

# The Global Context and Regional Outlook for Latin America and the Caribbean

**Anoop Singh**

Director

Western Hemisphere Department  
International Monetary Fund

*LACEA Annual Meetings  
Mexico City—November 2, 2006*

# Outline

1. Global and US Outlook
2. Latin America and the Caribbean (LAC)
  - A. Outlook and Policy Stance
  - B. External Risks to the Regional Outlook
3. Policy Challenges Facing LAC
4. The Evolving Role of the Fund

# Outline

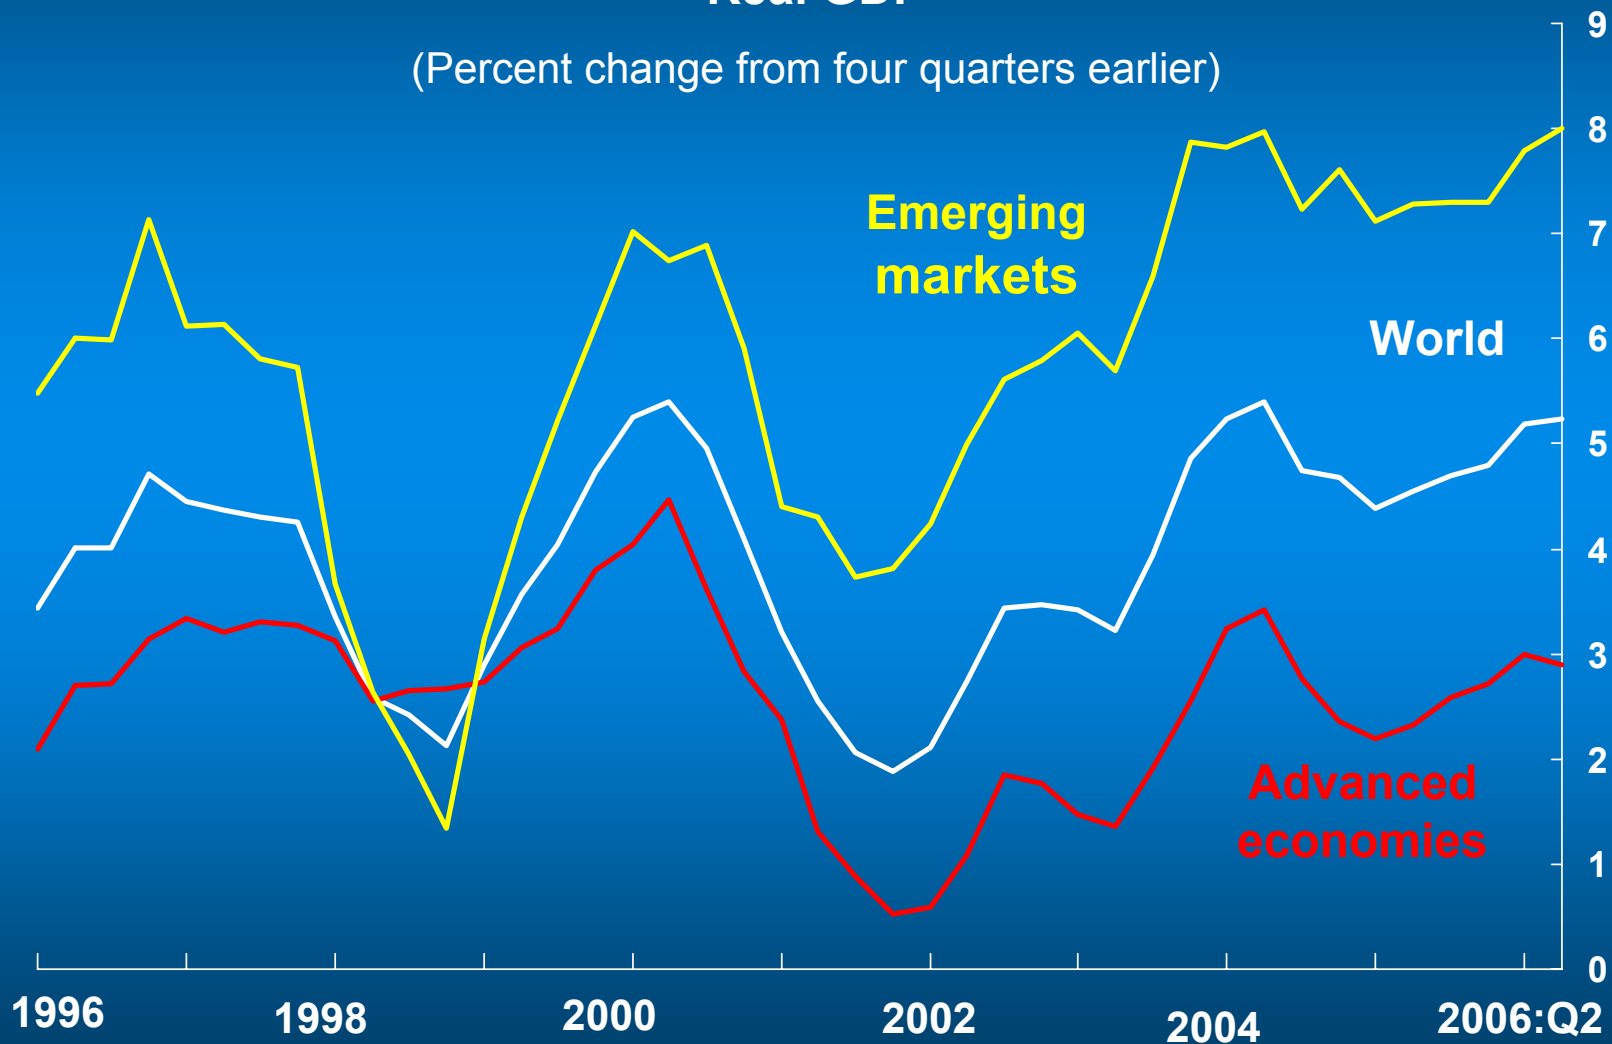

1. **Global and US Outlook**
2. **Latin America and the Caribbean (LAC)**
  - A. Outlook and Policy Stance
  - B. External Risks to the Regional Outlook
3. **Policy Challenges Facing LAC**
4. **The Evolving Role of the Fund**

