World Economic and Financial Surveys

This series (ISSN 0258-7440) contains biannual, annual, and periodic studies covering monetary and financial issues of importance to the global economy. The core elements of the series are the *World Economic Outlook* report, usually published in May and October, and the annual report on *International Capital Markets*. Other studies assess international trade policy, private market and official financing for developing countries, exchange and payments systems, export credit policies, and issues discussed in the *World Economic Outlook*. Please consult the *IMF Publications Catalog* for a complete listing of currently available World Economic and Financial Surveys.

World Economic Outlook: A Survey by the Staff of the International Monetary Fund

The *World Economic Outlook*, published twice a year in English, French, Spanish, and Arabic, presents IMF staff economists' analyses of global economic developments during the near and medium term. Chapters give an overview of the world economy; consider issues affecting industrial countries, developing countries, and economies in transition to the market; and address topics of pressing current interest.

International Capital Markets: Developments, Prospects, and Key Policy Issues

by an IMF staff team led by David Folkerts-Landau with Donald J. Mathieson and Garry J. Schinasi

This year's capital markets report provides a comprehensive survey of recent developments and trends in the mature and emerging capital markets, including equities, bonds, foreign exchange, and derivatives, and banking systems. It focuses on the implications of European Economic and Monetary Union (EMU) for financial markets and the management of external liabilities of emerging market countries.

Issues in International Exchange and Payments Systems

by a staff team from the IMF's Monetary and Exchange Affairs Department

The global trend toward liberalization in countries' international exchange and payments systems has been widespread in both industrial and developing countries and most dramatic in Central and Eastern Europe. Countries in general have brought their exchange systems more in line with market principles and moved toward more flexible exchange rate arrangements in recent years.
