ of 1 percent a year. At July 31, 1999, loans totaling SDR 5,777.3 million were outstanding. Members' outstanding loans are presented

Reserve Account

The Reserve Account consists of amounts transferred by the IMF from the Special Disbursement Account and net earnings from investment of resources held in the Reserve Account and in the Loan Account.

The Resources held in the Reserve Account are to be used by the Trustee, in the event that amounts payable from borrowers' principal repayments and interest together with the authorized interest subsidy are insufficient to repay loan principal and interest on borrowing of the Loan Account.

Subsidy Account

The resources held in the Subsidy Account consist of donations to the Trust, including transfers of net earnings from ESAF Administered Accounts, SDR 400 million transferred by the IMF from the Special Disbursement Account, net earnings on loans made to the Trust for the Subsidy Account, and the net earnings from investment of Subsidy Account resources.

Enhanced Structural Adjustment Facility Trust

Notes to the Financial Statements

as at July 31, 1999

The resources available in the Subsidy Account are drawn by the Trustee to pay the difference, with respect to each interest period, between the interest due from the borrowers under the Trust and the interest due on Loan Account loans.

1. Accounting Practices

The accounts are expressed in terms of the SDR. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of a basket of currencies of five members. The IMF reviews the SDR valuation basket every five years. The currencies in the basket and their amounts are as follows:

Currency	Amounts
Euro (Germany)	0.228
Euro (France)	0.1239
Japanese yen	27.2
Pound Sterling	0.105
U. S. dollar	0.5821

Members are not obligated to maintain the SDR value of their currencies held in the accounts of the Trust.

The accounts of the Trust are maintained on the accrual basis; accordingly, income is recognized as it is earned, and expenses are recorded as they are incurred.

2. Investments

The resources of the Trust are invested pending their use. Investments are denominated in SDRs or in currency and are carried at cost, which does not exceed net realizable value. Pending their investment, resources may be temporarily held in currency, which also may give rise to valuation gains and losses.

Enhanced Structural Adjustment Facility Trust

Notes to the Financial Statements

as at July 31, 1999

3. Contributions

The Trustee accepts contributions for the Subsidy Account on such terms and conditions as agreed between the Trust and the contributor. At July 31, 1999, cumulative contributions received, including transfers from the Special Disbursement Account, amounted to SDR 2,108.5 million. Cumulative contributions are listed in Schedule 2.

4. Borrowing

The Trust borrows for the Loan Account and for the Subsidy Account on such terms and conditions as agreed between the Trust and the lenders.

Schedules 3 and 4, respectively, present lenders' borrowing agreements and scheduled repayments of outstanding borrowing. The following summarizes the borrowing agreements concluded as of July 31, 1999:

	Amount Agreed	Amount Undrawn
<i>In thousands of SDRs</i>		
Loan Account	9,698,051	2,791,580
Subsidy Account	243,481	5,998

The Trustee has agreed to hold and invest, on behalf of a lender, principal repayments of Trust borrowing in a suspense account within the Loan Account. Principal repayments will be accumulated until the final maturity of the borrowing, when the full proceeds are to be transferred to the lender. Amounts deposited in this account are invested by the Trustee, and payments of interest to the lender are to be made exclusively from the earnings on the amounts invested.

5. Commitments Under Loan Arrangements

At July 31, 1999, undrawn balances under 35 loan arrangements amounted to SDR 2,173.0 million. Loan arrangements are listed in Schedule 5. Scheduled repayments of outstanding loans receivable are shown in Schedule 6.

Enhanced Structural Adjustment Facility Trust

Notes to the Financial Statements

as at July 31, 1999

6. Transfers Through the Special Disbursement Account

The expenses of conducting the business of the Trust are paid by the General Resources Account of the IMF and reimbursed through the Special Disbursement Account; corresponding transfers are made from the Reserve Account to the Special Disbursement Account when and to the extent needed. For financial year 2000, the Executive Board decided to forgo such reimbursement and to transfer an equivalent amount from the Reserve Account, through the Special Disbursement Account, to the ESAF-HIPC Trust. The amounts transferred for financial year 2000 were, SDR 12.0 million.

Resources of up to SDR 250 million may be transferred, as needed, from the Reserve Account through the Special Disbursement Account to the ESAF-HIPC Trust to be used to provide grant or loans to eligible members under the HIPC initiative. At July 31, 1999, SDR 20.3 million had been transferred for this purpose.