# Global growth is running above 5 percent...

## Real GDP

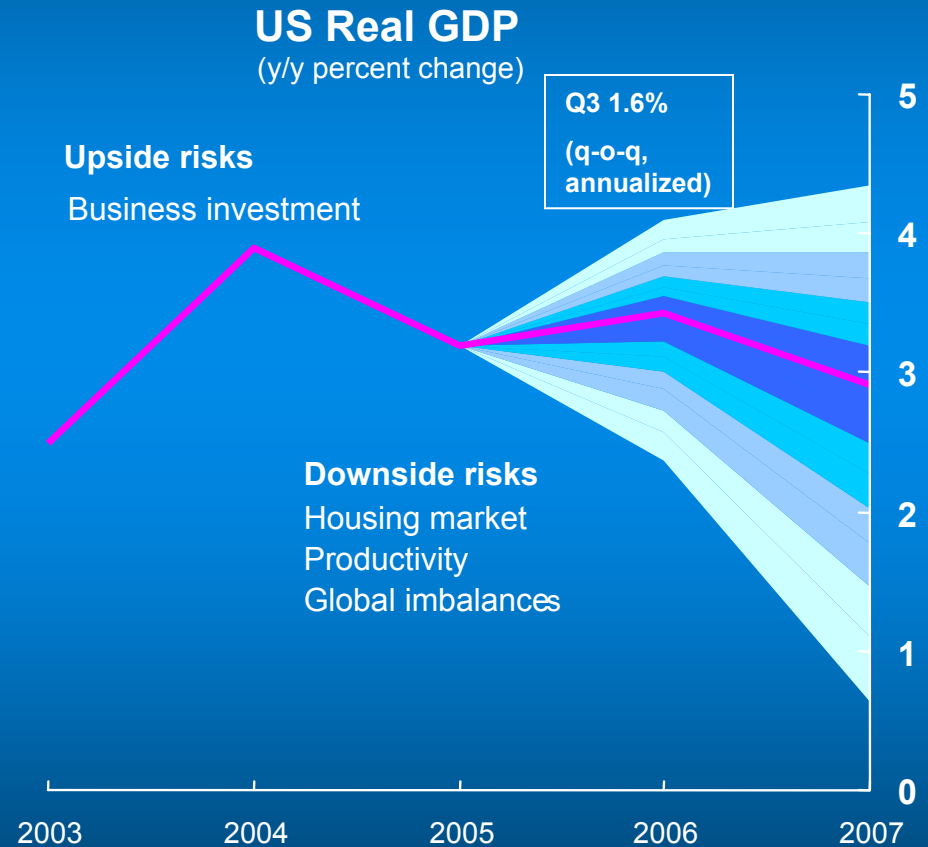

(Percent change from four quarters earlier)

