Independent Auditors' Report

**To the Board of Governors
of the International Monetary Fund
Washington, DC**

We have audited the accompanying balance sheet of the General Department of the International Monetary Fund (the "Department") as of April 30, 2005, and the related statements of income, changes in reserves and resources, and cash flows for the year then ended. These financial statements are the responsibility of the Department's management. Our responsibility is to express an opinion on these financial statements based on our audit. The Department's financial statements as of and for the year ended April 30, 2004, were audited by other auditors, whose report dated June 14, 2005, expressed an unqualified opinion on those statements and included an explanatory paragraph that described the adoption of International Accounting Standard No. 32 (Revised), *Financial Instruments: Disclosure and Presentation*, and International Accounting Standard No. 39 (Revised), *Financial Instruments: Recognition and Measurement*, as discussed in Note 2 to the financial statements.

We conducted our audit in accordance with International Standards on Auditing and auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Department's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such 2005 financial statements present fairly, in all material respects, the financial position of the General Department of the International Monetary Fund at April 30, 2005, and the results of its operations and its cash flows for the year then ended in conformity with International Financial Reporting Standards.

As discussed in Note 2 to the financial statements, during financial year 2005, the Department adopted International Accounting Standard No. 32 (Revised), *Financial Instruments: Disclosure and Presentation*, and International Accounting Standard No. 39 (Revised), *Financial Instruments: Recognition and Measurement*, and applied the revisions retrospectively from May 1, 2003.

Our audit was conducted for the purpose of forming an opinion on the basic 2005 financial statements taken as a whole. The supplemental schedules listed on pages 161 to 166 are presented for the purpose of additional analysis and are not a required part of the basic financial statements. These schedules are the responsibility of the Department's management. Such 2005 schedules have been subjected to the auditing procedures applied in our audit of the basic financial statements and, in our opinion, are fairly stated in all material respects when considered in relation to the basic financial statements taken as a whole. The 2004 schedules were subjected to auditing procedures by other auditors, whose report dated June 14, 2005, referred to above, stated that such information is fairly stated in all material respects when considered in relation to the basic 2004 financial statements taken as a whole.

General Department

Notes to the financial statements as at April 30, 2005, and 2004

1. Purpose and organization

The International Monetary Fund ("IMF") is an international organization of 184 member countries. It was established to promote international monetary cooperation and exchange stability and to maintain orderly exchange arrangements among members; to facilitate the expansion and balanced growth of international trade, and contribute thereby to the promotion and maintenance of high levels of employment; and to provide temporary financial assistance to member countries under adequate safeguards to assist in solving their balance of payments problems in a manner consistent with the provisions of the IMF's Articles of Agreement. The IMF conducts its operations and transactions through the General Department and the Special Drawing Rights Department (the SDR Department). The General Department consists of the General Resources Account (GRA), the Special Disbursement Account (SDA), and the Investment Account. The Investment Account has not been activated. The IMF also administers trusts and accounts established to perform financial and technical services and financial operations consistent with the purposes of the IMF. The resources of these trusts and accounts are contributed by members or the IMF through the SDA. The financial statements of the SDR Department and these trusts and accounts are presented separately.

General Resources Account

The GRA holds the general resources of the IMF. Its resources reflect the payment of quota subscriptions, use and repayment of IMF credit, collection of charges on the use of credit, payment of remuneration on creditor positions, borrowings, and payment of interest and repayment of borrowings.

Special Disbursement Account

The assets and resources of the SDA are held separately from the GRA and Investment Account of the General Department. The SDA is the vehicle for receiving and investing profits from the sale of the IMF's gold and for making transfers to other accounts (outside the General Department) for special purposes authorized in the Articles, in particular for financial assistance to low-income members of the IMF. Resources of the SDA include transfers received from the Trust Fund (in liquidation), a trust administered by the IMF as trustee, and part of the proceeds from the sales of the IMF's gold in the past. Income from the investment of gold profits in the SDA is to be transferred, as needed, to the Poverty Reduction and Growth Facility-Heavily Indebted Poor Countries Trust (PRGF-HIPC Trust), in accordance with decisions of the IMF. The SDA also has outstanding loans extended under the Structural Adjustment Facility (SAF), which was established in March 1986 to provide balance of payments assistance on concessional terms to qualifying low-income developing country members.

Assets that exceed the financing needs of the SDA, excluding investments arising from the sales of gold undertaken pursuant to the 1999 decision on gold sales by the IMF, are transferred to the Reserve Account of the Poverty Reduction and Growth Facility Trust (PRGF Trust), which is administered separately by the IMF as trustee.

2. Summary of significant accounting policies

Basis of accounting

The financial statements of the General Department are prepared in accordance with International Financial Reporting Standards (IFRS). Specific accounting principles and disclosure practices are explained further below.

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Unit of account

The financial statements are expressed in terms of SDRs. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of the currencies in the SDR valuation basket. The IMF reviews the SDR valuation basket every five years. The latest review was completed in October 2000, and the new composition of the SDR valuation basket became effective on January 1, 2001. The currencies in the basket as of April 30, 2005, and 2004 and their amounts were as follows:

Currency	Amount
Euro	0.4260
Japanese yen	21.0000
Pound sterling	0.0984
U.S. dollar	0.5770

As of April 30, 2005, one SDR was equal to 1.51678 U.S. dollars (one SDR was equal to 1.45183 U.S. dollars as of April 30, 2004).

Currencies

Currencies consist of members' currencies and securities held by the IMF. Each member has the option of substituting non-negotiable and non-interest-bearing securities for the IMF's holdings of its currency that exceed ¼ of 1 percent of the member's quota. These securities are encashable by the IMF on demand.

Each member is required to pay to the IMF its initial quota and subsequent quota increases partly in its own currency, with the remainder to be paid in usable currencies prescribed by the IMF, or SDRs. One exception was the quota increase of 1978, which was paid entirely in members' own currencies.

Usable currencies consist of currencies of member countries considered by the IMF to have strong balance of payments and reserve positions. These currencies are included in the IMF's financial transactions plan to finance purchases and other transfers of the IMF. Participation in the financial transactions plan is reviewed on a quarterly basis. Usable currencies and SDR holdings are cash equivalents. The changes in non-usable currencies (credit outstanding and other currencies) result from the IMF's transactions (purchases and repurchases) where a member's currency is exchanged for

another member's currency, or from the inclusion/exclusion of a member's currency in the IMF's financial transaction plan.

Currencies, including securities, are valued in terms of the SDR on the basis of the currency/SDR exchange rate determined for each currency. Securities can be substituted by members for currencies at their option. These securities are not marketable, but can be converted into currencies on demand. Each member is obligated to maintain, in terms of the SDR, the value of the balances of its currency, including its securities, held by the IMF in the GRA. This requirement is referred to as the maintenance-of-value obligation. The currency balances in the balance sheets include these receivables and payables. All currencies are revalued periodically in terms of the SDR, including at each financial year end. Whenever the IMF revalues its holdings of a member's currency, a receivable or a payable is established for the amount required to maintain the SDR value of the IMF's holdings of that currency.

Credit outstanding

The IMF provides balance of payments assistance in accordance with established policies by selling to members, in exchange for their own currencies, SDRs or currencies of other members. When members make purchases, they incur obligations to repurchase the IMF's holdings of their currencies arising from the purchases within specified periods by payments in SDRs or other currencies, as determined by the IMF. IMF credit is subject to specific repayment schedules over periods that vary depending on the type of facility used. Members are entitled to repurchase, at any time, the IMF's holdings of their currencies on which charges are levied and are expected to make repurchases as and when their balance of payments and reserve position improve.

The repurchase policies of the IMF are intended to ensure the revolving character of its resources. Programs supported by the IMF, other than the Supplemental Reserve Facility (SRF), are guided by the requirement that members should be able to make repurchases in accordance with normal terms of the respective facilities (referred to as the obligation schedule). In keeping with a long-standing principle of the IMF that its resources should be repaid as soon as the balance of payments and reserve position improve, debtors in a position to do so are expected to make repurchases under predetermined expectation schedules. However, if a member's external position is not sufficiently strong, it may request that repurchases on the expectation schedule be extended to the original obligation schedule. The extension period is one year for credit tranche and SRF purchases and three years for Extended Fund Facility (EFF) purchases. A member is considered overdue only after failure to make a payment on the repurchase obligation schedule.

Overdue obligations and the burden-sharing mechanism

It is the policy of the IMF to exclude from current income charges due by members that are six months or more overdue in meeting any financial obligation to the IMF. The IMF fully recovers this lost income from the burden-sharing mechanism, through adjustments, in the current period, to the rates of charge and remuneration. Members that have borne the financial consequences of overdue charges receive refunds to the extent that overdue charges that had given rise to burden-sharing adjustments are subsequently settled.

An impairment loss would be recognized if there is objective evidence of impairment as a result of a past event that occurred after initial recognition, and is determined as the difference between the outstanding credit's carrying value and the present value of the estimated future cash flows. No impairment losses have been recognized.

First Special Contingent Account

In view of the risk resulting from overdue obligations, the IMF accumulates balances in the first Special Contingent Account (SCA-1) by collecting resources under the burden sharing mechanism. Losses arising from overdue principal, if realized, would be charged against the SCA-1. The IMF has not realized any losses on overdue financial obligations. However, the IMF considers it prudent to maintain the SCA-1 as an added protection until all arrears are fully settled. Balances in the SCA-1 are refundable to the members that shared the cost of its financing in proportion to their contributions when there are no outstanding overdue repurchases and charges, or at such earlier time as the IMF may decide.

Gold holdings

The Articles of Agreement limit the use of gold in the IMF's operations and transactions. Any use provided for in the Articles requires a decision adopted by an 85 percent majority of the total voting power. Under the Articles, the IMF may sell gold outright on the basis of prevailing market prices but cannot engage in any other gold transactions, such as loans, leases, swaps, or the use of gold as collateral. In addition, the IMF does not have the authority to buy gold, but it may accept payments from a member in gold instead of SDRs or currencies in any operation or transaction under the IMF's Articles at prevailing market prices.

In accordance with the provisions of the Articles, whenever the IMF sells gold held on the date of the Second Amendment of the IMF's Articles of Agreement (April 1, 1978), the portion of the proceeds equal to the historical cost must be placed in the GRA. Any portion of the proceeds in excess of the historical cost will be held in the SDA or transferred to the Investment Account. The IMF may also sell gold held on the date of the Second Amendment to those members that were members on August 31, 1975, in proportion to their quotas on that date, in exchange for their own currencies, at the historical cost.

The IMF values its gold holdings at historical cost using the specific identification method. The carrying value of the Fund's gold holdings is derived from quota subscriptions prior to the Second Amendment and the settlement of financial obligations by members in 1992 and 1999 (see Note 6).

Other assets

Other assets include primarily fixed assets, net pension plan assets, and net assets for other post-retirement benefits.

Fixed assets with a cost in excess of a threshold amount are capitalized at cost and depreciated over the estimated useful lives of the assets, using the straight-line method. Buildings, equipment, and furniture are depreciated over 30, 3, and 7 years, respectively. Software is amortized over 3 years.

The IMF operates two defined-benefit pension plans and provides post-retirement benefits to staff. The pension plans are funded by payments from the staff and the IMF, taking into account the recommendations of independent actuaries. Assets of the pension plans are held in separate trustee-managed funds. The IMF also established a Retired Staff Benefits Investment Account (RSBIA) to hold and invest funds set aside to finance the cost of post-retirement employee benefits. The assets of RSBIA are administered by the IMF. Pension plans and other post-retirement assets are measured at fair value as of the balance sheet date. Pension costs and expected costs of the post-retirement medical and life insurance benefits are determined using the Projected Unit Credit Method, which measures the present value of the estimated future cash outflows, using interest rates of government securities that

have maturities approximating the terms of the pension liabilities, and accrued over the period of employment. Valuations of these obligations are carried out annually by independent actuaries.

SAF loans in the Special Disbursement Account

SAF loans provide financial assistance to low-income members at an interest rate of one-half of one percent per annum for a period of ten years. Repayments of all SAF loans are transferred to the PRGF Trust Reserve Account when received. Allowances for loan losses would be established if and when there is objective evidence that an impairment loss on loans has been incurred.

Investments in the Special Disbursement Account

Investments in the SDA are made in short-term deposits denominated in SDRs with maturities of less than one year and are classified as fair-value-through-profit-and-loss. Investments are recorded on the settlement date at cost and the carrying value of the investments approximate their fair value. Investment income comprises interest earned on investments.

SDR holdings

Although SDRs are not allocated to the IMF, the IMF may acquire, hold, and dispose of SDRs through the GRA. The IMF receives SDRs from members in the settlement of their financial obligations to the IMF and uses SDRs in transactions and operations with members. The IMF earns interest on its SDR holdings at the same rate as all other holders of SDRs.

Quotas

Each member is assigned a quota that forms the basis of its financial and organizational relationship with the IMF. A member's quota is related to, but not strictly determined by, economic factors such as national income, the value of external trade and payments, and the level of official reserves. Quotas determine members' subscriptions to the IMF, their relative voting power, access to financing, and their share in SDR allocations. Should a member withdraw from the IMF, its quota is repayable to the extent it is not needed to settle other net obligations of the member to the IMF. As a result of adopting IAS 32 Revised, "Financial Instruments Disclosure and Presentation," quota subscriptions have been reclassified as liabilities effective May 1, 2003, retrospectively, as these financial instruments also embody an unconditional obligation to redeem the instrument upon a member's withdrawal from the IMF.

Reserve tranche position

A member has a reserve tranche in the IMF when the IMF's holdings of its currency, excluding holdings that reflect the member's use of IMF credit, are less than the member's quota. Reserve tranches result from quota payments, part of which are to be made in reserve assets, and the use of the member's currency in the IMF's transactions or operations. A member's reserve tranche is considered a part of its external reserves and a liquid claim against the IMF. The member may draw on the reserve tranche at any time when it represents that it has a balance of payments need. Reserve tranche purchases are not subject to repurchase obligations or charges.