Schedule of Borrowing Agreements as at July 31, 1999

(*In thousands of SDRs*)

Member	Interest Rate (in percent)	Amount of Agreement	Amount Drawn	Outstanding Balance
Subsidy Account				
Malaysia (1994 loans)	2.00	40,000	40,000	40,000
Malaysia (1988 and 1989 loans)	0.50	40,000	40,000	10,000
Malta	0.50	2,730	2,730	2,730
Pakistan	0.50	10,000	4,002	4,002
Singapore	2.00	80,000	80,000	70,000
Thailand	2.00	7/ 60,000	60,000	--
Tunisia	0.50	3,551	3,551	3,551
Uruguay	Variable	8/ 7,200	7,200	7,200
Total--Subsidy Account		243,481	237,483	137,483

1/ The loans under this agreement are made at market-related rates of interest fixed at the time the loan was disbursed.

2/ The agreement with France made before the enlargement of ESAF (SDR 800 million) provides that the interest rate shall be 0.5 percent on the first SDR 700 million drawn, and for variable, market-related rates of interest thereafter. The agreement with France made for the enlargement of the ESAF (SDR 750 million) provides that the interest rate shall be 0.5 percent until the cumulative implicit interest subsidy reaches SDR 250 million, and at variable, market-related rates of interest thereafter.

3/ The loans under these agreements are made at variable, market-related rates of interest.

4/ The agreement expired with an undrawn balance of SDR 3.6 million.

5/ The agreement with the OPEC Fund for International Development is for an amount of \$50 million.

6/ This amount represents principal repayments held and invested on behalf of a lender.

7/ In accordance with the agreement with Thailand, outstanding borrowings were repaid at the the request of Thailand on January 30, 1998.

8/ The interest rate payable on the borrowing from Uruguay is equal to the rate on SDR-denominated deposits less 2.6 percent a year.

Enhanced Structural Adjustment Facility Trust

Schedule of Repayments of Borrowing as at July 31, 1999

(In thousands of SDRs)

Periods of Repayment, Financial Year Ending April 30 1/	Loan Account 1/	Subsidy Account
2000	257,132	20,000
2001	466,532	10,000
2002	494,968	10,000
2003	524,090	1,365

Enhanced Structural Adjustment Facility Trust Administered Accounts

Notes to the Financial Statements

as at July 31, 1999

Purpose

At the request of certain member countries, the IMF established administered accounts for the benefit of the Subsidy Account of the Enhanced Structural Adjustment Facility Trust (the ESAF Trust). The administered accounts comprise deposits made by contributors. The difference between interest earned by the administered accounts and the interest payable on deposits is transferred to the Subsidy Account of the ESAF Trust.

The Saudi Fund for Development (SFD) Special Account was established at the request of the SFD to provide supplementary finance in association with loans under the Enhanced Structural Adjustment Facility (ESAF). The IMF acts as agent of the SFD. Disbursements from the SFD Special Account are made simultaneously with ESAF disbursements. Payments of interest and principal due to the SFD under associated loans are to be transferred to the SFD.

The resources of each administered account are separate from the assets of all other accounts of, or administered by, the IMF and may not be used to discharge liabilities or to meet losses incurred in the administration of other accounts.

1. Accounting Practices

The accounts are expressed in terms of the SDR. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of a basket of currencies of five members. The IMF reviews the SDR valuation basket every five years. The currencies in the basket and their amounts are as follows:

Currency	Amounts
Euro (Germany)	0.228
Euro (France)	0.1239
Japanese yen	27.2
Pound sterling	0.105
U.S. dollar	0.5821

The administered accounts are maintained on the accrual basis; accordingly, income is recognized as it is earned, and expenses are recorded as they are incurred.

Enhanced Structural Adjustment Facility Trust Administered Accounts

Notes to the Financial Statements

as at July 31, 1999

2. Investments

The resources of each administered account are invested in SDR-denominated deposits and valued at cost, which approximates market value.

3. Deposits

The Administered Account Austria was established on December 27, 1988 for the administration of resources deposited in the account by the Austrian National Bank. Two deposits (one of SDR 60.0 million made on December 30, 1988, and one of SDR 50.0 million made on August 10, 1995) are to be repaid in ten equal semiannual installments beginning five and a half years after the date of each deposit and ending at the end of the tenth year after the date of each deposit. The deposits bear interest at a rate of $\frac{1}{2}$ of 1 percent a year. The first deposit from Austria had been repaid in full as of July 31, 1999.

