Global growth is forecast to regain some momentum during the second half of 2011. Real GDP growth in the advanced economies is expected to gradually return to about 2 percent. Activity in emerging and developing economies is expected to decelerate in the face of capacity constraints and tightening policies, settling at a still high rate of about 6 percent in 2012. Growth is expected to remain very elevated in emerging Asia, notably in China and India, followed by sub-Saharan Africa.