Reserves of the General Resources Account

The IMF's reserves, consisting of the General Reserve and the Special Reserve, provide it with protection against financial risk of a general nature. The IMF determines annually what part of its net income will be retained and placed to the General Reserve or the Special Reserve, and

what part, if any, will be distributed. The General Reserve may be used to meet capital losses or administrative deficits. The Articles of Agreement permit the IMF to use the Special Reserve for any purpose for which it may use the General Reserve, except distribution. After meeting the cost of administering the PRGF Trust, net operational income generated from surcharges on purchases under the SRF, the credit tranches, and the EFF has been placed to the General Reserve. All other income has been placed to the Special Reserve.

SDR interest rate

The SDR interest rate is determined weekly by reference to a combined market interest rate, which is a weighted average of yields on short-term instruments in the capital markets of the euro area, Japan, the United Kingdom, and the United States.

Charges

The IMF levies periodic charges on members' use of GRA credit. The basic rate of charge is set as a proportion of the SDR interest rate, which is equivalent to the effective interest rate. Under the burden-sharing mechanism (see Note 12), the basic rate of charge is increased to offset the effect on the IMF's income of the nonpayment of charges and also to finance the additions to the SCA-1.

A surcharge progressing from 300 to 500 basis points above the rate of charge applies to the use of credit under the SRF. In addition, credit outstanding exceeding 200 percent of quota, resulting from purchases in the credit tranches and under the EFF (other than those under the SRF) after November 28, 2000, is subject to a surcharge of 100 basis points, and credit in excess of 300 percent of quota, to a surcharge of 200 basis points. Special charges are levied on members' currency holdings that are not repurchased when due and on overdue charges. Special charges do not apply to members that are six months or more overdue to the IMF. A service charge is levied by the IMF on all purchases, except reserve tranche purchases. A refundable commitment fee is charged on Stand-By and Extended Arrangements. At the expiration or cancellation of an arrangement, the unrefunded portion of the commitment fee is recognized as current income.

Remuneration

The IMF pays interest, referred to as remuneration, on a member's reserve tranche position. A portion of the reserve tranche is unremunerated and is equal to 25 percent of the member's quota on April 1, 1978 (that part of the quota that was paid in gold prior to the Second Amendment of the Fund's Articles). For a member that joined the Fund after that date, the unremunerated reserve tranche is the same percentage of its initial quota as the average unremunerated reserve tranche was as a percentage of the quotas of all other members when the new member joined the Fund. The unremunerated reserve tranche remains fixed for each member in nominal terms, but because of subsequent quota increases, it is now significantly lower when expressed as a percentage of quota. The average is equal to 3.8 percent of quota at April 30, 2005, and 2004, but the actual percentage is different for each member.

The rate of remuneration, which is equivalent to the effective interest rate, is equal to the SDR interest rate, adjusted downward to finance a share of the nonpayment of charges and additions to the SCA-1 under the burden-sharing mechanism (see Note 12).

Adoption of new International Financial Reporting Standards

In December 2003, the International Accounting Standards Board (IASB) issued a revised International Accounting Standard 32, "Financial Instruments: Disclosure and Presentation" (IAS 32 Revised), which requires the classification of certain financial instruments, including shareholder interests, as a financial liability if such financial instruments embody redemption features. The adoption of IAS 32 Revised required the IMF to reclassify its quota subscriptions, which are repayable upon members' withdrawal, as liabilities. IAS 32 Revised is effective for financial year 2006, but the IMF decided to adopt it early during financial year 2005, with retrospective effect as of May 1, 2003. The impact of the implementation of IAS 32 Revised on the balance sheet was to increase total liabilities and decrease members' resources by SDR 213.5 billion as of April 30, 2005 (SDR 212.8 billion as of April 30, 2004).

In December 2003, the IASB revised International Accounting Standard 39, "Financial Instruments: Recognition and Measurement," under which investments previously classified as available-for-sale are permitted to be reclassified as securities at fair-value-through-profit-and-loss. After the reclassification, changes in fair value of the investments would continue to be recognized in the income statement. The revised standard is effective for financial year 2006, but the IMF elected to adopt it in financial year 2005, with retrospective effect as of May 1, 2003. The implementation of the revised standard did not have an impact on the IMF's financial position or results of operations.

In December 2004, the IASB issued an amendment to IAS 19, "Employee Benefits Actuarial Gains and losses, Group Plans and Disclosures." The amended IAS 19 provides an additional option for recognizing actuarial gains and losses and requires additional disclosures on the plan assets held by the employee benefit plans as well as further disclosure on the net periodic cost and reconciliation of the funded status. This revised standard will become effective for financial year 2007. The IMF will consider the implications of this revision on the General Department's financial statements.

Comparatives

When necessary, comparative figures have been reclassified to conform with changes in the presentation of the current year.

3. Financial risk management

In providing financial assistance to member countries and conducting its operations, the IMF is exposed to various types of risks, including credit, interest rate, exchange rate, liquidity, and operational risks. Because of its unique role in the international monetary system, the principal risk facing the IMF is credit risk.

Credit risk

Credit risk refers to potential losses on the credit outstanding due to the inability, or unwillingness, of member countries to make repurchases. While the IMF is accorded preferred creditor status, credit risk is inherent since the IMF generally provides financing when other sources are not available to a member and has limited ability to diversify its loan portfolio. As a result, credit concentration is high (see Note 4).

The IMF's credit risk-mitigating measures comprise policies on access limits; program design and monitoring, including conditionality attached to its financing; early repurchase; and preventative, precautionary, and remedial measures to cope with the financial consequences of protracted arrears.

The IMF has established access limits, including limits on overall access to resources in the GRA, as well as limits on access to the credit tranches under the Extended Fund Facility. The overall limit is currently set at an annual limit of 100 percent of a member's quota, with a cumulative limit of 300 percent of a member's quota. Access in excess of these limits can be granted in exceptional circumstances (exceptional access cases) subject to certain procedural requirements and substantive criteria that have been adopted by the Executive Board.

The IMF generally provides financial assistance to members in the context of a program that is designed to help the member overcome its balance of payments difficulties during the program period. IMF assistance is normally disbursed in tranches and subject to conditionality in the form of performance criteria and periodic reviews. To ensure the integrity of data provided to the Fund in the context of access to Fund resources and compliance with performance criteria, the IMF may apply remedies for misreporting by member countries by expecting early repurchases for noncomplying drawings.

In accordance with the Articles of Agreement, member countries using IMF resources are expected to make early repurchases as their balance of payments and reserve positions improve. Moreover, members are expected to make repurchases resulting from purchases in the credit tranches or under the Compensatory Financing Facility made after November 20, 2000, under predetermined expectation schedules ahead of the obligation date to preserve the revolving character of the IMF's resources and reduce the duration of IMF credit exposure.

The IMF maintains precautionary balances consisting of the SCA-1 and the reserves of the GRA to cover possible overdue principal and losses in income and to preserve the IMF's reputation as a prudent financial organization. The level of precautionary balances is determined by taking into consideration the amount of credit in protracted arrears and a margin for risk associated with credit in good standing. The Executive Board decided that in the current circumstances, the IMF should aim at precautionary balances in an amount of SDR 10 billion. In addition, the burden-sharing arrangement is another risk-mitigating mechanism unique to the IMF whereby the financial risk of overdue charges is passed on to creditor and debtor members and allows for the strengthening of the IMF's overall financial position.

Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate because of changes in market interest rates. The IMF's cost structure and its income position are interest-rate driven. Fluctuations in interest rates could widen or narrow the spread between the rate of charge on credit outstanding and the rate of remuneration paid to member countries with remunerated reserve tranche positions. To minimize the effect of interest rate fluctuations on income, the IMF links the rate of charge directly to the SDR interest rate (which is equal to the rate of remuneration). Moreover, the Executive Board may decide to recover any net income shortfalls in the GRA caused by falling interest rates or other factors by increasing the net income target for the following financial year.

Exchange rate risk

Exchange rate risk is the exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on an entity's financial position and cash flows. The IMF uses the SDR as the unit of account and conducts its transactions in terms of the SDR. It has no exchange rate risk exposure on its holdings of members' currencies since, under the Articles of Agreement, members are required to maintain the value of such holdings in terms of the SDR. Any depreciation/appreciation in their currency vis-à-vis the SDR gives rise to a

currency valuation adjustment receivable or payable that must be settled on an annual basis and that is included in the stock of the IMF's currency holdings. Therefore, the value of the IMF's currency holdings does not fluctuate in SDR terms.

Exchange rate risk on IMF investments is managed by investing in securities denominated in SDRs or in the constituent currencies of the SDR valuation basket. The IMF also has other assets and liabilities, such as trade receivables and payables, denominated in currencies other than SDRs and makes administrative payments largely in U.S. dollars, but the exchange rate risk exposure is very limited.

Liquidity risk

Liquidity risk is the risk of non-availability of resources to meet the IMF's financing needs and obligations. The IMF must have usable resources available to meet members' demand for credit. While the IMF's sources are revolving, uncertainties in timing and amount of credit extended to members during financial crises expose the IMF to liquidity risk. Moreover, the IMF must also stand ready to meet the potential demands from members drawing upon their reserve tranche positions, which have no fixed maturity and are part of members' reserves.

The IMF manages its liquidity risk not by matching the maturity of assets and liabilities, but by closely scrutinizing developments in its liquidity position, especially as it relates to the adequacy of quota-based resources to meet liquidity needs. The Articles of Agreement require the IMF to conduct a general review of members' quotas at intervals of no more than five years in order to assess the adequacy of quota-based resources to meet members' demand for IMF financing. There have been eight quota increases, including an ad hoc increase, as a result of the reviews. Should the available quota-based resources be inadequate to meet financing needs, the IMF may activate its standing credit lines totaling SDR 34 billion under the General Arrangements to Borrow and the New Arrangements to Borrow. The IMF also monitors its liquidity position over a shorter term, using an objective criterion such as the forward commitment capacity for the next twelve-month period (Schedule 2 provides the IMF's available resources and liquidity position).

Operational risk

Operational risk includes risk of loss attributable to errors or omissions because of failures in executing or processing transactions, inadequate controls, human factors, and/or failures in underlying support systems.

The IMF mitigates operational risk by (i) identifying key operational risks, (ii) maintaining a system of internal control, (iii) documenting policies and procedures on administrative and accounting and reporting processes, and (iv) conducting internal audits to ensure accurate processing of transactions and minimize the possibility of undetected errors. The design and effectiveness of controls are evaluated continuously and improvements are implemented on a timely basis. The results of the internal evaluation of the effectiveness of internal controls are reported by the Office of Internal Audit and Inspection to the External Audit Committee, which also exercises oversight over the external audit of the IMF's accounts and its controls.

The IMF has adopted a Code of Ethics to promote the highest standards of ethics among its staff, including senior management and members of the Executive Board. The enforcement of the Code of Ethics is further supplemented with procedures for the reporting and investigation of irregularities and improprieties, including fraudulent acts.

4. Credit and loans outstanding

Credit outstanding in the GRA and SAF loans in the SDA are carried at amortized cost.

Changes in the outstanding use of IMF credit under the various facilities of the GRA were as follows:

	April 30, 2003	Purchases	Repur- chases	April 30, 2004	Purchases	Repur- chases	April 30, 2005
<i>(In millions of SDRs)</i>							
Credit tranches	33,898	12,874	(5,042)	41,730	1,445	(7,717)	35,458
Extended Fund Facility	14,942	1,132	(2,323)	13,751	163	(4,549)	9,365
Supplemental Reserve Facility	15,700	3,807	(13,479)	6,028	–	(1,459)	4,569
Systemic Transformation Facility	644	–	(490)	154	–	(136)	18
Enlarged Access	279	–	(3)	276	–	(5)	271
Compensatory and Contingency Financing Facility	414	–	(294)	120	–	(36)	84
Supplementary Financing Facility	101	–	(7)	94	–	(5)	89
Total credit outstanding	<u>65,978</u>	<u>17,813</u>	<u>(21,638)</u>	<u>62,153</u>	<u>1,608</u>	<u>(13,907)</u>	<u>49,854</u>

The following repurchases were made by members during the financial years ended April 30:

	2005	2004
<i>(In millions of SDRs)</i>		
Early repurchases	2,645	328
Repurchase expectations	5,854	15,944
Repurchase obligations	<u>5,408</u>	<u>5,366</u>
Total repurchases	<u>13,907</u>	<u>21,638</u>

The IMF approved the following members' requests to extend repurchases from the expectation to the obligation schedule during the financial years ended April 30:

	Total repurchase expectations extended	
	2005	2004
<i>(In millions of SDRs)</i>		
Argentina	779	1,941
Brazil	–	8,096
Dominica	1	–
Dominican Republic	11	–
Ecuador	33	–
Papua New Guinea	–	26
Serbia and Montenegro	–	19
Sri Lanka	74	–
Turkey	–	8,273
Uruguay	434	227

As of April 30, 2005, and 2004, outstanding SAF loans amounted to SDR 46 million and SDR 86 million, respectively.

Scheduled repurchases in the GRA and repayment of SAF loans in the SDA are summarized below:

Financial year ending April 30	General Resources Account	Special Disbursement Account
<i>(In millions of SDRs)</i>		
2006	18,612	37
2007	17,671	–
2008	8,793	–
2009	2,502	–
2010	1,156	–
2011 and beyond	397	–
Overdue	723	9
Total	<u>49,854</u>	<u>46</u>

The use of credit in the GRA by the largest users at April 30 was as follows:

	2005		2004	
	<i>(In millions of SDRs and as a percentage of total GRA credit outstanding)</i>			
Largest user of credit	15,356	30.8%	18,139	29.2%
Three largest users of credit	36,539	73.3%	44,020	70.8%
Five largest users of credit	44,190	88.6%	53,680	86.4%

The five largest users of credit as of April 30, 2005, were Brazil, Turkey, Argentina, Indonesia, and Uruguay. Outstanding credit by member is provided in Schedule 1.