...but the balance of risks is increasingly slanted to the downside

# The sources of global growth are widening, but remain dependent on the United States (and China)

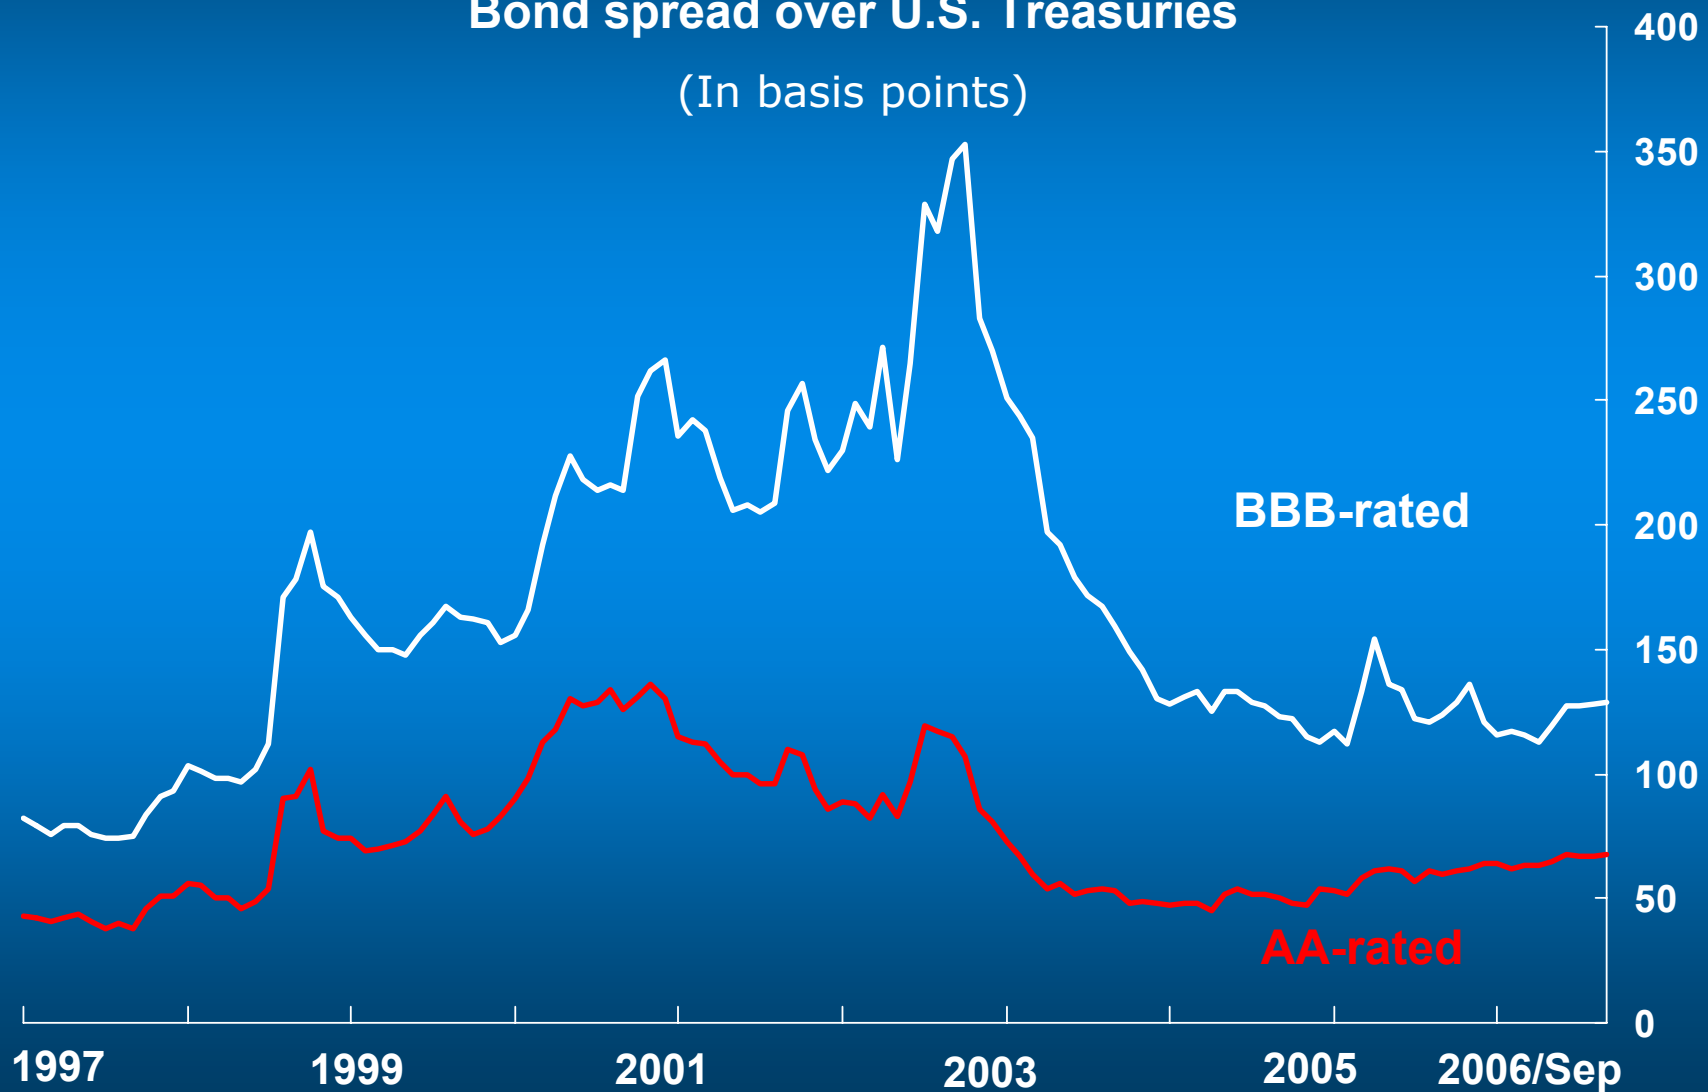

# Productivity growth remains close to its high 10-year average and corporate profits are at a record high...

# ...while corporate risk spreads remain low

## Bond spread over U.S. Treasuries

(In basis points)

# Although unit labor costs have been rising, inflation expectations remain well contained

1997

1999

2001

2003

2005

The flattening yield curve does not necessarily herald a recession, as real rates remain low...

...but the risk of a "substantial correction" in housing markets could weigh on activity...