The Administered Account Belgium was established on July 27, 1988 for the administration of resources deposited in the account by the National Bank of Belgium. Four deposits (SDR 30.0 million made on July 29, 1988; SDR 35.0 million made on December 30, 1988; SDR 35.0 million made on June 30, 1989; and SDR 80.0 million made on April 29, 1994) have an initial maturity of six months and are renewable by the IMF, on the same basis. The final maturity of each deposit, including renewals, will be ten years from the initial date of the individual deposits. The deposits bear interest at a rate of $\frac{1}{2}$ of 1 percent a year. In accordance with an addendum to the account, effective on July 24, 1998, the maturities of the first three deposits will be extended by the National Bank of Belgium, for further periods of six months, provided that the total maturity period of each deposit does not exceed five years. The deposits shall be invested by the IMF, and the IMF shall pay the National Bank of Belgium interest on each deposit at an annual rate of $\frac{1}{2}$ of 1 percent. The difference between the interest paid to the National Bank of Belgium and the interest earned on the deposits (net of any cost to the IMF) shall be retained in the account and invested, pending further disposition by the National Bank of Belgium.

The Administered Account Botswana was established on July 1, 1994 for the administration of resources deposited in the account by the Bank of Botswana. The deposit, totaling SDR 6.9 million, is to be repaid in one installment ten years after the date of deposit. The deposit bears interest at a rate of 2 percent a year.

The Administered Account Chile was established on October 4, 1994 for the administration of resources deposited in the account by the Banco Central de Chile. The deposit,

Enhanced Structural Adjustment Facility Trust Administered Accounts

Notes to the Financial Statements

as at July 31, 1999

totaling SDR 15.0 million, is to be repaid in one installment ten years after the date of deposit. The deposit bears interest at a rate of $\frac{1}{2}$ of 1 percent a year.

The Administered Account Greece was established on November 30, 1988 for the administration of resources deposited in the account by the Bank of Greece. Two deposits of SDR 35.0 million each (December 15, 1988 and April 29, 1994), are to be repaid in ten equal semiannual installments beginning five and a half years after the date of deposit and will be completed at the end of the tenth year after the date of the deposits. The deposits bear interest at a rate of $\frac{1}{2}$ of 1 percent a year. The first deposit from Greece had been repaid in full as of July 31, 1999.

The Administered Account Indonesia was established on June 30, 1994 for the administration of resources deposited in the account by the Bank Indonesia. The deposit, totaling SDR 25.0 million, is to be repaid in one installment ten years after the date the deposit was made. The interest payable on the deposit is equivalent to that obtained for the investment of the deposit less 2 percent a year.

The Administered Account Islamic Republic of Iran was established on June 6, 1994 for the administration of resources deposited in the account by the Central Bank of the Islamic Republic of Iran (CBIRI). The CBIRI has made five annual deposits, each of SDR 1.0 million. All of the deposits will be repaid at the end of ten years after the date of the first deposit. Each deposit bears interest at a rate of $\frac{1}{2}$ of 1 percent a year.

The Administered Account Portugal was established on May 16, 1994 for the administration of resources deposited in the account by the Banco de Portugal (BdP). The BdP has agreed to make six annual deposits, each of SDR 2.2 million. Each deposit is to be repaid in five equal annual installments beginning six years after the date of the deposit and will be completed at the end of the tenth year after the date of the deposit. Each deposit bears interest at a rate of $\frac{1}{2}$ of 1 percent a year.

4. Associated Loans

The SFD has provided resources to support arrangements under the ESAF through loans in association with loans under the ESAF. Funds become available under an associated loan after a bilateral agreement between the SFD and the recipient country has been effected. Amounts denominated in SDRs, for disbursement to a recipient country under an associated loan, are placed by the SFD in the Special Account for disbursement by the IMF simultaneously with disbursements under an ESAF arrangement. These loans are repayable in ten equal semiannual installments commencing not later than the end of the first six months of the sixth year, and are to be completed at the end of the tenth year after the date of disbursement. Interest on the outstanding balance is currently set at a rate of $\frac{1}{2}$ of 1 percent a year.

The accompanying notes are an integral part of the financial statements.

ESAF-HIPC Trust

Notes to the Financial Statements

as at July 31, 1999

Purpose

The Trust for Special ESAF Operations for the Heavily Indebted Poor Countries and for Interim ESAF Subsidy Operations ("the ESAF-HIPC Trust"), for which the IMF is Trustee, was established on February 4, 1997 to provide balance of payments assistance to low-income developing members by making grants and loans to eligible members for the purpose of reducing their external debt burden and for interim ESAF subsidy purposes. The resources of the ESAF-HIPC Trust are separate from the assets of all other accounts of, or administered by, the IMF and may not be used to discharge liabilities or to meet losses incurred in the administration of other accounts.

The operations of the ESAF-HIPC Trust are conducted through the ESAF-HIPC Trust Account and the Umbrella Account for HIPC Operations.