The concentration of GRA outstanding credit by regional geographical area as of April 30 was as follows:

	2005		2004	
	<i>(In millions of SDRs and as a percentage of total GRA credit outstanding)</i>			
Africa	1,168	2.3%	1,397	2.3%
Asia and Pacific	6,760	13.6%	8,019	12.9%
Europe	2,701	5.4%	6,160	9.9%
Latin America and the Caribbean	25,617	51.4%	30,697	49.4%
Middle East and Turkey	13,608	27.3%	15,880	25.5%
Total	<u>49,854</u>	<u>100%</u>	<u>62,153</u>	<u>100%</u>

Overdue obligations

At April 30, 2005, and 2004, four members were six months or more overdue in settling their financial obligations to the General Department.

GRA repurchases, GRA charges, SAF loan repayments, and SAF interest that are six or more months overdue were as follows:

	Repurchases and SAF loans		Charges and SAF interest	
	2005	2004	2005	2004
	<i>(In millions of SDRs)</i>			
Total overdue	732	752	1,030	1,009
Overdue for six months or more	730	743	1,018	1,001
Overdue for three years or more	661	650	970	939

The type and duration of the overdue amounts in the General Department as of April 30, 2005, were as follows:

	Repurchases and SAF loans	Charges and SAF interest	Total obligation	Longest overdue obligation
	<i>(In millions of SDRs)</i>			
Liberia	201	255	456	May 1985
Somalia	106	99	205	July 1987
Sudan	316	663	979	August 1985
Zimbabwe	109	13	122	May 2001
Total	<u>732</u>	<u>1,030</u>	<u>1,762</u>	

5. Currencies

Net changes in the IMF's holdings of members' currencies for the years ended April 30, 2005, and 2004 were as follows:

	April 30, 2003	Net change	April 30, 2004	Net change	April 30, 2005
	<i>(In millions of SDRs)</i>				
Members' quotas	212,731	63	212,794	684	213,478
Members' outstanding use of IMF credit in the GRA	65,978	(3,825)	62,153	(12,299)	49,854
Members' reserve tranche positions in the GRA	(68,009)	5,153	(62,856)	13,007	(49,849)
Administrative currency balances	(1)	(4)	(5)	8	3
Total currencies	<u>210,699</u>	<u>1,387</u>	<u>212,086</u>	<u>1,400</u>	<u>213,486</u>

Receivables and payables arising from valuation adjustments at April 30, 2005, when all holdings of currencies of members were last revalued, amounted to SDR 8,521 million and SDR 5,435 million, respectively (SDR 9,311 million and SDR 3,139 million, respectively, at April 30, 2004). Settlements of these receivables or payables are required to be made promptly after the end of each financial year.

6. Gold holdings

At April 30, 2005, and 2004, the IMF held 3,217,341 kilograms of gold, equal to 103,439,916 fine ounces of gold, at designated depositories. Gold holdings were valued at a historical cost of SDR 5,852 million as of April 30, 2005, and 2004.

	Cost		
	Ounces	Per ounce	Total
	<i>(In millions)</i>	<i>(In SDRs)</i>	<i>(In millions of SDRs)</i>
Gold acquired from quota subscriptions	90.474	35	3,167
Gold acquired from Cambodia in 1992	.021	241	5
Gold acquired through off-market transaction in 1999	12.944	207	2,680
Total	<u>103.439</u>		<u>5,852</u>

As of April 30, 2005, the market value of the IMF's holdings of gold was SDR 29.7 billion (SDR 27.7 billion at April 30, 2004). If realized, the excess of the market value over the cost of the IMF's gold holdings would be transferred to the SDA or to the Investment Account.

7. Interest and charges

As of April 30, 2005, the total holdings on which the IMF levies charges amounted to SDR 49,854 million (SDR 62,153 million as of April 30, 2004). For the financial year 2005, the rate of charge was set at 154 percent of the SDR interest rate for the first half and 136 percent for the second half of the year (for financial year 2004, it was 132 percent of the SDR interest rate). After the retroactive reduction of charges due to income exceeding the net income target for financial year 2005, the basic rate of charge was 144 percent for the first half of the financial year. The average adjusted rate of charge before applicable surcharges for financial year 2005 was 3.1 percent (2.17 percent for financial year 2004). Charges and other receivables as of April 30 were as follows:

	2005	2004
	<i>(In millions of SDRs)</i>	
Periodic charges	1,598	1,526
Amount paid through burden sharing	(848)	(825)
Unpaid charges	(187)	(188)
	563	513
Other receivables	5	4
Total receivables	<u>568</u>	<u>517</u>

Interest and periodic charges for the years ended April 30 consisted of the following:

	2005	2004
	<i>(In millions of SDRs)</i>	
Interest and periodic charges	2,259	2,224
Amounts paid through burden-sharing adjustments, net of refunds	11	8
Total interest and charges	<u>2,270</u>	<u>2,232</u>

Interest earned on SAF loans for the years ended April 30, 2005, and 2004 amounted to SDR 0.3 million and SDR 0.5 million, respectively.

Service charges, and commitment fees on canceled or expired arrangements are included in *Other Charges and Income*, which amounted to SDR 34 million (SDR 91 million for the year ended April 30, 2004).

8. Other assets—fixed assets

Other assets include fixed assets, which at April 30, 2005, and 2004 amounted to SDR 311 million and SDR 267 million, respectively, and consisted of land, buildings, construction in progress, and equipment.

	Land	Buildings	Others	Total
	<i>(In millions of SDRs)</i>			
Cost				
Beginning of the year	96	215	96	407
Additions	—	—	59	59
Disposals	—	—	(3)	(3)
End of the year	96	215	152	463
Accumulated depreciation				
Beginning of the year	—	107	33	140
Additions	—	7	8	15
Disposals	—	—	(3)	(3)
End of the Year	—	114	38	152
Net book value as at April 30, 2005	96	101	114	311
Net book value as at April 30, 2004	96	108	63	267

9. Special Disbursement Account

Investment

As at April 30, 2005, the investments in the SDA consisted of short-term fixed-term deposits with maturities of less than one year and amounted to SDR 2,519 million (SDR 2,631 million as at April 30, 2004).

Investment income of the SDA for the years ended April 30, 2005, and 2004 was SDR 52 million and SDR 41 million, respectively.

Transfer of SDA resources

Assets in the SDA can be used for special purposes authorized in the Articles, including providing financial assistance to low-income member countries. Transfers for this purpose can be made from current and prior years' income. Such transfers are not considered an expense, but are equity-like distributions approved separately by the Executive Board and transferred on an as-needed basis.

Proceeds from the repayment of SAF loans are transferred from the SDA to the PRGF Trust. During the financial years ended April 30, 2005, and 2004, such transfers amounted to SDR 41 million and SDR 52 million, respectively.

In addition, the accumulated investment earnings in the SDA are available for financing the PRGF-HIPC Trust on an as-needed basis. During the financial year ended April 30, 2005, the SDA transferred SDR 164 million to the PRGF-HIPC Trust (no such transfer was made for the financial year ended April 30, 2004).

Trust fund

The IMF is the trustee of the Trust Fund, which was established in 1976 to provide balance of payments assistance on concessional terms to eligible members that qualify for assistance. The Trust Fund is in liquidation.

In 1980, the IMF, as trustee, decided that, upon the completion of the final loan disbursements, the Trust Fund would be terminated as of April 30, 1981, and after that date, the activities of the Trust Fund have been confined

to the conclusion of its affairs. The Trust Fund has no assets other than claims receivable, including interest and special charges, from Liberia, Somalia, and Sudan amounting to SDR 117.6 million at April 30, 2005 (SDR 117.2 million at April 30, 2004). All interest is deferred. Cash receipts on these loans are to be transferred to the SDA.

10. Borrowings

Under the General Arrangements to Borrow (GAB), the IMF may borrow up to SDR 18.5 billion when supplementary resources are needed, in particular, to forestall or to cope with an impairment of the international monetary system. The GAB became effective on October 24, 1962, and has been renewed through December 25, 2008. Interest on borrowings under the GAB is set at a rate equal to the SDR interest rate.

Under the New Arrangements to Borrow (NAB), the IMF may borrow up to SDR 34 billion of supplementary resources. The NAB is the facility of first and principal recourse, but it does not replace the GAB, which will remain in force. Outstanding drawings and commitments under these two borrowing arrangements are limited to a combined total of SDR 34 billion. The NAB became effective for a five-year period on November 17, 1998, and has been renewed through November 16, 2008. Interest on borrowings under the NAB is payable to the participants at the SDR interest rate or any such higher rate as may be agreed between the IMF and participants representing 80 percent of the total credit arrangements. There was no balance outstanding as at April 30, 2005, and 2004 under the GAB or the NAB.

11. Arrangements

An arrangement is a decision of the IMF that gives a member the assurance that the IMF stands ready to provide SDRs or usable currencies during a specified period and up to a specified amount, in accordance with the terms of the arrangement. At April 30, 2005, the undrawn balances under the 12 arrangements that were in effect in the GRA amounted to SDR 7,927 million (SDR 19,799 million under 13 arrangements at April 30, 2004).

12. Burden sharing and the Special Contingent Account

Under the burden-sharing mechanism, the basic rate of charge is increased and the rate of remuneration is adjusted downward to offset the effect on the IMF's income of the nonpayment of charges and also to finance the additions to the SCA-1.

Cumulative charges, net of settlements, that have resulted in adjustments to charges and remuneration since May 1, 1986 (the date the burden-sharing mechanism was adopted) amounted to SDR 848 million at April 30, 2005 (SDR 825 million at April 30, 2004). The cumulative refunds for the same period, resulting from the settlements of overdue charges for which burden sharing adjustments have been made, amounted to SDR 1,073 million at April 30, 2005, and 2004.

The SCA-1 is financed by adjustments to the rate of charge and the rate of remuneration. Balances in the SCA-1 are to be distributed to the members that shared the cost of its financing when there are no outstanding overdue repurchases and charges, or at such earlier time as the IMF may decide. Amounts collected from members for the SCA-1 are akin to refundable cash deposits and are recorded as collections of cash and as a liability to those who paid them. Losses arising from overdue obligations, if realized, would be shared by members in proportion to their cumulative contributions to the SCA-1. For the financial years ended April 30, 2005, and 2004, the annual addition to the SCA-1 amounted to SDR 94 million.

13. Remuneration

At April 30, 2005, total creditor positions on which the IMF paid remuneration amounted to SDR 43,209 million (SDR 56,241 million at April 30, 2004). The average adjusted rate of remuneration for the financial year ended April 30, 2005, was 1.98 percent (1.48 percent for the financial year ended 2004). Remuneration consisted of the following for the years ended April 30:

	2005	2004
	<i>(In millions of SDRs)</i>	
Remuneration	1,045	974
Amount withheld for burden-sharing adjustment, net of refunds	<u>(11)</u>	<u>(8)</u>
	<u>1,034</u>	<u>966</u>

14. Administrative expenses

Administrative expenses, the majority of which were incurred in U.S. dollars, for the years ended April 30 were as follows:

	2005	2004
	<i>(In millions of SDRs)</i>	
Personnel	343	337
Pension and other long-term employee benefits	160	39
Travel	62	70
Exchange gains and losses	2	1
Other	108	103
Less: reimbursement for the administration of the SDR Department	<u>(2)</u>	<u>(1)</u>
Total administrative expenses, net of reimbursements	<u>673</u>	<u>549</u>

15. Pension and other post-retirement benefits

The IMF has a defined-benefit Staff Retirement Plan (SRP) that covers substantially all eligible staff and a Supplemental Retirement Benefits Plan (SRBP) for selected participants of the SRP. Participants contribute 7 percent of their pensionable remuneration and the IMF contributes the remainder of the cost of funding the plans and pays certain administrative costs of the plans. In addition, the IMF provides other employment and post-retirement benefits, including medical, life insurance, and other long-term benefits. In 1995, the IMF established a separate account, the Retired Staff Benefits Investment Account (RSBIA), to hold and invest resources set aside to fund the cost of the post-retirement benefits.

The defined-benefit obligations are valued annually by independent actuaries. The latest actuarial valuations were carried out as at April 30, 2005, using the Projected Unit Credit Method.

The amounts recognized in the balance sheet are determined as follows:

	2005				2004
	SRP	SRBP	Other	Total	Total
	<i>(In millions of SDRs)</i>				
Fair value of plan assets	3,142	3	359	3,504	3,264
Present value of the defined-benefit obligation	(2,901)	(245)	(574)	(3,720)	(3,569)
Unrecognized actuarial losses/(gains)	517	60	(17)	560	734
Unrecognized prior service cost	—	—	9	9	14
Net balance sheet asset/(liability)	<u>758</u>	<u>(182)</u>	<u>(223)</u>	<u>353</u>	<u>443</u>

The movement in the net balance sheet asset is reconciled as follows:

	2005				2004
	SRP	SRBP	Other	Total	Total
	<i>(In millions of SDRs)</i>				
Beginning of year	807	(147)	(217)	443	435
Expense recognized in the income statement	(90)	(41)	(44)	(175)	(51)
Contributions paid	41	6	38	85	59
End of year	<u>758</u>	<u>(182)</u>	<u>(223)</u>	<u>353</u>	<u>443</u>

The pension and other post-retirement benefits expense recognized in the income statement include the amortization, over the estimated average remaining service lives of IMF staff, of actuarial gains and losses in excess of a corridor. The corridor is the higher of 10 percent of either the defined-benefit obligation or the fair value of assets at the beginning of the financial year.