...in part by slowing wealth appreciation, which may dampen consumption

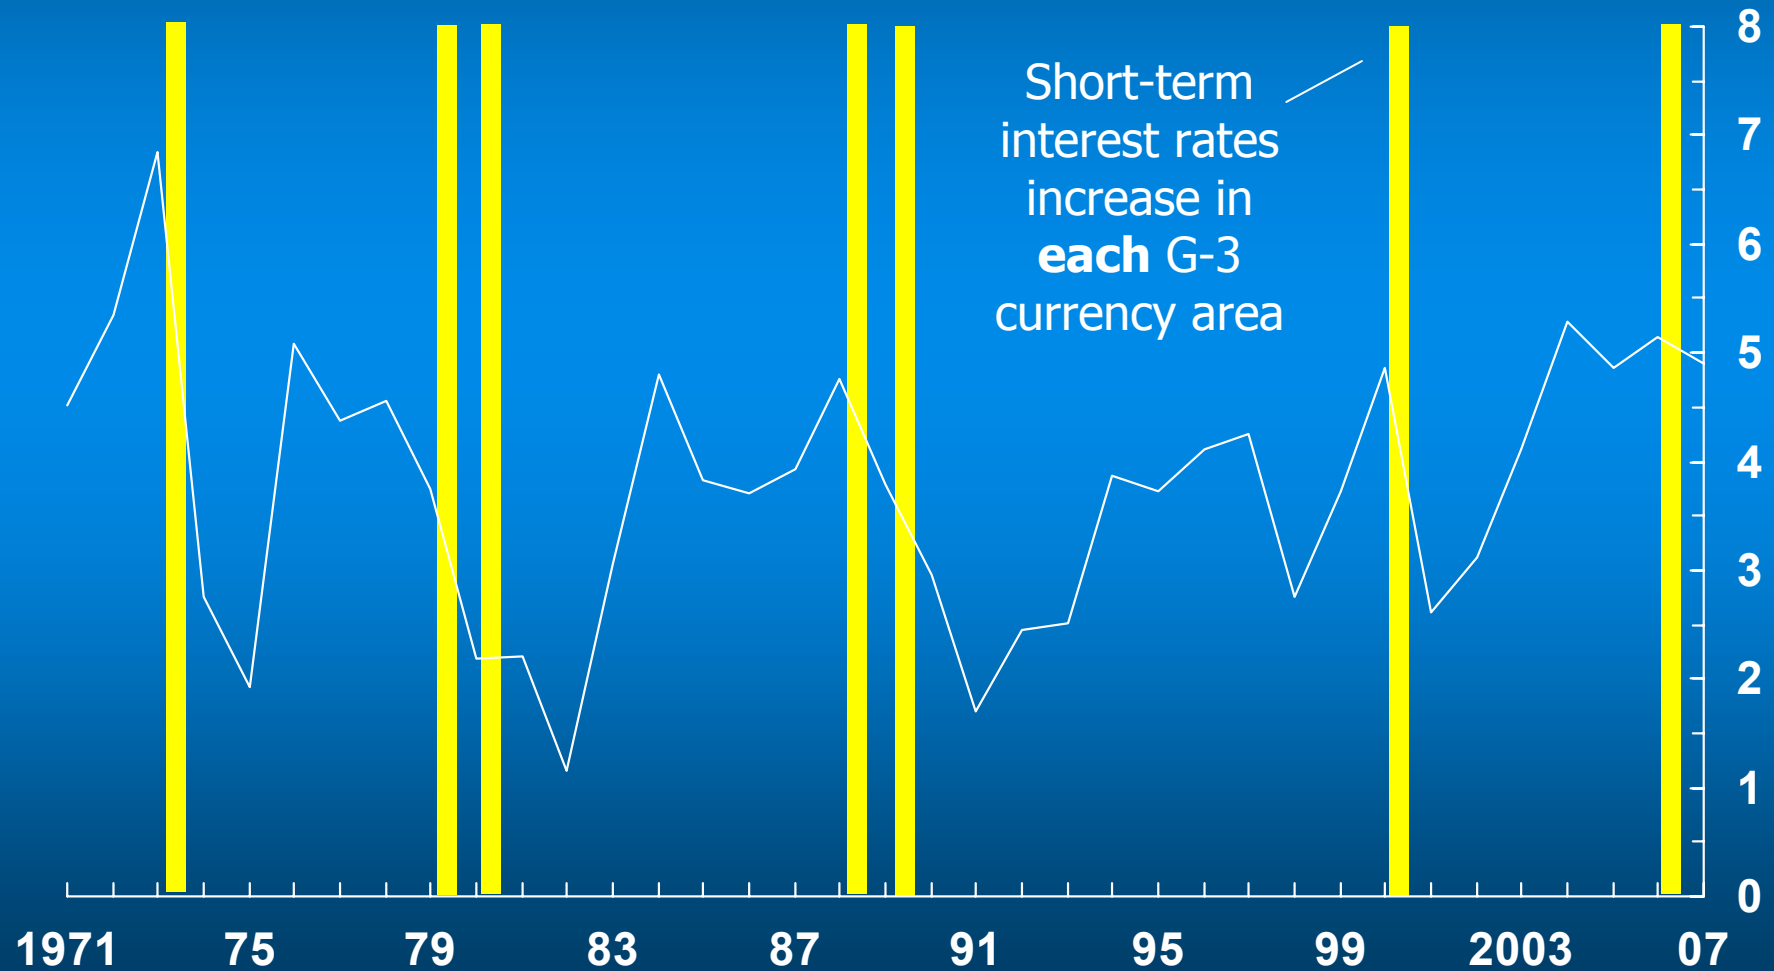

# Risks to the Global Outlook

- Impact of global monetary tightening
- High and volatile oil prices
- Global imbalances

# Synchronized tightening by the major central banks has usually been followed by a global slowdown

**World real GDP**  
(Annual percent change)

# Crude oil prices have fallen but remain high and volatile

**Spot and Future Prices**  
(US dollars a barrel)

# Global imbalances remain a pressing policy challenge

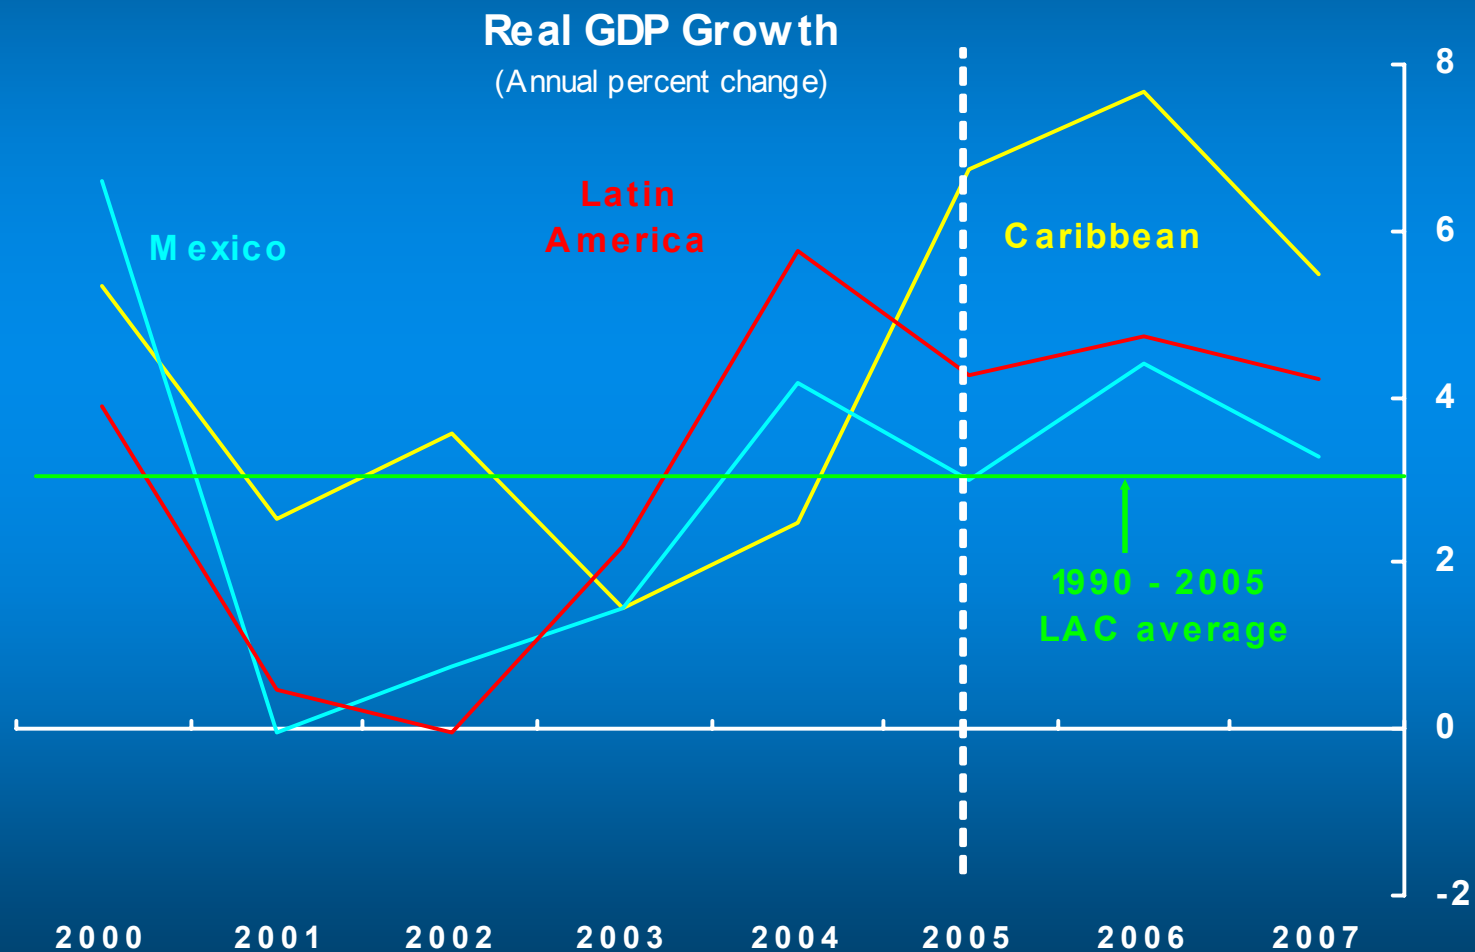

# Outline

1. Global and US Outlook
2. Latin America and the Caribbean (LAC)
  - A. Outlook and Policy Stance
  - B. External Risks to the Regional Outlook
3. Policy Challenges Facing LAC
4. The Evolving Role of the Fund