ESAF-HIPC Trust Account

The resources of the ESAF-HIPC Trust Account consist of grant contributions, deposits, loans, and other types of investments made by contributors; amounts transferred by the IMF from the Special Disbursement Account and the General Resources Account; and net earnings from investment of resources held in the ESAF-HIPC Trust Account.

The resources held in the ESAF-HIPC Trust Account are to be used by the Trustee to make grants or loans to eligible members that qualify for assistance under the HIPC Initiative and for subsidizing the interest rate on interim ESAF operations to ESAF-eligible members.

Umbrella Account for HIPC Operations

The Umbrella Account for HIPC Operations ("the Umbrella Account") receives and administers the proceeds of grants or loans made to eligible members that qualify for assistance under the terms of the ESAF-HIPC Trust. Within the Umbrella Account, resources received are administered through the establishment of subaccounts for each eligible member upon the approval of a disbursement under the ESAF-HIPC Trust.

The resources of a subaccount of the Umbrella Account consist of (i) amounts disbursed from the ESAF-HIPC Trust Account as grants or loans for the benefit of a member, and (ii) net earnings from investment of the resources held in the subaccount.

ESAF-HIPC Trust

Notes to the Financial Statements

as at July 31, 1999

The resources held in a subaccount of the Umbrella Account are to be used to meet the member's debt obligations to the IMF in accordance with the schedule agreed upon by the Trustee and the member for the use of the proceeds of the ESAF-HIPC disbursements.

1. Accounting Practices

The accounts are expressed in terms of the SDR. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of a basket of currencies of five members. The IMF reviews the SDR valuation basket every five years. The currencies in the basket and their amounts are as follows:

Currency	Amounts
Euro (Germany)	0.228
Euro (France)	0.1239
Japanese yen	27.2
Pound sterling	0.105
U.S. dollar	0.5821

Members are not obligated to maintain the SDR value of their currencies held in the accounts of the ESAF-HIPC Trust.

The accounts of the ESAF-HIPC Trust are maintained on the accrual basis; accordingly, income is recognized as it is earned, and expenses are recorded as they are incurred.

2. Investments

The resources of the ESAF-HIPC Trust are invested pending their use. Investments are denominated in SDRs or in currency and are carried at cost, which does not exceed net realizable value. Pending their investment, resources may be temporarily held in currency, which also may give rise to valuation gains and losses.

ESAF-HIPC Trust

Notes to the Financial Statements

as at July 31, 1999

3. Contributions and Transfers

ESAF-HIPC Trust Account

The Trustee accepts contributions of resources on such terms and conditions as agreed between the ESAF-HIPC Trust and the contributor. At July 31, 1999, six contributions amounting to SDR 53.3 million had been received: SDR 2.3 million from Finland; SDR 1.1 million from Nigeria; SDR 27.2 million and SDR 19.1 million, respectively, from Japan; SDR 3.6 million from the Netherlands; and SDR 20,000 from Belize. The contribution from the Netherlands is earmarked for interim ESAF subsidy operations.

Total transfers from the ESAF Trust Reserve Account through the Special Disbursement Account, and from the General Resources Account amounted to SDR 137.3 million and SDR 13.3 million respectively at July 31, 1999. At July 31, 1999, there was a transfer receivable from the General Resources Account amounting to SDR 16.4 million.

Umbrella Account

The Umbrella Account receives the proceeds of grants or loans disbursed by the ESAF-HIPC Trust on behalf of an eligible member. Four grants amounting to SDR 51.5 million, SDR 21.2 million, SDR 25.6 million and SDR 93.2 million had been received on behalf of Uganda, Bolivia, Guyana and Mozambique respectively, at July 31, 1999.

4. Deposits

ESAF-HIPC Trust Account

The Trustee accepts deposits, loans and other types of investments made by contributors to the ESAF-HIPC Trust on such terms and conditions as agreed between the ESAF-HIPC Trust and the Contributor. At July 31, 1999, six deposits amounting to SDR 42.6 million had been received by the ESAF-HIPC Trust Account. The first deposit of SDR 14.6 million bears interest at a rate of 2 percent a year and is to be repaid in one installment five years after the date of deposit, made on April 30, 1997. Three deposits of SDR 1 million each, which bear interest at a rate of $\frac{1}{2}$ of 1 percent a year and are to be repaid in one installment ten years after the date of the initial deposit, were made on May 30, 1997, May 30, 1998 and May 30, 1999 respectively. The fifth and sixth deposits of SDR 15 million and SDR 10 million, respectively, bear interest at a rate of 2 percent a year and are to be repaid in one installment ten years after the date of the deposit, made on June 29, 1998 and November 20, 1998, respectively.