The amounts recognized in the income statements are as follows:

	2005				2004
	SRP	SRBP	Other	Total	Total
	<i>(In millions of SDRs)</i>				
Current service cost	107	26	39	172	95
Interest cost	166	13	31	210	157
Expected loss on assets	(219)	—	(25)	(244)	(226)
Amortization of actuarial (gain)/loss	36	3	(5)	34	(8)
Prior service cost	—	—	3	3	33
Total expense recognized in income statement	<u>90</u>	<u>42</u>	<u>43</u>	<u>175</u>	<u>51</u>
Actual return on assets	<u>337</u>	<u>—</u>	<u>43</u>	<u>380</u>	<u>668</u>

The principal actuarial assumptions used in the actuarial valuations were as follows:

	2005	2004
	<i>(In percent)</i>	
Discount rate	5.7	5.7
Expected return on plan assets	7.5	7.5
Future salary increases	6.4–10.8	6.4–10.8
Ultimate health care costs growth rates	4.0	4.0

16. Related party transactions

The GRA conducts its transactions with the SDR Department on the same terms and conditions applicable to participants in the SDR Department. During the financial years ended April 30, 2005, the receipts (consisting of repurchases, charges, and interest on SDR holdings) and uses (consisting of purchases and remuneration) of SDRs by the GRA amounted to SDR 3,100 million (SDR 5,472 million for the financial year ended April 30, 2004) and SDR 3,032 million (SDR 5,929 million for the financial year ended April 30, 2004), respectively. As of April 30, 2005, and 2004, the GRA's SDR holdings amounted to SDR 574 million and SDR 506 million, respectively.

The costs of operating the SDR Department, the PRGF Trust, and the PRGF-HIPC Trust are borne by the GRA. The SDR Department reimbursed the GRA SDR 1.5 million and SDR 1.4 million for the financial years ended April 30, 2005, and 2004, respectively. The IMF has waived the reimbursements by the PRGF Trust to the GRA, amounting to SDR 54.4 million and SDR 57.7 million for the financial years ended April 30, 2005, and 2004, respectively. The PRGF-HIPC Trust does not reimburse the GRA.

17. Lease commitments

The IMF has committed to lease commercial office space through June 2005. Expenditures totaling SDR 3.2 million will be incurred over this period.

18. Subsequent event

On June 11, 2005, the G-8 finance ministers proposed an initiative that would involve debt relief leading to full debt cancellation of outstanding obligations of member countries eligible for HIPC assistance. Under this proposal, the cost of meeting the obligations of the eligible members would be met from existing IMF resources. In situations where other existing and projected debt relief obligations cannot be met from existing IMF resources (for example, for the protracted arrears cases such as Liberia,

Somalia, and Sudan), donors have committed to providing the extra resources necessary. IMF resources that will be considered to finance this debt relief operation consist of available resources already earmarked to provide debt relief or provide concessional financing (SDA, PRGF, and PRGF-HIPC resources) for an estimated amount of approximately SDR 4.0 billion as of April 30, 2005. The precise modalities of the proposal have not yet been developed. The G-8 Finance Ministers call upon all shareholders to support the debt relief proposals which would be put to the 2005 Annual Meetings.

General Department
Quotas, IMF's holdings of currencies, reserve tranche positions,
and outstanding credit and loans
as at April 30, 2005

(In thousands of SDRs)

Memorandum item		
Resources available under borrowing arrangements	34,000,000	34,000,000
Quotas of members that finance IMF transactions	170,089,000	164,143,600
Net uncommitted usable resources ⁸	99,882,010	75,051,056
Liquid liabilities ⁹	49,848,798	62,856,110
Liquidity ratio ¹⁰	200.4%	119.4%

¹Other assets reflect current assets (charges, interest, and other receivables) and other assets (which include capital assets such as land, buildings, and equipment), net of other liabilities including remuneration payable.

²Resources regarded as non-usable in the financing of the IMF's ongoing operations and transactions are (1) gold holdings, (2) currencies of members that are using IMF credit, (3) currencies of other members with relatively weak external positions, and (4) other assets.

³Usable resources consist of (1) holdings of currencies of members considered by the IMF as having balance of payments and reserve positions sufficiently strong for their currencies to be used in transfers, (2) SDR holdings, and (3) any unused amounts under credit lines that have been activated.

⁴Amounts committed under arrangements but not yet disbursed. This includes arrangements considered precautionary.

⁵Repurchases by member countries during the coming one-year period. It is assumed that repurchases would be made on an expectation basis for SRF, and on an obligation basis under all other facilities.

⁶Prudential balance is set at 20 percent of quotas of members that issue the currencies that are used in the financing of IMF transactions and any amounts activated under borrowing arrangements.

⁷FCC is a measure of the resources available for new financial commitments in the coming year. It is equal to uncommitted usable resources plus repurchases one-year forward minus the prudential balance.

⁸Net uncommitted usable resources are defined as usable resources less resources committed under arrangements (adjusted to exclude inoperative arrangements, one-half of the amounts committed under precautionary arrangements) and minimum working balances (set at 10 percent of the quotas of members deemed sufficiently strong for their currencies to be used in operations and transactions).

⁹Liquid liabilities consist of (1) members' reserve tranche positions, and (2) the amount of any outstanding borrowing by the IMF under the GAB or NAB. Both reserve tranche positions and outstanding lending under the GAB and NAB (together called members' reserve positions in the IMF) are part of members' international reserves. A member may draw on its reserve position when it represents that it has a need, and the IMF must therefore at all times be in a position to meet such requests.

¹⁰The liquidity ratio is a measure of the IMF's liquidity position, represented by the ratio of its net uncommitted usable resources to its liquid liabilities.

Independent Auditors' Report

**To the Board of Governors
 of the International Monetary Fund
 Washington, DC**

We have audited the accompanying balance sheet of the SDR Department of the International Monetary Fund (the "Department") as of April 30, 2005, and the related statements of income and cash flows for the year then ended. These financial statements are the responsibility of the Department's management. Our responsibility is to express an opinion on these financial statements based on our audit. The Department's financial statements as of and for the year ended April 30, 2004, were audited by other auditors, whose report dated June 7, 2004, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with International Standards on Auditing and auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Department's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such 2005 financial statements present fairly, in all material respects, the financial position of the SDR Department of the International Monetary Fund at April 30, 2005, and the results of its operations and its cash flows for the year then ended in conformity with International Financial Reporting Standards.

Our audit was conducted for the purpose of forming an opinion on the basic 2005 financial statements taken as a whole. The supplemental schedules listed on pages 172 to 177 are presented for the purpose of additional analysis and are not a required part of the basic financial statements. These schedules are the responsibility of the Department's management. Such 2005 schedules have been subjected to the auditing procedures applied in our audit of the basic financial statements and, in our opinion, are fairly stated in all material respects when considered in relation to the basic financial statements taken as a whole. The 2004 schedules were subjected to auditing procedures by other auditors, whose report dated June 7, 2004, referred to above, stated that such information is fairly stated in all material respects when considered in relation to the basic 2004 financial statements taken as a whole.

SDR Department

Notes to the financial statements as at April 30, 2005, and 2004

1. Nature of operations

The Special Drawing Right (SDR) is an international interest-bearing reserve asset created by the IMF following the First Amendment of the Articles of Agreement in 1969. All transactions and operations involving SDRs are conducted through the SDR Department. The SDR may be allocated by the IMF, as a supplement to existing reserve assets, to members participating in the SDR Department. Its value as a reserve asset derives, essentially, from the commitments of participants to hold and accept SDRs and to honor various obligations connected with its proper functioning as a reserve asset.

The resources of the SDR Department are held separately from the assets of all the other accounts of, or administered by, the IMF. They may not be used to meet the liability, obligations, or losses of the Fund incurred in the operations of the General Department or other accounts, except that the SDR Department reimburses the General Department for expenses incurred in conducting the business of the SDR Department.

At April 30, 2005, all members of the IMF were participants in the SDR Department. SDRs have been allocated by the IMF to members that are participants in the SDR Department at the time of the allocation in proportion to their quotas in the IMF. Six allocations have been made (in 1970, 1971, 1972, 1979, 1980, and 1981) for a total of SDR 21.4 billion. A proposed amendment of the IMF's Articles of Agreement was approved by the Board of Governors in January 1998 to allow for a special one-time allocation of SDRs equal to SDR 21.4 billion. The amendment will enter into force as of the date the IMF certifies by formal communication to all members that three-fifths of the members, having 85 percent of the total voting power, have accepted it. Upon termination of participation or liquidation of the SDR Department, the IMF will provide to holders the currencies received from the participants in settlement of their obligations. The IMF is empowered to prescribe certain official entities as holders of SDRs; at April 30, 2005, 14 institutions were prescribed as holders (15 institutions at April 30, 2004). Prescribed holders do not receive allocations.

The SDR is also used by a number of international and regional organizations as a unit of account or as the basis for their units of account. Several international conventions also use the SDR as a unit of account, notably those expressing liability limits for the international transport of goods and services.

Uses of SDRs

Participants and prescribed holders can use and receive SDRs in transactions and operations by agreement among themselves. Participants can also use SDRs in operations and transactions involving the General Resources Account, such as the payment of charges and repurchases. The IMF ensures, by designating participants to provide freely usable currency in exchange for SDRs, that a participant can use its SDRs to obtain an equivalent amount of currency if it has a need because of its balance of payments, its reserve position, or developments in its reserves.

General allocations and cancellations of SDRs

The IMF has the authority to provide unconditional liquidity through general allocations of SDRs to participants in the SDR Department in proportion to

their quotas in the IMF. The IMF cannot allocate SDRs to itself or to other holders it prescribes. The Articles also provide for the cancellation of SDRs, although to date there have been no cancellations. In its decisions on general allocations of SDRs, the IMF, as prescribed under its Articles, has sought to meet the long-term global need to supplement existing reserve assets in such a manner as will promote the attainment of the IMF's purposes and avoid economic stagnation and deflation, as well as excess demand and inflation.

2. Summary of significant accounting policies

Basis of accounting

The financial statements of the SDR Department are prepared in accordance with International Financial Reporting Standards (IFRS). Specific accounting principles and disclosure practices are explained further below.

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Unit of account

The financial statements are expressed in terms of SDRs. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of the currencies in the SDR valuation basket. The IMF reviews the SDR valuation basket every five years. The latest review was completed in October 2000 and the new composition of the SDR valuation basket became effective on January 1, 2001. The currencies in the basket as of April 30, 2005, and 2004 and their amounts were as follows:

Currency	Amount
Euro	0.4260
Japanese yen	21.0000
Pound sterling	0.0984
U.S. dollar	0.5770

As of April 30, 2005, one SDR was equal to 1.51678 U.S. dollars (one SDR was equal to 1.45183 U.S. dollars as of April 30, 2004).

Allocations and holdings

At April 30, 2005, and 2004, IMF net cumulative allocations to participants totaled SDR 21.4 billion. Participants with holdings in excess of their allocations have established a net claim on the SDR Department, which is represented on the balance sheet as a liability. Participants with holdings below their allocations have used part of their allocations, which results in a net obligation to the SDR Department and is presented as an asset of the SDR Department. Participants' net SDR positions as of April 30, 2005, and 2004 were as follows:

	2005			2004		
	Total	Below allocations	Above allocations	Total	Below allocations	Above allocations
	<i>(In millions of SDRs)</i>					
Cumulative allocations	21,433.3	12,133.5	9,299.8	21,433.3	11,838.8	9,594.5
Holdings of SDRs						
by participants	20,624.4	4,006.5	16,617.9	20,633.6	3,865.8	16,767.8
Net SDR positions	808.9	8,127.0	(7,318.1)	799.7	7,973.0	(7,173.3)

A summary of SDR holdings is provided below:

	2005	2004
	<i>(In millions of SDRs)</i>	
Participants	20,624.4	20,633.6
General Resources Account	574.3	506.0
Prescribed holders	270.4	382.3
	21,469.1	21,521.9
Less: Overdue charges receivable	35.8	88.6
Total holdings	21,433.3	21,433.3

Interest and charges

Interest is paid on holdings of SDRs. Charges are levied on each participant's net cumulative allocations plus any allocations in excess of its holdings and unpaid charges. Interest on SDR holdings is paid quarterly. Charges on net cumulative allocations are also collected quarterly. Interest and charges are levied at the same rate and are settled by crediting and debiting individual holdings accounts on the first day of the subsequent quarter. The SDR Department is required to pay interest to each holder, whether or not sufficient SDRs are received to meet the payment of interest. If sufficient SDRs are not received because charges are overdue, additional SDRs are temporarily created.

The rate of interest on the SDR is determined by reference to a combined market interest rate, which is a weighted average of yields or rates on short-term instruments in the capital markets of the euro area, Japan, the United Kingdom, and the United States. The combined market interest rate used to determine the SDR interest rate is calculated each Friday, using the yields or rates of that day. The SDR interest rate, which is set equal to the combined market interest rate, enters into effect on a Monday and applies through the following Sunday. The average SDR interest rate was 2.08 percent for the year ended April 30, 2005 (1.58 percent for the year ended April 30, 2004).

Administrative expenses

The expenses of conducting the business of the SDR Department are paid by the IMF from the General Resources Account, which is reimbursed in SDRs by the SDR Department at the end of each financial year. For this purpose, the SDR Department levies an assessment on all participants in proportion to their net cumulative allocations.

Overdue obligations

An allowance for losses resulting from overdue SDR obligations would be created if and when the IMF were to expect a loss to be incurred; no losses have been incurred to date.

Comparatives

When necessary, comparative figures have been reclassified to conform with changes in the presentation of the current year.

3. Overdue assessments and charges

At April 30, 2005, assessments and charges amounting to SDR 36.0 million were overdue to the SDR Department (SDR 88.9 million at April 30, 2004). At April 30, 2005, three members (as of April 30, 2004, four members) were six months or more overdue in meeting their financial obligations to the SDR Department.

Assessments and charges due from members that are six months or more overdue to the SDR Department were as follows as of April 30:

	2005	2004
	<i>(In millions of SDRs)</i>	
Total	36.0	88.9
Overdue for six months or more	35.2	87.4
Overdue for three years or more	32.1	75.9

The amount and duration of arrears as of April 30, 2005 were as follows:

	Total	Longest overdue obligation
	<i>(In millions of SDRs)</i>	
Liberia	25.1	Apr-86
Somalia	10.8	Feb-91
Sudan	0.1	Apr-91
Total	36.0

Independent Auditors' Report

**To the Board of Governors
of the International Monetary Fund
Washington, DC**

We have audited the accompanying combined balance sheet of the Poverty Reduction and Growth Facility Trust (the "Company") as of April 30, 2005, and the related combined statements of income, changes in resources, and cash flows for the year then ended. These combined financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these combined financial statements based on our audit. The Company's combined financial statements as of and for the year ended April 30, 2004, were audited by other auditors, whose report dated June 7, 2004, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with International Standards on Auditing and auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such 2005 financial statements present fairly, in all material respects, the combined financial position of the Poverty Reduction and Growth Facility Trust at April 30, 2005, and the combined results of its operations and its cash flows for the year then ended in conformity with International Financial Reporting Standards.