# Growth in LAC remains strong, although it is expected to moderate in 2007

Inflation has generally remained subdued (with exceptions) and is projected to decline further

# The recovery has contributed to falling unemployment rates

# Financial markets have largely recovered from the spring turbulence and spreads are back close to historical lows

## Equity Market Developments

(December, 2005 = 100)

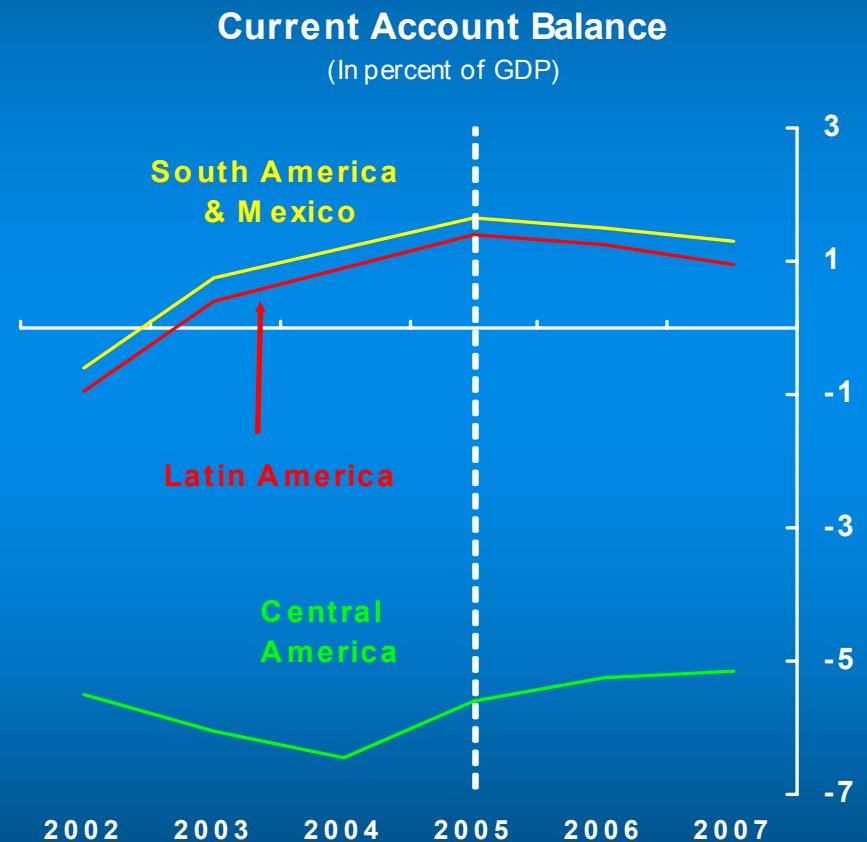

## Emerging market sovereign spreads

(Basis points)

# Strong global demand for commodities has supported the regional expansion and improved current accounts...

# ...but the benefits of commodity price increases have been unequally distributed across countries

## Impact of Commodity Price Movements on Trade Balances

(In percent of 2006 GDP)

# High remittances have bolstered living standards and current account positions

Remittances, 2001-03, 2004-06  
(%of GDP, average)

## Compared to previous recoveries, this expansion is generally solid

- Balanced contributions from external and domestic demand
- Higher reserves and exchange rate flexibility
- Improved monetary institutions
- Primary fiscal surpluses

# Domestic demand is playing an increasingly important role for the recovery

## Contributions to Growth

(In percent, per annum)

■ Consumption   ■ Investment   ■ Net Exports

2002-05

2006-07

# Reserves have increased and exchange rates have strengthened without harming competitiveness

### Exchange Rates and Reserves

### Average Export Share

# Monetary policy institutions have improved, allowing for lower inflation

(includes: Brazil, Chile, Colombia, Mexico, and Peru)

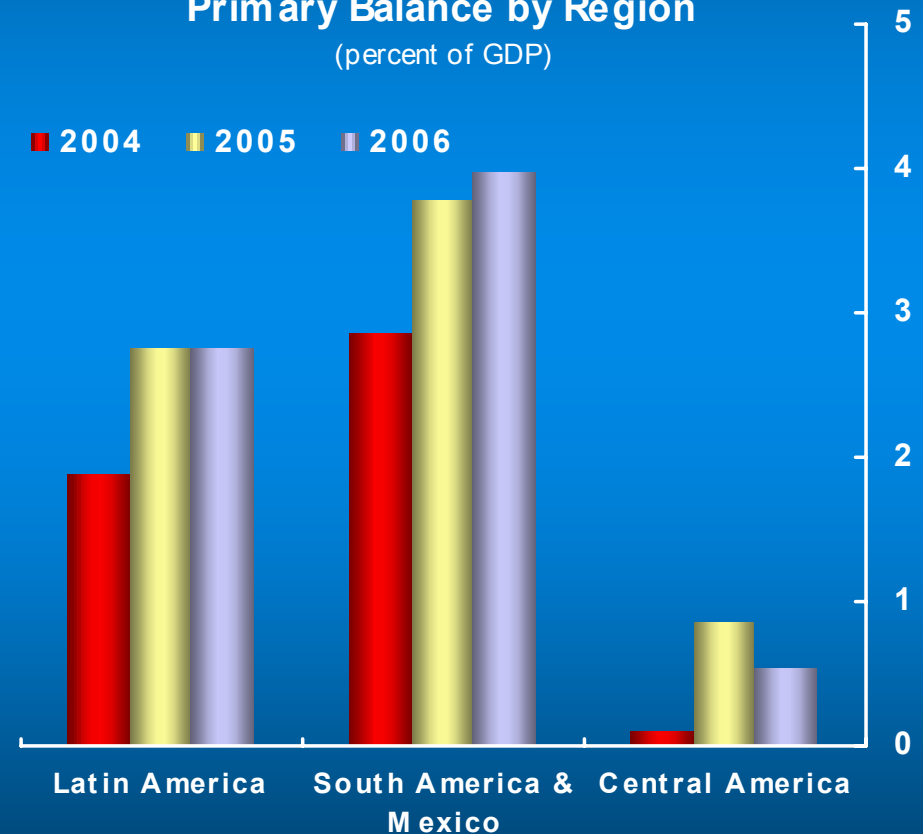

# Higher revenues have strengthened fiscal positions across the region (but with high cyclical components)

**Total Revenues and Primary spending**  
(percent of GDP)

**Primary Balance by Region**  
(percent of GDP)

# Outline

1. Global and US Outlook
2. Latin America and the Caribbean (LAC)
  - A. Outlook and Policy Stance
  - B. External Risks to the Regional Outlook
3. Policy Challenges Facing LAC
4. The Evolving Role of the Fund

