

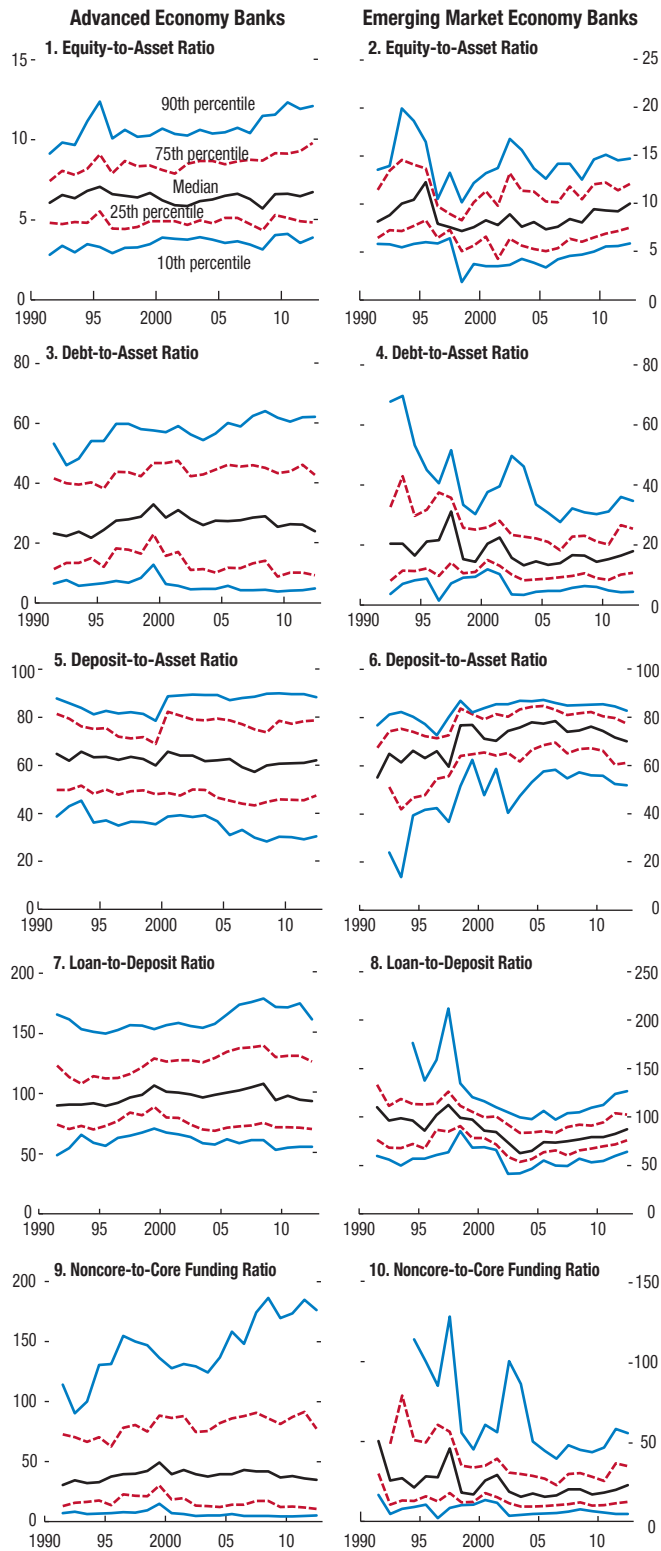

Figure 3.4. Evolution of Bank Funding Structures, Advanced and Emerging Market Economies
(Percent)

Sources: Bloomberg, L.P.; and IMF staff estimates.

Note: Figures show the median (black line), interquartile range (red dashed lines), and upper and lower decile (blue solid lines) of the distribution of the share of equity, debt, and deposits as percentages of total assets and the loan-to-deposit and noncore-to-core funding ratios (in percent). The latter ratio is defined as debt to equity and deposits.