Our audit was conducted for the purpose of forming an opinion on the basic 2005 combined financial statements taken as a whole. The supplemental schedules listed on pages 186 to 189 are presented for the purpose of additional analysis and are not a required part of the basic combined financial statements. These schedules are the responsibility of Company management. Such 2005 schedules have been subjected to the auditing procedures applied in our audit of the basic combined financial statements and, in our opinion, are fairly stated in all material respects when considered in relation to the basic combined financial statements taken as a whole. The 2004 schedules were subjected to auditing procedures by other auditors, whose report dated June 7, 2004, referred to above, stated that such information is fairly stated in all material respects when considered in relation to the basic 2004 combined financial statements taken as a whole.

Cash and cash equivalents, beginning of year	2,721,670	2,481,040
Cash and cash equivalents, end of year	<u><u>1,945,902</u></u>	<u><u>2,721,670</u></u>

The accompanying notes are an integral part of these financial statements.

Poverty Reduction and Growth Facility Trust

Notes to the combined financial statements as at April 30, 2005, and 2004

1. Nature of operations

The Poverty Reduction and Growth Facility Trust (PRGF Trust or the Trust), for which the IMF is Trustee, was established in December 1987 and was extended and enlarged in February 1994 to provide loans on concessional terms to qualifying low-income developing country members. The resources of the Trust are held separately from the assets of all other accounts of, or administered by, the IMF and may not be used to discharge liabilities or to meet losses incurred in the administration of other accounts.

The operations of the Trust are conducted through a Loan Account, a Reserve Account, and a Subsidy Account. Combining balance sheets and statements of income and changes in resources for each of these accounts are provided in Note 13 to these financial statements.

Loan Account

The resources of the Loan Account consist of the proceeds from borrowings, repayments of principal, and interest payments on loans extended by the Trust.

Reserve Account

The resources of the Reserve Account consist of amounts transferred by the IMF from the Special Disbursement Account and net earnings from investment of resources held in the Reserve Account and in the Loan Account.

The resources held in the Reserve Account are to be used by the Trustee, in the event that borrowers' principal repayments and interest payments, together with the authorized interest subsidy, are insufficient to repay loan principal and interest on borrowings of the Loan Account. The Trustee reviews the adequacy of the Reserve Account semiannually to determine whether sufficient resources are available to meet all obligations to the lenders to the Loan Account.

Subsidy Account

The resources held in the Subsidy Account consist of contributions to the Trust, including transfers of net earnings from the PRGF Administered Accounts, SDR 400 million transferred by the IMF from the Special Disbursement Account, net earnings on loans made to the Trust for the Subsidy Account, and the net earnings from investment of Subsidy Account resources.

The resources available in the Subsidy Account are drawn by the Trustee to pay the difference, with respect to each interest period, between the interest due from the borrowers under the Trust and the interest due on Loan Account borrowings. To the extent that resources in the Subsidy Account are insufficient for subsidy operations, the Trustee will transfer to the Subsidy Account resources in the PRGF-HIPC Trust Account not earmarked for assistance under PRGF-HIPC operations.

2. Summary of significant accounting policies

Basis of accounting

The financial statements of the PRGF Trust are prepared in accordance with International Financial Reporting Standards (IFRS). Specific accounting principles and disclosure practices are explained further below.

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Unit of account

The financial statements are expressed in terms of SDRs. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of the currencies in the SDR valuation basket. The IMF reviews the SDR valuation basket every five years. The latest review was completed in October 2000, and the new composition of the SDR valuation basket became effective on January 1, 2001. The currencies in the basket as of April 30, 2005, and 2004 and their amounts were as follows:

Currency	Amount
Euro	0.4260
Japanese yen	21.0000
Pound sterling	0.0984
U.S. dollar	0.5770

As of April 30, 2005, one SDR was equal to 1.51678 U.S. dollars (one SDR was equal to 1.45183 U.S. dollars as of April 30, 2004).

Foreign currency translation

Foreign currency transactions are recorded at the rate of exchange on the date of the transaction. At the balance sheet date, monetary assets and liabilities denominated in foreign currencies are reported using the closing exchange rates. Exchange differences arising from the settlement of transactions at rates different from those at the originating date of the transaction and unrealized foreign exchange differences on unsettled foreign currency monetary assets and liabilities are included in the determination of net income.

Cash and cash equivalents

Cash and cash equivalents include short-term deposits with a maturity of less than ninety days. These deposits are denominated in SDRs or other currencies and are carried at cost, which approximates fair value. Interest on these instruments varies and is based on prevailing market rates.

Investments

Investments are made in fixed-term deposits, domestic government bonds of the euro zone, Japan, the United Kingdom, and the United States, and obligations of multilateral organizations. For deposits, the Trust may invest only in obligations issued by institutions with a credit rating of A and above. For other investments, the Trust may invest only in obligations issued by an agency of a government and a multilateral organization with a minimum credit rating of AA.

Investments in debt securities, classified as available-for-sale securities, are measured initially at cost, including transaction costs. Subsequent to initial

recognition, all available-for-sale assets are remeasured to fair value, based on the quoted market price at the balance sheet date. Gains and losses arising from a change in the fair value of available-for-sale investments are recognized in the statement of income.

Investment income comprises interest income and realized and unrealized gains and losses on investments, including currency valuation differences arising from exchange rate movements against the SDR.

Loans

Loans in the Trust are initially recorded at the amount disbursed provided that the present value of the cash flows from stated interest due and the Subsidy Account is equal to or exceeds the disbursed amount. Thereafter, the carrying value of the loans is amortized cost.

Loans are repayable in 5½ to 10 years in semiannual installments. Interest on loans accrues at the stated interest rate of ½ of 1 percent per annum. It is the Trust's policy to exclude from income, interest on loans that are six months or more overdue. At each balance sheet date, the loans are reviewed to determine whether there is objective evidence of loan impairment. If any such evidence exists, an impairment loss is recognized to the extent that the present value of estimated future cash flows falls below the carrying amount.

Contributions

Contributions are reflected as increases in resources after the achievement of specified conditions and are subject to bilateral agreements stipulating how the resources are to be used.

Transfers

Internal transfers of resources within the IMF are accounted for under the accrual method of accounting.

Administrative costs

The expenses of conducting the activities of the Trust are borne by the General Resources Account of the IMF. In financial years 2005 and 2004, the reimbursements for these costs have been waived.

Comparatives

When necessary, comparative figures have been reclassified to conform with changes in the presentation of the current year.

Accounting and reporting developments

In December 2003, the International Accounting Standards Board revised International Accounting Standard 39, "Financial Instruments: Recognition and Measurement," which will become effective for financial year 2006. Upon adoption of the revised standard, and as permitted by the transition provisions, investments previously classified as available-for-sale will be reclassified as securities at fair-value-through-profit-and-loss. After the reclassification, changes in fair value of the investments would continue to be recognized in the income statement.

3. Financial risk management

In providing financial assistance to eligible country members and conducting its operations, the Trust is exposed to various types of risks, including credit, interest rate, exchange rate, and liquidity risks.

Credit risk refers to potential losses on credit outstanding owing to the inability, or unwillingness, of member countries to make loan repayments. To mitigate credit risk, the amount that eligible member countries may borrow is limited to 140 percent of their IMF quotas under three-year arrangements. Disbursements under PRGF arrangements are linked to performance criteria and the IMF, as trustee, conducts periodic reviews to ensure that such criteria are met. To protect the lenders to the Trust, resources are accumulated in the Reserve Account. These resources are available to repay the lenders in the event of delayed or nonpayment by borrowers.

Interest rate risk is the risk that future cash flows will fluctuate because of changes in market interest rates. Interest rate risk on the Trust's investments is managed by limiting the investment portfolio to a weighted-average effective duration that does not exceed three years.

Exchange rate risk is the exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on the Trust's financial position and cash flows. Exchange rate risk on the Trust's investments is managed by investing in securities denominated in SDRs or in the constituent currencies, with the same composition, of the SDR valuation basket.

Liquidity risk is the risk of non-availability of resources to meet the Trust's financing needs and obligations. The Trust conducts semiannual reviews to determine the adequacy of the resources accumulated in the Subsidy and Reserve accounts to meet liquidity needs. Resources in the Subsidy Account are expected to exceed estimated needs and the balance in the Reserve Account is projected to increase until it reaches the level sufficient to cover all outstanding PRGF Trust obligations to lenders.

4. Investments

Investments consisted of the following at April 30:

	2005	2004
	<i>(In thousands of SDRs)</i>	
Fixed-term deposits	1,185,595	234,845
Debt securities	<u>2,714,776</u>	<u>2,800,283</u>
Total	<u>3,900,371</u>	<u>3,035,128</u>

The maturities of the investments are as follows at April 30:

	2005	2004
	<i>(In thousands of SDRs)</i>	
Less than 1 year	3,635,060	2,831,390
1–3 years	228,811	168,542
3–5 years	36,500	—
Over 5 years	—	35,196
Total	<u>3,900,371</u>	<u>3,035,128</u>

5. Loans receivable

Resources of the Loan Account are committed to qualifying members for a three-year period, upon approval by the Trustee of three-year arrangements in support of the members' macroeconomic and structural adjustment programs. Interest on the outstanding loans, which is repayable in ten equal semiannual installments beginning 5½ years after disbursement, is set at the rate of ½ of 1 percent per annum. At April 30, 2005, the resources of the Loan Account included cumulative advances from the Reserve Account of SDR 75.2 million resulting from the nonpayment of principal by Zimbabwe (SDR 74.7 million at April 30, 2004). Scheduled repayments of loans by borrowers, including Zimbabwe's overdue obligations, are summarized below:

**Period of repayment,
financial year ending April 30**

	<i>(In thousands of SDRs)</i>
2006	854,789
2007	726,142
2008	815,876
2009	820,642
2010	836,220
2011 and beyond	2,459,161
Overdue	75,235
Total	<u>6,588,065</u>

As of April 30, use of credit in the Trust by the largest users was as follows:

	2005		2004	
	<i>(In millions of SDRs and percent of total PRGF credit)</i>			
Largest user of credit	1,028.2	15.6%	916.1	13.7%
Three largest users of credit	2,095.4	31.8%	1,920.4	28.7%
Five largest users of credit	2,655.9	40.3%	2,512.0	37.5%

The five largest users of credit as of April 30, 2005, were Pakistan, Zambia, the Democratic Republic of the Congo, Ghana, and Tanzania.

6. Borrowings

The Trust borrows on such terms and conditions as agreed between the Trustee and the lenders. Interest rates on borrowings as at April 30, 2005, were at a weighted average rate of 1.69 percent per annum (1.40 percent per annum as at April 30, 2004). The principal amounts of the borrowings are repayable between 5½ and 16 years after the first drawing.

Scheduled repayments of borrowings are summarized below:

**Period of repayment,
financial year ending April 30**

	<i>(In thousands of SDRs)</i>
2006	1,506,062
2007	984,181
2008	828,799
2009	827,633
2010	832,087
2011 and beyond	2,432,889
Total	<u>7,411,651</u>

The following summarizes the borrowing agreements concluded as of April 30:

	Amount undrawn	
	2005	2004
	<i>(In thousands of SDRs)</i>	
Loan Account	4,092,456	4,856,812
Subsidy Account	58,435	65,167

7. Investment income

Investment income comprised the following at April 30:

	2005	2004
	<i>(In thousands of SDRs)</i>	
Interest income	142,021	119,077
Realized losses, net	(7,915)	(70,151)
Unrealized (losses)/gains, net	(35,427)	26,647
Exchange rate losses, net	(306)	(196)
Total	<u>98,373</u>	<u>75,377</u>

8. Contributions

The Trustee accepts contributions for the Subsidy Account on such terms and conditions as agreed between the Trustee and the contributors. At April 30, 2005, cumulative contributions received, including transfers from the Special Disbursement Account, amounted to SDR 2,456.7 million (SDR 2,430.0 million at April 30, 2004).

9. Commitments under loan arrangements

An arrangement under the PRGF is a decision of the IMF, as Trustee, that gives a member the assurance that the Trust stands ready to provide foreign exchange or SDRs during a specified period and up to a specified amount in accordance with the terms of the decision. At April 30, 2005, undrawn balances under 31 loan arrangements amounted to SDR 1,315.0 million (SDR 2,088.9 million under 36 arrangements at April 30, 2004).

10. Related-party transactions

The expenses of conducting the business of the Trust are paid by the General Resources Account of the IMF and reimbursed by the Trust through the Special Disbursement Account; transfers corresponding to these expenses are made from the Reserve Account to the Special Disbursement Account when and to the extent needed. The Executive Board of the IMF decided to forgo such reimbursement to the General Resources Account, amounting to SDR 54.4 million and SDR 57.7 million for the financial years ended April 30, 2005, and 2004, respectively. For the financial year ended April 30, 2004, the Executive Board decided that an amount equivalent to the expenses should be transferred from the Reserve Account, through the Special Disbursement Account, to the PRGF-HIPC Trust. (No such decision was made for the financial year ended April 30, 2005.)

Cumulative transfers from the IMF, through the Special Disbursement Account, to the Reserve Account and Subsidy Account as of April 30, 2005, amounted to SDR 2,630.0 million and SDR 400 million, respectively (SDR 2,589.0 million and SDR 400 million, respectively, as of April 30, 2004). The Subsidy Account also receives contributions from member countries that had placed deposits in the Poverty Reduction and Growth Facility Administered Accounts at low interest rates. Net investment income transferred from the Poverty Reduction and Growth Facility Administered Accounts to the Subsidy Account amounted to SDR 0.3 million and SDR 1.9 million for the financial years 2005 and 2004, respectively.