# A sharper-than-expected slowdown in the U.S. could significantly affect demand for the region's exports

**Real GDP Growth**  
(Annual %change)

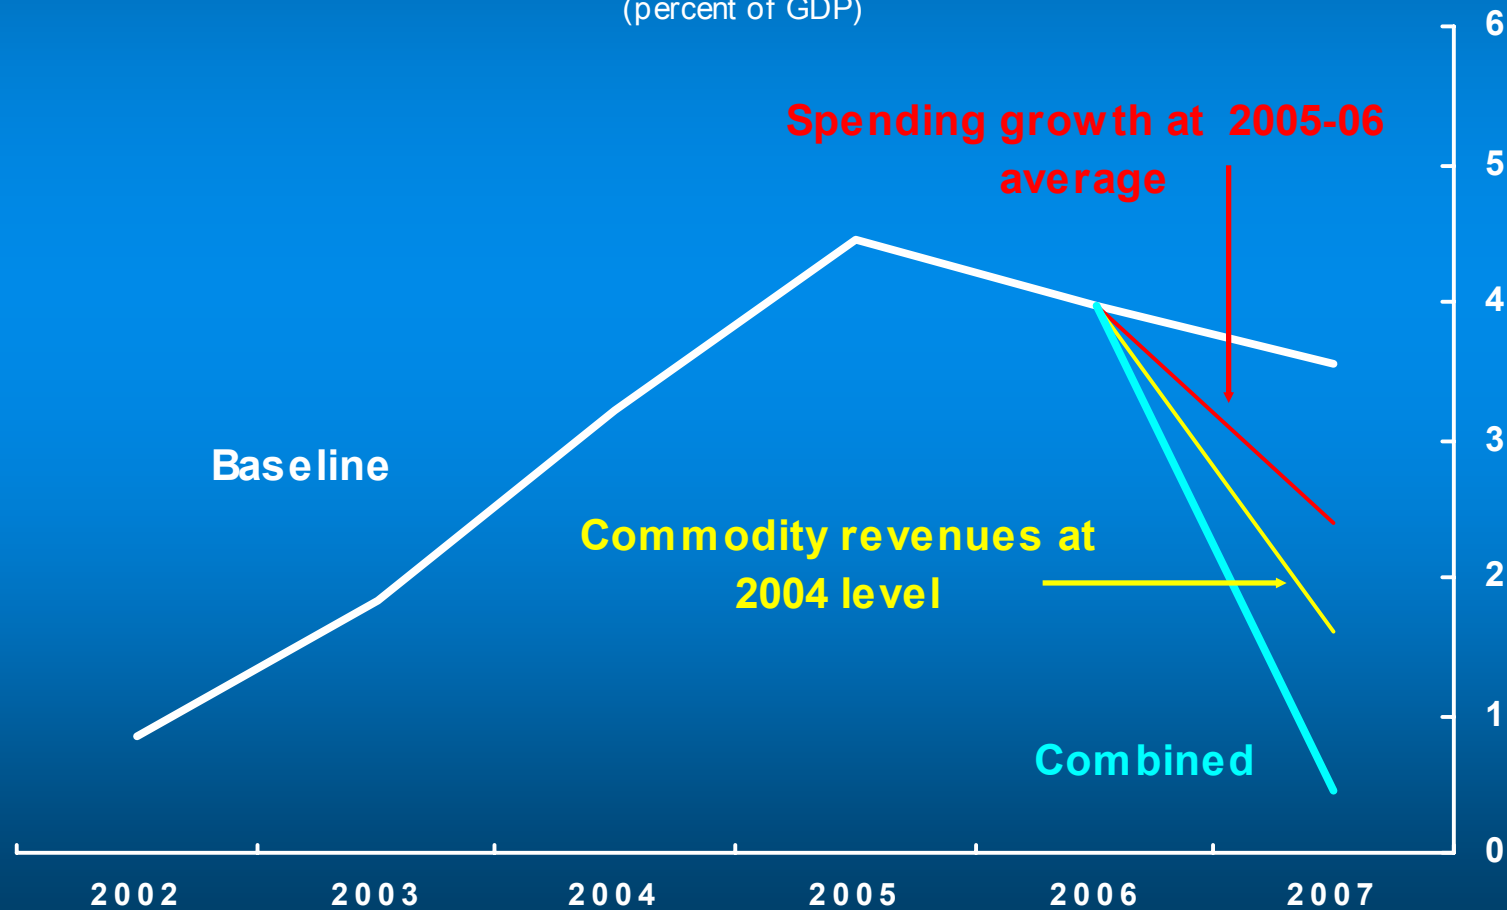

**Latin America: Exports to the United States**  
(In % of total exports from Latin American countries to the world)

# Primary fiscal surpluses would be halved by falling commodity prices

**Stress Tests of Fiscal Balances**  
(percent of GDP)

## Some countries face trade pressures

- **Caribbean:** erosion of preferential access for sugar and banana exports in EU markets
- **Central America:** competitive pressure in textiles following the phasing out of MFA quotas
- **Andean Region:** expiration of trade preferences under the ATPDEA

Share of Total Exports Affected by Expiration of ATPDEA Trade Preferences  
(In percent)

# Outline

1. Global and US Outlook
2. Latin America and the Caribbean (LAC)
  - A. Outlook and Policy Stance
  - B. External Risks to the Outlook
3. **Policy Challenges facing LAC**
4. The Evolving Role of the Fund

# The overriding challenge in Latin America today is to raise investment and productivity on a sustained basis

Even during the ongoing expansion, growth and investment in Latin America lags other regions

