

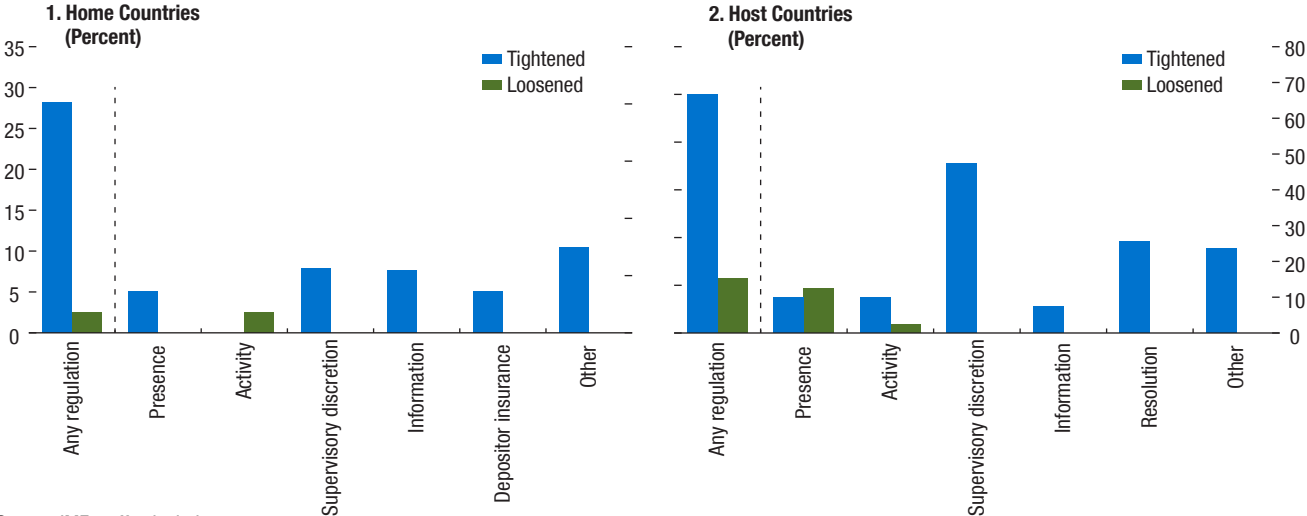

Figure 2.8. Share of Countries that Changed Regulations on International Banking Operations between 2006 and 2014

Source: IMF staff calculations.

Note: Shares are calculated from the results of a survey about regulations on banks' international operations. The "any regulation" bar represents the share of countries that changed any regulation related to banks' international operations during 2006–14. The other bars correspond to the shares of countries that have changed any corresponding type of regulation.