11. Loans under the Saudi Fund for Development Special Account

The Saudi Fund for Development (SFD) Special Account was established at the request of the SFD to provide supplementary financing in association with loans under the PRGF Trust. The SFD makes funds available after a bilateral agreement between it and a recipient country has been effected. The SFD places funds, denominated in SDRs, in the SFD Special Account for disbursement to a recipient country simultaneously with disbursements under a PRGF arrangement. These loans are repayable in ten equal semiannual installments commencing 5½ years after the date of disbursement and interest on these loans is set at a rate of ½ of 1 percent per annum.

The cumulative receipts and uses of resources for the Saudi Fund for Development Special Account were SDR 100.9 million as of April 30, 2005 (SDR 97.9 million at April 30, 2004).

12. Subsequent event

On June 11, 2005, the G-8 finance ministers proposed an initiative that would involve debt relief, leading to full debt cancellation of outstanding obligations, of member countries eligible for HIPC assistance. Under this proposal, the cost of meeting the obligations of the eligible members would be met from existing IMF resources. In situations where other existing and projected debt relief obligations cannot be met from existing IMF resources (for example, for the protracted arrears cases such as Liberia, Somalia, and Sudan), donors have committed to providing the extra resources necessary. IMF resources that will be considered to finance this debt relief operation consist of available resources already earmarked to

provide debt relief or provide concessional financing (SDA, PRGF, and PRGF-HIPC resources) for an estimated amount of approximately SDR 4.0 billion as of April 30, 2005. The precise modalities of the proposal have not yet been developed. The G-8 finance ministers call upon all shareholders to support the debt relief proposals which would be put to the 2005 Annual Meetings.

13. Combining balance sheets and statements of income and changes in resources

The balance sheets and statements of income and changes in resources for each of the accounts in the PRGF Trust are presented below:

¹Since Structural Adjustment Facility (SAF) loans have been disbursed in connection with PRGF arrangements, the above list includes these loans, as well as loans disbursed to members under SAF arrangements. These loans are held by the Special Disbursement Account, and repayments of all SAF loans are transferred to the PRGF Reserve Account when received.

Schedule 2

Poverty Reduction and Growth Facility Trust
Cumulative contributions to and resources of the Subsidy Account
as at April 30, 2005

(In thousands of SDRs)

Contributor ¹	Amount
Direct contributions to the Subsidy Account	
Argentina	24,802
Australia	7,938
Bangladesh	532
Canada	186,098
China	9,200
Czech Republic	10,004
Denmark	38,299
Egypt	10,002
Finland	22,684
Germany	132,832
Iceland	3,200
India	7,891
Ireland	5,262
Italy	154,666
Japan	506,997
Korea	32,733

¹The loans under this agreement are made at market-related rates of interest fixed at the time the loan was disbursed.

²The agreement with France made before the enlargement of PRGF (SDR 800 million) provides that the interest rate shall be 0.5 percent on the first SDR 700 million drawn, and at variable, market-related rates of interest thereafter. The agreement with France made for the enlargement of the PRGF (SDR 2.1 billion) provides that the interest rate shall be 0.5 percent until the cumulative implicit interest subsidy reaches SDR 250 million, and at variable, market-related rates of interest thereafter.

³The loans under these agreements are made at variable, market-related rates of interest.

⁴The agreement with the OPEC Fund for International Development is for an amount of \$50 million, or SDR 33 million, based on the exchange rate of 0.659291 SDR per U.S. dollar as at April 30, 2005.

Independent Auditors' Report

**To the Board of Governors
of the International Monetary Fund
Washington, DC**

We have audited the accompanying balance sheet as of April 30, 2005, and the related statements of income, changes in resources, and cash flows for the year then ended of the following entities:

Poverty Reduction and Growth Facility Administered Accounts (the "Accounts")

- Austria
- Belgium
- Botswana
- Greece
- Indonesia
- Islamic Republic of Iran
- Portugal

These financial statements are the responsibility of Accounts management. Our responsibility is to express an opinion on these financial statements based on our audit. The Accounts' financial statements as of and for the year ended April 30, 2004, were audited by other auditors, whose report dated June 7, 2004, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with International Standards on Auditing and auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Accounts' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such 2005 financial statements present fairly, in all material respects, the financial position of the Poverty Reduction and Growth Facility Administered Accounts at April 30, 2005, and the results of their operations and their cash flows for the year then ended in conformity with International Financial Reporting Standards.

Poverty Reduction and Growth Facility Administered Accounts

Notes to the financial statements as at April 30, 2005, and 2004

1. Nature of operations

At the request of certain member countries, the IMF established the Poverty Reduction and Growth Facility Administered Accounts ("PRGF Administered Accounts" or "Administered Accounts") for the benefit of the Subsidy Account of the PRGF Trust and PRGF-HIPC Trust Account. The Administered Accounts comprise deposits made by contributors. The difference between interest earned by the Administered Accounts and the interest payable on deposits is transferred to the Subsidy Account of the PRGF Trust and PRGF-HIPC Trust Account.

The resources of each Administered Account are held separately from the assets of all other accounts of, or administered by, the IMF and may not be used to discharge liabilities or to meet losses incurred in the administration of other accounts.

2. Summary of significant accounting policies

Basis of accounting

The financial statements of the Administered Accounts are prepared in accordance with International Financial Reporting Standards (IFRS). Specific accounting principles and disclosure practices are explained further below.

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Unit of account

The financial statements are expressed in terms of SDRs. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of the currencies in the SDR valuation basket. The IMF reviews the SDR valuation basket every five years. The latest review was completed in October 2000 and the new composition of the SDR valuation basket became effective on January 1, 2001. The currencies in the basket as of April 30, 2005, and 2004 and their amounts were as follows:

Currency	Amount
Euro	0.4260
Japanese yen	21.0000
Pound sterling	0.0984
U.S. dollar	0.5770

As of April 30, 2005, one SDR was equal to 1.51678 U.S. dollars (1.45183 U.S. dollars as of April 30, 2004).

Cash and cash equivalents

Cash and cash equivalents include short-term deposits with a maturity of less than ninety days. These deposits are denominated in SDRs or other currencies and are carried at cost, which approximates fair value. Interest received on these instruments varies and is based on prevailing market rates.

Investments

Investments are made in debt securities which are classified as available-for-sale securities.

The available-for-sale investments are measured initially at cost, including transaction costs. Subsequent to initial recognition, all available-for-sale assets are remeasured to fair value based on the quoted market price at the balance sheet date. Gains and losses arising from a change in the fair value of available-for-sale investments are recognized in the statement of income.

Investment income comprises interest income and realized and unrealized gains and losses on investments, including currency valuation differences arising from exchange rate movements against the SDR.

Transfers

Internal transfers of resources within the IMF are accounted for under the accrual method of accounting.

Administrative costs

The expenses of conducting the activities of the Administered Accounts are incurred and borne by the General Resources Account of the IMF.

Accounting and reporting developments

In December 2003, the International Accounting Standards Board revised International Accounting Standard 39, "Financial Instruments: Recognition and Measurement," which will become effective for financial year 2006. Upon adoption of the revised standard, and as permitted by the transition provisions, investments previously classified as available-for-sale will be reclassified as securities at fair-value-through-profit-and-loss. After the reclassification, changes in fair value of the investments would continue to be recognized in the income statement.

Comparatives

When necessary, comparative figures have been reclassified to conform with changes in the presentation of the current year.

3. Financial risk management

In conducting their operations, the PRGF Administered Accounts are exposed to various types of risks, including interest rate and exchange rate risks.

Interest rate risk is the risk that future cash flows will fluctuate because of changes in market interest rates. Interest rate risk on the PRGF Administered Accounts' investments is managed by limiting the investment portfolio to a weighted-average effective duration that does not exceed three years.

Exchange rate risk is the exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on the PRGF Administered Accounts' financial position and cash flows. Exchange rate risk on the investments is managed by investing in securities denominated in SDRs or in the constituent currencies, with the same composition of the SDR valuation basket.

4. Investments

Investments consisted of the following at April 30:

	2005	2004
	<i>(In thousands of SDRs)</i>	
Fixed-term deposits	25,000	—
Debt securities	<u>8,336</u>	<u>19,726</u>

5. Deposits

Austria

The Administered Account Austria was established on December 27, 1988, for the administration of resources deposited in the account by the Austrian National Bank. Two deposits (one of SDR 60.0 million made on December 30, 1988, and one of SDR 50.0 million made on August 10, 1995) are to be repaid in ten equal semiannual installments beginning five and a half years after the date of each deposit and ending at the end of the tenth year after the date of each deposit. The deposits bear interest at a rate of ½ of 1 percent a year. The first deposit from Austria has been repaid in full.

Belgium

The Administered Account Belgium was established on July 27, 1988, for the administration of resources deposited in the account by the National Bank of Belgium. Four deposits (SDR 30.0 million made on July 29, 1988; SDR 35.0 million made on December 30, 1988; SDR 35.0 million made on June 30, 1989; and SDR 80.0 million made on April 29, 1994) have an initial maturity of six months and are renewable by the IMF on the same basis. The final maturity of each deposit, including renewals, will be ten years from the initial dates of the individual deposits. The deposits bear interest at a rate of ½ of 1 percent a year. In accordance with an addendum to the account, effective on July 24, 1998, the maturities of the first three deposits will be extended by the National Bank of Belgium, for further periods of six months, provided that the total maturity period of each deposit does not exceed five years. The deposits are invested by the IMF as administrator, and the IMF as administrator pays the National Bank of Belgium interest on each deposit at an annual rate of ½ of 1 percent. The difference between the interest paid to the National Bank of Belgium and the interest earned on the deposits (net of any cost to the IMF) was retained in the account and invested. As of January 31, 2001, the Ministry of Finance of Belgium authorized a transfer of SDR 8.2 million in net earnings to the PRGF-HIPC Trust. All deposits have been repaid in full.

Botswana

The Administered Account Botswana was established on July 1, 1994, for the administration of resources deposited in the account by the Bank of Botswana. The deposit, totaling SDR 6.9 million, is to be repaid in one installment ten years after the date of deposit. The deposit bears interest at a rate of 2 percent a year. The deposit was repaid in full on March 1, 2004.

Greece

The Administered Account Greece was established on November 30, 1988, for the administration of resources deposited in the account by the Bank of Greece. Two deposits of SDR 35.0 million each (December 15, 1988, and April 29, 1994) are to be repaid in ten equal semiannual installments beginning five and a half years after the date of deposit and will be completed at the end of the tenth year after the date of the deposits. The deposits bear interest at a rate of ½ of 1 percent a year. The two deposits from Greece have been repaid in full.

Indonesia

The Administered Account Indonesia was established on June 30, 1994, for the administration of resources deposited in the account by Bank Indonesia. The deposit, totaling SDR 25.0 million, is to be repaid in one installment ten years after the date the deposit was made. The interest payable on the deposit is equivalent to that obtained for the investment of the deposit less 2 percent a year. Upon maturity in June 2004, the deposit was reinvested for another ten years (according to the amendment of the instrument) and investment income of 2 percent per annum (or any lesser amount if investment returns are below 2 percent) transferred to the PRGF-HIPC Trust.

Islamic Republic of Iran

The Administered Account Islamic Republic of Iran was established on June 6, 1994, for the administration of resources deposited in the account by the Central Bank of the Islamic Republic of Iran (CBIRI). The CBIRI has made five annual deposits, each of SDR 1.0 million. All of the deposits are to be repaid at the end of ten years after the date of the first deposit. Each deposit bears interest at a rate of ½ of 1 percent a year. All deposits have been repaid in full.

Portugal

The Administered Account Portugal was established on May 16, 1994, for the administration of resources deposited in the account by the Banco de Portugal (BdP). The BdP has made six annual deposits, each of SDR 2.2 million. Each deposit is to be repaid in five equal annual installments beginning six years after the date of the deposit and will be completed at the end of the tenth year after the date of the deposit. Each deposit bears interest at a rate of ½ of 1 percent a year.

6. Related-party transactions

The difference between the income earned by the Administered Accounts on the amounts invested and the interest payable on the deposits of the Administered Accounts, net of any cost, is transferred to the Subsidy Account of the PRGF Trust and the PRGF-HIPC Trust Account. As of April 30, 2005, and 2004, net investment income transferred from the Administered Accounts to the Subsidy Account amounted to SDR 0.3 million and SDR 1.9 million, respectively. Transfers to PRGF-HIPC Trust amounted to SDR 0.3 million as of April 30, 2005 (there were no transfers as of April 30, 2004).

Independent Auditors' Report

**To the Board of Governors
of the International Monetary Fund
Washington, DC**

We have audited the accompanying combined balance sheet of the Poverty Reduction and Growth Facility-Heavily Indebted Poor Countries Trust and Related Accounts (the "Company") as of April 30, 2005, and the related combined statements of income, changes in resources, and cash flows for the year then ended. These combined financial statements are the responsibility of Company management. Our responsibility is to express an opinion on these combined financial statements based on our audit. The Company's combined financial statements as of and for the year ended April 30, 2004, were audited by other auditors, whose report dated June 7, 2004, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with International Standards on Auditing and auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such 2005 financial statements present fairly, in all material respects, the combined financial position of the Poverty Reduction and Growth Facility-Heavily Indebted Poor Countries Trust and Related Accounts at April 30, 2005, and the combined results of their operations and their cash flows for the year then ended in conformity with International Financial Reporting Standards.

Our audit was conducted for the purpose of forming an opinion on the basic 2005 combined financial statements taken as a whole. The supplemental schedules listed on pages 204 to 207 are presented for the purpose of additional analysis and are not a required part of the basic combined financial statements. These schedules are the responsibility of Company management. Such 2005 schedules have been subjected to the auditing procedures applied in our audit of the basic combined financial statements and, in our opinion, are fairly stated in all material respects when considered in relation to the basic combined financial statements taken as a whole. The 2004 schedules were subjected to auditing procedures by other auditors, whose report dated June 7, 2004, referred to above, stated that such information is fairly stated in all material respects when considered in relation to the basic 2004 combined financial statements taken as a whole.