Real GDP per capita growth and real Investment to GDP, 2003 - 2006  
(In percent)

## Addressing this challenge requires policies that entrench and extend recent achievements

- Entrenching macroeconomic stability
- Improving equity and reducing poverty
- Removing structural impediments to growth

### Basic Message

There are strong complementarities between the policies that can achieve these objectives

To reduce risk premia and raise investment, the region needs to entrench its recent macroeconomic stability

*This requires:*

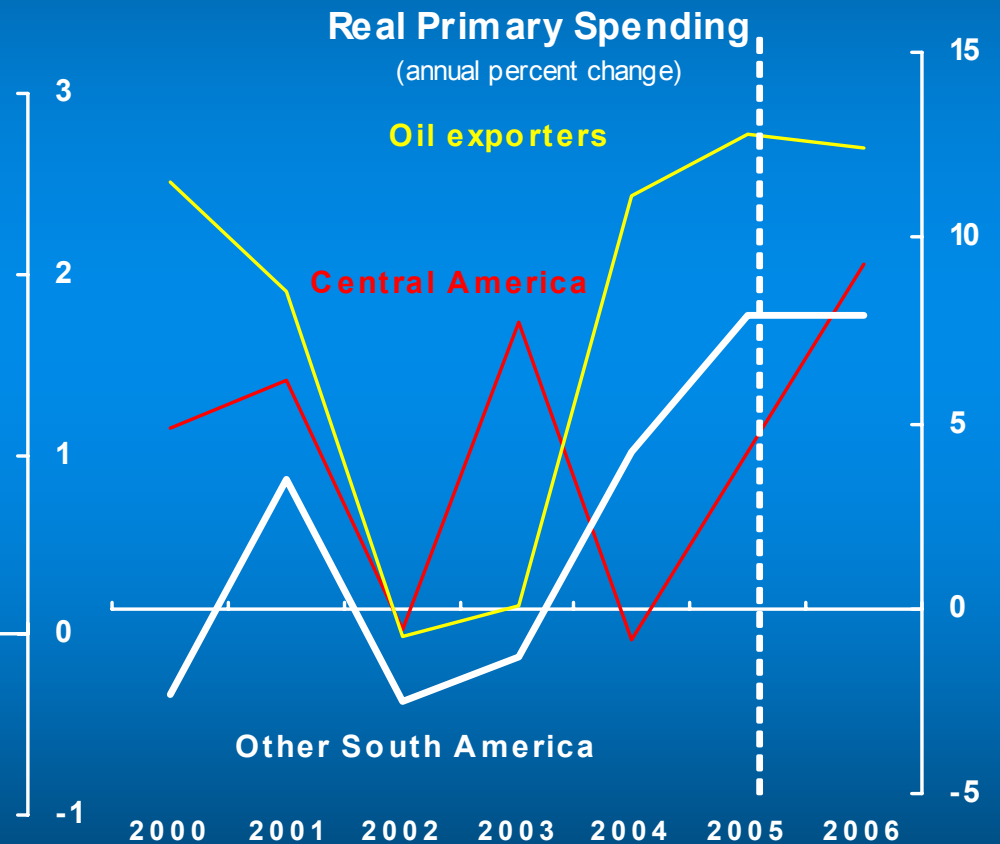

- Further lowering public debt
- Containing and better targeting public expenditures
- Making budgets less rigid
- Expanding revenue bases
- Deepening the credibility of monetary policy institutions and further financial sector reforms
- Monitoring rapid credit growth