ESAF-HIPC Trust

Notes to the Financial Statements

as at July 31, 1999

5. Grants and Disbursements

ESAF-HIPC Trust Account

The proceeds of grants or loans made on behalf of an eligible member are paid in a single disbursement to the Umbrella Account for the benefit of that member. Resources needed for interim ESAF subsidy operations will be drawn by the Trustee as needed. At July 31, 1999, four disbursements of SDR 51.5 million, SDR 21.2 million, SDR 25.6 million and SDR 93.2 million had been made to the Umbrella Account for the benefit of Uganda, Bolivia, Guyana and Mozambique respectively.

Umbrella Account

The resources of a subaccount within the Umbrella Account, including any income from investments, shall be used to meet the member's debt-service payments on its existing debt to the IMF as they fall due in accordance with the schedule agreed upon by the Trustee and the member. At July 31, 1999, disbursements of SDR 14.8 million, SDR 8.9 million and SDR 3.1 million had been made from the subaccounts of Uganda, Bolivia and Guyana respectively, in accordance with the agreed schedules.

Administered Accounts Established at the Request of Members

Notes to the Financial Statements

as at July 31, 1999

Purpose

At the request of members, the IMF has established special purpose accounts to administer contributed resources and to perform financial and technical services consistent with the purposes of the IMF. The assets of each account and each subaccount are separate from the assets of all other accounts of, or administered by, the IMF and are not to be used to discharge liabilities or to meet losses incurred in the administration of other accounts.

Administered Account Japan

At the request of Japan, the IMF established an account on March 3, 1989 to administer resources, made available by Japan or other countries with Japan's concurrence, that are to be used to assist certain members with overdue obligations to the IMF. The resources of the account are to be disbursed in amounts specified by Japan and to members designated by Japan. At July 31, 1999, cumulative resources received amounted to \$135.2 million, of which \$72.5 million had been disbursed.

Administered Account for Selected Fund Activities - Japan

At the request of Japan, the IMF established the Administered Technical Assistance Account - Japan on March 19, 1990 to administer resources contributed by Japan to finance technical assistance to member countries. On July 21, 1997 the account was renamed the Administered Account for Selected Fund Activities - Japan and amended to include the administration of resources contributed by Japan in support of the IMF's Regional Office for Asia and the Pacific (OAP). The resources of the account designated for technical assistance activities are used with the approval of Japan and include the provision of scholarships; the resources designated for the OAP are used as agreed between Japan and the IMF for certain activities of the IMF with respect to Asia and the Pacific through the OAP. Disbursements can also be made from the account to the General Resources Account to reimburse the IMF for qualifying technical assistance projects and OAP expenses. At July 31, 1999, cumulative contributions received by the account designated for technical assistance amounted to \$122.3 million, of which \$106.2 million had been disbursed.

Cumulative contributions include \$5.9 million earmarked for scholarships, of which \$5.7 million had been disbursed at July 31, 1999. At July 31, 1999, cumulative contributions designated for the OAP amounted to \$2.8 million, of which \$2.0 million had been disbursed.

Administered Accounts Established at the Request of Members

Notes to the Financial Statements

as at July 31, 1999

Framework Administered Account for Technical Assistance Activities

The Framework Administered Account for Technical Assistance Activities ("the Framework Account") was established by the IMF on April 3, 1995 to receive and administer contributed resources that are to be used to finance technical assistance consistent with the purposes of the IMF. The financing of technical assistance activities is implemented through the establishment and operation of subaccounts within the Framework Account. The establishment of a subaccount requires the approval of the Executive Board.

Resources are to be used in accordance with the written understandings between the contributor and the Managing Director. Disbursements can also be made from the Framework Account to the General Resources Account to reimburse the IMF for its costs incurred on behalf of technical assistance activities financed by resources from the Framework Account. At July 31, 1999, cumulative contributions received by the account amounted to \$12.1 million, of which \$8.4 million had been disbursed.

Subaccount for Japan Advanced Scholarship Program

At the request of Japan, this subaccount was established on June 6, 1995 to finance the cost of studies and training of nationals of member countries in macroeconomics and related subjects at selected universities and institutions. The scholarship program focuses primarily on the training of nationals of Asian member countries, including Japan. At July 31, 1999, cumulative contributions received amounted to \$4.3 million, of which \$2.9 million had been disbursed.

Rwanda-Macroeconomic Management Capacity Subaccount

At the request of Rwanda, this subaccount was established on December 20, 1995 to finance technical assistance to rehabilitate and strengthen Rwanda's macroeconomic management capacity. At July 31, 1999, cumulative contributions received amounted to \$1.5 million, of which \$1.5 million had been disbursed.