PRGF-HIPC Trust and Related Accounts

Notes to the financial statements as at April 30, 2005, and 2004

1. Nature of operations

The Trust for Special PRGF Operations for the Heavily Indebted Poor Countries and for Interim PRGF Subsidy Operations (the PRGF-HIPC Trust or the Trust) and Related Accounts comprise the PRGF-HIPC Trust Account, the Umbrella Account for HIPC Operations, and the Post-SCA-2 Administered Account. The PRGF-HIPC Trust Account comprises three subaccounts: the PRGF-HIPC, PRGF, and HIPC subaccounts. Combining balance sheets and income statements and changes in resources for each of these accounts are provided in Note 10. Transactions between the above accounts are eliminated on combination in the combined balance sheets and combined income statements and changes in resources.

PRGF-HIPC Trust

The PRGF-HIPC Trust, for which the IMF is Trustee, was established on February 4, 1997, to provide balance of payments assistance to low-income developing members by making grants or loans to eligible members for the purpose of reducing their external debt burden and for interim PRGF subsidy purposes. The resources of the PRGF-HIPC Trust are held separately from the assets of all other accounts of, or administered by, the IMF and may not be used to discharge liabilities or to meet losses incurred in the administration of other accounts.

The operations of the PRGF-HIPC Trust are conducted through the PRGF-HIPC Trust Account and the Umbrella Account for HIPC Operations.

PRGF-HIPC Trust Account and Related Accounts

The resources of the PRGF-HIPC Trust Account consist of grant contributions, borrowings, and other types of investments made by contributors; amounts transferred by the IMF from the Special Disbursement Account and the General Resources Account; and net earnings from investment of resources held in the PRGF-HIPC Trust Account.

The PRGF-HIPC subaccount holds resources that can finance either HIPC operations or interim PRGF subsidy operations; the PRGF subaccount holds resources earmarked for interim PRGF subsidy operations, while the HIPC subaccount holds resources earmarked for HIPC operations. PRGF-HIPC subaccount resources used to finance HIPC operations through the HIPC subaccount are repayable to the PRGF-HIPC subaccount and bear interest at a rate equal to the average return on investments in the Special Disbursement Account.

The resources held in the PRGF-HIPC Trust Account are to be used by the Trustee to make grants or loans to eligible members that qualify for assistance under the HIPC Initiative and for subsidizing the interest rate on interim PRGF operations to PRGF-eligible members.

Umbrella Account for HIPC Operations

The Umbrella Account for HIPC Operations (the Umbrella Account) receives and administers the proceeds of grants or loans made to eligible members that qualify for assistance under the terms of the PRGF-HIPC Trust. Within the Umbrella Account, resources received are administered through the establishment of subaccounts for each eligible member upon the approval of disbursements under the PRGF-HIPC Trust.

The resources of a subaccount of the Umbrella Account consist of (1) amounts disbursed from the PRGF-HIPC Trust Account as grants or loans for the benefit of a member, and (2) net earnings from investment of the resources held in the subaccount.

The resources held in a subaccount of the Umbrella Account are to be used to meet the member's debt obligations to the IMF, or accounts administered by it, in accordance with the schedule agreed upon by the Trustee and the member for the use of the proceeds of the PRGF-HIPC Trust disbursements.

Post-SCA-2 Administered Account

The Post-SCA-2 Administered Account, which is administered by the IMF on behalf of members, was established on December 8, 1999, for the temporary administration of resources transferred by members following the termination of the second Special Contingent Account (SCA-2) in the General Department of the IMF, prior to the final disposition of those resources.

Resources received from a member's cumulative SCA-2 contributions, together with the member's pro rata share of investment returns, shall be transferred to the PRGF-HIPC Trust or to the member, in accordance with the member's instructions. The assets held in the Post-SCA-2 Administered Account are held separately from the assets and property of all other accounts of, or administered by, the IMF and may not be used to discharge liabilities or to meet losses incurred in the administration of other accounts.

2. Summary of significant accounting policies

Basis of accounting

The financial statements of the PRGF-HIPC Trust and Related Accounts are prepared in accordance with International Financial Reporting Standards (IFRS). Specific accounting principles and disclosure practices are explained further below.

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Unit of account

The financial statements are expressed in terms of SDRs. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of the currencies in the SDR valuation basket. The IMF reviews the SDR valuation basket every five years. The latest review was completed in October 2000 and the new composition of the SDR valuation basket became effective on January 1, 2001. The currencies in the basket as of April 30, 2005, and 2004 and their amounts were as follows:

Currency	Amount
Euro	0.4260
Japanese yen	21.0000
Pound sterling	0.0984
U.S. dollar	0.5770

As of April 30, 2005, one SDR was equal to 1.51678 U.S. dollars (one SDR was equal to 1.45183 U.S. dollars as of April 30, 2004).

Foreign currency translation

Foreign currency transactions are recorded at the rate of exchange on the date of the transaction. At the balance sheet date, monetary assets and liabilities denominated in foreign currencies are reported using the closing exchange rates. Exchange differences arising from the settlement of transactions at rates different from those at the originating date of the transaction and unrealized foreign exchange differences on unsettled foreign currency monetary assets and liabilities are included in the determination of net income.

Cash and cash equivalents

Cash and cash equivalents include short-term deposits with a maturity of less than ninety days. These deposits are denominated in SDRs or other currencies and are carried at cost, which approximates fair value. Interest received on these instruments varies and is based on prevailing market rates.

Investments

Investments are made in fixed-term deposits; domestic government bonds of the euro zone, Japan, the United Kingdom, and the United States; and obligations of multilateral organizations. For deposits, the Trust may invest only in obligations issued by institutions with a credit rating of A and above. For other investments, the Trust may invest only in obligations issued by an agency of a government and a multilateral organization with a minimum credit rating of AA.

Investments in debt securities, classified as available-for-sale securities, are measured initially at cost, including transaction costs. Subsequent to initial recognition, all available-for-sale assets are remeasured to fair value, based on the quoted market price at the balance sheet date. Gains and losses arising from a change in the fair value of available-for-sale investments are recognized in the statement of income.

Investment income comprises interest income and realized and unrealized gains and losses on investments, including currency valuation differences arising from exchange rate movements against the SDR.

Contributions

Contributions are reflected as increases in resources and are subject to bilateral agreements stipulating how the resources are to be used.

Transfers

Internal transfers of resources within the IMF are accounted for under the accrual method of accounting.

Administrative costs

The expenses of conducting activities of the Trust and related accounts are borne by the General Resources Account of the IMF.

Comparatives

When necessary, comparative figures have been reclassified to conform with changes in the presentation of the current year.

Accounting and reporting developments

In December 2003, the International Accounting Standards Board revised International Accounting Standard 39, "Financial Instruments: Recognition and Measurement," which will become effective for financial year 2006. Upon adoption of the revised standard, and as permitted by the transition provisions, investments previously classified as available-for-sale will be reclassified as securities at fair-value-through-profit-and-loss. After the reclassification, changes in fair value of the investments would continue to be recognized in the income statement.

3. Financial risk management

In providing financial assistance to eligible country members and conducting its operations, the Trust is exposed to various types of risks, including interest rate and exchange rate risks.

Interest rate risk is the risk that future cash flows will fluctuate because of changes in market interest rates. Interest rate risk on the Trust's investments is managed by limiting the investment portfolio to a weighted-average effective duration that does not exceed three years.

Exchange rate risk is the exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on the Trust's financial position and cash flows. Exchange rate risk on the Trust's investments is managed by investing in securities denominated in SDRs or in the constituent currencies, with the same composition of the SDR valuation basket.

4. Investments

Investments consisted of the following at April 30:

	2005	2004
	<i>(In thousands of SDRs)</i>	
Fixed-term deposits	414,213	254,807
Debt securities	291,193	314,206
Total	<u>705,406</u>	<u>569,013</u>

The maturities of the investments are as follows at April 30:

	2005	2004
	<i>(In thousands of SDRs)</i>	
Less than 1 year	687,839	564,272
1-3 years	17,567	4,741
Total	<u>705,406</u>	<u>569,013</u>

5. Borrowings

The Trust borrows on such terms and conditions as agreed between the Trust and the lenders. Interest rates on borrowings at April 30, 2005, and 2004 varied between 0 percent and 2 percent a year. The principal amounts of the borrowings are repayable in one installment at their maturity dates. Scheduled repayments of borrowings are summarized below:

Financial year ending April 30	
	<i>(In thousands of SDRs)</i>
2006	—
2007	310
2008	20,066
2009	25,000
2010	277,416
2011 and beyond	287,532
Total	<u>610,324</u>

Borrowings, excluding the effect of foreign currency fluctuations, during the financial year ended April 30, 2005, amounted to SDR 3.0 million (SDR 6.2 million for the financial year ended April 30, 2004). During the year ended April 30, 2005, repayments amounted to SDR 15.0 million (none in 2004).

6. Investment income

Investment income at April 30 comprised:

	2005	2004
	<i>(In thousands of SDRs)</i>	
Interest income	27,873	25,978
Realized losses, net	(3,418)	(7,722)
Unrealized (losses)/gains, net	(2,087)	2,619
Exchange rate gains, net	40	4
Total	<u>22,408</u>	<u>20,879</u>

7. Transfers receivable and payable

At April 30, 2005, the HIPC subaccount had transfers payable to the PRGF-HIPC subaccount arising from past disbursements to the Umbrella Account under the HIPC Initiative in the amount of SDR 1,316.0 million, including interest (SDR 1,012.0 million at April 30, 2004). Interest payable between subaccounts is eliminated on combination.

8. Related-party transactions

The expenses of conducting the business of the Trust are paid by the General Resources Account of the IMF.

Cumulative transfers from the Special Disbursement Account of the IMF to the PRGF-HIPC Trust amounted to SDR 573.8 million as of April 30, 2005 (SDR 409.7 million as of April 30, 2004). The PRGF-HIPC Trust also receives contributions from member countries that had placed deposits in the Poverty Reduction and Growth Facility Administered Accounts. Net investment income transferred from the Poverty Reduction and Growth Facility Administered Account to the PRGF-HIPC Trust amounted to SDR 0.3 million for financial year 2005 (none in 2004).

9. Subsequent event

On June 11, 2005, the G-8 finance ministers proposed an initiative that would involve debt relief, leading to full debt cancellation of outstanding obligations, of member countries eligible for HIPC assistance. Under this proposal, the cost of meeting the obligations of the eligible members would be met from existing IMF resources. In situations where other existing and projected debt relief obligations cannot be met from existing IMF resources (for example, for the protracted arrears cases such as Liberia, Somalia, and Sudan), donors have committed to providing the extra resources necessary. IMF resources that will be considered to finance this debt relief operation consist of available resources already earmarked to provide debt relief or provide concessional financing (SDA, PRGF, and PRGF-HIPC resources) for an estimated amount of approximately SDR 4.0 billion as of April 30, 2005. The precise modalities of the proposal have not yet been developed. The G-8 finance ministers call upon all shareholders to support the debt relief proposals, which would be put to the 2005 Annual Meetings.

10. Combining balance sheets and statements of income and changes in resources

The balance sheets and statements of income and changes in resources for the accounts and subaccounts in the PRGF-HIPC Trust and Related Accounts are presented below.

Independent Auditors' Report

**To the Board of Governors
of the International Monetary Fund
Washington, DC**

We have audited the accompanying balance sheet as of April 30, 2005, and the related statements of income, changes in resources, and cash flows for the year then ended of the following entities:

Other Administered Accounts (the "Accounts")

- Administered Account Japan
- Administered Account for Selected Fund Activities - Japan
- Framework Administered Account for Technical Assistance Activities
- Administered Account - Spain
- Supplementary Financing Facility Subsidy Account
- The Post-Conflict and Natural Disaster Emergency Assistance Subsidy Account

These financial statements are the responsibility of Accounts management. Our responsibility is to express an opinion on these financial statements based on our audit. The Accounts' financial statements as of and for the year ended April 30, 2004, were audited by other auditors, whose report dated June 7, 2004, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with International Standards on Auditing and auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Accounts' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such 2005 financial statements present fairly, in all material respects, the financial position of the Other Administered Accounts at April 30, 2005, and the results of their operations and their cash flows for the year then ended in conformity with International Financial Reporting Standards.

Other Administered Accounts

Notes to the financial statements

as at April 30, 2005, and 2004

1. Nature of operations

At the request of members, the IMF has established special purpose accounts to administer contributed resources and to perform financial and technical services consistent with the purposes of the IMF. The assets of each account and each subaccount are separate from the assets of all other accounts of, or administered by, the IMF and are not to be used to discharge liabilities or to meet losses incurred in the administration of other accounts.

Administered Account Japan

At the request of Japan, the IMF established an account on March 3, 1989, to administer resources made available by Japan or other countries with Japan's concurrence that are to be used to assist certain members with overdue obligations to the IMF. The resources of the account are to be disbursed in amounts specified by Japan and to members designated by Japan.

Administered Account for Selected Fund Activities—Japan

At the request of Japan, the IMF established the Administered Technical Assistance Account—Japan on March 19, 1990, to administer resources contributed by Japan to finance technical assistance to member countries. On July 21, 1997, the account was renamed the Administered Account for Selected Fund Activities—Japan and amended to include the administration of resources contributed by Japan in support of the IMF's Regional Office for Asia and the Pacific (OAP). The resources of the account designated for technical assistance activities are used with the approval of Japan and include the provision of scholarships. The resources designated for the OAP are used as agreed between Japan and the IMF for certain activities of the IMF with respect to Asia and the Pacific through the OAP. Disbursements can also be made from the account to the General Resources Account to reimburse the IMF for qualifying technical assistance projects and OAP expenses.