# While public debt is projected to decline, it remains generally high

# However, primary expenditure growth has accelerated...

**Fiscal Policy Stance, 2002-04, 2004-06**  
(change in percent of GDP between indicated years)

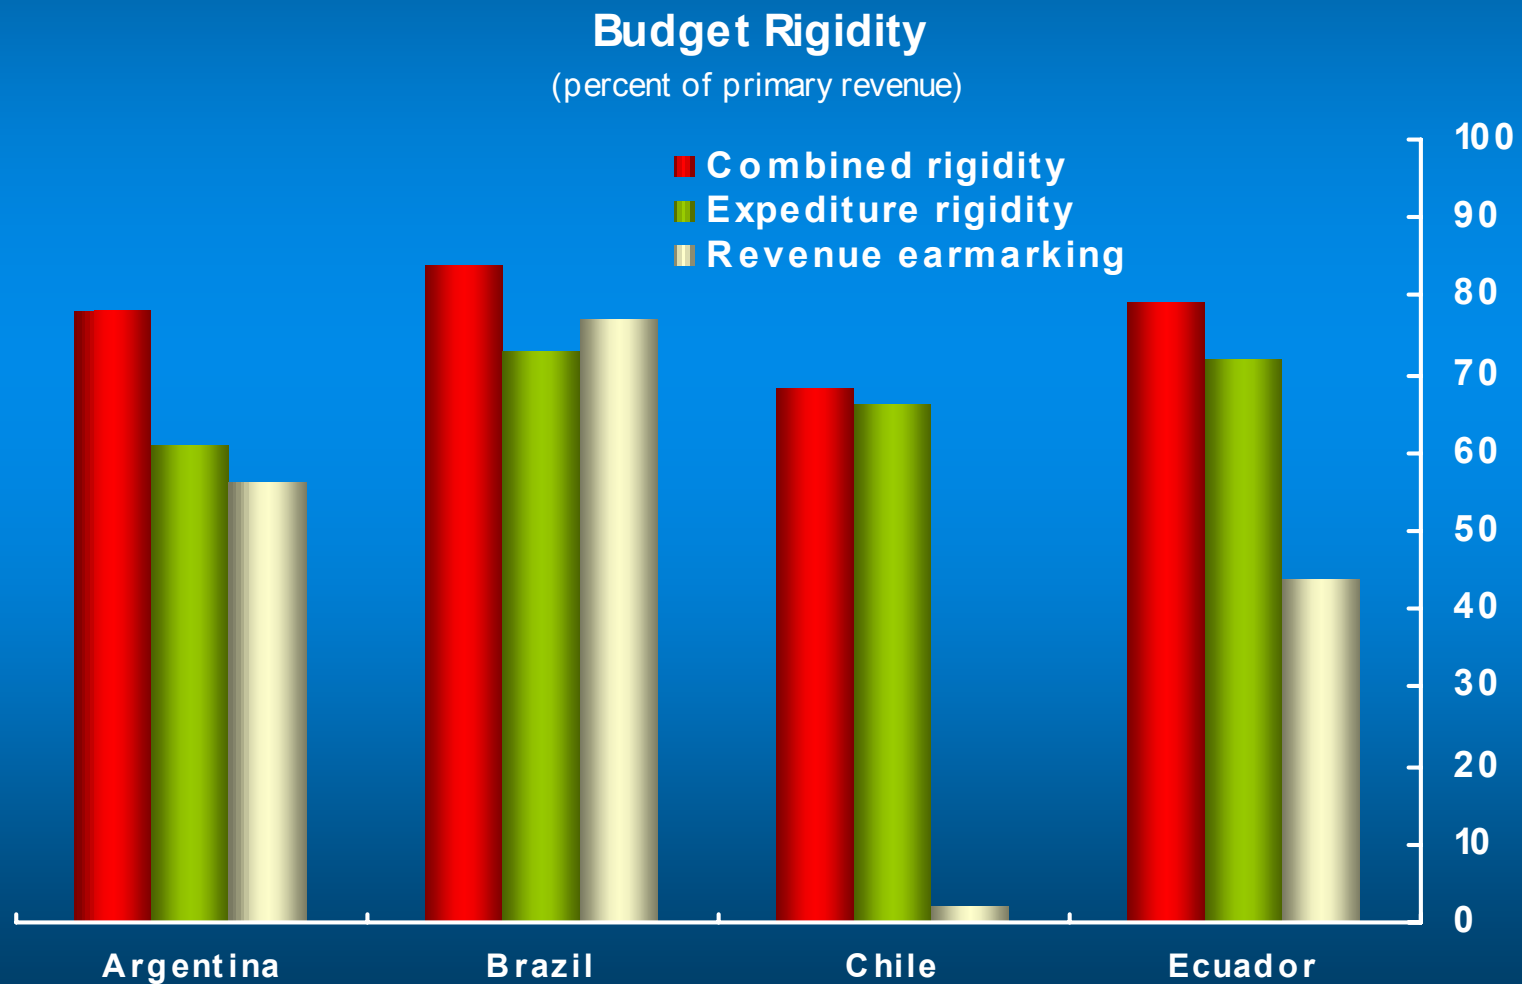

...as the underlying fiscal stance in many countries is turning expansionary

# More flexible budgets would allow fiscal policy to better respond to shocks and improve spending efficiency

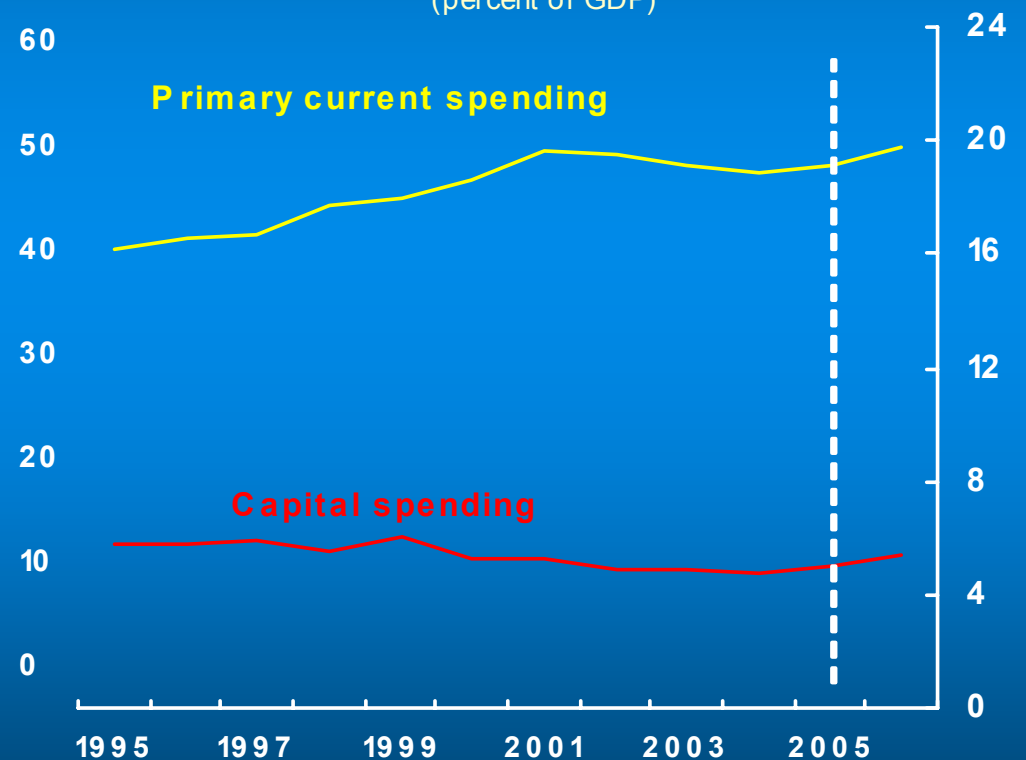

# Broader tax bases and higher revenues could create room for more public investment

**Public Sector Revenues, 2006**  
(percent of GDP)

**Primary Current and Capital Spending**  
(percent of GDP)

# Strong monetary and financial sector institutions help achieve low and stable real interest rates

Short-Term Real Interest Rates  
(in percent)

Net interest margins of the banking sector  
(in percent)

# The rapid expansion of domestic credit (from a low base) will require continued close monitoring

Household Debt and Credit Growth in 2005  
(Annual percent change)

# Reducing inequality would have positive effects on growth and macroeconomic stability...

## There are policy levers to promote equity

- Tax reform
- Reallocation of government expenditures
- Reduction of budget rigidities
- Reforms of labor markets, government services, and credit markets

...but entrenching macroeconomic stability would also have a salutary effect on equity

# While some obstacles to growth are country-specific, Latin American countries suffer from common problems

## Global Competitiveness

(Percentile rank)

## Cost of Doing Business

(Percentile rank)

# Outline

1. Global and US Outlook
2. Latin America and the Caribbean (LAC)
  - A. Outlook and Policy Stance
  - B. External Risks to the Outlook
3. Policy Challenges Facing LAC
4. **The Evolving Role of the Fund**

## The Fund's role in the LAC region is evolving

- The need for direct financial support to the region has diminished
- The focus of the Fund involvement is shifting in response to country needs
- The Fund is currently reshaping its role
  - Improved country and global surveillance
  - Improved lending instruments
  - Improved governance