Australia-IMF Scholarship Program for Asia Subaccount

At the request of Australia, this subaccount was established on June 5, 1996 to finance the cost of studies and training of government and central bank officials in macroeconomic management so as to enable them to contribute to their countries' achievement of sustainable economic

Administered Accounts Established at the Request of Members

Notes to the Financial Statements

as at July 31, 1999

growth and development. The program focusses primarily on the training of nationals of Asian countries. At July 31, 1999, cumulative contributions received amounted to \$0.8 million, of which \$0.6 million has been disbursed.

Switzerland Technical Assistance Subaccount

At the request of Switzerland, this subaccount was established on August 27, 1996 to finance the costs of technical assistance activities of the IMF that consist of policy advice and training in macroeconomic management. At July 31, 1999, cumulative contributions received amounted to \$4.6 million, of which \$2.9 million had been disbursed.

French Technical Assistance Subaccount

At the request of France, this subaccount was established on September 30, 1996 to cofinance the costs of training in economic fields for nationals of certain member countries. At July 31, 1999, cumulative contributions received amounted to \$0.39 million, of which \$0.26 million had been disbursed.

Denmark Technical Assistance Subaccount

At the request of Denmark, this subaccount was established on August 25, 1998 to finance the costs of technical assistance activities of the IMF that consist of advising on policy and administrative reforms in the fiscal, monetary, and related statistical fields. At July 31, 1999, cumulative contributions received amounted to \$0.47 million, of which \$0.25 million had been disbursed.

Administered Account for Rwanda

At the request of the Netherlands, Sweden, and the United States ("the donor countries"), the IMF established an account on October 27, 1995 to administer resources contributed by the donor countries to provide grants to Rwanda. These grants are to be used for reimbursing the service charge and reducing, to the equivalent of a rate of $\frac{1}{2}$ of 1 percent a year, the rate of the quarterly charges payable by Rwanda on its use of the IMF's financial resources under the Compensatory and Contingency Financing Facility (CCFF). At July 31, 1999, cumulative contributions received by the account amounted to SDR 1.54 million, of which SDR 1.25 million had been disbursed.

Administered Accounts Established at the Request of Members

Notes to the Financial Statements

as at July 31, 1999

1. Accounting Practices

The accounts are maintained on the accrual basis; accordingly, income is recognized as it is earned, and expenses are recorded as they are incurred.

Administered Account Japan, Administered Account for Selected Fund Activities - Japan, and Framework Administered Account for Technical Assistance Activities

The accounts are expressed in U.S. dollars. All transactions and operations of these accounts, including the transfers to and from the accounts, are denominated in U.S. dollars, except for transactions and operations in respect of the OAP, which are denominated in Japanese yen, or in other currencies as agreed between Japan and the IMF. Contributions denominated in other currencies are converted into U.S. dollars upon receipt of the funds.

Administered Account for Rwanda

The accounts are expressed in terms of the SDR. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of a basket of currencies of five members. The IMF reviews the SDR valuation basket every five years. The currencies in the basket and their amounts are as follows:

Currency	Amounts
Euro (Germany)	0.228
Euro (France)	0.1239
Japanese yen	27.2
Pound sterling	0.105
U.S. dollar	0.5821

Transfers to and disbursements from the accounts are made in U.S. dollars or in other freely usable currencies. Transactions and operations of the accounts shall be denominated in SDRs. Contributions denominated in other currencies are converted into SDRs upon receipt of the funds.

Administered Accounts Established at the Request of Members

Notes to the Financial Statements

as at July 31, 1999

2. Investments

The assets of the accounts are invested pending their disbursement and are valued at cost, which approximates market value. Interest received on these assets varies and is market related.

3. Accounts Termination

Administered Account Japan

The account can be terminated by the IMF or by Japan. Any remaining resources in the account at termination are to be returned promptly to Japan.

Administered Account for Selected Fund Activities - Japan

The account can be terminated by the IMF or by Japan. Any resources that may remain in the account at termination, net of accrued liabilities under technical assistance projects or in respect of the OAP, are to be returned promptly to Japan.

Framework Administered Account for Technical Assistance Activities

The Framework Account or any subaccount thereof may be terminated by the IMF at any time. The termination of the Framework Account shall terminate each subaccount thereof. A subaccount may also be terminated by the contributor of the resources to the subaccount. Termination shall be effective on the date that the IMF or the contributor, as the case may be, receives notice of termination. Any balances, net of the continuing liabilities and commitments under the activities financed, that may remain in a subaccount upon its termination are to be returned promptly to the contributor.