Framework Administered Account for Technical Assistance Activities

The Framework Administered Account for Technical Assistance Activities ("the Framework Account") was established by the IMF on April 3, 1995, to receive and administer contributed resources that are to be used to finance technical assistance consistent with the purposes of the IMF. The financing of technical assistance activities is implemented through the establishment and operation of subaccounts within the Framework Account. Resources are to be used in accordance with the written understandings between the contributor and the Managing Director. Disbursements can also be made from the Framework Account to the General Resources Account to reimburse the IMF for its costs incurred on behalf of technical assistance activities financed by resources from the Framework Account.

Subaccount for Japan Advanced Scholarship Program

At the request of Japan, this subaccount was established on June 6, 1995, to finance the cost of studies and training of nationals of member countries

in macroeconomics and related subjects at selected universities and institutions. The scholarship program focuses primarily on the training of nationals of Asian member countries, including Japan.

Rwanda—Macroeconomic Management Capacity Subaccount

At the request of Rwanda, this subaccount was established on December 20, 1995, to finance technical assistance to rehabilitate and strengthen Rwanda's macroeconomic management capacity.

Australia—IMF Scholarship Program for Asia Subaccount

At the request of Australia, this subaccount was established on June 5, 1996, to finance the cost of studies and training of government and central bank officials in macroeconomic management so as to enable them to contribute to their countries' achievement of sustainable economic growth and development. The program focuses primarily on the training of nationals of Asian countries.

Switzerland Technical Assistance Subaccount

At the request of Switzerland, this subaccount was established on August 27, 1996, to finance the costs of technical assistance activities of the IMF that consist of policy advice and training in macroeconomic management.

French Technical Assistance Subaccount

At the request of France, this subaccount was established on September 30, 1996, to cofinance the costs of training in economic fields for nationals of certain member countries.

Denmark Technical Assistance Subaccount

At the request of Denmark, this subaccount was established on August 25, 1998, to finance the costs of technical assistance activities of the IMF that consist of advising on policy and administrative reforms in the fiscal, monetary, and related statistical fields.

Australia Technical Assistance Subaccount

At the request of Australia, this subaccount was established on March 7, 2000, to finance the costs of technical assistance activities of the IMF that consist of advising on the design of policy and administrative reforms in the fiscal, monetary, and related statistical fields, as well as to provide training in the formulation and implementation of macroeconomic and financial policies.

The Netherlands Technical Assistance Subaccount

At the request of the Netherlands, this subaccount was established on July 27, 2000, to finance projects that seek to enhance the capacity of the members to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and projects that strengthen the legal and administrative framework in these core areas.

The United Kingdom Department for International Development (DFID) Technical Assistance Subaccount

At the request of the United Kingdom, this subaccount was established on June 29, 2001, to finance projects that seek to enhance the capacity of the members to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and projects that strengthen the legal and administrative framework in these core areas.

Italy Technical Assistance Subaccount

At the request of Italy, this subaccount was established on November 16, 2001, to finance projects that seek to enhance the capacity of certain members to formulate and implement policies related to fiscal, financial, and statistical standards and codes, including training programs and projects that strengthen the legal and administrative framework in these core areas.

Pacific Financial Technical Assistance Centre Subaccount

At the request of Australia and New Zealand, this subaccount was established on May 22, 2002, to finance activities of the Pacific Financial Technical Assistance Centre that seek to enhance the capacity of Pacific island countries and territories to formulate and implement policies related to macroeconomic, fiscal, monetary, financial, and statistical fields, including training and activities that strengthen the legal and administrative framework in these core areas.

Africa Regional Technical Assistance Centers Subaccount

At the request of France, Germany, Italy, the Netherlands, Norway, Sweden, and the United Kingdom, this subaccount was established on August 9, 2002, to finance activities of the Africa Regional Technical Assistance Centers that seek to support the Poverty Reduction Strategy Paper process in sub-Saharan African countries by fostering the capacity for sound macroeconomic management, strong fiscal institutions and financial systems, and timely and accurate collection and dissemination of economic data, including training and activities that strengthen the legal and administrative framework in these core areas. The resources of this subaccount are contributed by the above governments and other governments or official agencies, including the Russian Federation, Luxembourg, China, and Switzerland, that reached an understanding with the IMF subsequent to the establishment.

Sweden Technical Assistance Subaccount

At the request of Sweden, this subaccount was established on November 25, 2002, to finance projects that seek to enhance the capacity of members to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and projects that strengthen the legal and administrative framework in these core areas.

China Technical Assistance Subaccount

At the request of the People's Republic of China, this subaccount was established on May 23, 2003, to finance projects that seek to enhance the capacity of members to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and projects that strengthen the legal and administrative framework in these core areas.

Technical Assistance Subaccount for Iraq

At the request of Australia, Canada, Italy, and the United Kingdom, this subaccount was established on July 22, 2003, to finance technical assistance activities that seek to enhance the capacity of Iraq to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and activities that strengthen the legal and administrative framework in these core areas. The resources of this subaccount are contributed by the above governments and the government of Sweden, which reached an understanding with the IMF subsequent to the establishment.

Canada Technical Assistance Subaccount

At the request of Canada, this subaccount was established on January 28, 2004, to finance projects that seek to enhance the capacity of members to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and projects that strengthen the legal and administrative framework in these core areas.

Middle East Regional Technical Assistance Center Subaccount

At the request of France and Lebanon, this subaccount was established on August 20, 2004, to finance the technical assistance activities of the Middle East Regional Technical Assistance Center (METAC). METAC seeks to support the efforts of the participating countries/territories to achieve effective macroeconomic management, strong fiscal institutions and financial systems, and timely and accurate collection and dissemination of economic data, including training and activities that strengthen the legal and administrative framework in these areas. The current METAC's participating countries/territories include the Islamic Republic of Afghanistan, Iraq, Jordan, Lebanon, Libya, Sudan, Syria, West Bank and Gaza, and Yemen. The resources of this subaccount are contributed by the above governments and other governments or official agencies, including Egypt and Kuwait, that reached an understanding with the IMF subsequent to the establishment.

Technical Assistance Subaccount to Support Macroeconomic and Financial Policy Formulation and Management

At the request of Norway, this subaccount was established on September 29, 2004, to finance projects that seek to enhance the capacity of members to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and projects that strengthen the legal and administrative framework in these core areas. The activities to be financed from the Subaccount will seek in the first instance to enhance the capacity of Poverty Reduction and Growth Facility-eligible countries to formulate and implement the strategies needed to achieve the goals described in their Poverty Reduction Strategy Papers in those core areas of competence of the Fund, including strengthening their anti-money-laundering and countering-the-financing-of-terrorism legislation and implementation capacity, and improving central bank functions and operations in low-income countries.

Spain Technical Assistance Subaccount

At the request of Spain, this subaccount was established on March 2, 2005, to finance projects that seek to enhance the capacity of members to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and projects that strengthen the legal and administrative framework in these core areas.

Administered Account—Spain

At the request of Spain, the IMF established an account on March 20, 2001, to receive and disburse resources up to \$1 billion contributed by Spain for Argentina. The resources of this account are to be used to assist Argentina in the implementation of the adjustment program supported by the IMF under the Stand-By Arrangement for Argentina approved on March 10, 2000, and augmented on January 12, 2001.

Supplementary Financing Facility Subsidy Account

The Supplementary Financing Facility Subsidy Account administered by the IMF was established in December 1980 to assist low-income developing country members to meet the costs of using resources made available through the IMF's Supplementary Financing Facility and under the policy on exceptional use. All repurchases due under these policies were scheduled for completion by January 31, 1991, and the final subsidy payments were approved in July 1991. However, two members (Liberia and Sudan) overdue in the payment of charges remain eligible to receive previously approved subsidy payments of SDR 2.2 million when their overdue charges are settled. Accordingly, the Account remains in operation and has retained amounts for payment to these members after the overdue charges are paid.

The Post-Conflict and Natural Disaster Emergency Assistance Subsidy Account

The Post-Conflict Emergency Assistance Subsidy Account for PRGF-Eligible Members was established in May 2001 to administer contributed resources for the purpose of providing assistance to PRGF-eligible members in support of their adjustment efforts. The account was amended on January 21, 2005, to provide for the subsidization of emergency assistance for natural disasters for PRGF-eligible members. Contributions to this account will be used to provide grants to PRGF-eligible members that have made post-conflict and natural disaster emergency assistance purchases under the IMF General Resources Account, effectively subsidizing the basic rate of charge on these purchases to 0.5 percent per annum. The subsidy to each eligible member would be prorated if resources are insufficient to reduce the basic rate of charge to 0.5 percent.

2. Summary of significant accounting policies

Basis of accounting

The financial statements of the Other Administered Accounts are prepared in accordance with International Financial Reporting Standards (IFRS). Specific accounting principles and disclosure practices are explained further below.

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Unit of account

Administered Account Japan, Administered Account for Selected Fund Activities—Japan, and Framework Administered Account for Technical Assistance Activities, and Administered Account—Spain

These accounts are expressed in U.S. dollars. All transactions and operations of these accounts, including the transfers to and from the accounts, are

denominated in U.S. dollars, except for transactions and operations in respect of the OAP, which are denominated in Japanese yen, or transactions in other currencies as agreed between Japan and the IMF. Contributions denominated in other currencies are converted into U.S. dollars upon receipt of the funds.

The Supplementary Financing Facility Subsidy Account, the Post-Conflict and Natural Disaster Emergency Assistance Subsidy Account

These accounts are expressed in terms of SDRs. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of the currencies in the basket. The IMF reviews the SDR valuation basket every five years. The latest review was completed in October 2000 and the composition of the SDR valuation basket became effective from January 1, 2001. The currencies in the basket as of April 30, 2005, and 2004 and their amounts were as follows:

Currency	Amount
Euro	0.4260
Japanese yen	21.0000
Pound sterling	0.0984
U.S. dollar	0.5770

As of April 30, 2005, one SDR was equal to 1.51678 U.S. dollars (one SDR was equal to 1.45183 U.S. dollars as of April 30, 2004).

Transactions and operations of the accounts are denominated in SDRs. Contributions denominated in other currencies are converted into SDRs upon receipt of the funds.

Cash and cash equivalents

Cash and cash equivalents include short-term deposits with a maturity of less than ninety days. These deposits are carried at cost, which approximates fair value. Interest on these instruments varies and is based on prevailing market rates.

Contributions

Bilateral contributions are reflected as increases in resources after the achievement of specified conditions and are subject to bilateral agreements stipulating how the resources are to be used.

Payments to and on behalf of beneficiaries

Payments to and on behalf of beneficiaries are recognized when the specified conditions in the respective agreements are achieved.

Transfers

Internal transfers of resources within the IMF are accounted for under the accrual method of accounting.

Foreign currency translation

Foreign currency transactions are recorded at the rate of exchange on the date of the transaction. At the balance sheet date, monetary assets and liabilities denominated in foreign currencies are reported using the closing exchange rates. Exchange differences arising from the settlement of transaction at rates different from those at the date of the transaction and unrealized foreign exchange differences on unsettled foreign currency monetary assets and liabilities are included in the determination of net income.

Administrative expenses

The expenses of conducting the activities of the Other Administered Accounts are incurred and borne by the General Department of the IMF. To help defray the expenses incurred by the IMF in the administration of the Administered Account for Selected Fund Activities—Japan and the Framework Administered Account for Technical Assistance Activities, reimbursement equal to 13 percent of the expenses financed from the accounts is paid to the General Resources Account from these accounts. The Administered Account—Spain pays the General Resources Account an annual fee of \$40,000 for administrative costs incurred. As at April 30, 2005, the administrative costs for the Administered Account for Selected Fund Activities—Japan amounted to \$2.3 million (\$2.8 million at April 30, 2004), and for the Framework Administered Account for Technical Assistance Activities \$2.2 million (\$1.6 million at April 30, 2004). These amounts are included in payments to and on behalf of beneficiaries on the statements of income and changes in resources.

Comparatives

When necessary, comparative figures have been reclassified to conform with changes in the presentation of the current year.

3. Cumulative contributions and disbursements

The cumulative contributions to and disbursements from these administered accounts are as follows:

Account	April 30, 2005		April 30, 2004	
	Cumulative contributions	Cumulative disbursements ¹	Cumulative contributions	Cumulative disbursements ¹
	<i>(In millions of U.S. dollars)</i>

The Post-Conflict and Natural Disaster Emergency Assistance Subsidy Account	20.6	2.3	9.6	1.9

¹Disbursements had been made from resources contributed to these accounts as well as from interest earned on these resources.

4. Transfer of resources

Resources of the Supplementary Financing Facility Subsidy Account in excess of the remaining subsidy payments are to be transferred to the Special Disbursement Account. At April 30, 2005, and 2004, subsidy payments totaling SDR 2.2 million had not been made to Liberia and Sudan and were being held pending the payment of overdue charges by these members.

5. Accounts termination

Administered Account Japan

The account can be terminated by the IMF or by Japan at any time. Any remaining resources in the account at termination are to be returned to Japan.

Administered Account for Selected Fund Activities—Japan

The account can be terminated by the IMF or by Japan at any time. Any resources that may remain in the account at termination, net of accrued liabilities under technical assistance projects or in respect of the OAP, are to be returned to Japan.

Framework Administered Account for Technical Assistance Activities

The Framework Account or any subaccount thereof may be terminated by the IMF at any time. The termination of the Framework Account shall terminate each subaccount thereof. A subaccount may also be terminated by the contributor of the resources to the subaccount. Termination shall be effective on the date that the IMF or the contributor, as the case may be, receives notice of termination. Any balances, net of the continuing liabilities and commitments under the activities financed, that may remain in a subaccount upon its termination are to be returned to the contributor.

Administered Account—Spain

The account will be terminated when Argentina repays all the resources that were disbursed from the account to Argentina, or at an earlier time as agreed between Spain and the IMF, following consultations between Spain and Argentina. Any remaining resources in the account at termination are to be returned to Spain.

The Post-Conflict and Natural Disaster Emergency Assistance Subsidy Account

The account can be terminated by the IMF at any time. Any remaining balances after discharge of all obligations of the account upon the account's termination are to be returned to the contributors in proportion to their contributions.