Administered Account for Rwanda

The account can be terminated at any time by the IMF or by unanimous agreement of the donor countries. The account shall, in any case, be terminated by the IMF when Rwanda's financial obligations to the IMF under the CCFF have been fully discharged or when the resources of the account have been exhausted, whichever is earlier. Any balance in the account at termination shall be transferred promptly to the donor countries, in proportion to their contribution, or to Rwanda, if so instructed.

Balance, July 31, 1999	89,270

The accompanying notes are an integral part of the financial statements.

Trust Fund

Notes to the Financial Statements

as at July 31, 1999

Purpose

The Trust Fund, for which the IMF is Trustee, was established in 1976 to provide balance of payments assistance on concessional terms to eligible members that qualify for assistance.

In 1980, the IMF, as Trustee, decided that, upon the completion of the final loan disbursements, the Trust Fund would be terminated as of April 30, 1981, and after that date, the activities of the Trust Fund have been confined to the conclusion of its affairs. The resources of the Trust Fund are separate from the assets of all other accounts of, or administered by, the IMF and cannot be used to discharge liabilities or to meet losses incurred in the administration of other IMF accounts.

1. Accounting Practices

The accounts are expressed in terms of the SDR. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of a basket of currencies of five members. The IMF reviews the SDR valuation basket every five years. The currencies in the basket and their amounts are as follows:

Currency	Amounts
Euro (Germany)	0.228
Euro (France)	0.1239
Japanese yen	27.2
Pound sterling	0.105
U.S. dollar	0.5821

The accounts are maintained on the accrual basis; accordingly, income is recognized as it is earned, and expenses are recorded as they are incurred, except that interest income from members that are overdue in settling their obligations to the Trust Fund by six months or more is deferred and is recognized as income only when paid, unless the member has remained current in settling charges when due (see Note 3). Following the termination of the Trust Fund as of April 30, 1981, residual administrative costs have been absorbed by the General Resources Account of the IMF.

Trust Fund

Notes to the Financial Statements

as at July 31, 1999

2. Loans

Loans were made from the Trust Fund to those eligible members that qualified for assistance in accordance with the provisions of the Trust Fund instrument. The final Trust Fund loan installment was due on March 31, 1991. Interest on the outstanding loan balances is charged at the rate of $\frac{1}{2}$ of 1 percent a year, although special charges have been levied on overdue payments of interest and principal since February 1986. Beginning May 1, 1993, special charges on overdue obligations to the Trust Fund have been suspended for members who are more than six months overdue.

3. Overdue Obligations

At July 31, 1999, three members with obligations to the Trust Fund were six months or more overdue in discharging their obligations to the Trust Fund. The recognition of interest income on the loans outstanding to these members and of special charges due from them is being deferred. At July 31, 1999, total deferred income amounted to SDR 26.5 million. Overdue loan repayments and interest and special charges due from these members were as follows:

	<u>Loans</u>	<u>Interest and Special Charges</u>
<i>In millions of SDRs</i>		
Total overdue	89.3	26.5
Overdue six months or more	89.3	26.3
Overdue three years or more	89.3	25.1

Trust Fund

Notes to the Financial Statements

as at July 31, 1999

The type and duration of the arrears of these members at July 31, 1999 were as follows:

Member	Loans	Interest and Special Charges	Total	Longest Overdue Obligation
<i>In millions of SDRs</i>				
Liberia	23.6	6.9	30.5	January 1985
Somalia	6.5	1.3	7.8	July 1987
Sudan	<u>59.2</u>	<u>18.3</u>	<u>77.5</u>	June 1985
Total	<u>89.3</u>	<u>26.5</u>	<u>115.8</u>	

4. Transfer of Resources

The resources of the Trust Fund held on April 30, 1981 or received thereafter have been used to pay interest and principal when due on loan obligations and to make transfers to the Special Disbursement Account.

Supplementary Financing Facility Subsidy Account

Notes to the Financial Statements

as at July 31, 1999

Purpose

The Supplementary Financing Facility Subsidy Account ("the Subsidy Account"), which is administered by the IMF, was established in December 1980 to assist low-income developing country members to meet the cost of using resources made available through the IMF's Supplementary Financing Facility and under the policy on exceptional use. All repurchases due under these policies were scheduled for completion by January 31, 1991, and the final subsidy payments were approved in July 1991. However, two members (Liberia and Sudan), overdue in the payment of charges, remain ineligible to receive previously approved subsidy payments until their overdue charges are settled. Accordingly, the account remains in operation and has retained amounts for payment to these members after the overdue charges are paid.

The resources of the Subsidy Account are separate from the assets of all other accounts of, or administered by, the IMF and cannot be used to discharge liabilities or to meet losses incurred in the administration of other IMF accounts.

1. Accounting Practices

The accounts are expressed in terms of the SDR. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of a basket of currencies of five members. The IMF reviews the SDR valuation basket every five years. The currencies in the basket and their amounts are as follows:

Currency	Amounts
Euro (Germany)	0.228
Euro (France)	0.1239
Japanese yen	27.2
Pound sterling	0.105
U.S. dollar	0.5821

Supplementary Financing Facility Subsidy Account

Notes to the Financial Statements

as at July 31, 1999

The accounts are maintained on the accrual basis; accordingly, income is recognized as it is earned, and expenses are recorded as they are incurred.

2. Deposits

The assets of the Subsidy Account, pending their disbursement, are held in the form of interest-earning time deposits denominated in SDRs.

3. Transfer of Resources

Resources in excess of the remaining subsidy payments are to be transferred to the Special Disbursement Account. At July 31, 1999, subsidy payments totaling SDR 2.2 million had not been made to Liberia and Sudan and were being held pending the payment of overdue charges by these members.

Retired Staff Benefits Investment Account

Notes to the Financial Statements

as at July 31, 1999

Purpose

The Retired Staff Benefits Investment Account ("the RSBIA") was established to hold, administer, and invest resources contributed by the IMF for meeting postretirement medical and life insurance benefits to eligible retirees of the IMF and other beneficiaries. The RSBIA accumulates resources to finance benefits to current and future retirees.

The assets of the RSBIA consist of the IMF's contributions and the income earned thereon. Assets are within the sole ownership of the IMF and are to be used to meet the claims of retirees and the administrative costs of the RSBIA. Contributions are made periodically from the General Resources Account to the RSBIA, taking into consideration the actuarial valuation of the IMF's cumulative cost of these benefits. Cumulative contributions received by the RSBIA amounted to \$152 million at July 31, 1999.

The portion of the cumulative past-service cost that has been charged to income in the General Resources Account is fully funded.

The assets of the RSBIA are kept separate from the assets of all other accounts of, or administered by, the Fund and are not to be used to discharge liabilities or to meet losses incurred in the administration of other accounts.

1. Accounting Practices

The RSBIA is expressed in U.S. dollars. All transactions and operations of the RSBIA, including the transfers to and by the RSBIA, are denominated in U.S. dollars. The cost of transactions in other currencies—for example, the payment of future benefits—will be paid by the RSBIA.

The RSBIA is maintained on the accrual basis; accordingly, income is recognized as it is earned, and expenses are recorded as they are incurred.

2. Investments

Resources placed to the RSBIA have been invested by the IMF. In accordance with its investment policy, the RSBIA invests in equity securities, debt securities, short-term investments, and real estate. Investments in securities listed on stock exchanges are valued at the last reported market sales price on the last business day of the accounting period. Over-the-counter securities are valued at their bid price on the last business day of the accounting period. The valuation of purchases and sales is made on the trade date basis.

Retired Staff Benefits Investment Account

Notes to the Financial Statements

as at July 31, 1999

The net gain in the current value of investments represents the gains and losses realized during the year from the sale of investments, the unrealized appreciation and depreciation of the market value of investments, and, for investments denominated in currencies other than the U.S. dollar, valuation differences arising from exchange rate changes of other currencies against the dollar market value.

A summary of the RSBIA's investments at market values is as follows:

In millions of U.S. dollars

Equity securities	104.6
Debt securities	47.3
Real estate	25.1
Short-term investments	<u>24.5</u>
	<u>201.5</u>

In addition to these investments, the RSBIA held commitments in fixed-income futures contracts to minimize interest rate risk. At July 31, 1999, the notional value of these derivatives amounted to \$1.3 million and the unrealized gain was less than \$0.1 million.

3. Actuarial Valuation

Eligible retirees can elect to continue their life insurance coverage and medical coverage. The cost of these benefits is actuarially determined, based on the data in effect at the beginning of the year. The IMF's actuarially determined cost is estimated at \$198 million at April 30, 1999. Each year the IMF amortizes a portion of the past-service cost and recognizes the increase in the liability during the year as an expense in the General Resources Account. These amounts, less the return on investments, are transferred to the RSBIA to be held and invested pending their use by the IMF.

It is expected that the RSBIA will be a net recipient of resources until the unfunded cost is fully amortized and its assets meet the cost of benefits to retirees.

4. Account Termination

The RSBIA can be terminated by the IMF at any time. After meeting any existing obligations, the resources remaining in the RSBIA are to be transferred to the General Resources Account of the IMF.
